

Amplify CWP Enhanced Dividend Income ETF

NYSE Arca — DIVO

Before you invest, you may want to review the Fund's prospectus, which contains more information about the Fund and its risks. You can find the Fund's prospectus and other information about the Fund, including the statement of additional information and most recent reports to shareholders, online at www.amplifyetfs.com. You can also get this information at no cost by calling 1-855-267-3837 or by sending an e-mail request to info@amplifyetfs.com. The Fund's prospectus and statement of additional information, both dated February 28, 2022, are incorporated by reference into this summary prospectus.

Notification of electronic delivery of shareholder materials

As permitted by regulations adopted by the U.S. Securities and Exchange Commission ("SEC"), paper copies of the Fund's shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the Fund's reports from your financial intermediary, such as a broker-dealer or bank. Instead, the reports will be made available on a website, and you will be notified by mail each time a report is posted and provided with a website link to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. Please contact your financial intermediary to elect to receive shareholder reports and other Fund communications electronically.

You may elect to receive all future reports in paper free of charge. Please contact your financial intermediary to inform them that you wish to continue receiving paper copies of shareholder reports and for details about whether your election to receive reports in paper will apply to all funds held with your financial intermediary.

INVESTMENT OBJECTIVES

The Amplify CWP Enhanced Dividend Income ETF seeks to provide current income as its primary investment objective and to provide capital appreciation as its secondary investment objective.

FUND FEES AND EXPENSES

This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund ("Shares"). **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below.**

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.55%
Distribution and Service (12b-1) Fees	0.00%
Other Expenses	0.00%
Total Annual Fund Operating Expenses	0.55%

EXAMPLE

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds.

This example assumes that you invest \$10,000 in the Fund for the time periods indicated and then sell all of your Shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain at current levels. This example does not include the brokerage commissions that investors may pay to buy and sell Shares. Although your actual costs may be higher or lower, your costs, based on these assumptions, would be:

1 YEAR	3 YEARS	5 YEARS	10 YEARS
\$56	\$176	\$307	\$689

PORTFOLIO TURNOVER

The Fund pays transaction costs, such as commissions, when it purchases and sells securities (or "turns over" its portfolio). A higher portfolio turnover will cause the Fund to incur additional transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in Total Annual Fund Operating Expenses or in the example, may affect the Fund's performance. During the fiscal year ended October 31, 2021, the Fund's portfolio turnover rate was 89% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

Under normal circumstances, the Fund invests at least 80% of its net assets (plus borrowings for investment purposes) in dividend-paying U.S. exchange-traded equity securities (“Equity Securities”) and will opportunistically utilize an “option strategy” consisting of writing (selling) U.S. exchange-traded covered call options on such Equity Securities. Amplify Investments LLC (“Amplify Investments” or the “Adviser”) serves as the investment adviser to the Fund. Capital Wealth Planning, LLC (“CWP” or a “Sub-Adviser”) and Penserra Capital Management LLC (“Penserra” or a “Sub-Adviser”) each serve as investment sub-advisers to the Fund. Penserra is responsible for implementing the Fund’s investment program by, among other things, trading portfolio securities and performing related services, rebalancing the Fund’s portfolio and providing cash management services in accordance with the investment advice formulated by, and model portfolios delivered by, CWP and Amplify Investments. The Sub-Advisers are not affiliated with the Fund or Amplify Investments.

The Fund’s portfolio is strategically designed to offer high levels of total return on a risk-adjusted basis. The portfolio consists primarily of dividend-paying stocks that deliver cash flows from dividend and option income while offering the potential for capital appreciation. CWP constructs a portfolio that is diversified across the industry sectors represented by the S&P 500 Total Return Index (the “S&P 500”) and sells call options tactically to generate additional income. CWP actively manages sector allocation and opportunities to participate in defensive and cyclical trends within economic cycles. CWP also screens for growth and value stocks that have a history of increasing dividends and possess strong fundamentals.

Equity Securities Portfolio. CWP seeks to identify Equity Securities of high-quality large capitalization companies from the S&P 500 that CWP believes are likely, over time, to sustain their earnings and cash flow growth and increase their dividends. In accordance with this investment methodology, CWP seeks to identify Equity Securities of companies that are likely to raise annual dividends with consistency. In constructing its portfolio of approximately 20 to 25 of such Equity Securities (the “Portfolio”), CWP considers which industry sectors represented by the S&P 500 appear to be outperforming relative to the overall market and over-weights those sectors by selecting Equity Securities that are outperforming relative to their peers within such sectors. Under normal market circumstances, the Portfolio’s aggregate exposure to any one sector will be less than 25%, and the maximum weighting of each of the Equity Securities will be no more than 8%. The Equity Securities held by the Fund will, on an ongoing basis, be screened and adjusted according to other investment attributes, including market capitalization, management track record, earnings, cash flows and return on equity.

Covered Call Option Strategy. The Fund will also employ an option strategy in which it will write U.S. exchange-traded covered call options on Equity Securities in the Portfolio in order to seek additional income (in the form of premiums on the options) and selective repurchase of such options. A call option written (sold) by the Fund will give the holder (buyer) the right to buy a certain equity security at a predetermined strike price from the Fund. A premium is the income received by an investor who sells or writes

an option contract to another party. CWP seeks to lower risk and enhance total return by tactically selling short-term call options on some, or all, of the Equity Securities in the Portfolio. Specifically, CWP seeks to provide gross income of approximately 2-3% from dividend income and 2-4% from option premium, plus the potential for capital appreciation. Unlike a systematic covered call program, CWP is not obligated to continuously cover each individual equity position. When one of the underlying stocks demonstrates strength or an increase in implied volatility, CWP identifies that opportunity and sells call options tactically, rather than keeping all positions covered and limiting potential upside.

For more information on the Fund’s principal investment strategy, including the Enhanced Dividend Income Portfolio, please refer to the section entitled “Additional Information About the Fund’s Strategies and Risks — Principal Investment Strategies” and “Management of the Fund — Prior Related Performance of CWP.”

Concentration Policy. The Fund will not concentrate its investments (*i.e.*, invest more than 25% of the value of its total assets) in securities of issuers in any industry or group of industries.

The Fund is classified as “non-diversified” under the Investment Company Act of 1940, as amended (the “1940 Act”).

PRINCIPAL RISKS OF INVESTING IN THE FUND

You could lose money by investing in the Fund. An investment in the Fund is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency. There can be no assurance that the Fund’s investment objectives will be achieved.

Active Market Risk. Although the Shares are listed for trading on the Exchange, there can be no assurance that an active trading market for the Shares will develop or be maintained. Shares trade on the Exchange at market prices that may be below, at or above the Fund’s net asset value. Securities, including the Shares, are subject to market fluctuations and liquidity constraints that may be caused by such factors as economic, political, or regulatory developments, changes in interest rates, and/or perceived trends in securities prices. Shares of the Fund could decline in value or underperform other investments.

Authorized Participant Concentration Risk. Only an authorized participant may engage in creation or redemption transactions directly with the Fund. The Fund has a limited number of institutions that act as authorized participants on an agency basis (*i.e.* on behalf of other market participants). To the extent that these institutions exit the business or are unable to proceed with creation and/or redemption orders with respect to the Fund and no other authorized participant is able to step forward to create or redeem, in either of these cases, Shares may trade at a discount to the Fund’s net asset value and possibly face delisting.

Covered Call Risk. Covered call risk is the risk that the Fund will forgo, during the option’s life, the opportunity to profit from increases in the market value of the security covering the call option above the sum of the premium and the strike price of the call, but has retained the risk of loss should the price of the underlying security decline. In addition, as the Fund writes

covered calls over more of its portfolio, its ability to benefit from capital appreciation becomes more limited. The writer of an option has no control over the time when it may be required to fulfill its obligation as a writer of the option. Once an option writer has received an exercise notice, it cannot effect a closing purchase transaction in order to terminate its obligation under the option and must deliver the underlying security at the exercise price.

Currency Risk. Because the Fund's net asset value is determined in U.S. dollars, the Fund's net asset value could decline if a relevant foreign currency depreciates against the U.S. dollar or if there are delays or limits on the repatriation of such currency. Currency exchange rates can be very volatile and can change quickly and unpredictably. As a result, the Fund's net asset value may change without warning, which could have a significant negative impact on the Fund.

Cyber Security Risk. The Fund is susceptible to operational risks through breaches in cyber security. A breach in cyber security refers to both intentional and unintentional events that may cause the Fund to lose proprietary information, suffer data corruption or lose operational capacity. Such events could cause the Fund to incur regulatory penalties, reputational damage, additional compliance costs associated with corrective measures and/or financial loss. Cyber security breaches may involve unauthorized access to the Fund's digital information systems through "hacking" or malicious software coding, but may also result from outside attacks such as denial-of-service attacks through efforts to make network services unavailable to intended users. In addition, cyber security breaches of the Fund's third-party service providers, such as its administrator, transfer agent, custodian, or sub-adviser, as applicable, or issuers in which the Fund invests, can also subject the Fund to many of the same risks associated with direct cyber security breaches. While the Fund has established business continuity plans and risk management systems designed to reduce the risks associated with cyber security, there are inherent limitations in such plans and systems. Additionally, there is no guarantee that such efforts will succeed, especially because the Fund does not directly control the cyber security systems of issuers or third-party service providers.

Depository Receipts Risk. Depository receipts may be subject to some of the same risks as direct investment in foreign companies, which includes international trade, currency, political, regulatory and diplomatic risks. Under an unsponsored depository receipt arrangement, the foreign issuer assumes no obligations and the depository's transaction fees are paid directly by the depository receipt holders. Because unsponsored depository receipt arrangements are organized independently and without the cooperation of the issuer of the underlying securities, available information concerning the foreign issuer may not be as current as for sponsored depository receipt and voting rights with respect to the deposited securities are not passed through. Depository receipts can involve currency risk since, unlike depository receipts, they may not be U.S. dollar-denominated.

Equity Securities Risk. The value of the Shares will fluctuate with changes in the value of the equity securities in which it invests. Equity securities prices fluctuate for several reasons, including changes in investors' perceptions of the financial condition of an

issuer or the general condition of the relevant stock market, such as the current market volatility, or when political or economic events affecting the issuers occur.

Management Risk. The Fund is subject to management risk because it is an actively managed portfolio. The Sub-Advisers will apply investment techniques and risk analyses in making investment decisions for the Fund, but there can be no guarantee that the Fund will meet its investment objectives.

Market Maker Risk. If the Fund has lower average daily trading volumes, it may rely on a small number of third-party market makers to provide a market for the purchase and sale of Shares. Any trading halt or other problem relating to the trading activity of these market makers could result in a dramatic change in the spread between the Fund's net asset value and the price at which the Shares are trading on the Exchange, which could result in a decrease in value of the Shares. In addition, decisions by market makers or authorized participants to reduce their role or step away from these activities in times of market stress could inhibit the effectiveness of the arbitrage process in maintaining the relationship between the underlying values of the Fund's portfolio securities and the Fund's market price. This reduced effectiveness could result in Shares trading at a discount to net asset value and also in greater than normal intra-day bid-ask spreads for Shares.

Market Risk. Market risk is the risk that a particular security owned by the Fund or the Shares in general may fall in value, including the possible loss of the entire principal amount that you invest. Securities are subject to market fluctuations caused by such factors as economic, political, regulatory or market developments, changes in interest rates and perceived trends in securities prices, and changes in investors' perceptions of the financial condition of an issuer or the general condition of the relevant stock market, such as the current market volatility. Overall security values could decline generally or could underperform other investments. In addition, local, regional or global events such as war, acts of terrorism, spread of infectious diseases or other public health issues, recessions, or other events could have a significant negative impact on the Fund and its investments. Such events may affect certain regions, sectors and industries more significantly than others. Such events could also adversely affect the prices and liquidity of the Fund's portfolio securities or other instruments and could result in disruptions to trading markets. Any of such circumstances could materially negatively impact the value of the Fund's Shares and result in increased market volatility. During any such events, the Fund's Shares may trade at an increased premium or discount to its NAV.

Non-Diversification Risk. Because the Fund is non-diversified and can invest a greater portion of its assets in securities of individual issuers than a diversified fund, changes in the market value of a single investment could cause greater fluctuations in Share price than would occur in a diversified fund. This may increase the Fund's volatility and cause the performance of a relatively small number of issuers to have a greater impact on the Fund's performance.

Non-U.S. Investment Risk. Securities issued by non-U.S. companies present risks beyond those of securities of U.S. issuers. Risks of investing in the securities of non-U.S. companies include: different accounting standards; expropriation, nationalization or other adverse political or economic developments; currency devaluation, blockages or transfer restrictions; changes in foreign currency exchange rates; taxes; restrictions on non-U.S. investments and exchange of securities; and less government supervision and regulation of issuers in non-U.S. countries. Prices of non-U.S. securities also may be more volatile.

Operational Risk. The Fund is exposed to operational risks arising from a number of factors, including, but not limited to, human error, processing and communication errors, errors of the Fund's service providers, counterparties or other third-parties, failed or inadequate processes and technology or systems failures. The Fund, Adviser and Sub-Advisers seek to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate to address these risks.

Portfolio Turnover Risk. The Fund will engage in active trading, which may result in a turnover of the Fund's portfolio to be greater than 100% annually. The Fund's strategy may result in the Fund paying higher levels of transaction costs and generating greater tax liabilities for shareholders. Frequent portfolio turnover may negatively affect the Fund's performance.

Premium/Discount Risk. The net asset value of Shares will generally fluctuate with changes in the market value of the Fund's holdings. The market prices of Shares will generally fluctuate in accordance with change in net asset value as well as the relative supply of and demand for Shares on the Exchange. The Fund cannot predict whether Shares will trade below (discount), at or above (premium) their net asset value. Price differences may be due, in large part, to the fact that supply and demand forces at work in the secondary trading market for Shares will be closely related to, but not identical to, the same forces influencing the prices of the holdings of the Fund trading individually or in the aggregate at any point in time.

Smaller Companies Risk. Small and/or mid-capitalization companies may be more vulnerable to adverse general market or economic developments, and their securities may be less liquid and may experience greater price volatility than larger, more established companies as a result of several factors, including limited trading volumes, products or financial resources, management inexperience and less publicly available information. Accordingly, such companies are generally subject to greater market risk than larger, more established companies.

Trading Issues Risk. Although the Shares of the Fund are listed for trading on the Exchange, there can be no assurance that an active trading market for such Shares will develop or be maintained. Trading in Shares on the Exchange may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in shares inadvisable. In addition, trading in Shares on the Exchange is subject to trading halts caused by extraordinary market volatility pursuant to Exchange "circuit breaker" rules.

Market makers are under no obligation to make a market in the Fund's Shares, and authorized participants are not obligated to submit purchase or redemption orders for Creation Units. There can be no assurance that the requirements of the Exchange necessary to maintain the listing of the Fund will continue to be met or will remain unchanged. The Fund may have difficulty maintaining its listing on the Exchange in the event the Fund's assets are small or the Fund does not have enough shareholders.

The Shares will change in value, and you could lose money by investing in the Fund. The Fund may not achieve its investment objectives.

PERFORMANCE

The bar chart and table below illustrate the annual calendar year returns of the Fund based on NAV as well as the average annual Fund returns. The bar chart and table provide an indication of the risks of investing in the Fund by showing changes in the Fund's performance from year-to-year and by showing how the Fund's average annual total returns based on NAV compare to those of a benchmark index and a broad-based market index. The Fund's performance information is accessible on the Fund's website at www.amplifyetfs.com.

The Fund's highest quarterly return was 15.29% (quarter ended June 30, 2020) and the Fund's lowest quarterly return was -17.39% (quarter ended March 31, 2020).

	1 Year	5 Year	Since Inception (12/13/2016)
Amplify CWP Enhanced Dividend Income ETF			
Return Before Taxes	22.78%	15.22%	14.91%
Return After Taxes on Distributions	20.84%	13.72%	13.43%
Return After Taxes on Distributions and Sale of Fund Shares	13.77%	11.69%	11.44%
CBOE S&P 500 BuyWrite Index (reflects no deduction for fees, expenses or taxes)	20.47%	7.84%	7.62%
Dow Jones Industrial Average (reflects no deduction for fees, expenses or taxes)	18.73%	12.95%	12.65%

The Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future.

Returns before taxes do not reflect the effects of any income or capital gains taxes. All after-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of any state or local tax. Returns after taxes on distributions reflect the taxed return on the payment of dividends and capital gains.

Your own actual after-tax returns will depend on your specific tax situation and may differ from what is shown here. After-tax returns are not relevant to investors who hold Shares in tax-deferred accounts such as individual retirement accounts (IRAs) or employee-sponsored retirement plans.

MANAGEMENT OF THE FUND

Investment Adviser. Amplify Investments LLC.

Sub-Advisers. Capital Wealth Planning, LLC and Penserra Capital Management LLC.

Portfolio Managers. The following individuals serve as portfolio managers to the Fund.

CAPITAL WEALTH PLANNING, LLC

- Kevin Simpson, Founder and Chief Investment Officer of Capital Wealth Planning
- Josh Smith, Lead Portfolio Manager at Capital Wealth Planning

PENSERRA CAPITAL MANAGEMENT LLC

- Dustin Lewellyn, CFA, Chief Investment Officer at Penserra
- Ernesto Tong, CFA, Managing Director at Penserra
- Anand Desai, Senior Vice President at Penserra

The portfolio managers are primarily and jointly responsible for the day-to-day management of the Fund. Each portfolio manager has served as part of the portfolio management team of the Fund since its inception in 2016.

PURCHASE AND SALE OF SHARES

The Fund issues and redeems Shares at net asset value ("NAV") only with authorized participants ("APs") that have entered into agreements with the Fund's distributor and only in Creation Units (large blocks of 50,000 Shares) or multiples thereof ("Creation Unit Aggregations"), in exchange for the deposit or delivery of a basket of securities in which the Fund invests and/or cash. Except when aggregated in Creation Units, the Shares are not redeemable securities of the Fund.

Individual Shares may only be bought and sold in the secondary market (i.e., on a national securities exchange) through a broker or dealer at a market price. Because the Shares trade at market prices rather than NAV, Shares may trade at a price greater than NAV (at a premium), at NAV, or less than NAV (at a discount). An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase Shares (bid) and the lowest price a seller is willing to accept for Shares (ask) when buying or selling shares in the secondary market (the "*bid-ask spread*").

Recent information, including information on the Fund's NAV, market price, premiums and discounts, and bid-ask spreads, is available online at www.amplifyetfs.com.

TAX INFORMATION

The Fund's distributions will generally be taxable as ordinary income or capital gains. A sale of Shares may result in capital gain or loss.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase Shares through a broker-dealer or other financial intermediary (such as a bank), the Adviser and Foreside Fund Services, LLC, the Fund's distributor, may pay the intermediary for the sale of Shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.
