Mid Cap (\$2B - \$10B)	8.86%
Small Cap (\$300M - <\$2B)	0.00%

ABOUT THE FUND

The Amplify Top 10™ Asia Memory ETF (AHBM) focuses on market leaders across the memory semiconductor value chain—from DRAM (dynamic random-access memory), NAND ('Not And' flash memory), and HBM (High-Bandwidth Memory) to the equipment, materials, packaging, and testing technologies that support advanced memory production. AHBM seeks to provide investment results (before fees and expenses) that generally correlate to the total return performance of the Akros Asia Memory Semiconductor Top 10 Index.

REASONS TO INVEST

- 1 Focus on Market Leaders:** Provides concentrated, high-conviction exposure to 10 companies positioned at the center of memory semiconductor innovation.
- 2 Not a Single-Stock Bet:** Gain exposure across multiple companies rather than relying on a single company outcome.
- 3 More of the Theme; Less of the Noise:** A concentrated portfolio may help reduce exposure to peripheral holdings that are less central to the opportunity.

TOP 10™ HOLDINGS EXPOSURE

COMPANY	% WT.
SK Hynix Inc.	24.64%
Samsung Electronics Co.	22.79%
Kioxia Holdings Corp.	10.33%
CXMT Corp.	9.79%
Nanya Technology Corp.	8.46%
Windbound Electronics Corp.	6.73%
Macronix International Co.	4.69%
Tokyo Electron Ltd	4.67%
Powerchip Semiconductor Manufacturing Corp.	4.48%
Advantest Corp	3.89%

Fund holdings are subject to change at any time and should not be considered recommendations to buy or sell any security. Weighting reflects stock position and/or position held via total return swaps.

PERFORMANCE

Fund inception date: 8/18/2026. **The performance data quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than the original cost. Current performance may be lower or higher than the performance quoted. For most recent month end performance, visit [AmplifyETFs.com/AHBM](https://www.amplifyetfs.com/AHBM).** Brokerage commissions will reduce returns. NAV is the sum of all its assets less any liabilities, divided by the number of shares outstanding. The closing price is the last price at which the fund traded. Indexes are unmanaged and it's not possible to invest directly in an index. Akros Asia Memory Semiconductor Top 10 Index seeks to provide investment exposure to 10 equity securities issued by memory semiconductor companies based in Asian markets.

COUNTRY ALLOCATION

- Korea (48.35%)
- Taiwan (23.68%)
- Japan (18.74%)
- China (9.23%)

INDUSTRY ALLOCATION

- Semiconductors & Semiconductor Equipment (76.79%)
- Technology Hardware Storage & Peripherals (23.21%)

Carefully consider the Fund's investment objectives, risks, charges, and expenses before investing. This and other information can be found in the Fund's statutory and summary prospectuses, which may be obtained at [AmplifyETFs.com](https://amplifyetfs.com). Read the prospectus carefully before investing.

Investing involves risk, including possible loss of principal. There can be no assurance that a Fund will achieve its investment objective. ETF shares are

bought and sold at market price and may trade at a premium or discount to NAV. Brokerage commissions will reduce returns. The Fund follows a passive, index based investment approach and is subject to index, tracking error, and non-correlation risks. The Fund is non-diversified, invests in a limited number of issuers, and may be more volatile than diversified funds. Companies in the memory semiconductor industry may be affected by technological change, competition, intellectual property risks, supply chain disruptions, pricing pressure, regulatory developments, and evolving market demand, which may result in increased volatility.

The Fund invests primarily in Asian companies and is subject to risks including economic and political developments, trade disputes, government intervention, currency fluctuations, market concentration, and regional geopolitical tensions, which may adversely affect Fund performance. The use of derivatives and swap agreements may increase volatility.

Investment Adviser: Amplify Investments LLC; Sub-Adviser: Samsung Asset Management. Amplify ETFs are distributed by Foreside Fund Services, LLC.
