

Amplify Etho Climate Leadership U.S. ETF (formerly Etho Climate Leadership U.S. ETF)

NYSE Arca — ETHO

Before you invest, you may want to review the Fund's prospectus, which contains more information about the Fund and its risks. You can find the Fund's prospectus and other information about the Fund, including the statement of additional information and most recent reports to shareholders, online at www.amplifyetfs.com. You can also get this information at no cost by calling 1-855-267-3837 or by sending an e-mail request to info@amplifyetfs.com. The Fund's prospectus and statement of additional information, both dated January 26, 2024, are incorporated by reference into this summary prospectus.

Notification of electronic delivery of shareholder materials

As permitted by regulations adopted by the U.S. Securities and Exchange Commission ("SEC"), paper copies of the Fund's shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the Fund's reports from your financial intermediary, such as a broker-dealer or bank. Instead, the reports will be made available on a website, and you will be notified by mail each time a report is posted and provided with a website link to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. Please contact your financial intermediary to elect to receive shareholder reports and other Fund communications electronically.

You may elect to receive all future reports in paper free of charge. Please contact your financial intermediary to inform them that you wish to continue receiving paper copies of shareholder reports and for details about whether your election to receive reports in paper will apply to all funds held with your financial intermediary.

INVESTMENT OBJECTIVE

The Amplify Etho Climate Leadership U.S. ETF seeks investment results that generally correlate (before fees and expenses) to the total return performance of the Etho Climate Leadership Index — US (the "Index").

FUND FEES AND EXPENSES

This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund ("Shares"). **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below.**

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.45%
Distribution and Service (12b-1) Fees	0.00%
Other Expenses	0.00%
Total Annual Fund Operating Expenses	0.45%

EXAMPLE

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. This example assumes that you invest \$10,000 in the Fund for the time periods

indicated and then sell all of your Shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain at current levels. This example does not include the brokerage commissions that investors may pay to buy and sell Shares. Although your actual costs may be higher or lower, your costs, based on these assumptions, would be:

1 YEAR	3 YEARS	5 YEARS	10 YEARS
\$46	\$144	\$252	\$567

PORTFOLIO TURNOVER

The Fund pays transaction costs, such as commissions, when it purchases and sells securities (or "turns over" its portfolio). A higher portfolio turnover will cause the Fund to incur additional transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in Total Annual Fund Operating Expenses or in the example, may affect the Fund's performance. During the fiscal year ended September 30, 2023, the portfolio turnover rate of the Predecessor Fund (as defined below) was 50% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund uses a “passive” or indexing approach to try to achieve the Fund’s investment objective. Unlike many investment companies, the Fund does not try to “beat” the Index and does not seek temporary defensive positions when markets decline or appear overvalued.

The Etho Climate Leadership Index — US

The Index tracks the performance of the equity securities of a diversified set of U.S. companies that are leaders in their industry with respect to their carbon impact. “Carbon impact” is calculated based on the total greenhouse gas (“GHG”) emissions from a company’s operations, fuel use, supply chain and business activities, divided by the company’s market capitalization. The Index primarily includes each company with a carbon impact at least 50% better (*i.e.*, lower) than the average carbon impact for a given company’s industry (“Carbon Leaders”). The Index generally excludes companies in industries or sub-industries or specific companies that are broadly associated with negative environmental, social, or corporate governance (“ESG”) profiles, as described below. Etho Capital, LLC (“Etho Capital” or the “Index Provider”) created the Index to seek to identify a diverse portfolio of companies with a carbon impact at least 50% better than commonly used broad-based securities indices. The Fund will invest at least 80% of its total assets in the component securities of the Index. As a result, under normal circumstances, the Fund will invest at least 80% of its total assets in U.S. companies that are leaders in their industry with respect to their carbon impact.

Construction of the Index begins with the universe of U.S. companies with a minimum market capitalization of \$100 million. “U.S. companies” are defined as companies whose equity securities are principally listed and traded on a U.S. securities exchange and who either have their headquarters located in the U.S. or who derive at least 30% of their revenues from sales in the U.S. The carbon impact of each such company and its industry average is calculated by the Index Provider based on proprietary and third-party data. The universe of U.S.-listed companies is then screened by the Index Provider to include only companies that are Carbon Leaders.

The Index universe is further screened to generally exclude (i) all companies in the fossil fuel energy sector, (ii) all companies in the tobacco industry, the aerospace and defense industry that produce weapons, and (iii) all companies in the gambling, gold and silver sub-industries. Additionally, the Index excludes certain companies generally considered by certain non-governmental organizations (“NGOs”) as having a negative environmental sustainability impact (*e.g.*, due to deforestation activities) and includes certain companies identified by the Index Provider whose products produce sufficient downstream sustainability benefits to outweigh the companies’ exclusion based on the above criteria (*e.g.*, solar panel manufacturers).

The Index is reconstituted annually in April. At the time of each reconstitution, the companies in the Index are equal weighted.

The Index is not limited to a minimum or maximum number of constituents; rather, it includes all companies meeting the eligibility criteria for inclusion in the Index. The Index may include companies of any market capitalization, including small capitalization companies, subject to the previously referenced minimum market capitalization of \$100 million. The Index Provider anticipates that the Index will generally include between 250 and 450 companies. As of December 31, 2023, the Index included the securities of 257 companies.

The Fund’s Principal Investment Strategies

The Fund uses a replication strategy. A replication strategy is an indexing strategy that involves investing in the securities of the Index in approximately the same proportions as in the Index. However, the Fund may utilize a representative sampling strategy with respect to the Index when a replication strategy might be detrimental to shareholders, such as when there are practical difficulties or substantial costs involved in compiling a portfolio of equity securities to follow the Index, in instances in which a security in the Index becomes temporarily illiquid, unavailable or less liquid, or as a result of legal restrictions or limitations (such as tax diversification requirements) that apply to the Fund but not the Index.

The Fund will invest at least 80% of its total assets in the component securities of the Index. As a result, under normal circumstances, the Fund will invest at least 80% of its total assets in U.S. companies that are leaders in their industry with respect to their carbon impact (the “80% Policy”).

The Fund rebalances its portfolio in accordance with its Index, and, therefore, any changes to the Index’s rebalance schedule will result in corresponding changes to the Fund’s rebalance schedule.

The Index was initially created by the Index Provider. The Index Provider is not affiliated with the Fund, Amplify Investments LLC (the “Adviser”) or Toroso Investments, LLC (the “Sub-Adviser”). The Index Provider does not make investment decisions, provide investment advice, or otherwise act in the capacity of an investment adviser to the Fund. The Index is calculated and maintained by Solactive AG, which is not affiliated with the Fund, the Adviser, the Sub-Adviser, or the Index Provider

Concentration Policy. The Fund will not concentrate its investments (*i.e.*, invest more than 25% of the value of its total assets) in securities of issuers in any industry or group of industries, except to the extent the Index is concentrated in an industry or a group of industries.

Diversification Status. The Fund is classified as “diversified” under the Investment Company Act of 1940, as amended (the “1940 Act”).

PRINCIPAL RISKS OF INVESTING IN THE FUND

You could lose money by investing in the Fund. An investment in the Fund is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency. There can be no assurance that the Fund's investment objective will be achieved. The principal risks are presented in alphabetical order to facilitate finding particular risks and comparing them with other funds. Each risk summarized below is considered a "principal risk" of investing in the Fund, regardless of the order in which it appears.

Concentration Risk. The Fund's investments will be concentrated in an industry or group of industries to the extent the Index is so concentrated. To the extent the Fund invests more heavily in particular industries, groups of industries, or sectors of the economy, its performance will be especially sensitive to developments that significantly affect those industries, groups of industries, or sectors of the economy, and the value of Fund shares may rise and fall more than the value of shares that invest in securities of companies in a broader range of industries or sectors.

Equity Market Risk. The equity securities held in the Fund's portfolio may experience sudden, unpredictable drops in value or long periods of decline in value. This may occur because of factors that affect securities markets generally or factors affecting specific issuers, industries, or sectors in which the Fund invests such as political, market and economic developments, as well as events that impact specific issuers. Additionally, natural or environmental disasters, widespread disease or other public health issues, war, acts of terrorism or other events could result in increased premiums or discounts to the Fund's NAV.

ESG Risk. Because the Fund generally does not invest in (i) companies in the energy sector, (ii) companies in the tobacco, aerospace and defense industries, and (iii) companies in the gambling, gold and silver sub-industries, the Fund may underperform the broader equity market to the extent that such companies have above-average performance.

ETF Risks.

Absence of an Active Market. Although the Fund's shares are approved for listing on the NYSE Arca, Inc. (the "Exchange"), there can be no assurance that an active trading market will develop and be maintained for Fund shares. There can be no assurance that the Fund will grow to or maintain an economically viable size, in which case the Fund may experience greater tracking error to its Index than it otherwise would at higher asset levels or the Fund may ultimately liquidate.

Authorized Participants ("APs"), Market Makers, and Liquidity Providers Concentration: The Fund has a limited number of financial institutions that may act as APs. In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Shares may trade at a

material discount to net asset value ("NAV") and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.

Costs of Buying or Selling Shares: Investors buying or selling Fund shares in the secondary market will pay brokerage commissions or other charges imposed by brokers as determined by that broker. Brokerage commissions are often a fixed amount and may be a significant proportional cost for investors seeking to buy or sell relatively small amounts of shares.

Fluctuation of NAV: The NAV of Fund shares will generally fluctuate with changes in the market value of the Fund's securities holdings. The market prices of shares will generally fluctuate in accordance with changes in the Fund's NAV and supply and demand of shares on the Exchange. It cannot be predicted whether Fund shares will trade below, at or above their NAV. During periods of unusual volatility or market disruptions, market prices of Fund shares may deviate significantly from the market value of the Fund's securities holdings or the NAV of Fund shares. As a result, investors in the Fund may pay significantly more or receive significantly less for Fund shares than the value of the Fund's underlying securities or the NAV of Fund shares.

Market Trading: An investment in the Fund faces numerous market trading risks, including the potential lack of an active market for Fund shares, losses from trading in secondary markets, periods of high volatility and disruption in the creation/redemption process of the Fund. Any of these factors, among others, may lead to the Fund's shares trading at a premium or discount to NAV.

Trading Issues: Although Fund shares are listed for trading on the Exchange, there can be no assurance that an active trading market for such shares will develop or be maintained. Trading in Fund shares may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in shares inadvisable. There can be no assurance that the requirements of the Exchange necessary to maintain the listing of any Fund will continue to be met or will remain unchanged or that the shares will trade with any volume, or at all. Further, secondary markets may be subject to erratic trading activity, wide bid/ask spreads and extended trade settlement periods in times of market stress because market makers and APs may step away from making a market in Fund shares and in executing creation and redemption orders, which could cause a material deviation in the Fund's market price from its NAV.

Index Provider Risk. The Fund seeks to achieve returns that generally correlate, before fees and expenses, to the performance of the Index, as published by their Index Provider. There is

no assurance that the Index Provider will compile the Index accurately, or that the Index will be determined, composed or calculated accurately. The composition of the Index is heavily dependent on information and data supplied by third parties over which the Adviser has no or limited ability to oversee. While the Index Provider gives descriptions of what the Index is designed to achieve, the Index Provider does not provide any warranty or accept any liability in relation to the quality, accuracy or completeness of data in its indices, and it does not guarantee that its Index will be in line with its methodology. Because of this, if the composition of the Index reflects any errors, the Fund's portfolio can be expected to also reflect the errors.

Natural Disaster/Epidemic Risk: Natural or environmental disasters, such as earthquakes, fires, floods, hurricanes, tsunamis and other severe weather-related phenomena generally, and widespread disease, including pandemics and epidemics, have been and may be highly disruptive to economies and markets, adversely impacting individual companies, sectors, industries, markets, currencies, interest and inflation rates, credit ratings, investor sentiment, and other factors affecting the value of the Fund's investments. Given the increasing interdependence among global economies and markets, conditions in one country, market, or region are increasingly likely to adversely affect markets, issuers, and/or foreign exchange rates in other countries, including the U.S. Any such events could have a significant adverse impact on the value of the Fund's investments.

Passive Investment Risk: The Fund is not actively managed and therefore would not sell an equity security due to current or projected underperformance of a security, industry or sector, unless that security is removed from the Index. Unlike with an actively managed fund, the Fund's investment adviser does not use techniques or defensive strategies designed to lessen the effects of market volatility or to reduce the impact of periods of market decline. This means that, based on market and economic conditions, the Fund's performance could be lower than other types of funds that may actively shift their portfolio assets to take advantage of market opportunities or to lessen the impact of a market decline.

Security Issuer Risk. Issuer-specific attributes may cause a security held by the Fund to be more volatile than the market generally. The value of an individual security or particular type of security may be more volatile than the market as a whole and may perform differently from the value of the market as a whole.

Smaller Companies Risk. The Fund's Index may be composed primarily of, or have significant exposure to, securities of smaller companies. Smaller companies may be more vulnerable to adverse business or economic events than larger, more established companies, and may underperform other segments of the market or the equity market as a whole. The securities of smaller companies also are often traded in the over-the-counter market and tend to be bought and sold less frequently and at significantly lower trading volumes than the securities of larger companies. As a result, it may be more difficult for the Fund to buy or sell a significant amount of the securities of a smaller company without

an adverse impact on the price of the company's securities, or the Fund may have to sell such securities in smaller quantities over a longer period of time, which may increase the Fund's tracking error.

Tracking Error Risk: The Fund's return may not match or achieve a high degree of correlation with the return of the Index. To the extent the Fund utilizes a sampling approach, it may experience tracking error to a greater extent than if the Fund sought to replicate the Index. In addition, in order to minimize the market impact of an Index rebalance, the Fund may begin trading to effect the rebalance in advance of the effective date of the rebalance and continue trading after the effective date of the rebalance, which may contribute to tracking error.

The Shares will change in value, and you could lose money by investing in the Fund. The Fund may not achieve its investment objective.

PERFORMANCE

The Fund was reorganized on or about January 29, 2024 from the Etho Climate Leadership US ETF (the "Predecessor Fund"), a series of the ETF Managers Trust, a Delaware statutory trust, into Amplify ETF Trust, a Massachusetts business trust. The Fund is a continuation of the Predecessor Fund and, therefore adopts the performance information of the Predecessor Fund (as shown below), which was managed by ETF Managers Group LLC. The Predecessor Fund commenced operations on November 18, 2015.

The following bar chart and table provide some indication of the risks of investing in the Fund by showing changes in the Fund's performance from year to year and by showing how the Fund's average annual returns for certain time periods compare with the average annual returns of the Index. All returns assume reinvestment of dividends and distributions. The Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future. Updated performance information is available at the Fund's website, <https://amplifyetfs.com/> or by calling the Fund at 1-855-267-3837.

During the period of time shown in the bar chart, the Fund's highest return for a calendar quarter was 25.19% (quarter ended June 30, 2020) and the Fund's lowest return for a calendar quarter was -22.85% (quarter ended March 31, 2020).

Average Annual Total Returns (for the period ended December 31, 2023)

Amplify Etho Climate Leadership U.S. ETF	1 Year	5 Years	Since Inception 11/18/2015
Return Before Taxes	14.80%	12.86%	11.48%
Return After Taxes on Distributions	14.34%	12.58%	11.20%
Return After Taxes on Distributions and Sale of Fund Shares	9.03%	10.28%	9.36%
Etho Climate Leadership Index – US (reflects no deduction for fees, expenses or taxes)	14.23%	12.38%	10.93%
S&P 500 Index (reflects no deduction for fees, expenses or taxes)	26.29%	15.69%	12.79%

Returns before taxes do not reflect the effects of any income or capital gains taxes. All after-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of any state or local tax. Returns after taxes on distributions reflect the taxed return on the payment of dividends and capital gains.

Your own actual after-tax returns will depend on your specific tax situation and may differ from what is shown here. After-tax returns are not relevant to investors who hold Shares in tax-deferred accounts such as individual retirement accounts (IRAs) or employee-sponsored retirement plans.

MANAGEMENT OF THE FUND

Investment Adviser. Amplify Investments LLC (“Amplify Investments” or the “Adviser”)

Sub-Adviser. Toroso Investments, LLC (“Toroso” or the “Sub-Adviser”)

Portfolio Managers. The following individuals serve as portfolio managers to the Fund.

- Charles A. Ragauss, CFA, Head of Trading at Toroso
- Qiao Duan, CFA, Portfolio Manager at Toroso

The portfolio managers are primarily and jointly responsible for the day-to-day management of the Fund. The portfolio managers have served as part of the portfolio management team of the Fund since 2024.

PURCHASE AND SALE OF SHARES

The Fund issues and redeems Shares at net asset value (“NAV”) only with authorized participants (“APs”) that have entered into agreements with the Fund’s distributor and only in Creation Units (large blocks of 50,000 Shares) or multiples thereof (“Creation Unit Aggregations”), in exchange for the deposit or delivery of a basket of securities in which the Fund invests and/or cash. Except when aggregated in Creation Units, the Shares are not redeemable securities of the Fund.

Individual Shares may only be bought and sold in the secondary market (i.e., on a national securities exchange) through a broker or dealer at a market price. Because the Shares trade at market prices rather than NAV, Shares may trade at a price greater than NAV (at a premium), at NAV, or less than NAV (at a discount). An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase Shares (bid) and the lowest price a seller is willing to accept for Shares (ask) when buying or selling shares in the secondary market (the “*bid-ask spread*”).

Recent information, including information on the Fund’s NAV, market price, premiums and discounts, and bid-ask spreads, is available online at www.amplifyetfs.com.

TAX INFORMATION

The Fund’s distributions will generally be taxable as ordinary income or capital gains. A sale of Shares may result in capital gain or loss.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase Shares through a broker-dealer or other financial intermediary (such as a bank), the Adviser and Foreside Fund Services, LLC, the Fund’s distributor, may pay the intermediary for the sale of Shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.
