

Amplify ETF Trust

Amplify Top 10™ Space ETF

(NYSE Arca — XWNG)

PROSPECTUS

August 18, 2026

Amplify Top 10™ Space ETF (the “Fund”) is a series of Amplify ETF Trust (the “Trust”) and is an actively managed exchange-traded fund (an “ETF”) organized as a separate series of a registered investment management company. The Fund intends to list and principally trade its shares on the NYSE Arca, Inc. (“NYSE Arca” or the “Exchange”). Market prices of shares of the Fund may differ to some degree from their net asset value (“NAV”). The Fund issues and redeems shares at net asset value only in large blocks of shares called “Creation Units.” Except when aggregated in Creation Units, shares of the Fund are not redeemable securities of the Fund.

The SEC has not approved or disapproved these securities or passed upon the accuracy or adequacy of the prospectus. Any representation to the contrary is a criminal offense.

AMPLIFY TOP 10™ SPACE ETF

Summary Information

INVESTMENT OBJECTIVE

The Fund seeks to provide capital appreciation.

FUND FEES AND EXPENSES

This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund (“Shares”). **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below.**

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.49%
Distribution and Service (12b-1) Fees	0.00%
Other Expenses ⁽¹⁾	0.00%
Total Annual Fund Operating Expenses	0.49%

⁽¹⁾ Estimate based on the expenses the Fund expects to incur for the current fiscal year.

EXAMPLE

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. This example assumes that you invest \$10,000 in the Fund for the time periods indicated and then sell all of your Shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain at current levels. This example does not include the brokerage commissions that investors may pay to buy and sell Shares. Although your actual costs may be higher or lower, your costs, based on these assumptions, would be:

1 YEAR	3 YEARS
\$50	\$157

PORTFOLIO TURNOVER

The Fund pays transaction costs, such as commissions, when it purchases and sells securities (or “turns over” its portfolio). A higher portfolio turnover will cause the Fund to incur additional transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in Total Annual Fund Operating Expenses or in the example, may affect the Fund’s performance. Because the Fund has not yet commenced investment operations, no portfolio turnover information is available at this time.

PRINCIPAL INVESTMENT STRATEGIES

The Fund is an actively managed exchange-traded fund (“ETF”) that seeks to achieve its investment objective by investing in Space Companies (as defined below). Amplify Investments LLC is the investment adviser to the Fund (“Amplify” or the “Adviser”) and Samsung Asset Management (New York), Inc., serves as the investment sub-adviser to the Fund (“Samsung” or the “Sub-Adviser”).

Under normal circumstances, the Fund invests at least 80% of its net assets (plus borrowings for investment purposes) in equity securities (which may include common stocks and/or depository receipts), or derivative instruments, such as swap agreements and options contracts, that provide exposure to Space Companies. For purposes of compliance with this investment policy, derivative instruments will be valued at their notional value.

The Sub-Adviser defines Space Companies as those constituents included in the Bloomberg Top 10 Momentum Space Index (the “Reference Index”). Under normal circumstances, the Fund expects to invest in each of the constituents included in the Reference Index. **However, the Fund is not an index fund and will not seek to track or replicate the Reference Index.** The Sub-Adviser may, in limited circumstances, invest in securities that are not included in the Reference Index, provided such investments are consistent with the Fund’s investment objective and policies, or may divest a company included in the Reference Index. Such circumstances include the expectation by the Sub-Adviser that the company will be added to the Reference Index at its next scheduled quarterly reconstitution due to an initial public offering and the purchase or sale of companies in connection with spin-offs, mergers, acquisitions or other corporate actions. In addition, the Fund’s use of derivatives instruments may result in the increase or decrease to the Fund’s economic exposure to the companies in the Reference Index.

The Reference Index. The Reference Index is constructed to track the performance of companies driving technological advances and commercialization in the global space industry utilizing data from Bloomberg Intelligence (“BI”). The Reference Index includes the top ten (10) companies that are part of the space ecosystem according to BI. Bloomberg Reference Index Services Limited (the “Reference Index Provider”) developed and maintains the Reference Index. The Reference Index Provider is not affiliated with the Fund, the Adviser, or the Sub-Adviser.

Reference Index Methodology.

The Reference Index universe begins with all securities that are members of the Bloomberg World Aggregate universe with (1) a minimum issuer free float market capitalization of \$500 million; and (2) a minimum 90-day average daily value traded of \$5 million. From this initial universe, a security must belong to the “Space” theme, as defined by BI. The Space theme includes companies involved in:

- **Launch and Space Transportation** — Companies manufacturing rockets, launch infrastructure, and critical components.
- **Satellites and Comms** — Companies engaged in the deployment, operation, and maintenance of satellite constellations.
- **Space Domain Awareness** — Companies involved in the detection, tracking and characterization of threats in space.
- **Space Data and Artificial Intelligence** — Companies leveraging satellite constellations, advanced sensors and artificial intelligence-driven analytics to generate actionable intelligence from space-based data.

Assignment of a security to the Space theme is based on BI’s fundamental, research-driven analysis of the issuer’s business activities. BI’s research analysts assign securities to the Space theme based on company disclosures, public filings, and BI’s independent research and industry expertise. For additional information regarding BI’s process for assigning securities, please see “Additional Information About the Fund’s Strategies and Risks.”

If a security belongs to one of the Space theme categories listed above, to be eligible for inclusion it must also belong to the “gold” tier as pursuant to the Bloomberg Thematic Protocol. A gold tier ranking pursuant to this protocol equates to a high exposure on both a revenue basis and a thematic basis to the Space theme through a “Revenue Assessment” and “Theme Assessment,” respectively. For additional information on the index tiering process of the Bloomberg Thematic Protocol, please see “Additional Information About the Fund’s Strategies and Risks.”

All securities that satisfy the eligibility requirements set forth above are eligible for inclusion. The eligible securities will be ranked according to their “Momentum Value,” which is designed as a measure of the trailing 6- or 3-month price momentum of the security. If a Momentum Value cannot be calculated using either the 6-month or 3-month period, the security will be deemed ineligible and removed from the eligible universe. The top ten (10) securities based on this ranking are selected for inclusion in the Reference Index. In the event of a tie in Momentum Values, the security with the higher issuer free float market capitalization shall be selected. If an issuer has multiple securities, then the security currently in the Reference Index will take precedence if it has met all other criteria for eligibility, otherwise, the security with the highest 90-day average daily value traded is eligible for inclusion in the Reference Index.

Weighting. The Reference Index employs a rank-based weighting methodology that takes into account each constituent security’s Momentum Value and “Intensity Score.” The Intensity Score is a security’s combined assessment value, which is a combination of the security’s Revenue Assessment and Theme Assessment, as determined pursuant to the Bloomberg Thematic Protocol. Each constituent security is assigned a “Composite Rank,” which is calculated as the equal-weighted average of the security’s percentile ranking for Momentum Value and Intensity Score. Higher momentum values receive higher Momentum Ranks, while lower Intensity Scores receive higher Intensity Ranks. The Reference Index is then weighted according to each constituent security’s normalized Composite Rank. A constituent security’s normalized Composite Rank is determined by dividing its Composite Rank by the sum of all constituent securities’ Composite Ranks, such that each security’s weight is proportional to its Composite Rank relative to the aggregate Composite Ranks of all Reference Index constituents.

The Reference Index is reconstituted and rebalanced quarterly in January, April, July, and October. Eligibility and selection of securities, as well as weighting of securities, is based on data as of the first Friday of the relevant month. The rebalancing and reconstitution of the Reference Index is announced on the second Friday of the relevant month and the reconstitution and rebalancing go effective after close of trading on the third Friday of the relevant month.

As of July 6, 2026, the Reference Index was comprised of 10 constituents and had significant exposure to each of the communications and industrials sectors.

The Fund expects to gain investment exposure to Space Companies primarily through a combination of direct investments in equity securities and the use of swap agreements. The Fund may enter into one or more swap agreements with financial institutions whereby the Fund and the financial institution will agree to exchange the return (or differentials in rates of return) earned or realized on the Space Companies. The Fund’s use of swap agreements and other derivative instruments is designed to allow the Fund to gain efficient

exposure to the Space Companies in circumstances where direct investment may be impractical or involve higher transaction costs, including as a result of local market access requirements, foreign ownership restrictions, tax considerations, or liquidity constraints. While the Sub-Adviser generally seeks to weight Fund holdings in a manner consistent with the Reference Index, the Sub-Adviser may vary the weightings of securities held by the Fund relative to the Reference Index, including in connection with IPOs or where the use of swap agreements presents operational or market challenges. In addition, the Fund may at times gain long exposure to Space Companies by purchasing deep in-the-money call option contracts. A call option gives the Fund the right, but not the obligation, to buy the underlying security at a predetermined price (the “strike price”) within a set timeframe. Deep in-the-money call options have strike prices significantly below the current market price of the underlying security.

The Fund may invest a portion of the Fund’s portfolio depending on the amount of collateral required by the Fund’s counterparties in (1) U.S. Government securities, such as bills, notes and bonds issued by the U.S. Treasury; (2) money market funds; (3) short term bond ETFs and/or (4) corporate debt securities, such as commercial paper and other short-term unsecured promissory notes issued by businesses that are rated investment grade or of comparable quality.

Concentration and Diversification Status. The Fund is classified as “non-diversified” under the 1940 Act. The Fund will not concentrate its investments in securities of issuers in any industry or group of identified industries, as the term “concentrate” is used in the 1940 Act, except to the extent the Reference Index concentrates in an industry or group of identified industries.

PRINCIPAL RISKS OF INVESTING IN THE FUND

Active Management Risk. The Fund is actively-managed, and its performance reflects investment decisions that the Adviser makes for the Fund. Such judgments about the Fund’s investments may prove to be incorrect. If the investments selected and the strategies employed by the Fund fail to produce the intended results, the Fund could underperform as compared to other funds with similar investment objectives and/or strategies, or could have negative returns.

Collateral Investments Risk. The Fund’s use of collateral investments may include obligations issued or guaranteed by the U.S. Government, its agencies and instrumentalities, including bills, notes and bonds issued by the U.S. Treasury, money market funds and corporate debt securities, such as commercial paper.

Some securities issued or guaranteed by federal agencies and U.S. Government-sponsored instrumentalities may not be backed by the full faith and credit of the United States, in which case the investor must look principally to the agency or instrumentality issuing or guaranteeing the security for ultimate repayment, and may not be able to assert a claim against the United States itself in the event that the agency or instrumentality does not meet its commitment. The U.S. Government, its agencies and instrumentalities do not guarantee the market value of their securities, and consequently, the value of such securities may fluctuate. Although the Fund may hold securities that carry U.S. Government guarantees, these guarantees do not extend to shares of the Fund.

U.S. Treasury securities may differ from other securities in their interest rates, maturities, times of issuance and other characteristics and may provide relatively lower returns than those of other securities. U.S. government securities are guaranteed only as to the timely payment of interest and the payment of principal when held to maturity. Similar to other issuers, changes to the financial condition or credit rating of the U.S. government may cause the value of the Fund’s U.S. Treasury securities to decline.

Money market funds are subject to management fees and other expenses. Therefore, investments in money market funds will cause the Fund to bear indirectly a proportional share of the fees and costs of the money market funds in which it invests. At the same time, the Fund will continue to pay its own management fees and expenses with respect to all of its assets, including any portion invested in the shares of the money market fund. It is possible to lose money by investing in money market funds.

Corporate debt securities such as commercial paper generally are short-term unsecured promissory notes issued by businesses. Corporate debt may be rated investment-grade or below investment-grade and may carry variable or floating rates of interest. Corporate debt securities carry both credit risk and interest rate risk. Credit risk is the risk that the Fund could lose money if the issuer of a corporate debt security is unable to pay interest or repay principal when it is due. Some corporate debt securities that are rated below investment-grade generally are considered speculative because they present a greater risk of loss, including default, than higher quality debt securities.

Concentration Risk. The Fund’s investments will be concentrated in an industry or group of industries to the extent the Reference Index is so concentrated. To the extent the Fund invests more heavily in particular industries, groups of industries, or sectors of the economy, its performance will be especially sensitive to developments that significantly affect those industries, groups of industries, or sectors of the economy, and the value of Fund shares may rise and fall more than the value of shares that invest in securities of companies in a broader range of industries or sectors.

Counterparty Risk. Counterparty risk is the risk an issuer, guarantor or counterparty of a security held by the Fund is unable or unwilling to meet its obligation on the security. The Fund is subject to counterparty risk by virtue of its usage of derivatives. Counterparty risk may arise because of the counterparty’s financial condition, market activities, or for other reasons. A counterparty’s inability to fulfill its obligation may result in financial losses to the Fund, which could be significant. The Fund may be unable to recover its investment from the

counterparty or may obtain a limited and/or delayed recovery. The Fund may be unable to recover its investment from the counterparty or may obtain a limited and/or delayed recovery. The Fund intends to enter into swap agreements with multiple counterparties in an effort to limit the Fund's exposure to any single counterparty, although there is no guarantee that the number of counterparties available to the Fund will remain adequate over time.

Cyber Security Risk. The Fund is susceptible to operational risks through breaches in cyber security. A breach in cyber security refers to both intentional and unintentional events that may cause the Fund to lose proprietary information, suffer data corruption or lose operational capacity. Such events could cause the Fund to incur regulatory penalties, reputational damage, additional compliance costs associated with corrective measures and/or financial loss. Cyber security breaches may involve unauthorized access to the Fund's digital information systems through "hacking" or malicious software coding, and may also result from outside attacks such as denial-of-service attacks through efforts to make network services unavailable to intended users. In addition, cyber security breaches of the Fund's third-party service providers, such as its administrator, transfer agent, custodian, or sub-adviser, as applicable, or issuers in which the Fund invests, can also subject the Fund to many of the same risks associated with direct cyber security breaches. While the Fund has established business continuity plans and risk management systems designed to reduce the risks associated with cyber security, there are inherent limitations in such plans and systems. Additionally, there is no guarantee that such efforts will succeed, especially because the Fund does not directly control the cyber security systems of issuers or third-party service providers.

Debt Securities Risk. Investments in debt securities subject the holder to the credit risk of the issuer. Credit risk refers to the possibility that the issuer or other obligor of a security will not be able or willing to make payments of interest and principal when due. Generally, the value of debt securities will change inversely with changes in interest rates. To the extent that interest rates rise, certain underlying obligations may be paid off substantially slower than originally anticipated and the value of those securities may fall sharply. During periods of falling interest rates, the income received by the Fund may decline. If the principal on a debt security is prepaid before expected, the prepayments of principal may have to be reinvested in obligations paying interest at lower rates. Debt securities generally do not trade on a securities exchange making them generally less liquid and more difficult to value than common stock.

Derivatives Risk. Derivatives may be riskier than other types of investments because they may be more sensitive to changes in economic market conditions than other types of investments and could result in losses that significantly exceed the Fund's original investment. A derivative is a financial contract the value of which depends on, or is derived from, the value of a financial asset, a physical asset, or a market index. Many derivatives create leverage thereby causing the Fund to be more volatile than it would be if it had not invested in derivatives. Derivatives also expose the Fund to counterparty risk (the risk that the derivative counterparty will not fulfill its contractual obligations) and to credit risk. Additionally, derivatives may be subject to numerous special and complex tax rules, which could cause adverse tax consequences and impact the amount, timing or character of income distributed by the Fund. Derivatives may be purchased on established exchanges or through privately negotiated transactions referred to as OTC derivatives. Exchange-traded derivatives generally are guaranteed by the clearing agency which is the issuer or counterparty to such derivatives. Each party to an OTC derivative bears the risk that the counterparty will default. OTC derivatives are less liquid than exchange-traded derivatives since the other party to the transaction may be the only investor with sufficient understanding of the derivative to be interested in bidding for it. The Fund may enter into total return swaps, among other instruments, for purposes of attempting to gain exposure to a particular asset without actually purchasing that asset. Such swap arrangements are OTC derivatives that may also subject the Fund to the risk that the counterparty to the transaction may not meet its obligations. To the extent the Fund utilizes derivatives, it will do so pursuant to the requirements of Rule 18f-4 under the 1940 Act ("*Rule 18f-4*"). Rule 18f-4 requires a Fund to implement certain policies and procedures designed to manage its derivatives risks, dependent upon a Fund's level of exposure to derivative instruments. To the extent the Fund is noncompliant with Rule 18f-4, the Fund may be required to adjust its investment portfolio which may, in turn, negatively impact its implementation of its investment strategies.

Swap Agreements Risk. The Fund may utilize swap agreements to derive its exposure to the securities that comprise the Reference Index. Swap agreements may involve greater risks than direct investment in securities as they may be leveraged and are subject to credit risk, counterparty risk and valuation risk. A swap agreement could result in losses if the underlying reference or asset does not perform as anticipated. In addition, many swaps trade over-the-counter and may be considered illiquid. It may not be possible for the Fund to liquidate a swap position at an advantageous time or price, which may result in significant losses.

Option Contracts Risk. The use of option contracts involves investment strategies and risks different from those associated with ordinary portfolio securities transactions. The prices of option contracts are volatile and are influenced by, among other things, actual and anticipated changes in the value of the underlying instrument, changes in interest or currency exchange rates, including the anticipated volatility, which are affected by fiscal and monetary policies and by national and international political events, changes in the actual or implied volatility or the reference asset, the time remaining until the expiration of the option contract and economic events. There may at times be an imperfect correlation between the movement in values of option contracts and the reference asset of the option contract, and there may at times not be a liquid secondary market for certain option contracts. The Fund may utilize deep in-the-money call options, which have strike prices significantly below the current market price of the underlying security. These options tend to have high sensitivity to changes in the underlying security's price and may closely mirror the performance of directly owning the security, while requiring less capital to establish the position. This approach can provide capital efficiency and flexibility; however, it also involves risks, including potential losses if the underlying security declines in value, limited liquidity in certain option contracts, and the possibility that the options may expire worthless if not managed properly.

Equity Securities Risk. The value of the Shares will fluctuate with changes in the value of the equity securities in which the Fund invests. Prices of equity securities fluctuate for several reasons, including changes in investors' perceptions of the financial condition of an issuer or the general condition of the relevant stock market, such as the current market volatility, or when political or economic events affecting the issuers occur.

Foreign Investment Risk. Returns on investments in foreign stocks could be more volatile than, or trail the returns on, investments in U.S. stocks. Since foreign exchanges may be open on days when the Fund does not price its Shares, the value of the securities in the Fund's portfolio may change on days when shareholders will not be able to purchase or sell the Shares. Conversely, Shares may trade on days when foreign exchanges are closed. Because securities held by the Fund trade on foreign exchanges that are closed when the Fund's primary listing exchange is open, the Fund is likely to experience premiums and discounts greater than those of domestic ETFs. Each of these factors can make investments in the Fund more volatile and potentially less liquid than other types of investments.

Currency Risk: Indirect and direct exposure to foreign currencies subjects the Fund to the risk that currencies will decline in value relative to the U.S. dollar. Currency rates in foreign countries may fluctuate significantly over short periods of time for a number of reasons, including changes in interest rates and the imposition of currency controls or other political developments in the U.S. or abroad.

Depository Receipts Risk: The Fund may invest in depository receipts. Investment in ADRs and GDRs may be less liquid than the underlying shares in their primary trading market and GDRs, many of which are issued by companies in emerging markets, may be more volatile and less liquid than depository receipts issued by companies in more developed markets.

Emerging Markets. The Fund may invest in companies located in emerging markets. Emerging market countries include, but are not limited to, those considered to be developing by the International Monetary Fund, the World Bank, the International Finance Corporation or one of the leading global investment banks. The majority of these countries are likely to be located in Asia, Latin America, the Middle East, Central and Eastern Europe, and Africa. Investments in emerging market issuers are subject to a greater risk of loss than investments in issuers located or operating in more developed markets. This is due to, among other things, the potential for greater market volatility, lower trading volume, higher levels of inflation, political and economic instability, greater risk of a market shutdown and more governmental limitations on foreign investments in emerging market countries than are typically found in more developed markets. Moreover, emerging markets often have less uniformity in accounting and reporting requirements, less reliable securities valuations and greater risks associated with custody of securities than developed markets. In addition, emerging markets often have greater risk of capital controls through such measures as taxes or interest rate control than developed markets. Certain emerging market countries may also lack the infrastructure necessary to attract large amounts of foreign trade and investment. Emerging market economies' exposure to specific industries, such as tourism, and lack of efficient or sufficient health care systems, could make these economies especially vulnerable to global crises, including but not limited to, pandemics.

Foreign Market and Trading Risk: The trading markets for many foreign securities are not as active as U.S. markets and may have less governmental regulation and oversight. Foreign markets also may have clearance and settlement procedures that make it difficult for the Fund to buy and sell securities. These factors could result in a loss to the Fund by causing the Fund to be unable to dispose of an investment or to miss an attractive investment opportunity, or by causing Fund assets to be uninvested for some period of time.

Foreign Securities Risk: The Fund invests a significant portion of its assets directly in securities of issuers based outside of the U.S., or in depository receipts that represent such securities. Investments in securities of non-U.S. issuers involve certain risks that may not be present with investments in securities of U.S. issuers, such as risk of loss due to foreign currency fluctuations or to political or economic instability, as well as varying regulatory requirements applicable to investments in non-U.S. issuers. There may be less information publicly available about a non-U.S. issuer than a U.S. issuer. Non-U.S. issuers may also be subject to different regulatory, accounting, auditing, financial reporting and investor protection standards than U.S. issuers.

Political and Economic Risk: The Fund is subject to foreign political and economic risk not associated with U.S. investments, meaning that political events, social and economic events and natural disasters occurring in a country where the Fund invests could cause the Fund's investments in that country to experience gains or losses. The Fund also could be unable to enforce its ownership rights or pursue legal remedies in countries where it invests.

Reliance on Trading Partners Risk: The Fund invests in some economies that are heavily dependent upon trading with key partners. Any reduction in this trading may cause an adverse impact on the economy in which the Fund invests.

Strategy Risk. The Fund will normally invest in investments that provide exposure to the securities that comprise the Reference Index, as published by the Reference Index Provider, but does not seek to track or replicate the Reference Index itself. There is no assurance that the Reference Index Provider will compile its Reference Index accurately, or that the Reference Index will be determined, composed or calculated accurately. While the Reference Index Provider gives descriptions of what the Reference Index is designed to achieve, the Reference Index Provider does not provide any warranty or accept any liability in relation to the quality, accuracy or completeness of data in its indices, and it does not guarantee that the Reference Index will be in line with its methodology. Further, the Fund's return may not match the return of the Reference Index for a number of reasons, including that the Fund is actively managed and does not seek to track or replicate the Reference Index.

Inflation Risk. Inflation risk is the risk that the value of the Fund's assets or income from investments held by the Fund will be less in the future since inflation decreases the value of money. As inflation increases, the present value of the Fund's assets can decline as can the value of the Fund's distributions.

IPO Risk. The Fund may invest in securities offered in an IPO or in companies that have recently completed an IPO. The market value of IPO shares can have significant volatility due to factors such as the absence of a prior public market, unseasoned trading, a small number of shares available for trading and limited information about the issuer. The purchase of IPO shares may involve high transaction costs, and the Fund may lose money on an investment in such securities.

Market Risk. Market risk is the risk that a particular security owned by the Fund or the Shares in general may fall in value, including the possible loss of the entire principal amount that you invest. Securities are subject to market fluctuations caused by such factors as economic, political, regulatory or market developments, changes in interest rates and perceived trends in securities prices, and changes in investors' perceptions of the financial condition of an issuer or the general condition of the relevant stock market, such as market volatility. The economies of the United States and its trading partners, as well as the financial markets generally, may be adversely impacted by trade disputes and other matters. Advancements in technology may also adversely impact markets and the overall performance of the Fund. For instance, the economy may be significantly impacted by the advanced development and increased regulation of artificial intelligence. Overall security values could decline generally or could underperform other investments. In addition, local, regional or global events such as war, acts of terrorism, spread of infectious diseases or other public health issues, recessions, or other events could have a significant negative impact on the Fund and its investments. Such events may affect certain regions, sectors and industries more significantly than others. Such events could also adversely affect the prices and liquidity of the Fund's portfolio securities or other instruments and could result in disruptions to trading markets. Any of such circumstances could materially negatively impact the value of the Fund's Shares and result in increased market volatility. During any such events, the Fund's Shares may trade at an increased premium or discount to its net asset value.

New Fund Risk. The Fund is new and currently has fewer assets than larger funds, and like other new funds, large inflows and outflows may impact the Fund's market exposure for limited periods of time. This impact may be positive or negative, depending on the direction of market movement during the period affected. Additionally, because the Fund has fewer assets than larger funds over which to spread its fixed costs, its expense levels on a percentage basis will be higher than that of a larger Fund.

Non-Diversification Risk. Because the Fund is a "non-diversified company" under the 1940 Act, it can invest a greater portion of its assets in securities of individual issuers than a diversified fund, and changes in the market value of a single investment could cause greater fluctuations in Share price than would occur in a diversified fund. This may increase the Fund's volatility and cause the performance of a relatively small number of issuers to have a greater impact on the Fund's performance.

Portfolio Turnover Risk. The Fund will engage in active trading, which may result in a turnover of the Fund's portfolio to be greater than 100% annually. The Fund's strategy may result in the Fund paying higher levels of transaction costs and generating greater tax liabilities for shareholders. Frequent portfolio turnover may negatively affect the Fund's performance.

Risks Associated with ETFs. The Fund is an ETF, and therefore, as a result of an ETF's structure, is subject to the following risks:

Authorized Participant Concentration Risk. Only an authorized participant may engage in creation or redemption transactions directly with the Fund. The Fund has a limited number of institutions that act as authorized participants on an agency basis (*i.e.*, on behalf of other market participants). To the extent that these institutions exit the business or are unable to proceed with orders for issuance or redemption of Creation Units and no other authorized participant is able to step forward to fulfill the order, in either of these cases, Shares may trade at a discount to the Fund's net asset value ("NAV") and possibly face delisting.

Costs of Buying or Selling Shares. Investors buying or selling Shares in the secondary market will pay brokerage commissions or other charges imposed by brokers as determined by that broker. Brokerage commissions are often a fixed amount and may be a significant proportional cost for investors seeking to buy or sell relatively small amounts of shares.

Market Maker Risk. The Fund faces the risks associated with a potential lack of an active market for the Fund's Shares due to a limited number of market makers. If the Fund has lower average daily trading volumes, it may rely on a small number of third-party market makers to provide a market for the purchase and sale of Shares. Any trading halt or other problem relating to the trading activity of these market makers could result in a dramatic change in the spread between the Fund's NAV and the price at which the Shares are trading on the Exchange, which could result in a decrease in value of the Shares. Market makers are under no obligation to make a market in Shares, and authorized participants are not obligated to submit purchase or redemption orders for Creation Units. Decisions by market makers or authorized participants to reduce their role or step away from these activities in times of market stress could inhibit the effectiveness of the arbitrage process in maintaining the relationship between the underlying values of the Fund's portfolio securities and the Fund's market price. This reduced effectiveness could result in Shares trading at values below the NAV and also in greater than normal intra-day bid-ask spreads for Shares.

Market Trading Risks. Shares of the Fund are publicly traded on the Exchange, which may subject shareholders of the Fund to numerous trading risks. First, Shares of the Fund may trade at prices that deviate from its NAV. The market prices of Shares will generally fluctuate in accordance with changes in the NAV of the Fund, but are also dependent upon the relative supply of and demand for Shares on the Exchange. The Fund cannot predict whether Shares will trade below (*i.e.*, a discount), at, or above (*i.e.*, a premium) their NAV. Price differences between the trading price of Shares and the NAV may be due, in large part, to the fact that supply and demand forces at work in the secondary trading market for Shares will be closely related to, but not identical to, the same forces influencing the prices of the holdings of the Fund trading individually or in the aggregate at any point in time. Further, securities (including Shares), are subject to market fluctuations and liquidity constraints that may be caused by such factors as economic, political, or regulatory developments, changes in interest rates, and/or perceived trends in securities prices. Additionally, although the Shares are listed for trading on the Exchange, there can be no assurance that an active trading market for the Shares will develop or be maintained. Trading in Shares on the Exchange may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in Shares inadvisable. In addition, trading in Shares on the Exchange is subject to trading halts caused by extraordinary market volatility pursuant to Exchange "circuit breaker" rules. Further, the Fund is required to comply with listing requirements adopted by the Exchange, and there can be no assurance that the requirements of the Exchange necessary to maintain listing of the Fund's Shares will continue to be met or will remain unchanged. Non-compliance with such requirements may result in the Fund's Shares being delisted by the Exchange. The Fund may have difficulty maintaining its listing on the Exchange in the event the Fund's assets are small or the Fund does not have enough shareholders.

Operational Risk. The Fund is exposed to operational risks arising from a number of factors, including, but not limited to, human error, processing and communication errors, errors of the Fund's service providers, counterparties or other third parties, failed or inadequate processes and technology or systems failures. The Fund relies on third parties to provide a range of services relating to its operations. Any delay or failure relating to engaging or maintaining such service providers may affect the Fund's ability to meet its investment objective. The Fund and Adviser seek to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate to address these risks.

Security Issuer Risk. Issuer-specific attributes may cause a security held by the Fund to be more volatile than the market generally. The value of an individual security or particular type of security may be more volatile than the market as a whole and may perform differently from the value of the market as a whole.

Sector Risk. To the extent the Fund invests more heavily in a particular sector or sectors, its performance will be especially sensitive to developments that significantly affect those sectors. Individual sectors may be more volatile, and may perform differently, from the broader markets.

- *Communications.* Companies in the communication services sector may be affected by industry competition, substantial capital requirements, government regulation, and obsolescence of communications products and services due to technological advancement. Fluctuating domestic and international demand, shifting demographics and often unpredictable changes in consumer tastes can drastically affect a communication services company's profitability. In addition, while all companies may be susceptible to network security breaches, certain companies in the communication services sector may be particular targets of hacking and potential theft of proprietary or consumer information or disruptions in service, which could have a material adverse effect on their businesses. The communication services sector of a country's economy is often subject to extensive government regulation. The costs of complying with governmental regulations, delays or failure to receive required regulatory approvals, or the enactment of new regulatory requirements may negatively affect the business of communications companies. Government actions around the world, specifically in the area of pre-marketing clearance of products and prices, can be arbitrary and unpredictable. The communications services industry can also be significantly affected by intense competition for market share, including competition with alternative technologies such as wireless communications, product compatibility and standardization, consumer preferences, rapid product obsolescence, research and development of new products, lack of standardization or compatibility with existing technologies, and a dependency on patent and copyright protections. Companies in the communication services sector may encounter distressed cash flows due to the need to commit substantial capital to meet increasing competition, particularly in developing new products and services using new technology. Technological innovations may make the products and services of certain communications companies obsolete.

- **Industrials.** The value of securities issued by companies in the industrials sector may be adversely affected by supply and demand changes related to their specific products or services and industrials sector products in general. The products of manufacturing companies may face obsolescence due to rapid technological developments and frequent new product introduction. Global events, trade disputes and changes in government regulations, economic conditions and exchange rates may adversely affect the performance of companies in the industrials sector. Companies in the industrials sector may be adversely affected by liability for environmental damage and product liability claims. The industrials sector may also be adversely affected by changes or trends in commodity prices, which may be influenced by unpredictable factors. Companies in the industrials sector, particularly aerospace and defense companies, may also be adversely affected by government spending policies because companies in this sector tend to rely to a significant extent on government demand for their products and services.

Small and Mid-Cap Companies Risk. Small and/or mid-capitalization companies may be more vulnerable to adverse general market or economic developments, and their securities may be less liquid and may experience greater price volatility than larger, more established companies as a result of several factors, including limited trading volumes, products or financial resources, management inexperience and less publicly available information. Accordingly, such companies are generally subject to greater market risk than larger, more established companies.

Space Companies Risk. Space Companies operate in rapidly developing, highly competitive markets where the development and deployment of space-related technologies depend heavily on expectations regarding future innovation and demand, and an increasing number of public and private participants seek to address the needs of a growing global population. However, technological and engineering progress may not occur at the pace or scale anticipated, and projects may be delayed, fail to achieve intended objectives, or become uneconomic. Launch failures, mission anomalies, design defects, or the loss of satellites or spacecraft may result in significant financial losses, reputational harm, or loss of future contracts. The accumulation of orbital debris may increase the risk of collision, raise insurance costs, and constrain the deployment of new assets. Space companies may be particularly exposed to risks such as rapid technological change and obsolescence, supply chain disruptions, cybersecurity incidents, reliance on government budgets and spending priorities, the complexity and cost of government contracting processes, evolving regulatory regimes, geopolitical instability, and shortages of skilled labor. As a result, investments in Space Companies may be more volatile and involve greater risk than investments in more established industries, and their growth may be slower, uneven, and subject to significant setbacks.

Valuation Risk. The Fund is subject to the risk of valuation discrepancies for its securities between its valuation of a security and that in the marketplace. Additionally, the value of securities in the Fund's portfolio may change on days that shareholders are not able to purchase or sell Shares. Further, during periods of reduced market liquidity or in the absence of readily available market quotations for the holdings of the Fund, the valuation of the Fund's investments will become more difficult. In market environments where there is reduced availability of reliable objective pricing data, the judgment of the Fund's investment adviser in determining the fair value of the security may play a greater role. While such determinations may be made in good faith, it may nevertheless be more difficult for the Fund to accurately assign a daily value.

The Shares will change in value, and you could lose money by investing in the Fund. The Fund may not achieve its investment objective.

PERFORMANCE

As of the date of this prospectus, the Fund has not yet commenced operations and therefore does not have a performance history. Once available, the Fund's performance information will be accessible on the Fund's website at www.amplifyetfs.com and will provide some indication of the risks of investing in the Fund.

MANAGEMENT OF THE FUND

Investment Adviser. Amplify Investments LLC

Sub-Adviser. Samsung Asset Management (New York), Inc.

Portfolio Managers. The following individuals serve as portfolio managers to the Fund.

- Ryan Keunho Kim, Portfolio Manager
- Junwoo Park, Portfolio Manager

The portfolio managers are primarily and jointly responsible for the day-to-day management of the Fund. The portfolio managers have served as part of the portfolio management team of the Fund since its inception in August 2026.

PURCHASE AND SALE OF SHARES

The Fund issues and redeems Shares at NAV only with authorized participants that have entered into agreements with the Fund's distributor and only in Creation Units or multiples thereof ("Creation Unit Aggregations") or such other aggregation amount as determined by the officers of the Trust to be in the best interests of shareholders, in exchange for the deposit or delivery of a basket of securities in which the Fund invests and/or cash. Except when aggregated in Creation Units, the Shares are not redeemable securities of the Fund.

Individual Shares may only be bought and sold in the secondary market (i.e., on a national securities exchange) through a broker or dealer at a market price. Because the Shares trade at market prices rather than NAV, Shares may trade at a price greater than NAV (at a premium), at NAV, or less than NAV (at a discount). An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase Shares (bid) and the lowest price a seller is willing to accept for Shares (ask) when buying or selling shares in the secondary market (the "bid-ask spread").

Recent information, including information on the Fund's NAV, market price, premiums and discounts, and bid-ask spreads, is available online at www.amplifyetfs.com.

TAX INFORMATION

The Fund's distributions will generally be taxable as ordinary income or capital gains. A sale of Shares may result in capital gain or loss.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase Shares through a broker-dealer or other financial intermediary (such as a bank), the Adviser and Foreside Fund Services, LLC, the Fund's distributor, may pay the intermediary for the sale of Shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

Additional Information About the Fund's Strategies and Risks

PRINCIPAL INVESTMENT STRATEGIES

The Fund is a series of the Trust, an investment company and an actively-managed ETF. The investment objective of the Fund is to provide investors with capital appreciation. The Fund's investment objective, investment strategy and each of the policies described herein are non-fundamental policies that may be changed by the Board of Trustees of the Trust (the "Board") without shareholder approval. Certain fundamental policies of the Fund are set forth in the Fund's Statement of Additional Information ("SAI") under "Investment Objective and Policies." The Fund may, with board approval, liquidate and terminate at any time without shareholder approval.

The Fund may invest a portion of the Fund's portfolio depending on the amount of collateral required by the Fund's counterparties in (1) U.S. Government securities, such as bills, notes and bonds issued by the U.S. Treasury; (2) money market funds; (3) short term bond ETFs and/or (4) corporate debt securities, such as commercial paper and other short-term unsecured promissory notes issued by businesses that are rated investment grade or of comparable quality.

Additional Information About the Reference Index.

The Reference Index is one of a series of Bloomberg Concentrated Thematic Indices, each of which targets a distinct investment theme. The Reference Index universe begins with all securities that are members of the Bloomberg World Aggregate universe with a minimum issuer free float market capitalization of \$500 million and a minimum 90-day average daily value traded of \$5 million. From this initial universe, a security must belong to one of the following categories within the Space theme, as defined by BI: (i) launch and space transportation, (ii) satellites and comms, (iii) space domain awareness, and (iv) space data and artificial intelligence. The remaining securities are then screened for thematic eligibility through the "Bloomberg Thematic Protocol" (the process in which the BI analysts and strategists identify long-term growth trends, and through independent research, identify and categorize the companies exposed to a theme). Pursuant to the Bloomberg Thematic Protocol, BI first defines the Space theme and identifies the various ways in which a company may have exposure to that theme (for example, as a supplier, operator, service provider, or end user), and, based on that analysis, defines the categories applicable to the Space theme. Assignment of a security to the Space theme reflects BI's fundamental, research-driven analysis of the issuer's business activities, informed by company disclosures, public filings, and BI's independent research and industry expertise, rather than a mechanical mapping to a standard industry classification system, such as the Global Industry Classification Standard or a comparable third-party classification code. Through this objective process, and through independent research by BI analysts and strategists to identify long-term growth trends, the companies identified are assembled into the "BI Space Basket" (the companies selected for BI's Space theme universe). The Reference Index Provider then applies the Concentrated Thematic Reference Index methodology to select and weight the top 10 constituents. If a security is classified within the Space theme, to be eligible for inclusion it must also belong to the "gold" tier as pursuant to the Bloomberg Thematic Protocol. A gold tier ranking pursuant to this protocol equates to a high exposure on both a revenue basis and a thematic basis to a relevant theme. BI analyzes constituents within a theme based off of a "Revenue Assessment" and a "Theme Assessment" (each, as defined below). The Revenue Assessment reflects BI's view of near-term (3 to 5 years) revenue exposure of a company to a theme and appropriate sub-classification as a percent of the company's total revenue, leveraging publicly available company data (such as financial disclosures). The Revenue Assessment, together with the Theme Assessment, determines a security's combined assessment value (i.e., its "Intensity Score") only once the security has already satisfied the threshold requirement of being classified by BI within the Space theme based on the nature of its business activities. The Revenue Assessment therefore measures the degree, rather than the existence, of a security's connection to the space theme by estimating, on a forward-looking basis, the percentage of the company's total revenue attributable to the space ecosystem over the subsequent three to five years.

The Revenue Assessment utilizes the below scoring methodology:

Revenue Assessment

Estimated theme revenue as a % of company revenue in 3-5 years		
1	2	3
50-100%	20-50%	<20%

The Theme Assessment aims to capture BI's view on a company's positioning and ability to execute within the competitive landscape of a particular theme. The Theme Assessment relies on the availability of fundamental data for each company and on BI analysts' expertise and history following industries and companies. To support the Theme Assessment process, BI captures across companies a series of data points to inform a perspective on relevant issues, including a company's potential ability to ramp production, relevant capital allocation trends, current relationship and reputation with customers, and access to capital. Quantitative operational data is used to assess companies wherever possible, but BI analyst assessment of other publicly available company information and industry knowledge is also considered. This analyst judgment is informed by defined and consistently applied criteria across the companies within a given theme, and BI oversees the assessment process to promote consistent application of these criteria. In each theme, companies are assessed on a scale from 1 (most exposed) to 3 (least exposed). A Theme Assessment of "1" means a company is viewed as having the highest exposure to the "Space" theme, an assessment of "2" means medium exposure and an assessment of "3" means lowest exposure.

The Reference Index Provider groups the combined assessment values into one of three tiers: gold, silver, and bronze. A combined assessment value between 2 and 4 equates to gold, a score of 5 equates to silver, and a score of 6 equates to bronze.

Securities that are listed for trading on certain exchanges are not eligible for inclusion in the Reference Index. Specifically, securities must not be listed for trading on: BSE India, National Stock Exchange of India, Egyptian Exchange, or Warsaw Stock Exchange.

Concentration and Diversification Status. The Fund is classified as “non-diversified” under the 1940 Act. The Fund will not concentrate its investments in securities of issuers in any industry or group of identified industries, as the term “concentrate” is used in the 1940 Act, except to the extent the Reference Index concentrates in an industry or group of identified industries.

NON-PRINCIPAL INVESTMENT STRATEGIES

Securities Lending. The Fund may lend its portfolio securities to brokers, dealers and other financial institutions. In connection with such loans, the Fund receives liquid collateral equal to at least 102% (105% for international securities) of the value of the loaned portfolio securities. This collateral is marked-to-market on a daily basis. To the extent that the Fund receives cash collateral, it will invest such collateral in readily marketable, high quality, short-term obligations.

Fund Investments

EQUITY SECURITIES

The Fund invests in equity securities, including common stocks. Equity securities represent an ownership position in a company. The prices of equity securities fluctuate based on, among other things, events specific to their issuers and market, economic, and other conditions.

DERIVATIVES

The Fund may utilize derivatives in pursuing its investment objective. A derivative is a financial contract the value of which depends on, or is derived from, the value of a financial asset, a physical asset, or a market index. Derivatives may be riskier than other types of investments because they may be more sensitive to changes in economic market conditions than other types of investments and could result in losses that significantly exceed the Fund’s original investment. The Fund may utilize swap agreements in an attempt to gain exposure to the securities in a market without actually purchasing those securities. Swap arrangements are two-party contracts entered into primarily by institutional investors for periods ranging from a day to more than one-year. In a standard “swap” transaction, two parties agree to exchange the returns (or differentials in rates of return) earned or realized on a particular predetermined investments or instrument. The Fund may also utilize options to obtain exposure to Space Companies, including in circumstances where the capacity of the Fund’s swap counterparties to provide the desired exposure is constrained. The Fund will utilize derivative instruments pursuant to Rule 18f-4 under the 1940 Act, which requires the Fund to implement certain policies and procedures designed to manage its derivatives risks, dependent upon the Fund’s level of exposure to derivative instruments.

CASH EQUIVALENTS AND SHORT-TERM INVESTMENTS

The Fund may invest in securities with maturities of less than one year, cash or cash equivalents, or in the securities of one or more ETFs designed to provide exposure to short-term interest or financing rates, including the Amplify Samsung SOFR ETF (the “SOFR ETF”), which is advised by Amplify Investments LLC, the Fund’s investment adviser. The Fund expects, under normal market circumstances, that the Fund’s investment in securities with maturities of less than one year, cash or cash equivalents and/or one or more ETFs designed to provide exposure to short-term interest or financing rates (including the SOFR ETF), will vary due to several factors, including market conditions. During periods of high cash inflows or outflows or if market conditions are not favorable, the Fund may depart from its principal investment strategies and invest part or all of its assets in these securities or it may hold cash. During such periods, the Fund may not be able to achieve its investment objectives. For more information on eligible short-term investments, see the SAI.

U.S. GOVERNMENT SECURITIES

The Fund may invest in short-term U.S. government securities. U.S. government securities include U.S. Treasury obligations and securities issued or guaranteed by various agencies of the U.S. government, or by various instrumentalities that have been established or sponsored by the U.S. government. U.S. Treasury obligations are backed by the “full faith and credit” of the U.S. government. Securities issued or guaranteed by federal agencies and U.S. government sponsored instrumentalities may or may not be backed by the full faith and credit of the U.S. government.

SECURITIES LENDING

The Fund may lend its portfolio securities to brokers, dealers and other financial institutions. In connection with such loans, the Fund receives liquid collateral equal to at least 102% (105% for international securities) of the value of the loaned portfolio securities. This collateral is marked-to-market on a daily basis. To the extent that the Fund receives cash collateral, it will invest such collateral in readily marketable, high quality, short-term obligations.

Additional Information Regarding Fund Risks

The following provides additional information about certain of the principal risks identified under “Principal Risks of Investing in the Fund” in the Fund’s “Summary Information” section.

Risk is inherent in all investing. Investing in the Fund involves risk, including the risk that you may lose all or part of your investment. There can be no assurance that the Fund will meet its stated objectives. Before you invest, you should consider the following risks in addition to the Principal Risks set forth above in this prospectus.

Active Management Risk. The Fund is actively-managed, and its performance reflects investment decisions that the Adviser makes for the Fund. Such judgments about the Fund’s investments may prove to be incorrect. If the investments selected and the strategies employed by the Fund fail to produce the intended results, the Fund could underperform as compared to other funds with similar investment objectives and/or strategies, or could have negative returns.

Collateral Investments Risk. The Fund’s use of collateral investments may include obligations issued or guaranteed by the U.S. Government, its agencies and instrumentalities, including bills, notes and bonds issued by the U.S. Treasury, money market funds and corporate debt securities, such as commercial paper.

Some securities issued or guaranteed by federal agencies and U.S. Government-sponsored instrumentalities may not be backed by the full faith and credit of the United States, in which case the investor must look principally to the agency or instrumentality issuing or guaranteeing the security for ultimate repayment, and may not be able to assert a claim against the United States itself in the event that the agency or instrumentality does not meet its commitment. The U.S. Government, its agencies and instrumentalities do not guarantee the market value of their securities, and consequently, the value of such securities may fluctuate. Although the Fund may hold securities that carry U.S. Government guarantees, these guarantees do not extend to shares of the Fund.

U.S. Treasury securities may differ from other securities in their interest rates, maturities, times of issuance and other characteristics and may provide relatively lower returns than those of other securities. U.S. government securities are guaranteed only as to the timely payment of interest and the payment of principal when held to maturity. Similar to other issuers, changes to the financial condition or credit rating of the U.S. government may cause the value of the Fund’s U.S. Treasury securities to decline.

Money market funds are subject to management fees and other expenses. Therefore, investments in money market funds will cause the Fund to bear indirectly a proportional share of the fees and costs of the money market funds in which it invests. At the same time, the Fund will continue to pay its own management fees and expenses with respect to all of its assets, including any portion invested in the shares of the money market fund. It is possible to lose money by investing in money market funds.

Corporate debt securities such as commercial paper generally are short-term unsecured promissory notes issued by businesses. Corporate debt may be rated investment-grade or below investment-grade and may carry variable or floating rates of interest. Corporate debt securities carry both credit risk and interest rate risk. Credit risk is the risk that the Fund could lose money if the issuer of a corporate debt security is unable to pay interest or repay principal when it is due. Some corporate debt securities that are rated below investment-grade generally are considered speculative because they present a greater risk of loss, including default, than higher quality debt securities.

Concentration Risk. The Fund’s investments will be concentrated in an industry or group of industries to the extent the Reference Index is so concentrated. To the extent the Fund invests more heavily in particular industries, groups of industries, or sectors of the economy, its performance will be especially sensitive to developments that significantly affect those industries, groups of industries, or sectors of the economy, and the value of Fund shares may rise and fall more than the value of shares that invest in securities of companies in a broader range of industries or sectors.

Counterparty Risk. Counterparty risk is the risk an issuer, guarantor or counterparty of a security held by the Fund is unable or unwilling to meet its obligation on the security. Counterparty risk may arise because of the counterparty’s financial condition, market activities, or for other reasons. A counterparty’s inability to fulfill its obligation may result in financial losses to the Fund, which could be significant. The Fund may be unable to recover its investment from the counterparty or may obtain a limited and/or delayed recovery. The Fund intends to enter into swap agreements with multiple counterparties in an effort to limit the Fund’s exposure to any single counterparty, although there is no guarantee that the number of counterparties available to the Fund will remain adequate over time.

Cyber Security Risk. The Fund, Adviser, Sub-Adviser, service providers, authorized participants and the Exchange are susceptible to operational, information security and related “cyber” risks both directly and through their service providers. Similar types of cyber security risks are also present for issuers of securities in which the Fund invests, which could result in material adverse consequences for such issuers and may cause the Fund’s investment in such portfolio companies to lose value. Unlike many other types of risks faced by the Fund, these risks typically are not covered by insurance. In general, cyber incidents can result from deliberate attacks or unintentional events. Cyber incidents include, but are not limited to, gaining unauthorized access to digital systems (e.g., through “hacking” or malicious software coding) for purposes of misappropriating assets or sensitive information, corrupting data, or causing operational disruption. Cyber attacks may also be carried out in a manner that does not require gaining unauthorized access, such as causing denial-of-service attacks on websites (i.e., efforts to make network services unavailable to intended users). Cyber security failures by or breaches of the systems of the Adviser, Sub-Adviser, distributor and other service providers (including, but not limited to, index providers, fund accountants, custodians, transfer agents and administrators), market makers, authorized participants or the issuers of securities in which the Fund invests, have the ability to cause disruptions and impact business operations, potentially resulting in: financial losses, interference with the Fund’s ability to calculate its NAV, disclosure of confidential trading information, impediments to trading, submission of erroneous trades or erroneous creation or redemption orders, the inability of the Fund or its service providers to transact business, violations of applicable privacy and other laws, regulatory fines, penalties, reputational damage, reimbursement or other compensation costs, or additional compliance costs. In addition, cyber attacks may render records of Fund assets and transactions, shareholder ownership of Shares, and other data integral to the functioning of the Fund inaccessible or inaccurate or incomplete. Substantial costs may be incurred by the Fund in order to resolve or prevent cyber incidents in the future. While the Fund has established business continuity plans in the event of, and risk management systems to prevent, such cyber attacks, there are inherent limitations in such plans and systems, including the possibility that certain risks have not been identified and that prevention and remediation efforts will not be successful. Furthermore, the Fund cannot control the cyber security plans and systems put in place by service providers to the Fund, issuers in which the Fund invests, market makers or authorized participants. The Fund and its shareholders could be negatively impacted as a result.

Debt Securities Risk. Investments in debt securities subject the holder to the credit risk of the issuer. Credit risk refers to the possibility that the issuer or other obligor of a security will not be able or willing to make payments of interest and principal when due. Generally, the value of debt securities will change inversely with changes in interest rates. To the extent that interest rates rise, certain underlying obligations may be paid off substantially slower than originally anticipated and the value of those securities may fall sharply. During periods of falling interest rates, the income received by the Fund may decline. If the principal on a debt security is prepaid before expected, the prepayments of principal may have to be reinvested in obligations paying interest at lower rates. Debt securities generally do not trade on a securities exchange making them generally less liquid and more difficult to value than common stock.

Derivatives Risk. Derivatives may be riskier than other types of investments because they may be more sensitive to changes in economic market conditions than other types of investments and could result in losses that significantly exceed the Fund’s original investment. A derivative is a financial contract the value of which depends on, or is derived from, the value of a financial asset, a physical asset, or a market index. Many derivatives create leverage thereby causing the Fund to be more volatile than it would be if it had not invested in derivatives. Derivatives also expose the Fund to counterparty risk (the risk that the derivative counterparty will not fulfill its contractual obligations) and to credit risk. Additionally, derivatives may be subject to numerous special and complex tax rules, which could cause adverse tax consequences and impact the amount, timing or character of income distributed by the Fund. Derivatives may be purchased on established exchanges or through privately negotiated transactions referred to as OTC derivatives. Exchange-traded derivatives generally are guaranteed by the clearing agency which is the issuer or counterparty to such derivatives. Each party to an OTC derivative bears the risk that the counterparty will default. OTC derivatives are less liquid than exchange-traded derivatives since the other party to the transaction may be the only investor with sufficient understanding of the derivative to be interested in bidding for it. The Fund may enter into total return swaps, among other instruments, for purposes of attempting to gain exposure to a particular asset without actually purchasing that asset. Such swap arrangements are OTC derivatives that may also subject the Fund to the risk that the counterparty to the transaction may not meet its obligations. To the extent the Fund utilizes derivatives, it will do so pursuant to the requirements of Rule 18f-4. Rule 18f-4 requires a Fund to implement certain policies and procedures designed to manage its derivatives risks, dependent upon a Fund’s level of exposure to derivative instruments. To the extent the Fund is noncompliant with Rule 18f-4, the Fund may be required to adjust its investment portfolio which may, in turn, negatively impact its implementation of its investment strategies.

Swap Agreements Risk. The Fund may utilize swap agreements to derive its exposure to the securities that comprise the Reference Index. Swap agreements may involve greater risks than direct investment in securities as they may be leveraged and are subject to credit risk, counterparty risk and valuation risk. A swap agreement could result in losses if the underlying reference or asset does not perform as anticipated. In addition, many swaps trade over-the-counter and may be considered illiquid. It may not be possible for the Fund to liquidate a swap position at an advantageous time or price, which may result in significant losses.

Option Contracts Risk. The use of option contracts involves investment strategies and risks different from those associated with ordinary portfolio securities transactions. The prices of option contracts are volatile and are influenced by, among other things, actual and anticipated changes in the value of the underlying instrument, changes in interest or currency exchange rates, including the anticipated volatility, which are affected by fiscal and monetary policies and by national and international political events, changes in the actual or implied volatility or the reference asset, the time remaining until the expiration of the option contract

and economic events. There may at times be an imperfect correlation between the movement in values of option contracts and the reference asset of the option contract, and there may at times not be a liquid secondary market for certain option contracts. The Fund may utilize deep in-the-money call options, which have strike prices significantly below the current market price of the underlying security. These options tend to have high sensitivity to changes in the underlying security's price and may closely mirror the performance of directly owning the security, while requiring less capital to establish the position. This approach can provide capital efficiency and flexibility; however, it also involves risks, including potential losses if the underlying security declines in value, limited liquidity in certain option contracts, and the possibility that the options may expire worthless if not managed properly.

Equity Securities Risk. The value of the Shares will fluctuate with changes in the value of the equity securities in which the Fund invests. Prices of equity securities fluctuate for several reasons, including changes in investors' perceptions of the financial condition of an issuer or the general condition of the relevant stock market, such as the current market volatility, or when political or economic events affecting the issuers occur.

Foreign Investment Risk. Returns on investments in foreign stocks could be more volatile than, or trail the returns on, investments in U.S. stocks. Since foreign exchanges may be open on days when the Fund does not price its Shares, the value of the securities in the Fund's portfolio may change on days when shareholders will not be able to purchase or sell the Shares. Conversely, Shares may trade on days when foreign exchanges are closed. Because securities held by the Fund trade on foreign exchanges that are closed when the Fund's primary listing exchange is open, the Fund is likely to experience premiums and discounts greater than those of domestic ETFs. Each of these factors can make investments in the Fund more volatile and potentially less liquid than other types of investments.

Currency Risk: Indirect and direct exposure to foreign currencies subjects the Fund to the risk that currencies will decline in value relative to the U.S. dollar. Currency rates in foreign countries may fluctuate significantly over short periods of time for a number of reasons, including changes in interest rates and the imposition of currency controls or other political developments in the U.S. or abroad.

Depository Receipts Risk: The Fund may invest in depository receipts. Investment in ADRs and GDRs may be less liquid than the underlying shares in their primary trading market and GDRs, many of which are issued by companies in emerging markets, may be more volatile and less liquid than depository receipts issued by companies in more developed markets.

Emerging Markets. The Fund may invest in companies located in emerging markets. Emerging market countries include, but are not limited to, those considered to be developing by the International Monetary Fund, the World Bank, the International Finance Corporation or one of the leading global investment banks. The majority of these countries are likely to be located in Asia, Latin America, the Middle East, Central and Eastern Europe, and Africa. Investments in emerging market issuers are subject to a greater risk of loss than investments in issuers located or operating in more developed markets. This is due to, among other things, the potential for greater market volatility, lower trading volume, higher levels of inflation, political and economic instability, greater risk of a market shutdown and more governmental limitations on foreign investments in emerging market countries than are typically found in more developed markets. Moreover, emerging markets often have less uniformity in accounting and reporting requirements, less reliable securities valuations and greater risks associated with custody of securities than developed markets. In addition, emerging markets often have greater risk of capital controls through such measures as taxes or interest rate control than developed markets. Certain emerging market countries may also lack the infrastructure necessary to attract large amounts of foreign trade and investment. Emerging market economies' exposure to specific industries, such as tourism, and lack of efficient or sufficient health care systems, could make these economies especially vulnerable to global crises, including but not limited to, pandemics.

Foreign Market and Trading Risk: The trading markets for many foreign securities are not as active as U.S. markets and may have less governmental regulation and oversight. Foreign markets also may have clearance and settlement procedures that make it difficult for the Fund to buy and sell securities. These factors could result in a loss to the Fund by causing the Fund to be unable to dispose of an investment or to miss an attractive investment opportunity, or by causing Fund assets to be uninvested for some period of time.

Foreign Securities Risk: The Fund invests a significant portion of its assets directly in securities of issuers based outside of the U.S., or in depository receipts that represent such securities. Investments in securities of non-U.S. issuers involve certain risks that may not be present with investments in securities of U.S. issuers, such as risk of loss due to foreign currency fluctuations or to political or economic instability, as well as varying regulatory requirements applicable to investments in non-U.S. issuers. There may be less information publicly available about a non-U.S. issuer than a U.S. issuer. Non-U.S. issuers may also be subject to different regulatory, accounting, auditing, financial reporting and investor protection standards than U.S. issuers.

Political and Economic Risk: The Fund is subject to foreign political and economic risk not associated with U.S. investments, meaning that political events, social and economic events and natural disasters occurring in a country where the Fund invests could cause the Fund's investments in that country to experience gains or losses. The Fund also could be unable to enforce its ownership rights or pursue legal remedies in countries where it invests.

Reliance on Trading Partners Risk: The Fund invests in some economies that are heavily dependent upon trading with key partners. Any reduction in this trading may cause an adverse impact on the economy in which the Fund invests.

Strategy Risk. The Fund will normally invest in investments that provide exposure to the securities that comprise the Reference Index, as published by the Reference Index Provider, but does not seek to track or replicate the Reference Index itself. There is no assurance that the Reference Index Provider will compile its Reference Index accurately, or that the Reference Index will be determined, composed or calculated accurately. While the Reference Index Provider gives descriptions of what the Reference Index is designed to achieve, the Reference Index Provider does not provide any warranty or accept any liability in relation to the quality, accuracy or completeness of data in its indices, and it does not guarantee that the Reference Index will be in line with its methodology. Further, the Fund's return may not match the return of the Reference Index for a number of reasons, including that the Fund is actively managed and does not seek to track or replicate the Reference Index.

Inflation Risk. Inflation may reduce the intrinsic value of increases in the value of the Fund. Inflation risk is the risk that the value of the Fund's assets or income from investments held by the Fund will be less in the future since inflation decreases the value of money. As inflation increases, the present value of the Fund's assets can decline as can the value of the Fund's distributions.

IPO Risk. The Fund may invest in securities offered in an IPO or in companies that have recently completed an IPO. The market value of IPO shares can have significant volatility due to factors such as the absence of a prior public market, unseasoned trading, a small number of shares available for trading and limited information about the issuer. The purchase of IPO shares may involve high transaction costs, and the Fund may lose money on an investment in such securities.

Market Risk. Market risk is the risk that a particular security owned by the Fund or the Shares in general may fall in value, including the possible loss of the entire principal amount that you invest. Securities are subject to market fluctuations caused by such factors as economic, political, regulatory or market developments, changes in interest rates and perceived trends in securities prices, and changes in investors' perceptions of the financial condition of an issuer or the general condition of the relevant stock market, such as market volatility. The economies of the United States and its trading partners, as well as the financial markets generally, may be adversely impacted by trade disputes and other matters. Advancements in technology may also adversely impact markets and the overall performance of the Fund. For instance, the economy may be significantly impacted by the advanced development and increased regulation of artificial intelligence. Overall security values could decline generally or could underperform other investments. In addition, local, regional or global events such as war, acts of terrorism, spread of infectious diseases or other public health issues, recessions, or other events could have a significant negative impact on the Fund and its investments. Such events may affect certain regions, sectors and industries more significantly than others. Such events could also adversely affect the prices and liquidity of the Fund's portfolio securities or other instruments and could result in disruptions to trading markets. Any of such circumstances could materially negatively impact the value of the Fund's Shares and result in increased market volatility. During any such events, the Fund's Shares may trade at an increased premium or discount to its net asset value.

New Fund Risk. The Fund is new and currently has fewer assets than larger funds, and like other new funds, large inflows and outflows may impact the Fund's market exposure for limited periods of time. This impact may be positive or negative, depending on the direction of market movement during the period affected. Additionally, because the Fund has fewer assets than larger funds over which to spread its fixed costs, its expense levels on a percentage basis will be higher than that of a larger Fund.

Non-Diversification Risk. Because the Fund is a "non-diversified company" under the 1940 Act, it can invest a greater portion of its assets in securities of individual issuers than a diversified fund, and changes in the market value of a single investment could cause greater fluctuations in Share price than would occur in a diversified fund. This may increase the Fund's volatility and cause the performance of a relatively small number of issuers to have a greater impact on the Fund's performance.

Portfolio Turnover Risk. The Fund will engage in active trading, which may result in a turnover of the Fund's portfolio to be greater than 100% annually. The Fund's strategy may result in the Fund paying higher levels of transaction costs and generating greater tax liabilities for shareholders. Frequent portfolio turnover may negatively affect the Fund's performance.

Risks Associated with ETFs. The Fund is an ETF, and therefore, as a result of an ETF's structure, is subject to the following risks:

Authorized Participant Concentration Risk. Only an authorized participant may engage in creation or redemption transactions directly with the Fund. The Fund has a limited number of institutions that act as authorized participants on an agency basis (*i.e.*, on behalf of other market participants). To the extent that these institutions exit the business or are unable to proceed with orders for issuance or redemption of Creation Units and no other authorized participant is able to step forward to fulfill the order, in either of these cases, Shares may trade at a discount to the Fund's net asset value ("NAV") and possibly face delisting.

Costs of Buying or Selling Shares. Investors buying or selling Shares in the secondary market will pay brokerage commissions or other charges imposed by brokers as determined by that broker. Brokerage commissions are often a fixed amount and may be a significant proportional cost for investors seeking to buy or sell relatively small amounts of shares.

Market Maker Risk. The Fund faces the risks associated with a potential lack of an active market for the Fund's Shares due to a limited number of market makers. If the Fund has lower average daily trading volumes, it may rely on a small number of third-party market makers to provide a market for the purchase and sale of Shares. Any trading halt or other problem relating to the trading activity of these market makers could result in a dramatic change in the spread between the Fund's NAV and the price at which the Shares are trading on the Exchange, which could result in a decrease in value of the Shares. Market makers are under no obligation to make a market in Shares, and authorized participants are not obligated to submit purchase or redemption orders for Creation Units. Decisions by market makers or authorized participants to reduce their role or step away from these activities in times of market stress could inhibit the effectiveness of the arbitrage process in maintaining the relationship between the underlying values of the Fund's portfolio securities and the Fund's market price. This reduced effectiveness could result in Shares trading at values below the NAV and also in greater than normal intra-day bid-ask spreads for Shares.

Market Trading Risks. Shares of the Fund are publicly traded on the Exchange, which may subject shareholders of the Fund to numerous trading risks. First, Shares of the Fund may trade at prices that deviate from its NAV. The market prices of Shares will generally fluctuate in accordance with changes in the NAV of the Fund, but are also dependent upon the relative supply of and demand for Shares on the Exchange. The Fund cannot predict whether Shares will trade below (*i.e.*, a discount), at, or above (*i.e.*, a premium) their NAV. Price differences between the trading price of Shares and the NAV may be due, in large part, to the fact that supply and demand forces at work in the secondary trading market for Shares will be closely related to, but not identical to, the same forces influencing the prices of the holdings of the Fund trading individually or in the aggregate at any point in time. Further, securities (including Shares), are subject to market fluctuations and liquidity constraints that may be caused by such factors as economic, political, or regulatory developments, changes in interest rates, and/or perceived trends in securities prices. Additionally, although the Shares are listed for trading on the Exchange, there can be no assurance that an active trading market for the Shares will develop or be maintained. Trading in Shares on the Exchange may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in Shares inadvisable. In addition, trading in Shares on the Exchange is subject to trading halts caused by extraordinary market volatility pursuant to Exchange "circuit breaker" rules. Further, the Fund is required to comply with listing requirements adopted by the Exchange, and there can be no assurance that the requirements of the Exchange necessary to maintain listing of the Fund's Shares will continue to be met or will remain unchanged. Non-compliance with such requirements may result in the Fund's Shares being delisted by the Exchange. The Fund may have difficulty maintaining its listing on the Exchange in the event the Fund's assets are small or the Fund does not have enough shareholders.

Operational Risk. The Fund is exposed to operational risks arising from a number of factors, including, but not limited to, human error, processing and communication errors, errors of the Fund's service providers, counterparties or other third parties, failed or inadequate processes and technology or systems failures. The Fund relies on third parties to provide a range of services relating to its operations. Any delay or failure relating to engaging or maintaining such service providers may affect the Fund's ability to meet its investment objective. The Fund and Adviser seek to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate to address these risks.

Security Issuer Risk. Issuer-specific attributes may cause a security held by the Fund to be more volatile than the market generally. The value of an individual security or particular type of security may be more volatile than the market as a whole and may perform differently from the value of the market as a whole.

Sector Risk. To the extent the Fund invests more heavily in a particular sector or sectors, its performance will be especially sensitive to developments that significantly affect those sectors. Individual sectors may be more volatile, and may perform differently, from the broader markets.

- *Communications.* Companies in the communication services sector may be affected by industry competition, substantial capital requirements, government regulation, and obsolescence of communications products and services due to technological advancement. Fluctuating domestic and international demand, shifting demographics and often unpredictable changes in consumer tastes can drastically affect a communication services company's profitability. In addition, while all companies may be susceptible to network security breaches, certain companies in the communication services sector may be particular targets of hacking and potential theft of proprietary or consumer information or disruptions in service, which could have a material adverse effect on their businesses. The communication services sector of a country's economy is often subject to extensive government regulation. The costs of complying with governmental regulations, delays or failure to receive required regulatory approvals, or the enactment of new regulatory requirements may negatively affect the business of communications companies. Government actions around the world, specifically in the area of pre-marketing clearance of products and prices, can be arbitrary and unpredictable. The communications services industry can also be significantly affected by intense competition for market share, including competition with alternative technologies such as wireless communications, product compatibility and standardization, consumer preferences, rapid product obsolescence, research and development of new products, lack of standardization or compatibility with existing technologies, and a dependency on patent and copyright protections. Companies in the communication services sector may encounter distressed cash flows due to the need to commit substantial capital to meet increasing competition, particularly in developing new products and services using new technology. Technological innovations may make the products and services of certain communications companies obsolete.

- **Industrials.** The value of securities issued by companies in the industrials sector may be adversely affected by supply and demand changes related to their specific products or services and industrials sector products in general. The products of manufacturing companies may face obsolescence due to rapid technological developments and frequent new product introduction. Global events, trade disputes and changes in government regulations, economic conditions and exchange rates may adversely affect the performance of companies in the industrials sector. Companies in the industrials sector may be adversely affected by liability for environmental damage and product liability claims. The industrials sector may also be adversely affected by changes or trends in commodity prices, which may be influenced by unpredictable factors. Companies in the industrials sector, particularly aerospace and defense companies, may also be adversely affected by government spending policies because companies in this sector tend to rely to a significant extent on government demand for their products and services.

Small and Mid-Cap Companies Risk. Small and/or mid-capitalization companies may be more vulnerable to adverse general market or economic developments, and their securities may be less liquid and may experience greater price volatility than larger, more established companies as a result of several factors, including limited trading volumes, products or financial resources, management inexperience and less publicly available information. Accordingly, such companies are generally subject to greater market risk than larger, more established companies.

Space Companies Risk. Space Companies operate in rapidly developing, highly competitive markets where the development and deployment of space-related technologies depend heavily on expectations regarding future innovation and demand, and an increasing number of public and private participants seek to address the needs of a growing global population. However, technological and engineering progress may not occur at the pace or scale anticipated, and projects may be delayed, fail to achieve intended objectives, or become uneconomic. Launch failures, mission anomalies, design defects, or the loss of satellites or spacecraft may result in significant financial losses, reputational harm, or loss of future contracts. The accumulation of orbital debris may increase the risk of collision, raise insurance costs, and constrain the deployment of new assets. Space companies may be particularly exposed to risks such as rapid technological change and obsolescence, supply chain disruptions, cybersecurity incidents, reliance on government budgets and spending priorities, the complexity and cost of government contracting processes, evolving regulatory regimes, geopolitical instability, and shortages of skilled labor. As a result, investments in Space Companies may be more volatile and involve greater risk than investments in more established industries, and their growth may be slower, uneven, and subject to significant setbacks.

Valuation Risk. The Fund is subject to the risk of valuation discrepancies for its securities between its valuation of a security and that in the marketplace. Additionally, the value of securities in the Fund's portfolio may change on days that shareholders are not able to purchase or sell Shares. Further, during periods of reduced market liquidity or in the absence of readily available market quotations for the holdings of the Fund, the valuation of the Fund's investments will become more difficult. In market environments where there is reduced availability of reliable objective pricing data, the judgment of the Fund's investment adviser in determining the fair value of the security may play a greater role. While such determinations may be made in good faith, it may nevertheless be more difficult for the Fund to accurately assign a daily value. The Fund's Valuation Procedures (as defined below) appointed Amplify Investments as Valuation Designee (as defined below), as reviewed, approved, and subject to the oversight of the Board, complies with Rule 2a-5 under the 1940 Act ("Rule 2a-5"). Pursuant to Rule 2a-5, the Board oversees the implementation of the Valuation Procedures. While the Fund's program is designed to contemplate the specific risks of the Fund, there is no guarantee the program will adequately do so each time, and value may not be properly selected for the Fund.

NON-PRINCIPAL RISKS OF INVESTING IN THE FUND

The following section provides additional risk information regarding investing in the Fund.

Legislation and Litigation Risk. Legislation or litigation that affects the value of securities held by the Fund may reduce the value of the Fund. From time to time, various legislative initiatives are proposed that may have a negative impact on certain securities in which the Fund invests. In addition, litigation regarding any of the securities owned by the Fund may negatively impact the value of the Shares.

Securities Lending Risk. Securities lending involves a risk of loss because the borrower may fail to return the securities in a timely manner or at all. If the Fund were unable to recover the securities loaned, it may sell the collateral and purchase a replacement security in the market. Lending securities entails a risk of loss to the Fund if and to the extent that the market value of the loaned securities increases and the collateral is not increased accordingly. Any cash received as collateral for loaned securities will be invested in readily marketable, high quality, short-term obligations. This investment is subject to market appreciation or depreciation and the Fund will bear any loss on the investment of its cash collateral.

Portfolio Holdings

A description of the Trust's policies and procedures with respect to the disclosure of the Fund's portfolio holdings is available in the Fund's SAI, which is available at www.amplifyetfs.com.

Management of the Fund

FUND ORGANIZATION

The Fund is a series of the Trust, an investment company registered under the 1940 Act. The Fund is treated as a separate fund with its own investment objective and policies. The Trust is organized as a Massachusetts business trust. Its Board is responsible for the overall management and direction of the Trust. The Board elects the Trust's officers and approves all significant agreements, including those with the Adviser, Sub-Adviser, custodian and fund administrative and accounting agent.

Investment Adviser. Amplify Investments LLC is a registered investment adviser with its offices at 3333 Warrenville Road, Suite 350, Lisle, Illinois 60532. The Trust, on behalf of the Fund, has engaged Amplify Investments to serve as the Fund's investment adviser pursuant to an investment management agreement (the "Investment Management Agreement"). In this capacity, Amplify Investments has overall responsibility for overseeing the investment of the Fund's assets, managing the Fund's business affairs and providing certain clerical, bookkeeping and other administrative services for the Trust. As compensation for its services, the Fund has agreed to pay Amplify Investments an annual management fee equal to 0.49% of its average daily net assets. Out of this management fee, Amplify Investments pays substantially all expenses of the Fund, including the cost of transfer agency, custody, fund administration, legal, audit and other service and license fees, except for distribution and service fees payable pursuant to a Rule 12b-1 plan, if any, acquired fund fees and expenses brokerage commissions and other expenses connected with the execution of portfolio transactions, taxes, interest, and extraordinary expenses.

Pursuant to an agreement with the Fund, Amplify Investments has agreed to waive its management fee with respect to acquired fund fees incurred by the Fund with respect to the Fund's investment, if any, in any funds in which Amplify Investments serves as investment adviser, including but not limited to the SOFR ETF, in an amount equal to any acquired fund fees incurred by the Fund with respect to its investment in such fund. Amplify Investments has agreed to waive and reimburse such expenses. This agreement may be terminated only by, or with the consent of, the Trust's Board of Trustees on behalf of the Fund.

Investment Sub-Adviser. Samsung Asset Management (New York) Inc. serves as investment sub-adviser to the Fund with its offices at 152 West 57th Street, New York, New York 10019. The Trust, on behalf of the Fund, and Amplify Investments have engaged Samsung to serve as the Fund's investment sub-adviser pursuant to an investment sub-advisory agreement (the "Sub-Advisory Agreement"). In this capacity, Samsung has primary responsibility for managing the Fund's strategy, including investment selection and weighting of portfolio securities. As compensation for its services, Amplify Investments has agreed to pay Samsung an annual sub-advisory fee based upon the Fund's average daily net assets. Amplify Investments is responsible for paying the entire amount of Samsung's sub-advisory fee. The Fund does not directly pay Samsung. As of March 31, 2025, Samsung had approximately \$7.26 billion in assets under management.

In rendering sub advisory services, the Sub-Adviser may use the resources of the Foreign Affiliate that is not registered under the Advisers Act to provide services to the Fund, including portfolio management and construction and research services. Under a Participating Affiliates Agreement, the Foreign Affiliate may be considered a Participating Affiliate of Samsung Asset Management (New York), Inc. as that term is used in relief granted by the staff of the SEC allowing U.S.-registered advisers to use the resources of unregistered advisory affiliates subject to the regulatory supervision of the registered adviser. Each Participating Affiliate and any of their respective employees who provide services to the Fund are considered under a Participating Affiliate Agreement to be an "associated person" of the Sub-Adviser as that term is defined in the Advisers Act for purposes of the Subadvisor's required supervision. Samsung Active Asset Management Co., Ltd. is a Participating Affiliate of the Sub-Adviser. Samsung Active Asset Management Co., Ltd. has appointed the Sub-Adviser to act as its resident agent for service of process in the U.S.

A discussion regarding the Board's approval of the Investment Management Agreement and the Sub-Advisory Agreement will be available in the Fund's reports filed on Form N-CSR for the fiscal period ended September 30, 2026.

Portfolio Managers. The portfolio management team for the Fund consists of Ryan Keunho Kim and Junwoo Park.

Ryan Keunho Kim. Mr. Kim is a Senior Equity Portfolio Manager at Samsung Asset Management New York, where he leads the firm's equity strategies, including fundamental active management, options trading, and quantitative modeling. With deep expertise in global equity markets, he blends his knowledge of fundamental research, quantitative methods, and data science to generate actionable insights for equity investments. Prior to rejoining Samsung in New York in 2024, Mr. Kim spent two years at Bloomberg as an Equity Market Specialist, where he provided expert consultation to top hedge funds and wealth managers across the United States. Mr. Kim holds an MBA from The University of Texas at Austin and a Master of Data Science from U.C. Berkeley and received his bachelor's degree in Mechanical Engineering from Korea University.

Junwoo Park. Mr. Park is an investment professional with cross-asset market experience encompassing options, equities, and fixed income markets. He co-manages equity options ETFs and plays a pivotal role in the fundamental research and management of investment-grade corporate bond portfolios. Mr. Park holds a Bachelor of Science (B.S.) degree in Finance from Binghamton University.

A discussion regarding the basis for the Board's approval of the Investment Management Agreement and the Sub-Advisory Agreement will be available in the Fund's N-CSR to shareholders for the fiscal period ended September 30, 2026.

Manager of Managers Structure. The Fund and the Adviser have received an exemptive order from the SEC to operate under a manager of managers structure that permits the Adviser, with the approval of the Board, to appoint and replace sub-advisers, enter into sub-advisory agreements, and materially amend and terminate sub-advisory agreements on behalf of the Fund without shareholder approval (the "Manager of Managers Structure"). Under the Manager of Managers Structure, the Adviser has ultimate responsibility, subject to oversight by the Board, for overseeing the Fund's sub-adviser(s) and recommending to the Board the hiring, termination, or replacement of any such sub-adviser(s) — including Samsung, in its capacity as the Sub-Adviser. The exemptive order does not apply to any sub-adviser that is affiliated with the Fund or the Adviser.

The Manager of Managers Structure enables the Fund to operate with greater efficiency and without incurring the expense and delays associated with obtaining shareholder approvals for matters relating to sub-advisers or sub-advisory agreements. The Manager of Managers Structure does not permit an increase in the overall management and advisory fees payable by the Fund without shareholder approval. Shareholders will be notified of any changes made to sub-advisers or sub-advisory agreements within 90 days of the changes.

How to Buy and Sell Shares

The Fund issues or redeems its Shares at NAV per Share only in Creation Units. Most investors will buy and sell Shares in secondary market transactions through brokers. Shares will be listed for trading on the secondary market on the Exchange. Shares can be bought and sold throughout the trading day like other publicly traded shares. There is no minimum investment. When buying or selling Shares through a broker, you will incur customary brokerage commissions and charges, and you may pay some or all of the spread between the bid and the offered price in the secondary market on each leg of a round trip (purchase and sale) transaction. Share prices are reported in dollars and cents per Share. APs may acquire Shares directly from the Fund, and APs may tender their Shares for redemption directly to the Fund, at NAV per Share only in Creation Units or Creation Unit Aggregations, and in accordance with the procedures described in the SAI.

For purposes of the 1940 Act, the Fund is treated as a registered investment company, and the acquisition of Shares by other registered investment companies is subject to the restrictions of Section 12(d)(1) of the 1940 Act. The Trust, on behalf of the Fund, has received an exemptive order from the SEC that permits certain registered investment companies to invest in the Fund beyond the limits set forth in Section 12(d)(1), subject to certain terms and conditions, including that any such investment companies enter into an agreement with the Fund regarding the terms of any investment. When implemented, the Fund will rely on Rule 12d1-4 under the 1940 Act, which will rescind the exemptive order issued to the Trust and provide a framework for the Fund when investing in securities of other investment companies.

APs may acquire Shares directly from the Fund, and APs may tender their Shares for redemption directly to the Fund, at NAV per Share only in Creation Units or Creation Unit Aggregations, and in accordance with the procedures described in the SAI.

The Fund may liquidate and terminate at any time without shareholder approval.

BOOK ENTRY

Shares are held in book-entry form, which means that no stock certificates are issued. The Depository Trust Company ("DTC") or its nominee is the record owner of all outstanding Shares and is recognized as the owner of all Shares for all purposes.

Investors owning Shares are beneficial owners as shown on the records of DTC or its participants. DTC serves as the securities depository for all Shares. Participants in DTC include securities brokers and dealers, banks, trust companies, clearing corporations and other institutions that directly or indirectly maintain a custodial relationship with DTC. As a beneficial owner of Shares, you are not entitled to receive physical delivery of stock certificates or to have Shares registered in your name, and you are not considered a registered owner of Shares. Therefore, to exercise any right as an owner of Shares, you must rely upon the procedures of DTC and its participants. These procedures are the same as those that apply to any other stocks that you hold in book entry or "street name" form.

FUND SHARE TRADING PRICES

The trading prices of Shares on the Exchange may differ from the Fund's daily NAV. Market forces of supply and demand, economic conditions and other factors may affect the trading prices of Shares.

FREQUENT PURCHASES AND REDEMPTIONS OF FUND SHARES

The Fund imposes no restrictions on the frequency of purchases and redemptions (“market timing”), and has adopted no policies and procedures with respect to such purchases and redemptions. In making this determination, the Board considered the risks associated with frequent purchases and redemptions by the Fund’s shareholders. Such risks include, dilution, disruption of portfolio management, increases in the Fund’s trading costs and the potential for the realization of capital gains.

Shares may be purchased and redeemed directly from the Fund only when aggregated into one or more Creation Units by authorized participants that have entered into agreements with the Fund’s distributor. The vast majority of trading in Shares occurs on the secondary market and does not involve the Fund directly. In-kind purchases and redemptions of Creation Units by authorized participants and cash trades on the secondary market are unlikely to cause many of the harmful effects of frequent purchases and/or redemptions of Shares that are detailed above. To the extent that the Fund may affect the issuance or redemption of Creation Units in exchange wholly or partially for cash, such trades could result in dilution to the Fund and increased transaction costs, which could negatively impact the Fund’s ability to achieve its investment objectives. These consequences may increase as the frequency of cash purchases and redemptions of Creation Units by authorized participants increases. However, direct trading by authorized participants is critical to ensuring that Shares trade at or close to NAV.

To minimize these potential consequences of frequent purchases and redemptions of Shares, the Fund imposes transaction fees on purchases and redemptions of Creation Units to cover the custodial and other costs the Fund incurs in effecting trades. In addition, the Fund reserves the right to not accept orders from authorized participants that the Adviser has determined may be disruptive to the management of the Fund or otherwise are not in the best interests of the Fund. For these reasons, the Board has not adopted policies and procedures with respect to frequent purchases and redemptions of Shares.

Dividends, Distributions and Taxes

Ordinarily, dividends from net investment income, if any, are declared and paid at least annually by the Fund. The Fund currently intends to pay dividends from net investment income, if any, monthly. Notwithstanding the foregoing, the Fund will distribute net realized capital gains to shareholders in accordance with relevant requirements under the 1940 Act.

Distributions in cash may be reinvested automatically in additional whole Shares only if the broker through whom you purchased Shares makes such option available.

TAXES

This section summarizes some of the main U.S. federal income tax consequences of owning Shares of the Fund. This section is current as of the date of this prospectus. Tax laws and interpretations change frequently, and this summary does not describe all of the tax consequences to all taxpayers. For example, this summary generally does not describe your situation if you are a corporation, a non-U.S. person, a broker-dealer, or other investor with special circumstances. In addition, this summary does not describe your state, local, or non-U.S. tax consequences.

This federal income tax summary is based in part on the advice of counsel to the Fund. The Internal Revenue Service could disagree with any conclusions set forth in this section. In addition, counsel to the Fund was not asked to review, and has not reached a conclusion with respect to, the federal income tax treatment of the assets to be included in the Fund. This may not be sufficient for you to use for the purpose of avoiding penalties under federal tax law.

As with any investment, you should seek advice based on your individual circumstances from your own tax advisor.

The Fund intends to qualify as a “regulated investment company” under the federal tax laws. If the Fund qualifies as a regulated investment company and distributes its income as required by the tax law, the Fund generally will not pay federal income taxes.

Unless your investment in Shares is made through a tax-exempt entity or tax-deferred retirement account, such as an IRA plan, you need to be aware of the possible tax consequences when:

- The Fund makes distributions,
- You sell your Shares listed on the Exchange, and
- You purchase or redeem Creation Units.

TAXES ON DISTRIBUTIONS

The Fund's distributions are generally taxable. After the end of each year, you will receive a tax statement that separates the distributions of the Fund into two categories, ordinary income distributions and capital gain dividends. Ordinary income distributions are generally taxed at your ordinary tax rate; however, as further discussed below, certain ordinary income distributions received from the Fund may be taxed at the capital gains tax rates. Generally, you will treat all capital gain dividends as long-term capital gain regardless of how long you have owned your Shares. To determine your actual tax liability for your capital gain dividends, you must calculate your total net capital gain or loss for the tax year after considering all of your other taxable transactions, as described below. In addition, the Fund may make distributions that represent a return of capital for tax purposes and thus will generally not be taxable to you; however, such distributions may reduce your tax basis in your Shares, which could result in you having to pay higher taxes in the future when Shares are sold, even if you sell the Shares at a loss from your original investment. The tax status of your distributions from the Fund is not affected by whether you reinvest your distributions in additional Shares or receive them in cash. The income from the Fund that you must take into account for federal income tax purposes is not reduced by amounts used to pay a deferred sales fee, if any. The tax laws may require you to treat distributions made to you in January as if you had received them on December 31 of the previous year.

Income from the Fund may also be subject to a 3.8% "Medicare tax." This tax generally applies to your net investment income if your adjusted gross income exceeds certain threshold amounts, which are \$250,000 in the case of married couples filing joint returns and \$200,000 in the case of single individuals.

A corporation that owns Shares generally will not be entitled to the dividends received deduction with respect to many dividends received from the Fund because the dividends received deduction is generally not available for distributions from regulated investment companies. However, certain ordinary income dividends on Shares that are attributable to qualifying dividends received by the Fund from certain corporations may be reported by the Fund as being eligible for the dividends received deduction.

If you are an individual, the maximum marginal stated federal tax rate for net capital gain is generally 20% (15% or 0% for taxpayers with taxable incomes below certain thresholds). Some capital gains, including some portion of your capital gain dividends may be taxed at a higher maximum stated tax. Capital gains may also be subject to the Medicare tax described above.

Net capital gain equals net long-term capital gain minus net short-term capital loss for the taxable year. Capital gain or loss is long-term if the holding period for the asset is more than one year and is short-term if the holding period for the asset is one year or less. You must exclude the date you purchase your Shares to determine your holding period. However, if you receive a capital gain dividend from the Fund and sell your Share at a loss after holding it for six months or less, the loss will be recharacterized as long-term capital loss to the extent of the capital gain dividend received. The tax rates for capital gains realized from assets held for one year or less are generally the same as for ordinary income. The Code treats certain capital gains as ordinary income in special situations. An election may be available to you to defer recognition of the gain attributable to a capital gain dividend if you make certain qualifying investments within a limited time. You should talk to your tax advisor about the availability of this deferral election and its requirements.

Ordinary income dividends received by an individual shareholder from a regulated investment company such as the Fund are generally taxed at the same rates that apply to net capital gain (as discussed above), provided certain holding period requirements are satisfied and provided the dividends are attributable to qualifying dividends received by the Fund itself. The Fund will provide notice to its shareholders of the amount of any distribution which may be taken into account as a dividend which is eligible for the capital gains tax rates.

TAXES ON EXCHANGE-LISTED SHARE SALES

If you sell or redeem your Shares, you will generally recognize a taxable gain or loss. To determine the amount of this gain or loss, you must subtract your tax basis in your Shares from the amount you receive in the transaction. Your tax basis in your Shares is generally equal to the cost of your Shares, generally including sales charges. In some cases, however, you may have to adjust your tax basis after you purchase your Shares.

TAXES ON PURCHASE AND REDEMPTION OF CREATION UNITS

If you exchange securities for Creation Units you will generally recognize a gain or a loss. The gain or loss will be equal to the difference between the market value of the Creation Units at the time and your aggregate basis in the securities surrendered and the cash component paid. If you exchange Creation Units for securities, you will generally recognize a gain or loss equal to the difference between your basis in the Creation Units and the aggregate market value of the securities received and the cash redemption amount. The Internal Revenue Service, however, may assert that a loss realized upon an exchange of securities for Creation Units or Creation Units for securities cannot be deducted currently under the rules governing "wash sales," or on the basis that there has been no significant change in economic position.

TREATMENT OF FUND EXPENSES

Expenses incurred and deducted by the Fund will generally not be treated as income taxable to you. In some cases, however, you may be required to treat your portion of these Fund expenses as income. You may not be able to take a deduction for some or all of these expenses, even if the cash you receive is reduced by such expenses.

BACKUP WITHHOLDING

The Fund may be required to withhold U.S. federal income tax (“*backup withholding*”) from dividends and capital gain distributions paid to Shareholders. Federal tax will be withheld if (1) the Shareholder fails to furnish the Fund with the Shareholder’s correct taxpayer identification number or social security number, (2) the IRS notifies the Shareholder or the Fund that the Shareholder has failed to report properly certain interest and dividend income to the IRS and to respond to notices to that effect, or (3) when required to do so, the Shareholder fails to certify to the Fund that he or she is not subject to backup withholding. The current backup withholding rate is 24%. Any amounts withheld under the backup withholding rules may be credited against the Shareholder’s U.S. federal income tax liability.

NON-U.S. TAX CREDIT

If the Fund invests in non-U.S. securities, the tax statement that you receive may include an item showing non-U.S. taxes the Fund paid to other countries. In this case, dividends taxed to you will include your share of the taxes the Fund paid to other countries. You may be able to deduct or receive a tax credit for your share of these taxes.

NON-U.S. INVESTORS

If you are a non-U.S. investor (*i.e.*, an investor other than a U.S. citizen or resident or a U.S. corporation, partnership, estate or trust), you should be aware that, generally, subject to applicable tax treaties, distributions from the Fund will generally be characterized as dividends for federal income tax purposes (other than dividends which the Fund properly reports as capital gain dividends) and will be subject to U.S. federal income taxes, including withholding taxes, subject to certain exceptions described below. However, distributions received by a non-U.S. investor from the Fund that are properly reported by the Fund as capital gain dividends may not be subject to U.S. federal income taxes, including withholding taxes, provided that the Fund makes certain elections and certain other conditions are met. Distributions from the Fund that are properly reported by the Fund as an interest-related dividend attributable to certain interest income received by the Fund or as a short-term capital gain dividend attributable to certain net short-term capital gain income received by the Fund may not be subject to U.S. federal income taxes, including withholding taxes when received by certain non-U.S. investors, provided that the Fund makes certain elections and certain other conditions are met.

Distributions to, and gross proceeds from dispositions of shares by, (i) certain non-U.S. financial institutions that have not entered into an agreement with the U.S. Treasury to collect and disclose certain information and are not resident in a jurisdiction that has entered into such an agreement with the U.S. Treasury and (ii) certain other non-U.S. entities that do not provide certain certifications and information about the entity’s U.S. owners, may be subject to a U.S. withholding tax of 30%. However, proposed regulations may eliminate the requirement to withhold on payments of gross proceeds from dispositions.

It is the responsibility of the entity through which you hold your shares to determine the applicable withholding.

INVESTMENTS IN CERTAIN NON-U.S. CORPORATIONS

If the Fund holds an equity interest in any “passive foreign investment companies” (“PFICs”), which are generally certain non-U.S. corporations that receive at least 75% of their annual gross income from passive sources (such as interest, dividends, certain rents and royalties or capital gains) or that hold at least 50% of their assets in investments producing such passive income, the Fund could be subject to U.S. federal income tax and additional interest charges on gains and certain distributions with respect to those equity interests, even if all the income or gain is timely distributed to its shareholders. The Fund will not be able to pass through to its shareholders any credit or deduction for such taxes. The Fund may be able to make an election that could ameliorate these adverse tax consequences. In this case, the Fund would recognize as ordinary income any increase in the value of such PFIC shares, and as ordinary loss any decrease in such value to the extent it did not exceed prior increases included in income. Under this election, the Fund might be required to recognize in a year income in excess of its distributions from PFICs and its proceeds from dispositions of PFIC stock during that year, and such income would nevertheless be subject to the distribution requirement and would be taken into account for purposes of the 4% excise tax (described above). Dividends paid by PFICs are not treated as qualified dividend income.

The foregoing discussion summarizes some of the possible consequences under current federal tax law of an investment in the Fund. It is not a substitute for personal tax advice. You also may be subject to state and local taxes on Fund distributions and sales of Shares.

Consult your personal tax advisor about the potential tax consequences of an investment in Shares under all applicable tax laws. See “Federal Tax Matters” in the statement of additional information for more information.

Distribution Plan

Foreside Fund Services, LLC (the “Distributor”) serves as the distributor of Creation Units for the Fund on an agency basis. The Distributor does not maintain a secondary market in Shares.

The Board has adopted a Distribution and Service Plan pursuant to Rule 12b-1 under the 1940 Act. In accordance with its Rule 12b-1 plan, the Fund is authorized to pay an amount up to 0.25% of its average daily net assets each year to reimburse the Distributor for amounts expended to finance activities primarily intended to result in the sale of Creation Units or the provision of investor services. The Distributor may also use this amount to compensate securities dealers or other persons that are APs for providing distribution assistance, including broker-dealer and shareholder support and educational and promotional services.

The Fund does not, and has no current intention of, paying 12b-1 fees. However, in the event 12b-1 fees are charged in the future, because these fees are paid out of the Fund’s assets, over time these fees will increase the cost of your investment and may cost you more than certain other types of sales charges.

Net Asset Value

The Fund’s NAV is determined as of the close of trading (normally 4:00 p.m., Eastern time) on each day the New York Stock Exchange is open for business. NAV is calculated by taking the market price of the Fund’s total assets, including interest or dividends accrued but not yet collected, less all liabilities, and dividing such amount by the total number of Shares outstanding. The result, rounded to the nearest cent, is the net asset value per Share.

Section 2(a)(41) of the 1940 Act provides that when a market quotation is readily available for a fund’s portfolio investments, such investment must be valued at the market value. Rule 2a-5 under the 1940 Act defines a readily available market quotation as “a quoted price (unadjusted) in active markets for identical investments that the fund can access at a measurement date, provided that a quotation will not be readily available if it is not reliable.” If a market quotation is not “readily available” the portfolio investment must be fair valued as determined in good faith by a fund’s board of trustees. Rule 2a-5 allows a fund’s board of trustees to designate the fund’s investment adviser as the “valuation designee” to perform fair value determinations subject to certain conditions. In accordance with Rule 2a-5, the Board has appointed Amplify Investments as the “Valuation Designee” for the Fund’s portfolio investments. Investments will be fair valued as determined in good faith in accordance with the policies and procedures established by Amplify Investments as the Valuation Designee pursuant to Rule 2a-5 and approved by, and subject to the oversight of, the Board of Trustees. As a general principle, “fair value” represents a good faith approximation of the value of a portfolio investment and is the amount the Fund might reasonably expect to receive from the current sale of that investment in an arm’s-length transaction. The use of fair value prices may result in prices used by the Fund that may differ from current market quotations or official closing prices on the applicable exchange. A variety of factors may be considered in determining the fair value of such securities. While the Valuation Procedures (defined below) are intended to result in the Fund’s NAV calculation that fairly reflects the values as of the time of pricing, the fair value determined for a portfolio instrument may be materially different from the value that could be realized upon the sale of that instrument.

The Fund’s investments will be valued daily at market value or, in the absence of market value with respect to any investment, at fair value in accordance with valuation procedures adopted by the Board and in accordance with the 1940 Act. Market value prices represent last sale or official closing prices from a national or foreign exchange (*i.e.*, a regulated market) and are primarily obtained from third-party pricing services.

The Fund’s investments are valued daily in accordance with valuation procedures adopted by the Board, and in accordance with provisions of the 1940 Act. Certain securities in which the Fund may invest are not listed on any securities exchange or board of trade. Such securities are typically bought and sold by institutional investors in individually negotiated private transactions that function in many respects like an over-the-counter secondary market, although typically no formal market makers exist. Certain securities, particularly debt securities, have few or no trades, or trade infrequently, and information regarding a specific security may not be widely available or may be incomplete. Accordingly, determinations of the fair value of debt securities may be based on infrequent and dated information. Because there is less reliable, objective data available, elements of judgment may play a greater role in valuation of debt securities than for other types of securities. As explained below, any fair value determination will be made in accordance with Amplify Investments’ “Valuation Procedures.” Typically, debt securities are valued using information provided by a third-party pricing service. The third-party pricing service primarily uses broker quotes to value the securities.

Certain securities may not be able to be priced by pre-established pricing methods. Such securities may be valued by Amplify Investments (subject to the supervision of the Board) at fair value. The use of fair value pricing by the Fund is governed by valuation procedures adopted by Amplify Investments, and approved by, subject to the oversight of, the Board, and in accordance with the provisions of the 1940 Act. Investments will be fair valued as determined in good faith in accordance with the policies and procedures established by Amplify Investments as Valuation Designee pursuant to Rule 2a-5. These securities generally include, but are not limited to, certain restricted securities (securities which may not be publicly sold without registration under the Securities Act of 1933, as amended, for

which a pricing service is unable to provide a market price; securities whose trading has been formally suspended; a security whose market price is not available from a pre-established pricing source; a security with respect to which an event has occurred that is likely to materially affect the value of the security after the market has closed but before the calculation of the Fund's net asset value or make it difficult or impossible to obtain a reliable market quotation; and a security whose price, as provided by the pricing service, does not reflect the security's "fair value." See the SAI for details.

Even when market quotations are available for portfolio securities, they may be stale or unreliable because the security is not traded frequently, trading on the security ceased before the close of the trading market or issuer-specific events occurred after the security ceased trading or because of the passage of time between the close of the market on which the security trades and the close of the Exchange and when the Fund calculates its NAV. Events that may cause the last market quotation to be unreliable include a merger or insolvency, events which affect a geographical area or an industry segment, such as political events or natural disasters, or market events, such as a significant movement in the U.S. market. Where market quotations are not readily available, including where Amplify Investments determines that the closing price of the security is unreliable, Amplify Investments will value the security at fair value in good faith using procedures approved by the Board. Fair value pricing involves subjective judgments and it is possible that a fair value determination for a security is materially different than the value that could be realized upon the sale of the security. In addition, fair value pricing could result in a difference between the prices used to calculate the Fund's NAV and the prices used by the Fund's Reference Index. This may adversely affect the Fund's ability to track the Reference Index.

Fund Service Providers

U.S. Bancorp Fund Services, LLC, 615 East Michigan Street, Milwaukee, Wisconsin 53202, is the administrator, fund accounting and transfer agent for the Fund. U.S. Bank National Association, 1555 North River Center Drive, Suite 302, Milwaukee, WI 53212, is the custodian.

Chapman and Cutler LLP, 320 South Canal Street, Chicago, Illinois 60606, serves as legal counsel to the Trust.

Cohen & Company, Ltd., 1350 Euclid Ave., Suite 800, Cleveland, Ohio 44115, serves as the Fund's independent registered public accounting firm and is responsible for auditing the annual financial statements of the Fund.

Premium/Discount Information

Information showing the number of days the market price of the Shares was greater (at a premium) and less (at a discount) than the Fund's NAV for the most recently completed calendar year, and the most recently completed calendar quarters since that year (or the life of the Fund, if shorter), is available at www.amplifyetfs.com.

Other Information

INVESTMENTS BY OTHER INVESTMENT COMPANIES

Section 12(d)(1) of the 1940 Act restricts investments by investment companies in the securities of other investment companies, including Shares. Rule 12d1-4 under the 1940 Act allows the Fund, subject to certain conditions, to invest in other registered investment companies and other registered investment companies to invest in the Fund beyond the limits contained in Section 12(d)(1) of the 1940 Act.

DELIVERY OF SHAREHOLDER DOCUMENTS — HOUSEHOLDING

Householding is an option available to certain investors of the Fund. Householding is a method of delivery, based on the preference of the individual investor, in which a single copy of certain shareholder documents can be delivered to investors who share the same address, even if their accounts are registered under different names. Householding for the Fund is available through certain broker-dealers. If you are interested in enrolling in householding and receiving a single copy of the prospectus and other shareholder documents, please contact your broker-dealer. If you currently are enrolled in householding and wish to change your householding status, please contact your broker-dealer.

Financial Highlights

The Fund is new and has no performance history as of the date of this prospectus. Financial information therefore is not available.
