AMPLIFY YIELDSHARES CWP DIVIDEND & OPTION INCOME ETF
(the “Fund”)

OCTOBER 12, 2018

SUPPLEMENT TO THE FUND’S SUMMARY PROSPECTUS, PROSPECTUS
AND STATEMENT OF ADDITIONAL INFORMATION
EACH DATED MARCH 1, 2018

On October 4, 2018, the Board of Trustees of the Trust (the “Board”) approved a Fee Waiver/Expense Reimbursement Agreement between the Trust, on behalf of the Fund, and Amplify Investments LLC (the “Adviser”), as investment adviser of the Fund, whereby Amplify Investments LLC has agreed to reduce its management fee by 0.46% and effectively reimburse any acquired fund fees incurred by the Fund in an amount that limits the Fund’s “Total Annual Fund Operating Expenses” (excluding taxes, interest, all brokerage commissions, other normal charges incident to the purchase and sale of portfolio securities, distribution and service fees payable pursuant to a Rule 12b-1 plan, and other extraordinary expenses) to not more than 0.49% of the daily net assets of the Fund until October 22, 2019. Accordingly, notwithstanding anything to the contrary in the Fund’s prospectus or statement of information, as of October 22, 2018 the prospectus and statement of additional information are revised in the manner set forth below.

1. Prospectus – Fees and Expenses

The disclosure set forth in the section entitled “Fees and Expenses” is deleted in its entirety and replaced with the following:

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.95%
Distribution and Service (12b-1) Fees	0.00%
Other Expenses	0.00%
Acquired Fund Fees and Expenses	0.01%
Total Annual Fund Operating Expenses	0.96%
Expense Waiver/Reimbursement	0.47%
<hr/>	
Total Annual Fund Operating Expenses After Waiver/Reimbursement ⁽¹⁾	0.49%

(1) Pursuant to an agreement with the Fund, Amplify Investments LLC has agreed to reduce its management fee by 0.46% and effectively reimburse any acquired fund fees incurred by the Fund in an amount that limits the Fund’s “Total Annual Fund Operating Expenses” (excluding taxes, interest, all brokerage commissions, other normal charges incident to the purchase and sale of portfolio securities, distribution and service fees payable pursuant to a Rule 12b-1 plan, and other extraordinary expenses) to not more than 0.49% of the daily net assets of the Fund until October 22, 2019.

EXAMPLE

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds.

<u>1 YEAR</u>	<u>3 YEARS</u>	<u>5 YEARS</u>	<u>10 YEARS</u>
\$50	\$259	\$485	\$1,135

2. Prospectus – Management of the Fund

The disclosure set forth below is inserted as the 14th paragraph of the section entitled “Management of the Fund.”

Pursuant to an agreement with the Fund, the Adviser has agreed to reduce its management fee by 0.46% and effectively reimburse any acquired fund fees incurred by the Fund in an amount that limits the Fund’s “Total Annual Fund Operating Expenses” (excluding taxes, interest, all brokerage commissions, other normal charges incident to the purchase and sale of portfolio securities, distribution and service fees payable pursuant to a Rule 12b-1 plan, and other extraordinary expenses) to not more than 0.49% of the daily net assets of the Fund until October 22, 2019. The Adviser may also terminate the agreement at the end of the term upon 60 days’ written notice to the Fund.

3. Statement of Additional Information – Management of the Fund

The disclosure set forth below is inserted as the third paragraph of the subsection entitled “Management of the Fund – Investment Adviser”:

The Adviser has entered into a Fee Waiver/Expense Reimbursement Agreement with the Fund under which it has agreed to waive or reduce the Fund’s management fee and/or reimburse expenses of the Fund in an amount that limits the Fund’s “Total Annual Fund Operating Expenses” (excluding taxes, interest, all brokerage commissions, other normal charges incident to the purchase and sale of portfolio securities, distribution and service fees payable pursuant to a Rule 12b-1 plan, and other extraordinary expenses) to not more than 0.49% of the daily net assets of the Fund, until October 22, 2019. The Adviser may also terminate the agreement at the end of the term upon 60 days’ written notice to the Fund.

(Cboe BZX—DIVO)**

PROSPECTUS

March 1, 2018

Amplify YieldShares CWP Dividend & Option Income ETF (the “Fund”) is a series of Amplify ETF Trust (the “Trust”) and an exchange-traded actively managed fund. The Fund lists and principally trades its shares on Cboe BZX Exchange, Inc. (“Cboe BZX” or the “Exchange”).

The U.S. Securities and Exchange Commission (“SEC”) has not approved or disapproved these securities or passed upon the accuracy or adequacy of this prospectus. Any representation to the contrary is a criminal offense.

AMPLIFY YIELDSHARES CWP DIVIDEND & OPTION INCOME ETF

Summary Information

INVESTMENT OBJECTIVES

The Amplify YieldShares CWP Dividend & Option Income ETF seeks to provide current income as its primary investment objective and to provide capital appreciation as its secondary investment objective.

FUND FEES AND EXPENSES

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund (“Shares”). Investors may pay brokerage commissions on their purchases and sales of Shares, which are not reflected in the table or the example below.

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.95%
Distribution and Service (12b-1) Fees	0.00%
Other Expenses	0.00%
Acquired Fund Fees and Expenses	0.01%
Total Annual Fund Operating Expenses	0.96%

EXAMPLE

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds.

This example assumes that you invest \$10,000 in the Fund for the time periods indicated and then sell all of your Shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain at current levels. This example does not include the brokerage commissions that investors may pay to buy and sell Shares. Although your actual costs may be higher or lower, your costs, based on these assumptions, would be:

1 YEAR	3 YEARS	5 YEARS	10 YEARS
\$98	\$306	\$531	\$1,178

PORTFOLIO TURNOVER

The Fund pays transaction costs, such as commissions, when it purchases and sells securities (or “turns over” its portfolio). A higher portfolio turnover will cause the Fund to incur additional transaction costs and may result in higher taxes when Shares are held in a taxable account.

These costs, which are not reflected in Total Annual Fund Operating Expenses or in the example, may affect the Fund’s performance. During the fiscal period ended October 31, 2017, the Fund’s portfolio turnover rate was 187% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

Under normal circumstances, the Fund invests at least 80% of its total assets in dividend-paying U.S. exchange-traded equity securities (“Equity Securities”) and will opportunistically utilize an “option strategy” consisting of writing (selling) U.S. exchange-traded covered call options on such Equity Securities. Amplify Investments LLC is the investment adviser (the “Adviser”) to the Fund. Capital Wealth Planning, LLC (“CWP”) and Penserra Capital Management LLC (“Penserra”) serve as investment sub-advisers to the Fund (Penserra, together with CWP, the “Sub-Advisers,” and each, a “Sub-Adviser”). Penserra is responsible for implementing the Fund’s investment program by, among other things, trading portfolio securities and performing related services, rebalancing the Fund’s portfolio, and providing cash management services in accordance with the investment advice formulated by, and model portfolios delivered by, CWP and the Adviser. The Sub-Advisers are not affiliated with the Fund or the Adviser.

The Fund’s portfolio is strategically designed to offer high levels total return on a risk-adjusted basis. The portfolio consists primarily of dividend-paying stocks that deliver cash flows from dividend and option income while offering the potential for capital appreciation. CWP constructs a portfolio that is diversified across the industry sectors represented by the S&P 500 Total Return Index (the “S&P 500”)

and sells call options tactically to generate additional income. CWP actively manages sector allocation and opportunities to participate in defensive and cyclical trends within economic cycles. CWP also screens for growth and value stocks that have a history of increasing dividends and possess strong fundamentals.

Equity Securities Portfolio

CWP seeks to identify Equity Securities of high-quality large capitalization companies from the S&P 500 that CWP believes are likely, over time, to sustain their earnings and cash flow growth and increase their dividends. In accordance with this investment methodology, CWP seeks to identify Equity Securities of companies that are likely to raise annual dividends with consistency. In constructing its portfolio of approximately 20 to 25 of such Equity Securities (the “Portfolio”), CWP considers which industry sectors represented by the S&P 500 appear to be outperforming relative to the overall market and over-weights those sectors by selecting Equity Securities that are outperforming relative to their peers within such sectors. Under normal market circumstances, the Portfolio’s aggregate exposure to any one sector will be less than 25%, and the maximum weighting of each of the Equity Securities will be no more than 8%. The Equity Securities held by the Fund will, on an ongoing basis, be screened and adjusted according to other investment attributes, including market capitalization, management track record, earnings, cash flows and return on equity.

Covered Call Option Strategy

The Fund will also employ an option strategy in which it will write U.S. exchange-traded covered call options on Equity Securities in the Portfolio in order to seek additional income (in the form of premiums on the options) and selective repurchase of such options. A call option written (sold) by the Fund will give the holder (buyer) the right to buy a certain equity security at a predetermined strike price from the Fund. A premium is the income received by an investor who sells or writes an option contract to another party. CWP seeks to lower risk and enhance total return by tactically selling short-term call options on some, or all, of the Equity Securities in the Portfolio. Specifically, CWP seeks to provide gross income of approximately 2-3% from dividend income and 2-4% from option premium, plus the potential for capital appreciation. Unlike a systematic covered call program, CWP is not obligated to continuously cover each individual equity position. When one of the underlying stocks demonstrates strength or an increase in implied volatility, CWP identifies that opportunity and sells call options tactically, rather than keeping all positions covered and limiting potential upside.

For more information on the Fund’s Principal Investment Strategy, including the Enhanced Dividend Income Portfolio, please refer to the “Additional Information About the Fund’s Strategies and Risks—Principal Investment Strategies” and “Management of the Fund—Performance” sections later in this prospectus.

PRINCIPAL RISKS OF INVESTING IN THE FUND

You could lose money by investing in the Fund. An investment in the Fund is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency. There can be no assurance that the Fund’s investment objectives will be achieved.

Active Market Risk. Although the Shares are listed for trading on the Exchange, there can be no assurance that an active trading market for the Shares will develop or be maintained. Shares trade on the Exchange at market prices that may be below, at or above the Fund’s net asset value. Securities, including the Shares, are subject to market fluctuations and liquidity constraints that may be caused by such factors as economic, political, or regulatory developments, changes in interest rates, and/or perceived trends in securities prices. Shares of the Fund could decline in value or underperform other investments.

Authorized Participant Concentration Risk. Only an authorized participant (as defined in “Purchase and Sale of Shares”) may engage in creation or redemption transactions directly with the Fund. The Fund has a limited number of institutions that act as authorized participants. To the extent that these institutions exit the business or are unable to proceed with creation and/or redemption orders with respect to the Fund and no other authorized participant is able to step forward to create or redeem, in either of these cases, Fund shares may trade at a discount to the Fund’s net asset value and possibly face delisting.

Below Net Asset Value Risk. The net asset value of Shares will generally fluctuate with changes in the market value of the Fund’s holdings. The market prices of Shares will generally fluctuate in accordance with changes in net asset value as well as the relative supply of and demand for Shares on the Exchange. The Fund cannot predict whether Shares will trade below (discount), at or above (premium) their net asset value. Price differences may be due, in large part, to the fact that supply and demand forces at work in the secondary trading market for Shares will be closely related to, but not identical to, the same forces influencing the prices of the holdings of the Fund trading individually or in the aggregate at any point in time.

Covered Call Risk. Covered call risk is the risk that the Fund will forgo, during the option’s life, the opportunity to profit from increases in the market value of the security covering the call option above the sum of the premium and the strike price of the call, but has retained the risk of loss should the price of the underlying security decline. In addition, as the Fund writes covered calls over more of its portfolio,

its ability to benefit from capital appreciation becomes more limited. The writer of an option has no control over the time when it may be required to fulfill its obligation as a writer of the option. Once an option writer has received an exercise notice, it cannot effect a closing purchase transaction in order to terminate its obligation under the option and must deliver the underlying security at the exercise price.

Equity Securities Risk. The value of the Shares will fluctuate with changes in the value of the equity securities in which it invests. Equity securities prices fluctuate for several reasons, including changes in investors' perceptions of the financial condition of an issuer or the general condition of the relevant stock market, such as the current market volatility, or when political or economic events affecting the issuers occur.

Fluctuation of Net Asset Value Risk. The net asset value of Shares will generally fluctuate with changes in the market value of the Fund's holdings. The market prices of Shares will generally fluctuate in accordance with changes in net asset value as well as the relative supply of and demand for Shares on the Exchange. The Fund cannot predict whether Shares will trade below, at or above their net asset value. Price differences may be due, in large part, to the fact that supply and demand forces at work in the secondary trading market for Shares will be closely related to, but not identical to, the same forces influencing the prices of the holdings of the Fund trading individually or in the aggregate at any point in time.

Management Risk. The Fund is subject to management risk because it is an actively managed portfolio. The Sub-Advisers will apply investment techniques and risk analyses in making investment decisions for the Fund, but there can be no guarantee that the Fund will meet its investment objectives.

Market Risk. Market risk is the risk that a particular security owned by the Fund or the Shares in general may fall in value. Securities are subject to market fluctuations caused by such factors as economic, political, regulatory or market developments, changes in interest rates and perceived trends in securities prices. Overall security values could decline generally or could underperform other investments.

Non-Diversification Risk. Because the Fund is non-diversified and can invest a greater portion of its assets in securities of individual issuers than a diversified fund, changes in the market value of a single investment could cause greater fluctuations in Share price than would occur in a diversified fund. This may increase the Fund's volatility and cause the performance of a relatively small number of issuers to have a greater impact on the Fund's performance.

Operational Risk. The Fund is exposed to operational risks arising from a number of factors, including, but not limited to, human error, processing and communication errors, errors of the Fund's service providers, counterparties or other third-parties, failed or inadequate processes and technology or systems failures. The Fund, Adviser and Sub-Adviser seek to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate to address these risks.

Portfolio Turnover Risk. The Fund will engage in active trading, which may result in a turnover of the Fund's portfolio to be greater than 100% annually. The Fund's strategy may result in the Fund paying higher levels of transaction costs and generating greater tax liabilities for shareholders. Frequent portfolio turnover may negatively affect the Fund's performance.

Smaller Companies Risk. Small and/or mid-capitalization companies may be more vulnerable to adverse general market or economic developments, and their securities may be less liquid and may experience greater price volatility than larger, more established companies as a result of several factors, including limited trading volumes, products or financial resources, management inexperience and less publicly available information. Accordingly, such companies are generally subject to greater market risk than larger, more established companies.

Small Fund Risk. The Fund currently has fewer assets than larger funds, and like other smaller funds, large inflows and outflows may impact the Fund's market exposure for limited periods of time. This impact may be positive or negative, depending on the direction of market movement during the period affected.

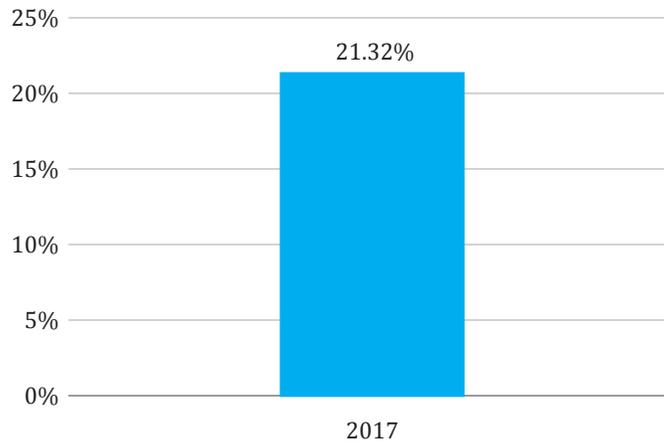

Trading Issues Risk. Although the shares of the Fund are listed for trading on the Exchange, there can be no assurance that an active trading market for such shares will develop or be maintained. Trading in shares on the Exchange may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in shares inadvisable. In addition, trading in shares on the Exchange is subject to trading halts caused by extraordinary market volatility pursuant to Exchange "circuit breaker" rules. Market makers are under no obligation to make a market in the Fund's shares, and authorized participants are not obligated to submit purchase or redemption orders for Creation Units. There can be no assurance that the requirements of the Exchange necessary to maintain the listing of the Fund will continue to be met or will remain unchanged. The Fund may have difficulty maintaining its listing on the Exchange in the event the Fund's assets are small or the Fund does not have enough shareholders.

The Shares will change in value, and you could lose money by investing in the Fund. The Fund may not achieve its investment objectives.

PERFORMANCE

The bar chart and table below illustrate the annual calendar year returns of the Fund based on NAV as well as the average annual Fund and Index returns. The bar chart and table provide an indication of the risks of investing in the Fund by showing changes in the Fund's performance from year-to-year and by showing how the Fund's average annual total returns based on net asset value compare to those of the Index and a broad-based market index. The Fund's performance information is accessible on the Fund's website at www.amplifyetfs.com

Calendar Year Total Returns as of 12/31

The Fund's highest quarterly return was 9.85% (quarter ended December 31, 2017) and the Fund's lowest quarterly return was 0.68% (quarter ended June 30, 2017).

Average Annual Total Return as of December 31, 2017

	1 Year	Since Inception (12/14/2016)
Amplify YieldShares CWP Dividend & Option Income ETF		
Return Before Taxes	21.32%	19.49%
Return After Taxes on Distributions	20.27%	18.50%
Return After Taxes on Distributions and Sale of Fund Shares	12.66%	14.68%
CBOE S&P 500 BuyWrite Index (reflects no deduction for fees, expenses or taxes)	13.00%	11.66%
Dow Jones Industrial Average (reflects no deduction for fees, expenses or taxes)	25.08%	22.89%

The Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future.

Returns before taxes do not reflect the effects of any income or capital gains taxes. All after-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of any state or local tax. Returns after taxes on distributions reflect the taxed return on the payment of dividends and capital gains.

Your own actual after-tax returns will depend on your specific tax situation and may differ from what is shown here. After-tax returns are not relevant to investors who hold Shares in tax-deferred accounts such as individual retirement accounts (IRAs) or employee-sponsored retirement plans.

MANAGEMENT OF THE FUND

Investment Adviser. Amplify Investments LLC (the "Adviser").

Sub-Advisers. Capital Wealth Planning, LLC ("CWP") and Penserra Capital Management LLC ("Penserra").

Portfolio Managers. The following individuals serve as portfolio managers to the Fund.

CAPITAL WEALTH PLANNING, LLC

- Kevin Simpson
- Josh Smith

PENSERRA CAPITAL MANAGEMENT LLC

- Dustin Lewellyn
- Ernesto Tong
- Anand Desai

The portfolio managers are primarily and jointly responsible for the day-to-day management of the Fund. Each portfolio manager has served as part of the portfolio management team of the Fund since its inception in December 2016.

PURCHASE AND SALE OF SHARES

The Fund issues and redeems Shares at net asset value (“NAV”) only with authorized participants (“APs”) that have entered into agreements with the Fund’s distributor and only in Creation Units (large blocks of 50,000 Shares) or multiples thereof (“Creation Unit Aggregations”), in exchange for the deposit or delivery of a basket of securities in which the Fund invests and/or cash. Except when aggregated in Creation Units, the Shares are not redeemable securities of the Fund.

Individual Shares may be purchased and sold only on a national securities exchange through brokers. Shares are expected to be listed for trading on the Exchange and because the Shares will trade at market prices rather than NAV, Shares may trade at prices greater than NAV (at a premium), at NAV, or less than NAV (at a discount).

TAX INFORMATION

The Fund’s distributions will generally be taxable as ordinary income or capital gains. A sale of Shares may result in capital gain or loss.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase Shares through a broker-dealer or other financial intermediary (such as a bank), the Adviser and Quasar Distributors LLC, the Fund’s distributor, may pay the intermediary for the sale of Shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information

Additional Information About the Fund’s Strategies

PRINCIPAL INVESTMENT STRATEGIES

The Fund seeks to provide current income as its primary investment objective and to provide capital appreciation as its secondary investment objective. Under normal circumstances, the Fund will invest at least 80% of its total assets in Equity Securities and opportunistically utilize an “option strategy” consisting of writing (selling) U.S. exchange-traded covered call options on such Equity Securities (the “Strategy”).

The Fund’s portfolio is strategically designed to offer a higher total return on a risk-adjusted basis. The portfolio consists primarily of dividend-paying stocks that deliver cash flows from dividend and option income while offering the potential for capital appreciation. CWP constructs a portfolio that is diversified across the industry sectors represented by the S&P 500 and sells call options tactically to generate additional income. CWP actively manages sector allocation and opportunities to participate in defensive and cyclical trends within economic cycles. CWP also screens for growth and value stocks that have a history of increasing dividends and possess strong fundamentals.

Equity Securities Portfolio

CWP seeks to identify Equity Securities of high-quality large capitalization companies from the S&P 500 that CWP believes are likely, over time, to sustain their earnings and cash flow growth and increase their dividends. In accordance with the its investment methodology, CWP seeks to identify Equity Securities of companies that are likely to raise annual dividends with consistency. In constructing the Portfolio consisting of approximately 20 to 25 of such Equity Securities, CWP considers which industry sectors represented by the S&P 500 appear to be outperforming relative to the overall market and over-weights those sectors by selecting Equity Securities that are outperforming relative to their peers within such sectors. Under normal market circumstances, the Portfolio’s aggregate exposure to any one sector will be less than 25%, and the maximum weighting of each of the Equity Securities will be no more than 8%. The Equity Securities held by the Fund will, on an ongoing basis, be screened and adjusted according to other investment attributes, including market capitalization, management track record, earnings, cash flows and return on equity.

Covered Call Option Strategy

The Fund will also employ an option strategy in which it will write U.S. exchange-traded covered call options on Equity Securities in the Portfolio in order to seek additional income (in the form of premiums on the options) and selective repurchase of such options. A call option written (sold) by the Fund will give the holder (buyer) the right to buy a certain equity security at a predetermined strike price from the Fund. A premium is the income received by an investor who sells or writes an option contract to another party. CWP seeks to lower risk and enhance total return by tactically selling short-term call options on some, or all, of the Equity Securities in the Portfolio. Specifically, CWP seeks to provide gross income of approximately 2-3% from dividend income and 2-4% from option premium, plus the potential for capital appreciation. Unlike a systematic covered call program, CWP is not obligated to continuously cover each individual equity position. When one of the underlying stocks demonstrates strength or an increase in implied volatility, CWP identifies that opportunity and sells call options tactically, rather than keeping all positions covered and limiting potential upside.

The Fund's investment strategy will follow the same proprietary investment strategy, the "Enhanced Dividend Income Portfolio," currently employed by CWP for separately managed accounts. For more information on the Fund's Principal Investment Strategy, including the Enhanced Dividend Income Portfolio, please refer to the "Management of the Fund—Performance" section later in this prospectus.

The Fund's investment objectives, the Strategy and each of the policies described herein are non-fundamental policies that may be changed by the Board of Trustees of the Trust (the "Board") without shareholder approval. As non-fundamental policies, the Fund's investment objectives and the Strategy require 60 days' prior written notice to shareholders before they can be changed. Certain fundamental policies of the Fund are set forth in the Fund's Statement of Additional Information ("SAI") under "Investment Objectives and Policies."

CWP is not affiliated with the Trust, the Adviser, the Fund's administrator, custodian, transfer agent or distributor, or any of their respective affiliates. The Adviser has entered into a license agreement with CWP pursuant to which the Adviser pays a fee to use the marketing names and licensed trademarks of CWP (the "Trademarks"). The Adviser is sub-licensing rights to the Trademarks to the Fund.

Fund Investments

EQUITY SECURITIES

The Fund invests in equity securities, which will primarily include common stocks and/or depository receipts, such as American Depository Receipts ("ADRs") and Global Depository Receipts ("GDRs"). Equity securities represent an ownership position in a company. The prices of equity securities fluctuate based on, among other things, events specific to their issuers and market, economic, and other conditions

CALL OPTIONS

The Fund invests in covered call options. A covered call, also called a "buy-write," is generally considered an investment strategy in which an investor buys a stock or basket of stocks and sells call options that correspond to the stock or basket of stocks. In return for a premium, the Fund gives the right to the purchaser of the option written by the Fund to receive a cash payment equal to the difference between the value of the underlying security and the exercise price, if the value on the expiration date is above the exercise price. In addition, covered call options partially hedge against a decline in the price of the securities on which they are written to the extent of the premium the Fund receives.

CASH EQUIVALENTS AND SHORT-TERM INVESTMENTS

The Fund may invest in securities with maturities of less than one year or cash equivalents, or it may hold cash. The percentage of the Fund invested in such holdings varies and depends on several factors, including market conditions. During the initial invest-up period and during periods of high cash inflows or outflows, if market conditions are not favorable, the Fund may depart from its principal investment strategies and invest part or all of its assets in these securities or it may hold cash. During such periods, the Fund may not be able to achieve its investment objectives. For more information on eligible short term investments, see the SAI.

PRINCIPAL RISKS OF INVESTING IN THE FUND

The following provides additional information about certain of the principal risks identified under "Principal Risks of Investing in the Fund" in the Fund's "Summary Information" section.

Risk is inherent in all investing. Investing in the Fund involves risk, including the risk that you may lose all or part of your investment. There can be no assurance that the Fund will meet its stated objectives. Before you invest, you should consider the following risks in addition to the Principal Risks set forth above in this prospectus.

Active Market Risk. Although the Shares are listed for trading on the Exchange, there can be no assurance that an active trading market for the Shares will develop or be maintained. Shares trade on the Exchange at market prices that may be below, at or above the Fund's net asset value. Securities, including the Shares, are subject to market fluctuations and liquidity constraints that may be caused by such factors as economic, political, or regulatory developments, changes in interest rates, and/or perceived trends in securities prices. Shares of the Fund could decline in value or underperform other investments.

ADR and GDR Risk. The Equity Securities held by the Fund may include non-U.S. securities that are listed on a U.S. securities exchange in the form of depositary receipts, such as American Depositary Receipts ("ADRs") and Global Depositary Receipts ("GDRs"). ADRs are certificates that evidence ownership of shares of a foreign issuer and are alternatives to purchasing directly the underlying foreign securities in their national markets and currencies. GDRs are certificates issued by an international bank that generally are traded and denominated in the currencies of countries other than the home country of the issuer of the underlying shares. ADRs and GDRs may be subject to certain of the risks associated with direct investments in the securities of foreign companies, such as currency, political, economic and market risks, because their values depend on the performance of the non-dollar denominated underlying foreign securities. Certain countries may limit the ability to convert ADRs into the underlying foreign securities and vice versa, which may cause the securities of the foreign company to trade at a discount or premium to the market price of the related ADR. ADRs may be purchased through "sponsored" or "unsponsored" facilities. A sponsored facility is established jointly by a depositary and the issuer of the underlying security. A depositary may establish an unsponsored facility without participation by the issuer of the deposited security. Unsponsored receipts may involve higher expenses and may be less liquid. Holders of unsponsored ADRs generally bear all the costs of such facilities, and the depositary of an unsponsored facility frequently is under no obligation to distribute shareholder communications received from the issuer of the deposited security or to pass through voting rights to the holders of such receipts in respect of the deposited securities. GDRs can involve currency risk since, unlike ADRs, they may not be U.S. dollar-denominated. Because the Fund's NAV is determined in U.S. dollars, the Fund's NAV could decline if the currency of the non-U.S. market in which the Fund invests depreciates against the U.S. dollar, even if the value of the Fund's holdings, measured in the foreign currency, increases.

Authorized Participant Concentration Risk. Only an authorized participant may engage in creation or redemption transactions directly with the Fund. The Fund has a limited number of institutions that act as authorized participants. To the extent that these institutions exit the business or are unable to proceed with creation and/or redemption orders with respect to the Fund and no other authorized participant is able to step forward to create or redeem, in either of these cases, Fund shares may trade at a discount to the Fund's NAV and possibly face delisting.

Below Net Asset Value Risk. The net asset value of Shares will generally fluctuate with changes in the market value of the Fund's holdings. The market prices of Shares will generally fluctuate in accordance with changes in net asset value as well as the relative supply of and demand for Shares on the Exchange. The Fund cannot predict whether Shares will trade below (discount), at or above (premium) their net asset value. Price differences may be due, in large part, to the fact that supply and demand forces at work in the secondary trading market for Shares will be closely related to, but not identical to, the same forces influencing the prices of the holdings of the Fund trading individually or in the aggregate at any point in time.

Covered Call Risk. Covered call risk is the risk that the Fund will forgo, during the option's life, the opportunity to profit from increases in the market value of the security covering the call option above the sum of the premium and the strike price of the call but has retained the risk of loss should the price of the underlying security decline. In addition, as the Fund writes covered calls over more of its portfolio, its ability to benefit from capital appreciation becomes more limited. The writer of an option has no control over the time when it may be required to fulfill its obligation as a writer of the option. Once an option writer has received an exercise notice, it cannot affect a closing purchase transaction in order to terminate its obligation under the option and must deliver the underlying security at the exercise price.

Cyber Security Risk. As the use of Internet technology has become more prevalent in the course of business, the Fund has become more susceptible to potential operational risks through breaches in cyber security. A breach in cyber security refers to both intentional and unintentional events that may cause the Fund to lose proprietary information, suffer data corruption or lose operational capacity. Such events could cause the Fund to incur regulatory penalties, reputational damage, additional compliance costs associated with corrective measures and/or financial loss. Cyber security breaches may involve unauthorized access to the Fund's digital information systems through "hacking" or malicious software coding, but may also result from outside attacks such as denial-of-service attacks through efforts to make network services unavailable to intended users. In addition, cyber security breaches of the Fund's third party service providers, such as its administrator, transfer agent, custodian, or issuers in which the Fund invests, can also subject the Fund to many of the same risks associated with direct cyber security breaches. The Fund has established risk management systems designed to reduce the risks associated with cyber security. However, there is no guarantee that such efforts will succeed, especially because the Fund does not directly control the cyber security systems of issuers or third party service providers.

Equity Securities Risk. Equity risk is the risk that the value of the securities the Fund holds will fall due to general market and economic conditions, perceptions regarding the industries in which the issuers of securities the Fund holds participate or factors relating to specific companies in which the Fund invests. For example, an adverse event, such as an unfavorable earnings report, may depress the value of securities the Fund holds; the price of securities may be particularly sensitive to general movements in the stock market; or a drop in the stock market may depress the price of most or all of the securities the Fund holds.

Fluctuation of Net Asset Value Risk. The NAV of the Shares will generally fluctuate with changes in the market value of the Fund's holdings. The market prices of Shares will generally fluctuate in accordance with changes in NAV as well as the relative supply of and demand for Shares on the Exchange. The Fund cannot predict whether Shares will trade below, at or above their net asset value. Price differences may be due, in large part, to the fact that supply and demand forces at work in the secondary trading market for Shares will be closely related to, but not identical to, the same forces influencing the prices of the holdings of the Fund trading individually or in the aggregate at any point in time. However, given that Shares can only be purchased and redeemed in Creation Units, and only to and from broker-dealers and large institutional investors that have entered into participation agreements (unlike shares of closed-end funds, which frequently trade at appreciable discounts from, and sometimes at premiums to, their net asset value), the Fund believes that large discounts or premiums to the net asset value of Shares should not be sustained.

Management Risk. The Fund is subject to management risk because it is an actively managed portfolio. The Sub-Advisers will apply investment techniques and risk analyses in making investment decisions for the Fund, but there can be no guarantee that the Fund will meet its investment objectives.

Market Risk. Market risk is the risk that a particular security owned by the Fund or the Shares in general may fall in value. Securities are subject to market fluctuations caused by such factors as economic, political, regulatory or market developments, changes in interest rates and perceived trends in securities prices. Overall security values could decline generally or could underperform other investments. If the Fund is focused in an industry or sector, the Fund may face more risks than if it were broadly diversified over numerous industries and sectors of the economy. At times, such industry or sector may be out of favor and underperform other industries or sectors or the market as a whole.

Non-Diversification Risk. Because the Fund is non-diversified and can invest a greater portion of its assets in securities of individual issuers than a diversified fund, changes in the market value of a single investment could cause greater fluctuations in Share price than would occur in a diversified fund. This may increase the Fund's volatility and cause the performance of a relatively small number of issuers to have a greater impact on the Fund's performance.

Operational Risk. The Fund is exposed to operational risks arising from a number of factors, including, but not limited to, human error, processing and communication errors, errors of the Fund's service providers, counterparties or other third-parties, failed or inadequate processes and technology or systems failures. The Fund, Adviser and Sub-Adviser seek to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate to address these risks.

Portfolio Turnover Risk. The Fund will engage in active trading, which may result in a turnover of the Fund's portfolio to be greater than 100% annually. The Fund's strategy may result in the Fund paying higher levels of transaction costs and generating greater tax liabilities for shareholders. Frequent portfolio turnover may negatively affect the Fund's performance.

Smaller Companies Risk. Small and/or mid-capitalization companies may be more vulnerable to adverse general market or economic developments, and their securities may be less liquid and may experience greater price volatility than larger, more established companies as a result of several factors, including limited trading volumes, products or financial resources, management inexperience and less publicly available information. Accordingly, such companies are generally subject to greater market risk than larger, more established companies.

Small Fund Risk. The Fund currently has fewer assets than larger funds, and like other smaller funds, large inflows and outflows may impact the Fund's market exposure for limited periods of time. This impact may be positive or negative, depending on the direction of market movement during the period affected.

Trading Issues Risk. Although the shares of the Fund are listed for trading on the Exchange, there can be no assurance that an active trading market for such shares will develop or be maintained. Trading in shares on the Exchange may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in shares inadvisable. In addition, trading in Shares on the Exchange is subject to trading halts caused by extraordinary market volatility pursuant to Exchange "circuit breaker" rules. Market makers are under no obligation to make a market in Shares, and authorized participants are not obligated to submit purchase or redemption orders for Creation Units. There can be no assurance that the requirements of the Exchange necessary to maintain the listing of the Fund will continue to be met or will remain unchanged. The Fund may have difficulty maintaining its listing on the Exchange in the event the Fund's assets are small or the Fund does not have enough shareholders.

ADDITIONAL RISKS OF INVESTING IN THE FUND

The following section provides additional risk information regarding investing in the Fund.

Inflation Risk. Inflation may reduce the intrinsic value of increases in the value of the Fund. Inflation risk is the risk that the value of assets or income from investments will be less in the future as inflation decreases the value of money. As inflation increases, the value of the Fund's assets can decline as can the value of the Fund's distributions.

Legislation and Litigation Risk. Legislation or litigation that affects the value of securities held by the Fund may reduce the value of the Fund. From time to time, various legislative initiatives are proposed that may have a negative impact on certain securities in which the Fund invests. In addition, litigation regarding any of the securities owned by the Fund may negatively impact the value of the Shares. Such legislation or litigation may cause the Fund to lose value or may result in higher portfolio turnover if the Adviser determines to sell such a holding.

Security Issuer Risk. Issuer-specific attributes may cause a security held by the Fund to be more volatile than the market generally. The value of an individual security or particular type of security may be more volatile than the market as a whole and may perform differently from the value of the market as a whole.

Portfolio Holdings

A description of the Trust's policies and procedures with respect to the disclosure of the Fund's portfolio holdings is available in the Fund's SAI, which is available at www.amplifyetfs.com.

Management of the Fund

FUND ORGANIZATION

The Fund is a series of the Trust, an investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). The Fund is treated as a separate fund with its own investment objective and policies. The Trust is organized as a Massachusetts business trust. The Board is responsible for the overall management and direction of the Trust. The Board elects the Trust's officers and approves all significant agreements, including those with the Adviser, Sub-Adviser, custodian and fund administrative and accounting agent.

Amplify Investments LLC is a registered investment adviser with its offices at 310 South Hale Street, Wheaton, Illinois 60187.

Capital Wealth Planning, LLC is a registered investment adviser with its offices at 1016 Collier Center Way, Suite 101, Naples, Florida 34110.

Penserra Capital Management LLC is a registered investment adviser with its offices at 4 Orinda Way, Suite 100-A, Orinda, California 94563.

The Adviser has overall responsibility for overseeing the investment of the Fund's assets, managing the Fund's business affairs and providing certain clerical, bookkeeping and other administrative services for the Trust. CWP has responsibility for the Fund's selection of Equity Securities for the Portfolio and covered call strategy. Penserra has responsibility for implementing the Fund's investment program by, among other things, trading portfolio securities and performing related services, rebalancing the Fund's portfolio, and providing cash management services in accordance with the investment advice formulated by, and model portfolios delivered by, CWP and the Adviser.

The members of the portfolio management team for the Fund are Kevin Simpson, Josh Smith, Dustin Lewellyn, Ernesto Tong and Anand Desai.

Kevin Simpson. Kevin Simpson has been the President of Capital Wealth Planning, LLC since establishing the firm in 2005. Kevin has been investing in options since he began his career at W.H. Newbold's Son & Co. in 1992. After his time at W.H. Newbold's Son & Co, Kevin spent 7 years with Wheat First Butcher Singer (subsequently Wells Fargo) where he helped institutions and high-net worth individuals plan and achieve their financial goals through option-centered strategies. Following his time at Wheat First Butcher Singer, Kevin spent several years at Sterling Financial before establishing Capital Wealth Planning. Kevin is a graduate of The George Washington University with a major in Finance.

Josh Smith. Josh Smith is the Senior Portfolio Manager of Capital Wealth Planning, LLC, in which capacity he is responsible for the oversight and management of the firm's investment strategies. Josh joined CWP in 2011. Prior to joining CWP, Josh spent 6 years with First Financial Capital Advisors, the internal asset management arm of First Financial Bank. Josh received his B.S. in Finance from Miami University of Ohio. He is a CFA charter holder.

Dustin Lewellyn, CFA. Mr. Lewellyn has extensive background in institutional investment process with a specific focus on exchange-traded funds ("ETFs"), such as the Fund. Mr. Lewellyn was a portfolio manager at BGI (now part of Blackrock), and he managed a number of international equity funds. Dustin also was head of ETF product management and product development at Northern Trust where he oversaw the build out and management of all areas of a new ETF business, including primary responsibility for the portfolio management process surrounding the ETFs. Mr. Lewellyn also built and ran a new ETF business for Charles Schwab, including having primary responsibility for the technology and investment process to support portfolio management for the ETFs. Mr. Lewellyn started a

consulting business with a focus on ETFs and helped numerous new ETF sponsors, as well as service providers, understand the resource requirements to participate in the industry utilizing current best practices. Mr. Lewellyn holds a B.A. from University of Iowa and is a CFA Charterholder. He also holds security licenses 7, 63, 66 and 24.

Ernesto Tong, CFA. Mr. Tong worked for Barclays Global Investors and Blackrock prior to joining Penserra. During his time at Blackrock, Mr. Tong spent two years as an Index Research Analyst and seven years as a portfolio manager for a number of funds. As an Index Research Analyst, he was responsible for performing independent research and analysis to incorporate into Portfolio Management and Trading strategies and also developing and launching new indices and investment products, particularly in Latin America. As a portfolio manager, Ernesto managed \$40 billion in global ETF assets and was responsible for all aspects of portfolio management across domestic and international portfolios. Ernesto was also responsible for launching, managing, and driving the local Latin American ETF products for the portfolio management group, focusing on Brazil, Colombia and Mexico. Ernesto holds a B.A. from the University of California, Davis and is a CFA Charterholder. He holds security licenses 7 and 63.

Anand Desai. Prior to joining Penserra in 2015, Mr. Desai was an officer at State Street, where he had roles in portfolio accounting and client operations.

The Fund's SAI provides additional information about the compensation structure for the portfolio managers, other accounts that the portfolio managers manage and the ownership of Shares by the portfolio managers.

Pursuant to an investment advisory agreement, the Fund pays the Adviser an annual management fee equal to 0.95% of its average daily net assets. The Adviser's management fee is designed to pay the Fund's expenses and to compensate the Adviser for providing services to the Fund. Out of the management fee, the Adviser pays substantially all expenses of the Fund, including the cost of transfer agency, custody, fund administration, legal, audit and other service and license fees, except for distribution and service fees payable pursuant to a Rule 12b-1 plan, if any, brokerage commissions and other expenses connected with the execution of portfolio transactions, taxes, interest, and extraordinary expenses.

Pursuant to investment sub-advisory agreements, each Sub-Adviser receives a sub-advisory based upon the Fund's average daily net assets. The Fund does not directly pay the Sub-Advisers. The Adviser is responsible for paying the entire amount of each Sub-Adviser's fee for the Fund.

A discussion regarding the basis for the Board's approval of the Trust's investment advisory agreement and the sub-advisory agreements on behalf of the Fund is available in the Fund's Semi-Annual Report to shareholders for the fiscal period ended April 30, 2017.

Manager of Managers Structure. The Fund and the Adviser have received an exemptive order from the SEC to operate under a manager of managers structure that permits the Adviser, with the approval of the Board, to appoint and replace sub-advisers, enter into sub-advisory agreements, and materially amend and terminate sub-advisory agreements on behalf of the Fund without shareholder approval (the "Manager of Managers Structure"). Under the Manager of Managers Structure, the Adviser has ultimate responsibility, subject to oversight by the Board, for overseeing the Fund's sub-adviser(s) and recommending to the Board the hiring, termination, or replacement of any such sub-adviser(s)—including CWP and Penserra, each in its capacity as a Sub-Adviser. The exemptive order does not apply to any sub-adviser that is affiliated with the Fund or the Adviser.

The Manager of Managers Structure enables the Fund to operate with greater efficiency and without incurring the expense and delays associated with obtaining shareholder approvals for matters relating to sub-advisers or sub-advisory agreements. The Manager of Managers Structure does not permit an increase in the overall management and advisory fees payable by the Fund without shareholder approval. Shareholders will be notified of any changes made to sub-advisers or sub-advisory agreements within 90 days of the changes.

PRIOR RELATED PERFORMANCE OF CWP

The tables below illustrate the historical performance of CWP's Enhanced Dividend Income Portfolio ("EDIP"), which is derived from all separately managed accounts managed by CWP that have investment objectives, policies, and strategies that are substantially similar to those of the Fund. EDIP WRAP Composite consisted of approximately 1,052 accounts totaling approximately \$491 million in assets under management as of December 31, 2017.

EDIP is not subject to the diversification requirements and other restrictions imposed by the 1940 Act and the Internal Revenue Code of 1986, which, if applicable, might have adversely affected account performance. Returns are presented gross and net of the entire actual wrap fees and include the reinvestment of all income. Wrap fee accounts pay a fee based on a percentage of assets under management. Other than brokerage commissions, this fee includes investment management, portfolio monitoring, and, in some cases, custodial services. The custodial wrap fee schedule for separately managed clients is typically between 100 to 175 basis points, depending on the actual account size. Actual investment advisory fees incurred by clients may vary. The tables below also show how the performance of the composite compare over the time periods indicated with those of a broad measure of market performance and an index with similar investment objectives. You cannot invest directly in an index.

Of course, past performance is no indication of future results. The tables presented here represent the performance of other accounts managed by CWP on a calendar-year basis and not the actual performance of the Fund.

How to Buy and Sell Shares

The Fund issues or redeems its Shares at NAV per Share only in Creation Units.

Most investors buy and sell Shares in secondary market transactions through brokers. Shares are listed for trading on the secondary market on the Exchange. Shares can be bought and sold throughout the trading day like other publicly traded shares. There is no minimum investment. When buying or selling Shares through a broker, you will incur customary brokerage commissions and charges, and you may pay some or all of the spread between the bid and the offered price in the secondary market on each leg of a round trip (purchase and sale) transaction.

Share prices are reported in dollars and cents per Share.

APs may acquire Shares directly from the Fund, and APs may tender their Shares for redemption directly to the Fund, at NAV per Share only in Creation Units or Creation Unit Aggregations, and in accordance with the procedures described in the SAI.

The Fund may liquidate and terminate at any time without shareholder approval

BOOK ENTRY

Shares are held in book-entry form, which means that no stock certificates are issued. The Depository Trust Company (“DTC”) or its nominee is the record owner of all outstanding Shares and is recognized as the owner of all Shares for all purposes.

Investors owning Shares are beneficial owners as shown on the records of DTC or its participants. DTC serves as the securities depository for all Shares. Participants in DTC include securities brokers and dealers, banks, trust companies, clearing corporations and other institutions that directly or indirectly maintain a custodial relationship with DTC. As a beneficial owner of Shares, you are not entitled to receive physical delivery of stock certificates or to have Shares registered in your name, and you are not considered a registered owner of Shares. Therefore, to exercise any right as an owner of Shares, you must rely upon the procedures of DTC and its participants. These procedures are the same as those that apply to any other stocks that you hold in book entry or “street name” form.

FUND SHARE TRADING PRICES

The trading prices of Shares on the Exchange may differ from the Fund’s daily NAV. Market forces of supply and demand, economic conditions and other factors may affect the trading prices of Shares.

The approximate value of Shares, an amount representing on a per Share basis the sum of the current market price of the securities accepted by the Fund in exchange for Shares and an estimated cash component, will be disseminated every 15 seconds throughout the trading day through the facilities of the Consolidated Tape Association. This approximate value should not be viewed as a “real-time” update of the NAV per Share of the Fund because the approximate value may not be calculated in the same manner as the NAV, which is computed once a day, generally at the end of the business day. The Fund is not involved in, or responsible for, the calculation or dissemination of the approximate value and the Fund does not make any warranty as to its accuracy.

FREQUENT PURCHASES AND REDEMPTIONS OF FUND SHARES

Shares may be purchased and redeemed directly from the Fund only in Creation Units by APs that have entered into agreements with the Fund’s distributor. The vast majority of trading in Shares occurs on the secondary market and does not involve the Fund directly. In-kind purchases and redemptions of Creation Units by APs and cash trades on the secondary market are unlikely to cause many of the harmful effects of frequent purchases and/or redemptions of Shares. Cash purchases and/or redemptions of Creation Units, however, can result in increased tracking error, disruption of portfolio management, dilution to the Fund and increased transaction costs, which could negatively impact the Fund’s ability to achieve its investment objectives, and may lead to the realization of capital gains. These consequences may increase as the frequency of cash purchases and redemptions of Creation Units by APs increases. However, direct trading by APs is critical to ensuring that Shares trade at or close to NAV.

To minimize these potential consequences of frequent purchases and redemptions of Shares, the Fund imposes transaction fees on purchases and redemptions of Creation Units to cover the custodial and other costs the Fund incurs in effecting trades. In addition, the Fund reserves the right to not accept orders from APs that the Adviser has determined may be disruptive to the management of the Fund or otherwise are not in the best interests of the Fund. For these reasons, the Board has not adopted policies and procedures with respect to frequent purchases and redemptions of Shares.

Dividends, Distributions and Taxes

Ordinarily, dividends from net investment income, if any, are declared and paid at least annually by the Fund. The Fund distributes its net realized capital gains, if any, to shareholders annually.

Distributions in cash may be reinvested automatically in additional whole Shares only if the broker through whom you purchased Shares makes such option available.

TAXES

This section summarizes some of the main U.S. federal income tax consequences of owning Shares of the Fund. This section is current as of the date of this prospectus. Tax laws and interpretations change frequently, and these summaries do not describe all of the tax consequences to all taxpayers. For example, these summaries generally do not describe your situation if you are a corporation, a non-U.S. person, a broker-dealer, or other investor with special circumstances. In addition, this section does not describe your state, local or non-U.S. tax consequences.

This federal income tax summary is based in part on the advice of counsel to the Fund. The Internal Revenue Service could disagree with any conclusions set forth in this section. In addition, counsel to the Fund was not asked to review, and has not reached a conclusion with respect to, the federal income tax treatment of the assets to be included in the Fund. This may not be sufficient for you to use for the purpose of avoiding penalties under federal tax law.

As with any investment, you should seek advice based on your individual circumstances from your own tax advisor.

The Fund intends to continue to qualify as a “regulated investment company” under the federal tax laws. If the Fund qualifies as a regulated investment company and distributes its income as required by the tax law, the Fund generally will not pay federal income taxes.

Unless your investment in Shares is made through a tax-exempt entity or tax-deferred retirement account, such as an IRA plan, you need to be aware of the possible tax consequences when:

- Your Fund makes distributions,
- You sell your Shares listed on the Exchange, and
- You purchase or redeem Creation Units.

TAXES ON DISTRIBUTIONS

The Fund's distributions are generally taxable. After the end of each year, you will receive a tax statement that separates the distributions of the Fund into two categories, ordinary income distributions and capital gain dividends. Ordinary income distributions are generally taxed at your ordinary tax rate; however, as further discussed below, certain ordinary income distributions received from the Fund may be taxed at the capital gains tax rates. Generally, you will treat all capital gain dividends as long-term capital gains regardless of how long you have owned your Shares. To determine your actual tax liability for your capital gain dividends, you must calculate your total net capital gain or loss for the tax year after considering all of your other taxable transactions, as described below. In addition, the Fund may make distributions that represent a return of capital for tax purposes and thus will generally not be taxable to you; however, such distributions may reduce your tax basis in your Shares, which could result in you having to pay higher taxes in the future when Shares are sold, even if you sell the Shares at a loss from your original investment. The tax status of your distributions from the Fund is not affected by whether you reinvest your distributions in additional Shares or receive them in cash. The income from the Fund that you must take into account for federal income tax purposes is not reduced by amounts used to pay a deferred sales fee, if any. The tax laws may require you to treat distributions made to you in January as if you had received them on December 31 of the previous year.

Income from the Fund may also be subject to a 3.8% "Medicare tax." This tax generally applies to your net investment income if your adjusted gross income exceeds certain threshold amounts, which are \$250,000 in the case of married couples filing joint returns and \$200,000 in the case of single individuals.

A corporation that owns Shares generally will not be entitled to the dividends received deduction with respect to many dividends received from the Fund because the dividends received deduction is generally not available for distributions from regulated investment companies. However, certain ordinary income dividends on Shares that are attributable to qualifying dividends received by the Fund from certain corporations may be reported by the Fund as being eligible for the dividends received deduction. However, the presence of covered call options in the portfolio may reduce the amount of dividends that are treated as qualifying dividends.

If you are an individual, the maximum marginal stated federal tax rate for net capital gain is generally 20% (15% or 0% for taxpayers with taxable incomes below certain thresholds). Some portion of your capital gain dividends may be taxed at a higher maximum stated tax rate. Capital gains may also be subject to the Medicare tax described above.

Net capital gain equals net long-term capital gain minus net short-term capital loss for the taxable year. Capital gain or loss is long-term if the holding period for the asset is more than one year and is short-term if the holding period for the asset is one year or less. You must exclude the date you purchase your Share to determine your holding period. However, if you receive a capital gain dividend from the Fund and sell your Shares at a loss after holding it for six months or less, the loss will be recharacterized as long-term capital loss to the extent of the capital gain dividend received. The tax rates for capital gains realized from assets held for one year or less are generally the same as for ordinary income. The Code treats certain capital gains as ordinary income in special situations. The presence of covered call options in the portfolio may reduce the amount of dividends that would otherwise be treated as capital gain dividends.

Ordinary income dividends received by an individual shareholder from a regulated investment company such as the Fund are generally taxed at the same rates that apply to net capital gain (as discussed above), provided certain holding period requirements are satisfied and provided the dividends are attributable to qualifying dividends received by the Fund itself. Dividends received by the Fund from foreign corporations are qualifying dividends only in limited circumstances. Further, the presence of covered call options in the portfolio may reduce the amount of dividends that are eligible for capital gains tax rates. The Fund will provide notice to its shareholders of the amount of any distribution which may be taken into account as a dividend which is eligible for the capital gains tax rates.

TAXES ON EXCHANGE-LISTED SHARE SALES

If you sell or redeem your Shares, you will generally recognize a taxable gain or loss. To determine the amount of this gain or loss, you must subtract your tax basis in your Shares from the amount you receive in the transaction. Your tax basis in your Shares is generally equal to the cost of your Shares, generally including sales charges. In some cases, however, you may have to adjust your tax basis after you purchase your Shares.

TAXES ON PURCHASE AND REDEMPTION OF CREATION UNITS

If you exchange securities for Creation Units you will generally recognize a gain or a loss. The gain or loss will be equal to the difference between the market value of the Creation Units at the time and your aggregate basis in the securities surrendered and the cash component paid. If you exchange Creation Units for securities, you will generally recognize a gain or loss equal to the difference between your basis in the Creation Units and the aggregate market value of the securities received and the cash redemption amount. The Internal Revenue Service, however, may assert that a loss realized upon an exchange of securities for Creation Units or Creation Units for securities cannot be deducted currently under the rules governing "wash sales," or on the basis that there has been no significant change in economic position.

TREATMENT OF FUND EXPENSES

Expenses incurred and deducted by the Fund will generally not be treated as income taxable to you. In some cases, however, you may be required to treat your portion of these Fund expenses as income. You may not be able to deduct some or all of these expenses.

NON-U.S. TAX CREDIT

If the Fund invests in non-U.S. securities, the tax statement that you receive may include an item showing non-U.S. taxes the Fund paid to other countries. In this case, dividends taxed to you will include your share of the taxes the Fund paid to other countries. You may be able to deduct or receive a tax credit for your share of these taxes.

NON-U.S. INVESTORS

If you are a non-U.S. investor (*i.e.*, an investor other than a U.S. citizen or resident or a U.S. corporation, partnership, estate or trust), you should be aware that, generally, subject to applicable tax treaties, distributions from the Fund will be characterized as dividends for federal income tax purposes (other than dividends which the Fund properly reports as capital gain dividends) and will be subject to U.S. federal income taxes, including withholding taxes, subject to certain exceptions described below. However, distributions received by a non-U.S. investor from the Fund that are properly reported by the Fund as capital gain dividends may not be subject to U.S. federal income taxes, including withholding taxes, provided that the Fund makes certain elections and certain other conditions are met. Distributions from the Fund that are properly reported by the Fund as an interest-related dividend attributable to certain interest income received by the Fund or as a short-term capital gain dividend attributable to certain net short-term capital gain income received by the Fund may not be subject to U.S. federal income taxes, including withholding taxes when received by certain non-U.S. investors, provided that the Fund makes certain elections and certain other conditions are met.

Distributions may be subject to a U.S. withholding tax of 30% in the case of distributions to (i) certain non-U.S. financial institutions that have not entered into an agreement with the U.S. Treasury to collect and disclose certain information and are not resident in a jurisdiction that has entered into such an agreement with the U.S. Treasury and (ii) certain other non-U.S. entities that do not provide certain certifications and information about the entity's U.S. owners. Dispositions of Shares by such persons may be subject to such withholding after December 31, 2018.

INVESTMENTS IN CERTAIN NON-U.S. CORPORATIONS

If the Fund holds an equity interest in any "passive foreign investment companies" ("PFICs"), which are generally certain non-U.S. corporations that receive at least 75% of their annual gross income from passive sources (such as interest, dividends, certain rents and royalties or capital gains) or that hold at least 50% of their assets in investments producing such passive income, the Fund could be subject to U.S. federal income tax and additional interest charges on gains and certain distributions with respect to those equity interests, even if all the income or gain is timely distributed to its shareholders. The Fund will not be able to pass through to its shareholders any credit or deduction for such taxes. The Fund may be able to make an election that could ameliorate these adverse tax consequences. In this case, the Fund would recognize as ordinary income any increase in the value of such PFIC shares, and as ordinary loss any decrease in such value to the extent it did not exceed prior increases included in income. Under this election, the Fund might be required to recognize in a year income in excess of its distributions from PFICs and its proceeds from dispositions of PFIC stock during that year, and such income would nevertheless be subject to the distribution requirement and would be taken into account for purposes of the 4% excise tax. Dividends paid by PFICs are not treated as qualified dividend income.

Distribution Plan

Quasar Distributors LLC (the "Distributor") serves as the distributor of Creation Units for the Fund on an agency basis. The Distributor does not maintain a secondary market in Shares.

The Board has adopted a Distribution and Service Plan pursuant to Rule 12b-1 under the 1940 Act. In accordance with its Rule 12b-1 plan, the Fund is authorized to pay an amount up to 0.25% of its average daily net assets each year to reimburse the Distributor for amounts expended to finance activities primarily intended to result in the sale of Creation Units or the provision of investor services. The Distributor may also use this amount to compensate securities dealers or other persons that are APs for providing distribution assistance, including broker-dealer and shareholder support and educational and promotional services.

The Fund does not and has no current intention of paying 12b-1 fees. However, in the event 12b-1 fees are charged in the future, because these fees are paid out of the Fund's assets, over time these fees will increase the cost of your investment and may cost you more than certain other types of sales charges.

Net Asset Value

The Fund's NAV is determined as of the close of trading (normally 4:00 p.m., Eastern time) on each day the New York Stock Exchange is open for business. NAV is calculated for the Fund by taking the market price of the Fund's total assets, including interest or dividends accrued but not yet collected, less all liabilities, and dividing such amount by the total number of Shares outstanding. The result, rounded to the nearest cent, is the net asset value per Share. All valuations are subject to review by the Board or its delegate.

The Fund's investments are valued daily in accordance with valuation procedures adopted by the Board, and in accordance with provisions of the 1940 Act. Certain securities in which the Fund may invest are not listed on any securities exchange or board of trade. Such securities are typically bought and sold by institutional investors in individually negotiated private transactions that function in many respects like an over the counter secondary market, although typically no formal market makers exist. Certain securities, particularly debt securities, have few or no trades, or trade infrequently, and information regarding a specific security may not be widely available or may be incomplete. Accordingly, determinations of the fair value of debt securities may be based on infrequent and dated information. Because there is less reliable, objective data available, elements of judgment may play a greater role in valuation of debt securities than for other types of securities. Typically, debt securities are valued using information provided by a third-party pricing service. The third-party pricing service primarily uses broker quotes to value the securities.

The Fund's investments will be valued daily at market value or, in the absence of market value with respect to any investment, at fair value in accordance with valuation procedures adopted by the Board and in accordance with the 1940 Act. Market value prices represent last sale or official closing prices from a national or foreign exchange (*i.e.*, a regulated market) and are primarily obtained from third-party pricing services.

Certain securities may not be able to be priced by pre-established pricing methods. Such securities may be valued by the Board or its delegate at fair value. The use of fair value pricing by the Fund is governed by valuation procedures adopted by the Board and in accordance with the provisions of the 1940 Act. These securities generally include, but are not limited to, certain restricted securities (securities which may not be publicly sold without registration under the Securities Act of 1933, as amended (the "Securities Act")) for which a pricing service is unable to provide a market price; securities whose trading has been formally suspended; a security whose market price is not available from a pre-established pricing source; a security with respect to which an event has occurred that is likely to materially affect the value of the security after the market has closed but before the calculation of the Fund's net asset value or make it difficult or impossible to obtain a reliable market quotation; and a security whose price, as provided by the pricing service, does not reflect the security's "fair value." As a general principle, the current "fair value" of a security would appear to be the amount which the owner might reasonably expect to receive for the security upon its current sale. The use of fair value prices by the Fund generally results in the prices used by the Fund that may differ from current market quotations or official closing prices on the applicable exchange. A variety of factors may be considered in determining the fair value of such securities. Valuing the Fund's securities using fair value pricing will result in using prices for those securities that may differ from current market valuations. See the SAI for details.

Even when market quotations are available for portfolio securities, they may be stale or unreliable because the security is not traded frequently, trading on the security ceased before the close of the trading market or issuer-specific events occurred after the security ceased trading or because of the passage of time between the close of the market on which the security trades and the close of the Exchange and when the Fund calculates its NAV. Events that may cause the last market quotation to be unreliable include a merger or insolvency, events which affect a geographical area or an industry segment, such as political events or natural disasters, or market events, such as a significant movement in the U.S. market. Where market quotations are not readily available, including where the Adviser determines that the closing price of the security is unreliable, the Adviser will value the security at fair value in good faith using procedures approved by the Board. Fair value pricing involves subjective judgments and it is possible that a fair value determination for a security is materially different than the value that could be realized upon the sale of the security.

Fund Service Providers

U.S. Bancorp Fund Services, LLC, 615 East Michigan Street, Milwaukee, Wisconsin 53202, is the administrator, custodian and fund accounting and transfer agent for the Fund.

Chapman and Cutler LLP, 111 West Monroe Street, Chicago, Illinois 60603, serves as legal counsel to the Trust.

Cohen & Company, Ltd., 1350 Euclid Avenue, Suite 800, Cleveland, Ohio 44115, serves as the Fund's independent registered public accounting firm and is responsible for auditing the annual financial statements of the Fund.

Premium/Discount Information

The market prices of the Shares generally will fluctuate in accordance with changes in NAV, as well as the relative supply of and demand for Shares on the Exchange. The Adviser cannot predict whether the Shares will trade below, at or above their NAV. The approximate value of the Shares, which is an amount representing on a per share basis the sum of the current market price of the securities (and an estimated cash component) accepted by the Fund in exchange for Shares, will be disseminated every 15 seconds throughout the trading day through the facilities of the Consolidated Tape Association. This approximate value should not be viewed as a “real-time” update of the NAV per Share of the Fund because the approximate value may not be calculated in the same manner as the NAV, which is computed once a day, generally at the end of the business day. The Fund is not involved with, or responsible for, the calculation or dissemination of the approximate value, and the Fund does not make any warranty as to its accuracy.

Information regarding how often the Shares traded on the Exchange at a price above (at a premium) or below (at a discount) the NAV of the Fund during the past four calendar quarters, when available, will be found at www.amplifyetfs.com.

Financial Highlights

The financial highlights table is intended to help you understand the Fund's financial performance. The total return in the table represents the rate than an investor would have earned (or lost) on an investment in the Fund (assuming reinvestment of all dividends and distributions). This information has been derived from the Fund's financial statements, which have been audited by Cohen & Company, Ltd., the Fund's independent registered public accounting firm, whose report, along with this information and additional Fund performance and portfolio information appears in the Fund's Annual Report dated October 31, 2017.

	Period Ended October 31, 2017 ^(a)
Net Asset Value, Beginning of Period	\$ 25.00
Income (Loss) from Investment Operations:	
Net Investment Income ^(b)	0.39
Net Realized and Unrealized Gain	<u>2.92</u>
Total from Investment Operations	<u>3.31</u>
 Distributions to Shareholders	
Net Investment Income	(0.57)
Return on Capital	<u>(0.20)</u>
Total from Distributions	<u>(0.77)</u>
 Net Asset Value, End of Period	 <u>\$ 27.54</u>
Total Return on Net Asset Value ^(c)	13.40% ^(d)
 Supplemental Data:	
Net Assets, End of Period (000's)	\$ 11,016
Ratio of Expenses to Average Net Assets	0.95% ^(e)
Ratio of Net Investment Income (Loss) to Average Net Assets	1.67% ^(e)
Portfolio Turnover ^(f)	187% ^(d)

(a) The Fund commenced operations on December 14, 2016.

(b) Calculated based on average shares outstanding during the period.

(c) Total Return on Net Asset Value is based on the change in net asset value ("NAV") of a share during the period and assumes reinvestment of dividends and distributions at NAV. Total Return on Net Asset Value is for the period indicated and has not been annualized. The return shown does not reflect the deduction of taxes that a shareholder would pay on fund distributions or redemption of fund shares.

(d) Not Annualized.

(e) Annualized.

(f) Excludes the impact of in-kind transactions.

DELIVERY OF SHAREHOLDER DOCUMENTS—HOUSEHOLDING

Householding is an option available to certain investors of the Fund. Householding is a method of delivery, based on the preference of the individual investor, in which a single copy of certain shareholder documents can be delivered to investors who share the same address, even if their accounts are registered under different names. Householding for the Fund is available through certain broker-dealers. If you are interested in enrolling in householding and receiving a single copy of the prospectus and other shareholder documents, please contact your broker-dealer. If you currently are enrolled in householding and wish to change your householding status, please contact your broker-dealer.
