SUPPLEMENT TO EACH FUND’S PROSPECTUS

DATED JUNE 7, 2019

Notwithstanding anything to the contrary in each Fund’s prospectus, the second sentence of the first paragraph of the section entitled “Dividends, Distributions and Taxes” in each Fund’s prospectus is replaced in its entirety with the following:

“The Fund distributes its net realized capital gains, if any, to shareholders annually.”

PLEASE KEEP THIS SUPPLEMENT WITH YOUR PROSPECTUS FOR FUTURE REFERENCE

Amplify ETF Trust

Amplify CrowdBureau[®] Peer-to-Peer Lending & Crowdfunding ETF (NYSE Arca — LEND)

PROSPECTUS

May 6, 2019

Amplify CrowdBureau[®] Peer-to-Peer Lending & Crowdfunding ETF (the "Fund") is a series of Amplify ETF Trust and an exchange-traded index fund. The Fund lists and principally trades its shares on NYSE Arca, Inc. ("NYSE Arca" or the "Exchange")

The U.S. Securities and Exchange Commission ("SEC") has not approved or disapproved these securities or passed upon the accuracy or adequacy of this prospectus. Any representation to the contrary is a criminal offense.

AMPLIFY CROWDBUREAU® PEER-TO-PEER LENDING & CROWDFUNDING ETF

Summary Information

INVESTMENT OBJECTIVE

The Amplify Crowdbureau® Peer-to-Peer Lending & Crowdfunding ETF seeks investment results that generally correspond (before fees and expenses) to the price and yield of the CrowdBureau® Peer-to-Peer Lending and Equity Crowdfunding Index (the “Index”).

FUND FEES AND EXPENSES

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund (“Shares”). Investors may pay brokerage commissions on their purchases and sales of Shares, which are not reflected in the table or the example below.

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

Management Fees	0.65%
Distribution and Service (12b-1) Fees	0.00%
Other Expenses ⁽¹⁾	0.00%
Total Annual Fund Operating Expenses	0.65%

(1) Estimated based on the expenses the Fund expects to incur for the current fiscal year.

EXAMPLE

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds.

This example assumes that you invest \$10,000 in the Fund for the time periods indicated and then sell all of your Shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain at current levels. This example does not include the brokerage commissions that investors may pay to buy and sell Shares. Although your actual costs may be higher or lower, your costs, based on these assumptions, would be:

1 YEAR	3 YEARS
\$66	\$208

PORTFOLIO TURNOVER

The Fund pays transaction costs, such as commissions, when it purchases and sells securities (or “turns over” its portfolio). A higher portfolio turnover will cause the Fund to incur additional transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in Total Annual Fund Operating Expenses or in the example, may affect the Fund’s performance. Because the Fund has not yet commenced investment operations, no portfolio turnover information is available at this time.

PRINCIPAL INVESTMENT STRATEGIES

The Fund will normally invest at least 80% of its net assets (including investment borrowings) in the securities that comprise the Index. The Fund, using an indexing investment approach, attempts to replicate, before fees and expenses, the performance of the Index. Penserra Capital Management, LLC, the Fund’s investment sub-adviser, seeks a correlation of 0.95 or better (before fees and expenses) between the Fund’s performance and the performance of the Index; a figure of 1.00 would represent perfect correlation.

The Index is a rules-based stock index owned, developed and maintained by CrowdBureau Corporation (“CrowdBureau” or the “Index Provider”) designed to provide exposure to the U.S.-listed equity securities of companies comprising the “crowdfunding ecosystem.” “Crowdfunding” is an umbrella term generally referring to the financing method, typically internet-based, by which capital is raised through the solicitation of small individual investments or contributions from a large number of persons, entities or institutions that lend money directly or indirectly to businesses or consumers. This may be done through loan-based crowdfunding, more commonly referred to as “peer-to-peer lending,” whereby investors generally purchase nonrecourse notes representing fractional interests in specific underlying loans. It may also be done through investment-based crowdfunding. Also known as “equity crowdfunding” or “securities-based crowdfunding,” this method of crowdfunding allows investors to provide financing to privately-held companies through the purchase of such company’s debt or equity securities. Companies in this segment may also provide various ancillary and financial services.

In seeking to provide broad exposure to this emerging portion of the economy, the Index is devised to provide exposure to not only those companies that operate the platforms that facilitate peer-to-peer lending and investment-based crowdfunding, but also the providers of the technology and software that enable and facilitate the operation of these crowdfunding platforms. As such, the Index includes those companies with business operations that fall into one of the following four categories:

- *Peer-to-Peer Lending and Equity Crowdfunding Platforms.* Companies that derive at least 50% of their revenue from the operation of either: (i) loan-based lending platforms on which individuals and institutions may lend to individuals or businesses seeking loans and other credit-based offerings; or (ii) investment-based crowdfunding platforms, on which individuals and institutions may invest in unlisted equity or debt securities issued by businesses. Peer-to-peer lending platforms and financial institutions with a dedicated peer-to-peer lending and equity crowdfunding platform operate under specific federal, state, or local governmental regulations in their country of domicile and are identified by their publicly disclosed oversight or charter referencing specific regulations. Outside the United States, companies are governed by specifically defined crowdfunding laws, regulations, rules and policies of their countries of domicile.
- *Financial Institutions with Dedicated Peer-to-Peer Lending and Equity Crowdfunding Platforms.* Companies that offer dedicated peer-to-peer lending and/or equity crowdfunding in the form of a separate business line or cost unit within a larger financial services franchise.
- *Social Networking Platforms.* Companies operating social network platforms that enable individuals to lend or borrow without a bank serving as intermediary. This includes mobile banking, cash advances, remittances, and/or other forms of credit as part of a commerce ecosystem to support buyers, sellers or other customer groups.
- *Providers of Technology and Software Solutions.* Companies that derive their annual revenues from technologies, software solutions or data analytics intended to evaluate, underwrite, fund, provide financing and payment services that facilitate access to and extension of credit so as to enable and facilitate the operations of peer-to-peer lending and equity crowdfunding platforms.

Each of the four enumerated segments is assigned a fixed weight within the Index. The “Peer-to-Peer Lending and Equity Crowdfunding Platforms” segment is allocated 80% of the Index weight, the “Providers of Technology and Software Solutions” segment is allocated 14% of the Index weight, the “Social Networking Platforms” segment is allocated 5% of the Index weight and the “Financial Institutions with Dedicated Peer-to-Peer Lending and Equity Crowdfunding Platforms” segment is allocated 1% of the Index weight. This segment weight is distributed amongst the segment’s constituent securities based upon the segment’s weighting methodology. The securities comprising the Financial Institutions with Dedicated Peer-to-Peer Lending and Equity Crowdfunding Platforms segment and Social Networking Platforms segment are equally weighted. The securities comprising the Peer-to-Peer Lending and Equity Crowdfunding Platforms segment and the Providers of Technology and Software Solutions segment utilize a modified market cap-weighting methodology described in further detail in the section entitled “Additional Information About the Fund’s Strategies and Risks.”

The Index is composed of common stocks and depositary receipts issued by small, mid or large capitalization issuers operating in developed or emerging markets. The security selection process relies on publicly available information and data to identify those companies with business operations that fall into one of the four segments of the crowdfunding ecosystem enumerated above. Eligible companies must satisfy the following requirements:

- A security must be listed and traded on a nationally recognized securities exchange located in the United States;
- A security must be listed for trading at the end of each calendar quarter; and
- A security must have a market capitalization of at least \$75 million.

To qualify for a full weighting allocation, a security must register an average daily trading volume corresponding to at least 750,000 shares over a one-month interval, or average notional value of monthly trades of at least \$25 million over the prior six months, or lower volumes provided that any such securities are limited to no greater than 30% by market value. Securities with average daily trading volumes below the above described average daily trading volume are added to the Index at a maximum weight no greater than 0.5% until such time as the minimum trading volume threshold has been reached.

There is no limit as to the number of securities that can comprise the Index. The Index is rebalanced and reconstituted on a quarterly basis. The Fund is classified as “non-diversified” under the Investment Company Act of 1940, as amended (the “1940 Act”). To the extent the Index concentrates (i.e., holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent. As of February 28, 2019, the Index was composed of 35 securities with a market capitalization range of approximately \$138 million to \$674 billion. The Index also had significant exposure to Chinese issuers.

PRINCIPAL RISKS OF INVESTING IN THE FUND

You could lose money by investing in the Fund. An investment in the Fund is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency. There can be no assurance that the Fund's investment objective will be achieved.

Active Market Risk. Although the Shares are listed for trading on the Exchange, there can be no assurance that an active trading market for the Shares will develop or be maintained. Shares trade on the Exchange at market prices that may be below, at or above the Fund's net asset value. Securities, including the Shares, are subject to market fluctuations and liquidity constraints that may be caused by such factors as economic, political, or regulatory developments, changes in interest rates, and/or perceived trends in securities prices. Shares of the Fund could decline in value or underperform other investments.

Asia Risk. The Fund is subject to certain risks specifically associated with investments in the securities of Asian issuers. Many Asian economies have experienced rapid growth and industrialization, and there is no assurance that this growth rate will be maintained. Some Asian economies are highly dependent on trade, and economic conditions in other countries within and outside Asia can impact these economies. Certain of these economies may be adversely affected by trade or policy disputes with its major trade partners. There is also a high concentration of market capitalization and trading volume in a small number of issuers representing a limited number of industries, as well as a high concentration of investors and financial intermediaries. Certain Asian countries have experienced and may in the future experience expropriation and nationalization of assets, confiscatory taxation, currency manipulation, political instability, armed conflict and social instability as a result of religious, ethnic, socio-economic and/or political unrest. In particular, escalated tensions involving North Korea and any outbreak of hostilities involving North Korea could have a severe adverse effect on Asian economies. Governments of certain Asian countries have exercised, and continue to exercise, substantial influence over many aspects of the private sector. In certain cases, the government owns or controls many companies, including the largest in the country. Accordingly, government actions could have a significant effect on the issuers of the Fund's securities or on economic conditions generally.

Asset Concentration Risk. Since the Index, and therefore the Fund, may take concentrated positions in certain securities, the Fund's performance may be hurt disproportionately and significantly by the poor performance of those positions to which it has significant exposure. Asset concentration makes the Fund more susceptible to any single occurrence affecting the underlying positions and may subject the Fund to greater market risk than more diversified funds.

Authorized Participant Concentration Risk. Only an authorized participant may engage in creation or redemption transactions directly with the Fund. The Fund has a limited number of institutions that act as authorized participants on an agency basis (*i.e.* on behalf of other market participants). To the extent that these institutions exit the business or are unable to proceed with creation and/or redemption orders with respect to the Fund and no other authorized participant is able to step forward to create or redeem, in either of these cases, Shares may trade at a discount to the Fund's net asset value and possibly face delisting.

China Risk. The Fund is subject to certain risks specifically associated with investments in the securities of Chinese issuers, including those issuers with securities listed on the Hong Kong Stock Exchange. China is an emerging market and demonstrates significantly higher volatility from time to time in comparison to developed markets. The central government has historically exercised substantial control over virtually every sector of the Chinese economy through administrative regulation and/or state ownership and actions of the Chinese central and local government authorities continue to have a substantial effect on economic conditions in China. Export growth continues to be a major driver of China's rapid economic growth. Reduction in spending on Chinese products and services, institution of tariffs or other trade barriers, or a downturn in any of the economies of China's key trading partners may have an adverse impact on the Chinese economy. Recent developments in relations between the U.S. and China have heightened concerns of increased tariffs and restrictions on trade between the two countries. An increase in tariffs or trade restrictions, or even the threat of such developments, could lead to a significant reduction in international trade, which could have a negative impact on China's export industry and a commensurately negative impact on the Fund.

Concentration Risk. In following its methodology, the Index from time to time may be concentrated to a significant degree in securities of issuers located in a single industry or sector. To the extent that the Index concentrates in the securities of issuers in a particular industry or sector, the Fund will also concentrate its investments to approximately the same extent. By concentrating its investments in an industry or sector, the Fund may face more risks than if it were diversified broadly over numerous industries or sectors.

Currency Risk. Because the Fund's net asset value is determined in U.S. dollars, the Fund's net asset value could decline if a relevant non-U.S. currency depreciates against the U.S. Dollar or if there are delays or limits on the repatriation of such currency. Currency exchange rates can be very volatile and can change quickly and unpredictably. As a result, the Fund's net asset value may change quickly and without warning, which could have a significant negative impact on the Fund.

Cyber Security Risk. The Fund is susceptible to operational risks through breaches in cyber security. A breach in cyber security refers to both intentional and unintentional events that may cause the Fund to lose proprietary information, suffer data corruption or lose operational capacity. Such events could cause the Fund to incur regulatory penalties, reputational damage, additional compliance costs

associated with corrective measures and/or financial loss. Cyber security breaches may involve unauthorized access to the Fund's digital information systems through "hacking" or malicious software coding, but may also result from outside attacks such as denial-of-service attacks through efforts to make network services unavailable to intended users. In addition, cyber security breaches of the Fund's third-party service providers, such as its administrator, transfer agent, custodian, or sub-advisor, as applicable, or issuers in which the Fund invests, can also subject the Fund to many of the same risks associated with direct cyber security breaches. While the Fund has established business continuity plans and risk management systems designed to reduce the risks associated with cyber security, there are inherent limitations in such plans and systems. Additionally, there is no guarantee that such efforts will succeed, especially because the Fund does not directly control the cyber security systems of issuers or third-party service providers.

Depository Receipts Risk. Depository receipts may be subject to some of the same risks as direct investment in foreign companies, which includes international trade, currency, political, regulatory and diplomatic risks. Under an unsponsored depository receipt arrangement, the foreign issuer assumes no obligations and the depository's transaction fees are paid directly by the depository receipt holders. Because unsponsored depository receipt arrangements are organized independently and without the cooperation of the issuer of the underlying securities, available information concerning the foreign issuer may not be as current as for sponsored depository receipt and voting rights with respect to the deposited securities are not passed through. Depository receipts can involve currency risk since, unlike depository receipts, they may not be U.S. dollar-denominated.

Electronic Information Risk. Peer-to-peer loans are originated and documented in electronic form and there are generally no tangible written documents evidencing such loans or any payments owed thereon. As such, the crowdfunding ecosystem is susceptible to risks associated with such electronic systems. These risks include, among others: power loss, computer systems failures and Internet, telecommunications or data network failures; operator negligence or improper operation by, or supervision of, employees; physical and electronic loss of data or security breaches, misappropriation and similar events; computer viruses; cyber-attacks, intentional acts of vandalism and similar events; and hurricanes, fires, floods and other natural disasters.

Emerging Markets Risk. Investments in emerging market issuers are subject to a greater risk of loss than investments in issuers located or operating in more developed markets. This is due to, among other things, the potential for greater market volatility, lower trading volume, higher levels of inflation, political and economic instability, greater risk of a market shutdown and more governmental limitations on foreign investments in emerging market countries than are typically found in more developed markets. Moreover, emerging markets often have less uniformity in accounting and reporting requirements, less reliable securities valuations and greater risks associated with custody of securities than developed markets. In addition, emerging markets often have greater risk of capital controls through such measures as taxes or interest rate control than developed markets. Certain emerging market countries may also lack the infrastructure necessary to attract large amounts of foreign trade and investment.

Equity Securities Risk. The value of the Shares will fluctuate with changes in the value of the equity securities in which it invests. Equity securities prices fluctuate for several reasons, including changes in investors' perceptions of the financial condition of an issuer or the general condition of the relevant stock market, such as the current market volatility, or when political or economic events affecting the issuers occur.

Index Provider Risk. The Fund seeks to achieve returns that generally correspond, before fees and expenses, to the performance of the Index, as published by their Index Provider. There is no assurance that the Index Provider will compile the Index accurately, or that the Index will be determined, composed or calculated accurately. While the Index Provider gives descriptions of what the Index is designed to achieve, the Index Provider does not provide any warranty or accept any liability in relation to the quality, accuracy or completeness of data in its indices, and it does not guarantee that its Index will be in line with its methodology. Additionally, the Index Provider has a limited history of experience as an index provider or investment adviser for a registered fund, which may create additional risks for investing in the Fund.

International Closed Market Trading Risk. To the extent that the underlying securities held by the Fund trade on non-U.S. exchanges that may be closed when the Exchange is open, there are likely to be deviations between the current price of such an underlying security and the last quoted price for the underlying security. These deviations could result in premiums or discounts to the Fund's NAV that may be greater than those experienced by other exchange-traded funds.

Investments in Platforms Risk. The platforms in which the Fund may invest may have a higher risk profile and be more volatile than companies engaged in lines of business with a longer, established history and such investments should be viewed as longer term investments. The success of a platform is dependent upon their specific business model and market conditions. Any increase in default rates on a platform's peer-to-peer loans could adversely affect the platform's profitability and, therefore, the Fund's investments in the platform. The electronic systems on which platforms rely may be subject to cyber attacks that could result, among other things, in data breaches and the release of confidential information and thus expose the platform to significant liability. A security breach could also irreparably damage a platform's reputation and thus its ability to continue to operate its business.

Limited Operating History of Platforms Risk. Many of the peer-to-peer lending platforms, and investment crowdfunding in general, are in the early stages of development and have a limited operating history. As a result, there is limited historical data regarding the performance of peer-to-peer lending and the long-term outlook of the industry is uncertain.

Market Maker Risk. If the Fund has lower average daily trading volumes, it may rely on a small number of third-party market makers to provide a market for the purchase and sale of Shares. Any trading halt or other problem relating to the trading activity of these market makers could result in a dramatic change in the spread between the Fund's net asset value and the price at which the Shares are trading on the Exchange, which could result in a decrease in value of the Shares. In addition, decisions by market makers or authorized participants to reduce their role or step away from these activities in times of market stress could inhibit the effectiveness of the arbitrage process in maintaining the relationship between the underlying values of the Fund's portfolio securities and the Fund's market price. This reduced effectiveness could result in Shares trading at a discount to net asset value and also in greater than normal intra-day bid-ask spreads for Shares.

Market Risk. Market risk is the risk that a particular security owned by the Fund or the Shares in general may fall in value, including the possible loss of the entire principal amount that you invest. Securities are subject to market fluctuations caused by such factors as economic, political, regulatory or market developments, changes in interest rates and perceived trends in securities prices. Overall security values could decline generally or could underperform other investments.

New Fund Risk. The Fund currently has fewer assets than larger funds, and like other relatively new funds, large inflows and outflows may impact the Fund's market exposure for limited periods of time. Because the Fund is new, investors in the Fund bear the risk that the Fund may not be successful in implementing its investment strategy, may not employ a successful investment strategy, or may fail to attract sufficient assets under management to realize economies of scale, any of which could result in the Fund being liquidated at any time without shareholder approval and at a time that may not be favorable for all shareholders. Such liquidation could have negative tax consequences for shareholders and will cause shareholders to incur expenses of liquidation. Even if the Fund does not liquidate, if the Fund fails to attract a large amount of assets, shareholders of the Fund may incur higher expenses. Finally, because the Fund has fewer assets than larger funds over which to spread its fixed costs, its expense levels on a percentage basis will be higher than that of a larger Fund.

Non-Correlation Risk. The Fund's return may not match the return of the Index for a number of reasons. For example, the Fund incurs operating expenses not applicable to the Index, and incurs costs in buying and selling securities, especially when rebalancing the Fund's securities holdings to reflect changes in the composition of the Index. In addition, the performance of the Fund and the Index may vary due to asset valuation differences and differences between the Fund's portfolio and the Index resulting from legal restrictions, cost or liquidity constraints.

Non-Diversification Risk. Because the Fund is non-diversified and can invest a greater portion of its assets in securities of individual issuers than a diversified fund, changes in the market value of a single investment could cause greater fluctuations in Share price than would occur in a diversified fund. This may increase the Fund's volatility and cause the performance of a relatively small number of issuers to have a greater impact on the Fund's performance.

Non-U.S. Investment Risk. Securities issued by non-U.S. companies present risks beyond those of securities of U.S. issuers. Risks of investing in the securities of non-U.S. companies include: different accounting standards; expropriation, nationalization or other adverse political or economic developments; currency devaluation, blockages or transfer restrictions; changes in foreign currency exchange rates; taxes; restrictions on non-U.S. investments and exchange of securities; and less government supervision and regulation of issuers in non-U.S. countries. Prices of non-U.S. securities also may be more volatile.

Operational Risk. The Fund is exposed to operational risks arising from a number of factors, including, but not limited to, human error, processing and communication errors, errors of the Fund's service providers, counterparties or other third-parties, failed or inadequate processes and technology or systems failures. The Fund, Adviser and Sub-Adviser seek to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate to address these risks.

Passive Investment Risk. The Fund invests in the securities included in the Index regardless of their investment merit. The Fund does not attempt to outperform the Index or take defensive positions in declining markets. As a result, the Fund's performance may be adversely affected by a general decline in the market segments relating to the Index.

Premium/Discount Risk. The net asset value of Shares will generally fluctuate with changes in the market value of the Fund's holdings. The market prices of Shares will generally fluctuate in accordance with changes in net asset value as well as the relative supply of and demand for Shares on the Exchange. The Fund cannot predict whether Shares will trade below (discount), at or above (premium) their net asset value. Price differences may be due, in large part, to the fact that supply and demand forces at work in the secondary trading market for Shares will be closely related to, but not identical to, the same forces influencing the prices of the holdings of the Fund trading individually or in the aggregate at any point in time.

Regulatory Risk. The platforms in which the Fund invests are subject to various statutes, rules and regulations issued by federal, state and local government authorities. A failure to comply with the applicable rules and regulations may, among other things, subject the platform or its related entities to certain registration requirements with government authorities and the payment of any penalties and fines; result in the revocation of their licenses; cause the loan contracts originated by the platform to be voided or otherwise impair the enforcement of such loans; and subject them to potential civil and criminal liability, class action lawsuits and/or administrative or regulatory enforcement actions. Any of the foregoing could have a material adverse effect on a platform's financial condition, results of operations or ability to perform its obligations with respect to its lending business or could otherwise result in modifications in the platform's methods of doing business.

Risk of Regulation as an Investment Company or an Investment Adviser. If platforms or any related entities are required to register as investment companies under the 1940 Act or as investment advisers under the Investment Advisers Act of 1940, their ability to conduct business may be materially adversely affected, which may result in such entities being unable to perform their obligations with respect to their peer-to-peer loans, including applicable indemnity, guaranty, repurchasing and servicing obligations, and any contracts entered into by a platform or related entity while in violation of the registration requirements may be voidable.

Smaller Companies Risk. Small and/or mid-capitalization companies may be more vulnerable to adverse general market or economic developments, and their securities may be less liquid and may experience greater price volatility than larger, more established companies as a result of several factors, including limited trading volumes, products or financial resources, management inexperience and less publicly available information. Accordingly, such companies are generally subject to greater market risk than larger, more established companies.

Trading Issues Risk. Although the Shares of the Fund are listed for trading on the Exchange, there can be no assurance that an active trading market for such Shares will develop or be maintained. Trading in Shares on the Exchange may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in shares inadvisable. In addition, trading in Shares on the Exchange is subject to trading halts caused by extraordinary market volatility pursuant to Exchange "circuit breaker" rules. Market makers are under no obligation to make a market in the Fund's Shares, and authorized participants are not obligated to submit purchase or redemption orders for Creation Units. There can be no assurance that the requirements of the Exchange necessary to maintain the listing of the Fund will continue to be met or will remain unchanged. The Fund may have difficulty maintaining its listing on the Exchange in the event the Fund's assets are small or the Fund does not have enough shareholders.

The Shares will change in value, and you could lose money by investing in the Fund. The Fund may not achieve its investment objective.

PERFORMANCE

The Fund's performance information is only shown in the Fund summary when the Fund has had a full calendar year of operations.

MANAGEMENT OF THE FUND

Investment Adviser. Amplify Investments LLC ("Amplify Investments" or the "Adviser")

Sub-Advisers. Penserra Capital Management LLC ("Penserra" or the "Sub-Adviser")

Portfolio Managers. The following individuals serve as portfolio managers to the Fund.

- Dustin Lewellyn
- Ernesto Tong
- Anand Desai

Each portfolio manager is primarily responsible for the day-to-day management of the Fund. Each portfolio manager has served as part of the portfolio management team of the Fund since its inception in 2019.

PURCHASE AND SALE OF SHARES

The Fund issues and redeems Shares at net asset value (“NAV”) only with authorized participants (“APs”) that have entered into agreements with the Fund’s distributor and only in Creation Units (large blocks of 25,000 Shares) or multiples thereof (“Creation Unit Aggregations”), in exchange for the deposit or delivery of a basket of securities in which the Fund invests and/or cash. Except when aggregated in Creation Units, the Shares are not redeemable securities of the Fund.

Individual Shares may be purchased and sold only on a national securities exchange through brokers. Shares are expected to be listed for trading on the Exchange and because the Shares will trade at market prices rather than NAV, Shares may trade at prices greater than NAV (at a premium), at NAV, or less than NAV (at a discount).

TAX INFORMATION

The Fund’s distributions will generally be taxable as ordinary income or capital gains. A sale of Shares may result in capital gain or loss.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase Shares through a broker-dealer or other financial intermediary (such as a bank), the Adviser and Quasar Distributors LLC, the Fund’s distributor, may pay the intermediary for the sale of Shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.

Additional Information About the Fund's Strategies and Risks

PRINCIPAL INVESTMENT STRATEGIES

The Fund's investment objective may be changed by the Board of Trustees of the Trust (the "Board") without shareholder approval. Additionally, the Fund may liquidate and terminate at any time without shareholder approval.

The Fund uses an "indexing" investment approach to attempt to replicate, before fees and expenses, the performance of the Index. The Sub-Adviser seeks correlation over time of 0.95 or better between the Fund's performance and the performance of the Index; a figure of 1.00 would represent perfect correlation. Another means of evaluating the relationship between the returns of the Fund and the Index is to assess the "tracking error" between the two. Tracking error means the variation between the Fund's annual return and the return of the Index, expressed in terms of standard deviation. The Fund seeks to have a tracking error of less than 5%, measured on a monthly basis over a one-year period by taking the standard deviation of the difference in the Fund's returns versus the Index's returns.

The Fund generally invests in all of the securities comprising the Index in proportion to the weightings of the securities in the Index. However, under various circumstances, it may not be possible or practicable to purchase all of those securities in those same weightings. In those circumstances, the Fund may employ a representative sampling indexing strategy to track the Index. "Representative sampling" is an indexing strategy that involves investing in a representative sample of securities that collectively has an investment profile similar to that of the Index. The securities selected are expected to have, in the aggregate, investment characteristics (based on factors such as market capitalization and industry weightings), fundamental characteristics (such as return variability and yield) and liquidity measures similar to those of the Index. The Fund may or may not hold all of the securities in the Index.

Additional Information about the Index

The CrowdBureau® Peer-to-Peer Lending and Equity Crowdfunding Index seeks to track the performance of companies comprising the "crowdfunding ecosystem." The Index is owned, developed and maintained by CrowdBureau Corporation. To be included in the Index, a company or its issued securities must meet the following requirements:

- Be an equity security, or an ADR, ADS or GDR representing an equity security, issued by a company in the peer-to-peer lending and equity crowdfunding ecosystem;
- A security must generally be listed and traded on a nationally recognized securities exchange in the United States;
- A security must be listed for trading at the end of each calendar quarter; and
- A security must have a market capitalization of at least \$75 million.

To qualify for a full weighting allocation, a security must register an average daily trading volume corresponding to at least 750,000 shares over a one-month interval, or average notional value of monthly trades of at least \$25 million over the prior six months, or lower volumes provided that any such securities are limited to no greater than 30% by market value. Securities with average daily trading volumes below the above described average daily trading volume are added to the Index at a maximum weight no greater than 0.5% until such time as the minimum trading volume threshold has been reached.

Index eligibility is also restricted to companies comprising the peer-to-peer lending and equity crowdfunding ecosystem, as determined by CrowdBureau. On a quarterly basis, CrowdBureau evaluates the business operations of companies that have equity securities listed and traded on a nationally recognized securities exchange in the United States to determine whether such business operations fall into one of the four segments that make up the peer-to-peer lending ecosystem based upon data available from public sources. Companies are assigned to one of the four segments that make up the peer-to-peer lending ecosystem set forth below.

- Peer-to-Peer Lending and Equity Crowdfunding Platforms. Companies that derive at least 50% of their revenue from the operation of either: (i) loan-based lending platforms on which individuals and institutions may lend to individuals or businesses seeking loans and other credit-based offerings; or (ii) investment-based crowdfunding platforms, on which individuals and institutions may invest in unlisted equity or debt securities issued by businesses. Peer-to-peer lending platforms and financial institutions with a dedicated peer-to-peer lending and equity crowdfunding platform operate under specific federal, state, or local governmental regulations in their country of domicile and are identified by their publicly disclosed oversight or charter referencing specific regulations. Outside the United States, companies are governed by specifically defined crowdfunding laws, regulations, rules and policies of their countries of domicile.
- Financial Institutions with Dedicated Peer-to-Peer Lending and Equity Crowdfunding Platforms. Companies that offer dedicated peer-to-peer lending and/or equity crowdfunding in the form of a separate business line or cost unit within a larger financial services franchise.

- *Social Networking Platforms.* Companies operating social network platforms that enable individuals to lend or borrow without a bank serving as intermediary. This includes mobile banking, cash advances, remittances, and/or other forms of credit as part of a commerce ecosystem to support buyers, sellers or other customer groups.
- *Providers of Technology and Software Solutions.* Companies that derive their annual revenues from technologies, software solutions or data analytics intended to evaluate, underwrite, fund, provide financing and payment services that facilitate access to and extension of credit so as to enable and facilitate the operations of peer-to-peer lending and equity crowdfunding platforms.

Weighting. The Index relies on a modified weighting methodology that combines two cap-weighted segments and two equal-weight segments to establish an Index in which the weight of a single security and/or the sum of the weights of the securities representing a defined group are constrained to a maximum weight. The securities comprising the Financial Institutions with Dedicated Peer-to-Peer Lending and Equity Crowdfunding Platforms segment and Social Networking Platforms segment are equally weighted. The securities comprising the Peer-to-Peer Lending and Equity Crowdfunding Platforms segment and the Providers of Technology and Software Solutions segment utilize a modified market cap-weighting methodology described below.

Modified Market-Cap Weighting. The securities comprising the Peer-to-Peer Lending and Equity Crowdfunding Platforms segment and Providers of Technology and Software Solutions segment are weighted according to their market capitalization, subject to the following diversification requirements: (1) the market capitalization weighted value of any single constituent stock may not exceed 24% of the value of the index, and (2) the sum of the constituent stocks with weights greater than 4.8% cannot exceed 50% of the Index weight.

If a constituent stock violates condition (1), its weight is reduced to 24%. At the same time, if one or more constituent stocks attains a weight less than 24% and equal to or greater than 5%, the weights of the constituent stocks with weights at the lowest end of the range at or over 5% is reduced to 4.8% until condition (2) is fulfilled. The total difference resulting from these reductions will be reallocated proportionately across the higher weighted stocks, excluding stocks with weights equal to or greater than 24%. If as a result of the above-mentioned reallocation process condition (2) is violated again, the weights greater than 4.8% will be reduced proportionately to a total weight of 48%, and the difference will be reallocated proportionately across the stocks weighted less than 4.8%. If as a result of the above-mentioned reallocation process one or more weights are greater than 4.8%, they will be reduced to 4.8% each, and the difference will be reallocated proportionately across the stocks weighted less than 4.8%. If required, this process will be repeated until no more weights greater than 4.8% are left at the lower end of the constituent range. Note that securities with “low” average daily trading volumes will be assigned a fixed weight of 0.5% each, and they will not be included in the calculations of market capitalization weighted values.

Rebalance and Reconstitution. The Index is rebalanced and may be reconstituted on a quarterly basis to reflect additions to as well as any deletions of securities classified as peer-to-peer lending and equity crowdfunding platforms, financial institutions with dedicated peer-to-peer lending and equity crowdfunding platforms, social network(ing) platforms and providers of technology and software solutions.

Additional Information About Peer-to-Peer Lending

Peer-to-peer lending is a crowdsourcing approach to lending money to consumers and businesses through online intermediary platforms that match lenders with borrowers. As of February 28, 2019, 16 peer-to-peer platforms are eligible for inclusion in the Index. However, an estimated 500+ platforms exist worldwide with high concentrations operating in the U.S., Europe and Asia.

The Index’s investability criteria starting point to be included in the Index is that a potential company must be publicly traded, can be domiciled globally, but must be listed for trading in the United States (“U.S”), including common stock, American Depositary Receipts (“ADRs”), American Depositary Shares (“ADSs”) and Global Depositary Receipts (“GDRs”). From this initial universe, the additional rules are applied from the four definitions, such as market capitalization. As of February 28, 2019, only 16 platforms meet the criteria for inclusion, although there are over 500 non-publicly traded online marketplace peer-to-peer lenders.

Peer-to-peer lending has experienced significant growth in the past five years. The availability of capital, a low interest rate environment with demand for yield, technological advances and the use of “big data” are enabling and contributing to a change in the way consumers and small-to-medium-sized businesses secure financing. According to CrowdBureau’s direct data collection from peer-to-peer lending platforms and estimates from the US Treasury Department, the peer-to-peer lending market originated an estimated \$98 billion in loans by year-end 2017 across the United States, Europe and Asia.

NON-PRINCIPAL INVESTMENT STRATEGIES

Securities Lending. The Fund may lend its portfolio securities to brokers, dealers and other financial institutions. In connection with such loans, the Fund receives liquid collateral equal to at least 102% (105% for international securities) of the value of the loaned portfolio securities. This collateral is marked-to-market on a daily basis. To the extent that the Fund receives cash collateral, it will invest such collateral in readily marketable, high quality, short-term obligations.

Fund Investments

EQUITY SECURITIES

The Fund invests in equity securities, which primarily includes common stocks and depositary receipts. Depositary receipts may be “sponsored” or “unsponsored.” Sponsored depositary receipts are established jointly by a depositary and the underlying issuer, whereas unsponsored depositary receipts may be established by a depositary without participation by the underlying issuer.

CASH EQUIVALENTS AND SHORT-TERM INVESTMENTS

The Fund may invest in securities with maturities of less than one year or cash equivalents, or it may hold cash. The percentage of the Fund invested in such holdings varies and depends on several factors, including market conditions. For more information on eligible short-term investments, see the statement of additional information.

Additional Information Regarding Fund Risks

The following provides additional information about certain of the principal risks identified under “Principal Risks of Investing in the Fund” in the Fund’s “Summary Information” section.

Risk is inherent in all investing. Investing in the Fund involves risk, including the risk that you may lose all or part of your investment. There can be no assurance that the Fund will meet its stated objectives. Before you invest, you should consider the following risks in addition to the Principal Risks set forth above in this prospectus.

Active Market Risk. Although the Shares are listed for trading on the Exchange, there can be no assurance that an active trading market for the Shares will develop or be maintained. Shares trade on the Exchange at market prices that may be below, at or above the Fund’s net asset value. Securities, including the Shares, are subject to market fluctuations and liquidity constraints that may be caused by such factors as economic, political, or regulatory developments, changes in interest rates, and/or perceived trends in securities prices. Shares of the Fund could decline in value or underperform other investments.

Asset Concentration Risk. Since the Index, and therefore the Fund, may take concentrated positions in certain securities, the Fund’s performance may be hurt disproportionately and significantly by the poor performance of those positions to which it has significant exposure. Asset concentration makes the Fund more susceptible to any single occurrence affecting the underlying positions and may subject the Fund to greater market risk than more diversified funds.

Authorized Participant Concentration Risk. Only an authorized participant may engage in creation or redemption transactions directly with the Fund. The Fund has a limited number of institutions that act as authorized participants. To the extent that these institutions exit the business or are unable to proceed with creation and/or redemption orders with respect to the Fund and no other authorized participant is able to step forward to create or redeem, in either of these cases, Shares may trade at a discount to the Fund’s NAV and possibly face delisting.

Concentration Risk. In following its methodology, the Index from time to time may be concentrated to a significant degree in securities of issuers located in a single industry or a sector. To the extent that the Index concentrates in the securities of issuers in a particular industry or sector, the Fund will also concentrate its investments to approximately the same extent. By concentrating its investments in an industry or sector, the Fund faces more risks than if it were diversified broadly over numerous industries or sectors. Such industry-based risks, any of which may adversely affect the companies in which the Fund invests, may include, but are not limited to, the following: general economic conditions or cyclical market patterns that could negatively affect supply and demand in a particular industry; competition for resources, adverse labor relations, political or world events; obsolescence of technologies; and increased competition or new product introductions that may affect the profitability or viability of companies in an industry. In addition, at times, such industry or sector may be out of favor and underperform other industries or the market as a whole.

Currency Risk. Because the Fund’s NAV is determined in U.S. dollars, the Fund’s NAV could decline if the currency of a non-U.S. market in which the Fund invests depreciates against the U.S. dollar or if there are delays or limits on repatriation of such currency. Currency exchange rates can be very volatile and can change quickly and unpredictably. As a result, the Fund’s NAV may change quickly and without warning.

Cyber Security Risk. The Fund, Adviser, Sub-Adviser, service providers, authorized participants and the Exchange are susceptible to operational, information security and related “cyber” risks both directly and through their service providers. Similar types of cyber security risks are also present for issuers of securities in which the Fund invests, which could result in material adverse consequences for such issuers and may cause the Fund’s investment in such portfolio companies to lose value. Unlike many other types of risks faced by the Fund, these risks typically are not covered by insurance. In general, cyber incidents can result from deliberate attacks or unintentional events. Cyber incidents include, but are not limited to, gaining unauthorized access to digital systems (e.g., through “hacking” or malicious software

coding) for purposes of misappropriating assets or sensitive information, corrupting data, or causing operational disruption. Cyber attacks may also be carried out in a manner that does not require gaining unauthorized access, such as causing denial-of-service attacks on websites (*i.e.*, efforts to make network services unavailable to intended users). Cyber security failures by or breaches of the systems of the Adviser, Sub-Adviser, distributor and other service providers (including, but not limited to, index providers, fund accountants, custodians, transfer agents and administrators), market makers, authorized participants or the issuers of securities in which the Fund invests, have the ability to cause disruptions and impact business operations, potentially resulting in: financial losses, interference with the Fund's ability to calculate its NAV, disclosure of confidential trading information, impediments to trading, submission of erroneous trades or erroneous creation or redemption orders, the inability of the Fund or its service providers to transact business, violations of applicable privacy and other laws, regulatory fines, penalties, reputational damage, reimbursement or other compensation costs, or additional compliance costs. In addition, cyber attacks may render records of Fund assets and transactions, shareholder ownership of Shares, and other data integral to the functioning of the Fund inaccessible or inaccurate or incomplete. Substantial costs may be incurred by the Fund in order to resolve or prevent cyber incidents in the future. While the Fund has established business continuity plans in the event of, and risk management systems to prevent, such cyber attacks, there are inherent limitations in such plans and systems, including the possibility that certain risks have not been identified and that prevention and remediation efforts will not be successful. Furthermore, the Fund cannot control the cyber security plans and systems put in place by service providers to the Fund, issuers in which the Fund invests, market makers or authorized participants. The Fund and its shareholders could be negatively impacted as a result.

Depository Receipts Risk. Depository receipts may be subject to certain of the risks associated with direct investments in the securities of non-U.S. companies, such as currency, political, economic and market risks, because their values depend on the performance of the non-dollar denominated underlying non-U.S. securities. Certain countries may limit the ability to convert depository receipts into the underlying non-U.S. securities and vice versa, which may cause the securities of the non-U.S. company to trade at a discount or premium to the market price of the related depository receipts. Depository receipts may be purchased through "sponsored" or "unsponsored" facilities. A sponsored facility is established jointly by a depository and the issuer of the underlying security. A depository may establish an unsponsored facility without participation by the issuer of the deposited security. Unsponsored receipts may involve higher expenses and may be less liquid. Holders of unsponsored depository receipts generally bear all the costs of such facilities, and the depository of an unsponsored facility frequently is under no obligation to distribute shareholder communications received from the issuer of the deposited security or to pass through voting rights to the holders of such receipts in respect of the deposited securities.

Electronic Information Risk. Peer-to-peer loans are originated and documented in electronic form and there are generally no tangible written documents evidencing such loans or any payments owed thereon. As such, the crowdfunding ecosystem is susceptible to risks associated with such electronic systems. These risks include, among others: power loss, computer systems failures and Internet, telecommunications or data network failures; operator negligence or improper operation by, or supervision of, employees; physical and electronic loss of data or security breaches, misappropriation and similar events; computer viruses; cyber attacks, intentional acts of vandalism and similar events; and hurricanes, fires, floods and other natural disasters. In addition, platforms rely on software that is highly technical and complex and depend on the ability of such software to store, retrieve, process and manage immense amounts of data. Such software may contain errors or bugs. Any errors, bugs or defects discovered in the software on which a platform relies could negatively impact operations of the platform and the ability of the platform to perform its obligations with respect to the peer-to-peer loans originated by the platform.

Emerging Markets Risk. Investments in emerging market issuers are subject to a greater risk of loss than investments in issuers located or operating in more developed markets. This is due to, among other things, the potential for greater market volatility, lower trading volume, higher levels of inflation, political and economic instability, greater risk of a market shutdown and more governmental limitations on foreign investments in emerging market countries than are typically found in more developed markets. Moreover, emerging markets often have less uniformity in accounting and reporting requirements, less reliable securities valuations and greater risks associated with custody of securities than developed markets. In addition, emerging markets often have greater risk of capital controls through such measures as taxes or interest rate control than developed markets. Certain emerging market countries may also lack the infrastructure necessary to attract large amounts of foreign trade and investment.

Equity Securities Risk. Equity securities risk is the risk that the value of equity securities, including common stocks, will fall. The value of an equity security may fall due to changes in general economic conditions that impact the market as a whole and that are relatively unrelated to an issuer or its industry. These conditions include changes in interest rates, specific periods of overall market turbulence or instability, or general and prolonged periods of economic decline and cyclical change. An issuer's common stock in particular may be especially sensitive to, and more adversely affected by, these general movements in the stock market; it is possible that a drop in the stock market may depress the price of most or all of the common stocks that a Fund holds. In addition, equity risk includes the risk that investor sentiment toward, and perceptions regarding, particular industries or economic sectors will become negative. Price changes of equity securities may occur in a particular region, industry, or sector of the market, and as a result, the value of an issuer's common stock may fall solely because of factors, such as increases in production costs, that negatively impact other companies in the same industry or in a number of different industries. Equity securities risk also includes the financial risks of a specific company, including that the value of the company's securities may fall as a result of factors directly relating to that company, such as decisions made by its management or lower demand for the company's products or services. In particular, the common stock of a company may decline significantly in price over

short periods of time. For example, an adverse event, such as an unfavorable earnings report, may depress the value of common stock; similarly, the common stock of an issuer may decline in price if the issuer fails to make anticipated dividend payments because, among other reasons, the issuer experiences a decline in its financial condition.

Index Provider Risk. The Fund seeks to achieve returns that generally correspond, before fees and expenses, to the performance of their Index, as published by their Index Provider. There is no assurance that the Index Provider will compile its Index accurately, or that the Index will be determined, composed or calculated accurately. While the Index Provider gives descriptions of what the Index is designed to achieve, the Index Provider does not provide any warranty or accept any liability in relation to the quality, accuracy or completeness of data in its indices, and it does not guarantee that its Index will be in line with its methodology. Errors made by the Index Provider with respect to the quality, accuracy and completeness of the data within the Index may occur from time to time and may not be identified and corrected by the Index Provider for a period of time, if at all. Therefore, gains, losses or costs associated with Index Provider errors will generally be borne by the Fund and its shareholders. Additionally, the Index Provider has a limited history of experience as an index provider or investment adviser for a registered fund, which may create additional risks for investing in the Fund.

Investments in Platforms Risk. The platforms in which the Fund may invest may have a higher risk profile and be more volatile than companies engaged in lines of business with a longer, established history and such investments should be viewed as longer term investments. The success of a platform is dependent upon their specific business model and market conditions. Any increase in default rates on a platform's peer-to-peer loans could adversely affect the platform's profitability and, therefore, the Fund's investments in the platform. The electronic systems on which platforms rely may be subject to cyber attacks that could result, among other things, in data breaches and the release of confidential information and thus expose the platform to significant liability. A security breach could also irreparably damage a platform's reputation and thus its ability to continue to operate its business.

Limited Operating History of Platforms Risk. Many of the peer-to-peer lending platforms, and investment crowdfunding in general, are in the early stages of development and have a limited operating history. As a result, there is limited historical data regarding the performance of peer-to-peer lending and the long-term outlook of the industry is uncertain.

Market Maker Risk. If the Fund has lower average daily trading volumes, it may rely on a small number of third-party market makers to provide a market for the purchase and sale of Shares. Any trading halt or other problem relating to the trading activity of these market makers could result in a dramatic change in the spread between the Fund's net asset value and the price at which the Shares are trading on the Exchange, which could result in a decrease in value of the Shares. In addition, decisions by market makers or authorized participants to reduce their role or step away from these activities in times of market stress could inhibit the effectiveness of the arbitrage process in maintaining the relationship between the underlying values of the Fund's portfolio securities and the Fund's market price. This reduced effectiveness could result in Shares trading at a discount to net asset value and also in greater than normal intra-day bid-ask spreads for Shares.

Market Risk. Market risk is the risk that a particular security owned by the Fund or the Shares in general may fall in value, including the possible loss of the entire principal amount that you invest. Securities are subject to market fluctuations caused by such factors as economic, political, regulatory or market developments, changes in interest rates and perceived trends in securities prices. Overall security values could decline generally or could underperform other investments.

New Fund Risk. The Fund currently has fewer assets than larger funds, and like other new funds, large inflows and outflows may impact the Fund's market exposure for limited periods of time. Additionally, because the Fund has fewer assets than larger funds over which to spread its fixed costs, its expense levels on a percentage basis will be higher than that of a larger Fund.

Non-Correlation Risk. The Fund's return may not match the return of the Index for a number of reasons. For example, the Fund incurs operating expenses not applicable to the Index and incurs costs in buying and selling securities, especially when rebalancing the Fund's securities holdings to reflect changes in the composition of the Index. In addition, the performance of the Fund and the Index may vary due to asset valuation differences and differences between the Fund's portfolio and the Index resulting from legal restrictions, cost or liquidity constraints. The Fund may fair value certain of the securities it holds. The Fund may value portfolio securities traded on a foreign exchange using fair value when an event occurs after the close of the exchange that is likely to have changed the value of the securities. To the extent the Fund calculates its NAV based on fair value prices, the Fund's ability to track the Index may be adversely affected. Since the Index is not subject to the tax diversification requirements to which the Fund must adhere, the Fund may be required to deviate its investments from the securities and relative weightings of the Index. The Fund may not invest in certain securities included in the Index due to liquidity constraints. Liquidity constraints also may delay the Fund's purchase or sale of securities included in the Index. Although the Fund currently intends to seek to fully replicate the Index, the Fund may use a representative sampling approach, which may cause the Fund not to be as well-correlated with the return of the Index as would be the case if the Fund purchased all of the securities in the Index in the proportions represented in the Index.

Non-Diversification Risk. Because the Fund is non-diversified and can invest a greater portion of its assets in securities of individual issuers than a diversified fund, changes in the market value of a single investment could cause greater fluctuations in Share price than

would occur in a diversified fund. This may increase the Fund's volatility and cause the performance of a relatively small number of issuers to have a greater impact on the Fund's performance.

Non-U.S. Investment Risk. Securities issued by non-U.S. companies present risks beyond those of securities of U.S. issuers. Risks of investing in the securities of non-U.S. companies include: different accounting standards; expropriation, nationalization or other adverse political or economic developments; currency devaluation, blockages or transfer restrictions; changes in foreign currency exchange rates; taxes; restrictions on non-U.S. investments and exchange of securities; and less government supervision and regulation of issuers in non-U.S. countries. Prices of non-U.S. securities also may be more volatile.

Operational Risk. The Fund is exposed to operational risks arising from a number of factors, including, but not limited to, human error, processing and communication errors, errors of the Fund's service providers, counterparties or other third-parties, failed or inadequate processes and technology or systems failures. The Fund, Adviser and Sub-Adviser seek to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate to address these risks.

Passive Investment Risk. The Fund invests in the securities included in the Index regardless of their investment merit. The Fund does not attempt to outperform the Index or take defensive positions in declining markets, except in connection with the Index's risk reduction mechanism. As a result, the Fund's performance may be adversely affected by a general decline in the market segments relating to the Index.

Premium/Discount Risk. The net asset value of Shares will generally fluctuate with changes in the market value of the Fund's holdings. The market prices of Shares will generally fluctuate in accordance with changes in net asset value as well as the relative supply of and demand for Shares on the Exchange. The Fund cannot predict whether Shares will trade below (discount), at or above (premium) their net asset value. Price differences may be due, in large part, to the fact that supply and demand forces at work in the secondary trading market for Shares will be closely related to, but not identical to, the same forces influencing the prices of the holdings of the Fund trading individually or in the aggregate at any point in time.

Regulatory Risk. The platforms in which the Fund invests are subject to various statutes, rules and regulations issued by federal, state and local government authorities. A failure to comply with the applicable rules and regulations may, among other things, subject the platform or its related entities to certain registration requirements with government authorities and the payment of any penalties and fines; result in the revocation of their licenses; cause the loan contracts originated by the platform to be voided or otherwise impair the enforcement of such loans; and subject them to potential civil and criminal liability, class action lawsuits and/or administrative or regulatory enforcement actions. Any of the foregoing could have a material adverse effect on a platform's financial condition, results of operations or ability to perform its obligations with respect to its lending business or could otherwise result in modifications in the platform's methods of doing business.

Risk of Regulation as an Investment Company or an Investment Adviser. If platforms or any related entities are required to register as investment companies under the 1940 Act or as investment advisers under the Investment Advisers Act of 1940, their ability to conduct business may be materially adversely affected, which may result in such entities being unable to perform their obligations with respect to their peer-to-peer loans, including applicable indemnity, guaranty, repurchasing and servicing obligations, and any contracts entered into by a platform or related entity while in violation of the registration requirements may be voidable.

Smaller Companies Risk. Small and/or mid-capitalization companies may be more vulnerable to adverse general market or economic developments, and their securities may be less liquid and may experience greater price volatility than larger, more established companies as a result of several factors, including limited trading volumes, products or financial resources, management inexperience and less publicly available information. Accordingly, such companies are generally subject to greater market risk than larger, more established companies.

Trading Issues Risk. Although the Shares of the Fund are listed for trading on the Exchange, there can be no assurance that an active trading market for such Shares will develop or be maintained. Trading in Shares on the Exchange may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in shares inadvisable. In addition, trading in Shares on the Exchange is subject to trading halts caused by extraordinary market volatility pursuant to Exchange "circuit breaker" rules. Market makers are under no obligation to make a market in the Fund's Shares, and authorized participants are not obligated to submit purchase or redemption orders for Creation Units. There can be no assurance that the requirements of the Exchange necessary to maintain the listing of the Fund will continue to be met or will remain unchanged. The Fund may have difficulty maintaining its listing on the Exchange in the event the Fund's assets are small or the Fund does not have enough shareholders.

ADDITIONAL RISKS OF INVESTING IN THE FUND

The following section provides additional risk information regarding investing in the Fund.

Inflation Risk. Inflation may reduce the intrinsic value of increases in the value of the Fund. Inflation risk is the risk that the value of assets or income from investments will be less in the future as inflation decreases the value of money. As inflation increases, the value of the Fund's assets can decline as can the value of the Fund's distributions.

Legislation and Litigation Risk. Legislation or litigation that affects the value of securities held by the Fund may reduce the value of the Fund. From time to time, various legislative initiatives are proposed that may have a negative impact on certain securities in which the Fund invests. In addition, litigation regarding any of the securities owned by the Fund may negatively impact the value of the Shares. Such legislation or litigation may cause the Fund to lose value or may result in higher portfolio turnover if the Adviser determines to sell such a holding.

Limitations on Intraday Indicative Value Risk. The Exchange intends to disseminate the approximate per share value of the Fund's published basket of portfolio securities every 15 seconds (the "intraday indicative value" or "IIV"). The IIV should not be viewed as a "real-time" update of the NAV per Share because (i) the IIV may not be calculated in the same manner as the NAV, which is computed once a day, generally at the end of the business day, (ii) the calculation of NAV may be subject to fair valuation at different prices than those used in the calculations of the IIV, (iii) unlike the calculation of NAV, the IIV does not take into account Fund expenses, and (iv) the IIV is based on the published basket of portfolio securities and not on the Fund's actual holdings. The IIV calculations are based on local market prices and may not reflect events that occur subsequent to the local market's close, which could affect premiums and discounts between the IIV and the market price of the Shares. The Fund, Adviser and Sub-Adviser are not involved in, or responsible for, any aspect of the calculation or dissemination of the IIV and do not make any warranty as to the accuracy of these calculations.

Security Issuer Risk. Issuer-specific attributes may cause a security held by the Fund to be more volatile than the market generally. The value of an individual security or particular type of security may be more volatile than the market as a whole and may perform differently from the value of the market as a whole.

Securities Lending Risk. Securities lending involves a risk of loss because the borrower may fail to return the securities in a timely manner or at all. If the Fund were unable to recover the securities loaned, it may sell the collateral and purchase a replacement security in the market. Lending securities entails a risk of loss to the Fund if and to the extent that the market value of the loaned securities increases and the collateral is not increased accordingly. Any cash received as collateral for loaned securities will be invested in readily marketable, high quality, short-term obligations. This investment is subject to market appreciation or depreciation and the Fund will bear any loss on the investment of its cash collateral.

Portfolio Holdings

A description of the Trust's policies and procedures with respect to the disclosure of the Fund's portfolio holdings is available in the Fund's SAI, which is available at www.amplifyetfs.com.

Management of the Fund

FUND ORGANIZATION

The Fund is a series of the Trust, an investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). The Fund is treated as a separate fund with its own investment objective and policies. The Trust is organized as a Massachusetts business trust. Its Board is responsible for the overall management and direction of the Trust. The Board elects the Trust's officers and approves all significant agreements, including those with the Adviser, Sub-Adviser, custodian and fund administrative and accounting agent.

Investment Adviser. Amplify Investments LLC is a registered investment adviser with its offices at 310 South Hale Street, Wheaton, Illinois 60187. The Trust, on behalf of the Fund, has engaged Amplify Investments to serve as the Fund's investment adviser pursuant to an investment management agreement (the "Investment Management Agreement"). In this capacity, Amplify Investments has overall responsibility for overseeing the investment of the Fund's assets, managing the Fund's business affairs and providing certain clerical, bookkeeping and other administrative services for the Trust. As compensation for its services, the Fund has agreed to pay Amplify Investments an annual management fee equal to 0.65% of its average daily net assets. Out of this management fee, Amplify Investments pays substantially all expenses of the Fund, including the cost of transfer agency, custody, fund administration, legal, audit and other service and license fees, except for distribution and service fees payable pursuant to a Rule 12b-1 plan, if any, acquired fund fees and expenses, brokerage commissions and other expenses connected with the execution of portfolio transactions, taxes, interest, and extraordinary expenses.

Investment Sub-Adviser. Penserra Capital Management LLC is a registered investment adviser with its offices at 4 Orinda Way, Suite 100-A, Orinda, California 94563. The Trust, on behalf of the Fund, and Amplify Investments have engaged Penserra to serve as the Fund's investment sub-adviser pursuant to an investment sub-advisory agreement (the "Sub-Advisory Agreement"). In this capacity, Penserra has overall responsibility for selecting and continuously monitoring the Fund's investments. As compensation for its services, Amplify Investments has agreed to pay Penserra an annual sub-advisory fee based upon the Fund's average daily net assets. Amplify Investments is responsible for paying the entire amount of Penserra's sub-advisory fee. The Fund does not directly pay Penserra.

A discussion regarding the basis for the Board's approval of the Investment Management Agreement and Sub-Advisory Agreement will be available in the Fund's Annual Report to shareholders for the fiscal period ended October 31, 2019.

Portfolio Managers. The members of the portfolio management team for the Fund are Dustin Lewellyn, Ernesto Tong and Anand Desai.

Dustin Lewellyn, CFA. Mr. Lewellyn has extensive background in institutional investment process with a specific focus on ETF, such as the Fund. Mr. Lewellyn was a portfolio manager at BGI (now part of Blackrock) and he managed a number of international equity funds. Mr. Lewellyn also was head of ETF product management and product development at Northern Trust where he oversaw the build out and management of all areas of a new ETF business, including primary responsibility for the portfolio management process surrounding the ETFs. Mr. Lewellyn also built and ran a new ETF business for Charles Schwab, including having primary responsibility for the technology and investment process to support portfolio management for the ETFs. Mr. Lewellyn started a consulting business with a focus on ETFs and helped numerous new ETF sponsors, as well as service providers, understand the resource requirements to participate in the industry utilizing current best practices. Mr. Lewellyn holds a B.A. from University of Iowa and is a CFA Charterholder. He also holds security licenses 7, 63, 66 and 24.

Ernesto Tong, CFA. Mr. Tong worked for Barclays Global Investors and Blackrock prior to joining the Sub-Adviser. During his time at Blackrock, Mr. Tong spent two years as an Index Research Analyst and seven years as a portfolio manager for a number of funds. As an Index Research Analyst, he was responsible for performing independent research and analysis to incorporate into Portfolio Management and Trading strategies and also developing and launching new indices and investment products, particularly in Latin America. As a portfolio manager, Ernesto managed \$40 billion in global ETF assets and was responsible for all aspects of portfolio management across domestic and international portfolios. Mr. Tong was also responsible for launching, managing, and driving the local Latin American ETF products for the portfolio management group, focusing on Brazil, Colombia and Mexico. Mr. Tong holds a B.A. from the University of California, Davis and is a CFA Charterholder. He holds security licenses 7 and 63.

Anand Desai. Prior to joining Penserra in 2015, Mr. Desai was an officer at State Street, where he had roles in portfolio accounting and client operations.

The Fund's SAI provides additional information about the compensation structure for the portfolio managers, other accounts that the portfolio managers manage and the ownership of Shares by the portfolio managers.

Manager of Managers Structure. The Fund and Amplify Investments have received an exemptive order from the SEC to operate under a manager of managers structure that permits Amplify Investments, with the approval of the Board, to appoint and replace sub-advisers, enter into sub-advisory agreements, and materially amend and terminate sub-advisory agreements on behalf of the Fund without shareholder approval (the "Manager of Managers Structure"). Under the Manager of Managers Structure, Amplify Investments has ultimate responsibility, subject to oversight by the Board, for overseeing the Fund's sub-adviser(s) and recommending to the Board the hiring, termination, or replacement of any such sub-adviser(s) — including Penserra, in its capacity as the Sub-Adviser. The exemptive order does not apply to any sub-adviser that is affiliated with the Fund or Amplify Investments.

The Manager of Managers Structure enables the Fund to operate with greater efficiency and without incurring the expense and delays associated with obtaining shareholder approvals for matters relating to sub-advisers or sub-advisory agreements. The Manager of Managers Structure does not permit an increase in the overall management and advisory fees payable by the Fund without shareholder approval. Shareholders will be notified of any changes made to sub-advisers or sub-advisory agreements within 90 days of the changes.

How to Buy and Sell Shares

The Fund issues or redeems its Shares at NAV per Share only in Creation Units. Most investors buy and sell Shares in secondary market transactions through brokers. Shares are listed for trading on the secondary market on the Exchange. Shares can be bought and sold throughout the trading day like other publicly-traded shares. There is no minimum investment. When buying or selling Shares through a broker, you will incur customary brokerage commissions and charges, and you may pay some or all of the spread between the bid and the offered price in the secondary market on each leg of a round trip (purchase and sale) transaction. Share prices are reported in dollars and cents per Share. APs may acquire Shares directly from the Fund, and APs may tender their Shares for redemption directly to the Fund, at NAV per Share only in Creation Units or Creation Unit Aggregations, and in accordance with the procedures described in the SAI.

BOOK ENTRY

Shares are held in book-entry form, which means that no stock certificates are issued. The Depository Trust Company ("DTC") or its nominee is the record owner of all outstanding Shares and is recognized as the owner of all Shares for all purposes.

Investors owning Shares are beneficial owners as shown on the records of DTC or its participants. DTC serves as the securities depository for all Shares. Participants in DTC include securities brokers and dealers, banks, trust companies, clearing corporations and other

institutions that directly or indirectly maintain a custodial relationship with DTC. As a beneficial owner of Shares, you are not entitled to receive physical delivery of stock certificates or to have Shares registered in your name, and you are not considered a registered owner of Shares. Therefore, to exercise any right as an owner of Shares, you must rely upon the procedures of DTC and its participants. These procedures are the same as those that apply to any other stocks that you hold in book entry or “street name” form.

FUND SHARE TRADING PRICES

The trading prices of Shares on the Exchange may differ from the Fund’s daily NAV. Market forces of supply and demand, economic conditions and other factors may affect the trading prices of Shares.

The approximate value of Shares, an amount representing on a per Share basis the sum of the current market price of the securities accepted by the Fund in exchange for Shares and an estimated cash component, will be disseminated every 15 seconds throughout the trading day through the facilities of the Consolidated Tape Association. This approximate value should not be viewed as a “real-time” update of the NAV per Share of the Fund because the approximate value may not be calculated in the same manner as the NAV, which is computed once a day, generally at the end of the business day. The Fund is not involved in, or responsible for, the calculation or dissemination of the approximate value and the Fund does not make any warranty as to its accuracy.

FREQUENT PURCHASES AND REDEMPTIONS OF FUND SHARES

Shares may be purchased and redeemed directly from the Fund only in Creation Units by APs that have entered into agreements with the Fund’s distributor. The vast majority of trading in Shares occurs on the secondary market and does not involve the Fund directly. In-kind purchases and redemptions of Creation Units by APs and cash trades on the secondary market are unlikely to cause many of the harmful effects of frequent purchases and/or redemptions of Shares. Cash purchases and/or redemptions of Creation Units, however, can result in increased tracking error, disruption of portfolio management, dilution to the Fund and increased transaction costs, which could negatively impact the Fund’s ability to achieve its investment objective, and may lead to the realization of capital gains. These consequences may increase as the frequency of cash purchases and redemptions of Creation Units by APs increases. However, direct trading by APs is critical to ensuring that Shares trade at or close to NAV.

To minimize these potential consequences of frequent purchases and redemptions of Shares, the Fund imposes transaction fees on purchases and redemptions of Creation Units to cover the custodial and other costs the Fund incurs in effecting trades. In addition, the Fund reserves the right to not accept orders from APs that the Adviser has determined may be disruptive to the management of the Fund or otherwise are not in the best interests of the Fund. For these reasons, the Board has not adopted policies and procedures with respect to frequent purchases and redemptions of Shares.

Dividends, Distributions and Taxes

Ordinarily, dividends from net investment income, if any, are declared and paid at least annually by the Fund. The Fund distributes its net realized capital gains, if any, to shareholders quarterly.

Distributions in cash may be reinvested automatically in additional whole Shares only if the broker through whom you purchased Shares makes such option available.

TAXES

The Fund intends to qualify as a “regulated investment company” under the federal tax laws. If the Fund qualifies as a regulated investment company and distributes its income as required by the tax law, the Fund generally will not pay federal income taxes.

As with any investment, you should consider how your investment in Shares will be taxed. The tax information in this prospectus is provided as general information. You should consult your own tax professional about the tax consequences of an investment in Shares.

Unless your investment in Shares is made through a tax-exempt entity or tax-deferred retirement account, such as an IRA plan, you need to be aware of the possible tax consequences when:

- Your Fund makes distributions,
- You sell your Shares listed on the Exchange, and
- You purchase or redeem Creation Units.

TAXES ON DISTRIBUTIONS

The Fund's distributions are generally taxable. After the end of each year, you will receive a tax statement that separates the distributions of the Fund into two categories, ordinary income distributions and capital gains dividends. Ordinary income distributions are generally taxed at your ordinary tax rate; however, as further discussed below, certain ordinary income distributions received from the Fund may be taxed at the capital gains tax rates. Generally, you will treat all capital gain dividends as long-term capital gains regardless of how long you have owned your Shares. To determine your actual tax liability for your capital gains dividends, you must calculate your total net capital gain or loss for the tax year after considering all of your other taxable transactions, as described below. In addition, the Fund may make distributions that represent a return of capital for tax purposes and thus will generally not be taxable to you; however, such distributions may reduce basis, which could result in you having to pay higher taxes in the future when Shares are sold, even if you sell the Shares at a loss from your original investment. The tax status of your distributions from the Fund is not affected by whether you reinvest your distributions in additional Shares or receive them in cash. The income from the Fund that you must take into account for federal income tax purposes is not reduced by amounts used to pay a deferred sales fee, if any. The tax laws may require you to treat distributions made to you in January as if you had received them on December 31 of the previous year.

Income from the Fund may also be subject to a 3.8% "Medicare tax." This tax will generally apply to your net investment income if your adjusted gross income exceeds certain threshold amounts, which are \$250,000 in the case of married couples filing joint returns and \$200,000 in the case of single individuals.

A corporation that owns Shares generally will not be entitled to the dividends received deduction with respect to many dividends received from the Fund because the dividends received deduction is generally not available for distributions from regulated investment companies. However, certain ordinary income dividends on Shares that are attributable to qualifying dividends received by the Fund from certain corporations may be reported by the Fund as being eligible for the dividends received deduction.

If you are an individual, the maximum marginal stated federal tax rate for net capital gain is generally 20% for taxpayers in the highest tax bracket. Some capital gains dividends may be taxed at a maximum stated tax rate of 25%. Capital gains may also be subject to the Medicare tax described above.

Net capital gain equals net long-term capital gain minus net short-term capital loss for the taxable year. Capital gain or loss is long-term if the holding period for the asset is more than one year and is short-term if the holding period for the asset is one year or less. You must exclude the date you purchase your Shares to determine your holding period. However, if you receive a capital gain dividend from the Fund and sell your Shares at a loss after holding it for six months or less, the loss will be recharacterized as long-term capital loss to the extent of the capital gain dividend received. The tax rates for capital gains realized from assets held for one year or less are generally the same as for ordinary income. The Code treats certain capital gains as ordinary income in special situations.

Ordinary income dividends received by an individual shareholder from a regulated investment company such as the Fund are generally taxed at the same rates that apply to net capital gain (as discussed above), provided certain holding period requirements are satisfied and provided the dividends are attributable to qualifying dividends received by the Fund itself. Distributions with respect to Shares in REITs are qualifying dividends only in limited circumstances. The Fund will provide notice to its shareholders of the amount of any distribution which may be taken into account as a dividend which is eligible for the capital gains tax rates.

TAXES ON EXCHANGE-LISTED SHARE SALES

If you sell or redeem your Shares, you will generally recognize a taxable gain or loss. To determine the amount of this gain or loss, you must subtract your tax basis in your Shares from the amount you receive in the transaction. Your tax basis in your Shares is generally equal to the cost of your Shares, generally including sales charges. In some cases, however, you may have to adjust your tax basis after you purchase your Shares.

Distribution Plan

Quasar Distributors LLC (the "Distributor") serves as the distributor of Creation Units for the Fund on an agency basis. The Distributor does not maintain a secondary market in Shares.

The Board has adopted a Distribution and Service Plan pursuant to Rule 12b-1 under the 1940 Act. In accordance with its Rule 12b-1 plan, the Fund is authorized to pay an amount up to 0.25% of its average daily net assets each year to reimburse the Distributor for amounts expended to finance activities primarily intended to result in the sale of Creation Units or the provision of investor services. The Distributor may also use this amount to compensate securities dealers or other persons that are APs for providing distribution assistance, including broker-dealer and shareholder support and educational and promotional services.

The Fund does not and has no current intention of paying 12b-1 fees. However, in the event 12b-1 fees are charged in the future, because these fees are paid out of the Fund's assets, over time these fees will increase the cost of your investment and may cost you more than certain other types of sales charges.

Net Asset Value

The Fund's net asset value is determined as of the close of trading (normally 4:00 p.m., Eastern time) on each day the New York Stock Exchange is open for business. Net asset value is calculated for the Fund by taking the market price of the Fund's total assets, including interest or dividends accrued but not yet collected, less all liabilities, and dividing such amount by the total number of Shares outstanding. The result, rounded to the nearest cent, is the net asset value per Share. All valuations are subject to review by the Trust's Board or its delegate.

The Fund's investments are valued daily in accordance with valuation procedures adopted by the Board, and in accordance with provisions of the 1940 Act. Certain securities in which the Fund may invest are not listed on any securities exchange or board of trade. Such securities are typically bought and sold by institutional investors in individually negotiated private transactions that function in many respects like an over the counter secondary market, although typically no formal market makers exist. Certain securities, particularly debt securities, have few or no trades, or trade infrequently, and information regarding a specific security may not be widely available or may be incomplete. Accordingly, determinations of the fair value of debt securities may be based on infrequent and dated information. Because there is less reliable, objective data available, elements of judgment may play a greater role in valuation of debt securities than for other types of securities. Typically, debt securities are valued using information provided by a third-party pricing service. The third-party pricing service primarily uses broker quotes to value the securities.

The Fund's investments will be valued daily at market value or, in the absence of market value with respect to any investment, at fair value in accordance with valuation procedures adopted by the Board and in accordance with the 1940 Act. Market value prices represent last sale or official closing prices from a national or foreign exchange (*i.e.*, a regulated market) and are primarily obtained from third-party pricing services.

Certain securities may not be able to be priced by pre-established pricing methods. Such securities may be valued by the Board or its delegate at fair value. The use of fair value pricing by the Fund is governed by valuation procedures adopted by the Board and in accordance with the provisions of the 1940 Act. These securities generally include, but are not limited to, certain restricted securities (securities which may not be publicly sold without registration under the Securities Act of 1933, as amended (the "Securities Act")) for which a pricing service is unable to provide a market price; securities whose trading has been formally suspended; a security whose market price is not available from a pre-established pricing source; a security with respect to which an event has occurred that is likely to materially affect the value of the security after the market has closed but before the calculation of the Fund's net asset value or make it difficult or impossible to obtain a reliable market quotation; and a security whose price, as provided by the pricing service, does not reflect the security's "fair value." As a general principle, the current "fair value" of a security would appear to be the amount which the owner might reasonably expect to receive for the security upon its current sale. The use of fair value prices by the Fund generally results in the prices used by the Fund that may differ from current market quotations or official closing prices on the applicable exchange. A variety of factors may be considered in determining the fair value of such securities. Valuing the Fund's securities using fair value pricing will result in using prices for those securities that may differ from current market valuations. See the Fund's SAI for details.

Even when market quotations are available for portfolio securities, they may be stale or unreliable because the security is not traded frequently, trading on the security ceased before the close of the trading market or issuer-specific events occurred after the security ceased trading or because of the passage of time between the close of the market on which the security trades and the close of the Exchange and when the Fund calculates its NAV. Events that may cause the last market quotation to be unreliable include a merger or insolvency, events which affect a geographical area or an industry segment, such as political events or natural disasters, or market events, such as a significant movement in the U.S. market. Where market quotations are not readily available, including where the Adviser determines that the closing price of the security is unreliable, the Adviser will value the security at fair value in good faith using procedures approved by the Board. Fair value pricing involves subjective judgments and it is possible that a fair value determination for a security is materially different than the value that could be realized upon the sale of the security. In addition, fair value pricing could result in a difference between the prices used to calculate the Fund's NAV and the prices used by the Fund's Index. This may adversely affect the Fund's ability to track the Index.

Index Information

The Index is owned and operated by CrowdBureau Corporation. CrowdBureau is not affiliated with the Fund, Amplify, Penserra or the Distributor. The Fund is entitled to use the Index pursuant to a sublicensing arrangement with Amplify, which in turn has a licensing agreement with the Index Provider. Solactive AG serves as calculation agent for the Index (the "Index Calculation Agent"). The Index Calculation Agent is responsible for the management of the day-to-day operations of the Index, including calculating the value of the

Index every 15 seconds, widely disseminating the Index values every 15 seconds and tracking corporate actions, some of which result in Index adjustments.

Disclaimers

The Fund is not sponsored, endorsed, sold or promoted by CrowdBureau Corporation (“Licensor”). Licensor makes no representation or warranty, express or implied, to the owners of the Fund or any member of the public regarding the advisability of trading in the Fund. Fund Service Providers

U.S. Bancorp Fund Services, LLC, 615 East Michigan Street, Milwaukee, Wisconsin 53202, is the administrator, fund accounting and transfer agent for the Fund. U.S. Bank National Association, 1555 North Rivercenter Drive, Suite 302, Milwaukee, WI 53212, is the custodian.

Chapman and Cutler LLP, 111 West Monroe Street, Chicago, Illinois 60603, serves as legal counsel to the Trust.

Cohen & Company, Ltd., 1350 Euclid Avenue, Suite 800, Cleveland, Ohio 44115, serves as the Fund’s independent registered public accounting firm and is responsible for auditing the annual financial statements of the Fund.

Financial Highlights

The Fund is new and has no performance history as of the date of this prospectus. Financial information therefore is not available.

Premium/Discount Information

The market prices of the Shares generally will fluctuate in accordance with changes in NAV, as well as the relative supply of and demand for Shares on the Exchange. The Adviser cannot predict whether the Shares will trade below, at or above their NAV. The approximate value of the Shares, which is an amount representing on a per share basis the sum of the current market price of the securities (and an estimated cash component) accepted by the Fund in exchange for Shares, will be disseminated every 15 seconds throughout the trading day through the facilities of the Consolidated Tape Association. This approximate value should not be viewed as a “real-time” update of the NAV per Share of the Fund because the approximate value may not be calculated in the same manner as the NAV, which is computed once a day, generally at the end of the business day. The Fund is not involved with, or responsible for, the calculation or dissemination of the approximate value, and the Fund does not make any warranty as to its accuracy.

Information regarding how often the Shares traded on the Exchange at a price above (at a premium) or below (at a discount) the NAV of the Fund during the past four calendar quarters, when available, will be found at www.amplifyetfs.com.

Other Information

Section 12(d)(1) of the 1940 Act restricts investments by investment companies in the securities of other investment companies, including Shares. Registered investment companies are permitted to invest in the Fund beyond the limits set forth in Section 12(d)(1) subject to certain terms and conditions set forth in an SEC exemptive order issued to the Trust, including that such investment companies enter into an agreement with the Trust on behalf of the Fund prior to exceeding the limits imposed by Section 12(d)(1).

DELIVERY OF SHAREHOLDER DOCUMENTS — HOUSEHOLDING

Householding is an option available to certain investors of the Fund. Householding is a method of delivery, based on the preference of the individual investor, in which a single copy of certain shareholder documents can be delivered to investors who share the same address, even if their accounts are registered under different names. Householding for the Fund is available through certain broker-dealers. If you are interested in enrolling in householding and receiving a single copy of the prospectus and other shareholder documents, please contact your broker-dealer. If you currently are enrolled in householding and wish to change your householding status, please contact your broker-dealer.
