

BATT

AMPLIFY LITHIUM & BATTERY
TECHNOLOGY ETF

As of 3/31/2022

Invest in the Power Behind an Energy Revolution

WHY INVEST IN BATT?

- Growing Global Opportunity:** The lithium-ion battery market is expected to grow from an estimated \$44.2 billion in 2020 to \$94.4 billion by 2025, a compound annual growth rate (CAGR) of 16.4%.²
- Multiple Drivers of Demand:** A number of factors continue to fuel growth in lithium-ion batteries, including continued demand for mobile devices, electric vehicle adoption, and a rising need for energy storage solutions.
- Access** to this theme in the convenience and transparency of the ETF structure.

THE CASE FOR LITHIUM BATTERY TECHNOLOGY

The adoption rate of electric vehicles (EVs) is accelerating at a rapid pace, creating significant opportunities for investment in battery metals, such as lithium, cobalt, nickel, graphite, vanadium and manganese, and the battery technologies that utilize these materials in their battery chemistry.

The long-term investment case for battery metals remains compelling amid supply constraints to meet the growing demand for lithium-ion batteries globally, and the prospect of a continued rise in prices of the underlying battery metals and components.

BATT INDEX SELECTION METHODOLOGY

The Index seeks to provide exposure to global companies associated with the development, production and use of lithium battery technology, including:

Companies deriving more than 50% of their revenue from the development and production of lithium battery technologies and/or battery storage solutions

Companies in the battery metals & materials supply chain that demonstrate beneficial interest in lithium battery technology

Companies deriving 90% of their revenue from the development and production of electric vehicles

BATT is a portfolio of companies generating significant revenue from the development, production and use of lithium battery technology, including : 1) battery storage solutions, 2) battery metals & materials, and 3) electric vehicles. BATT seeks investment results that correspond generally to the EQM Lithium & Battery Technology Index.

INDEX DETAILS

Index Name	EQM Lithium & Battery Technology Index
Index Ticker	BATTIDX
Weighting	Modified Market-Cap
Rebalance	Quarterly
Website	eqmindexes.com

MARKET CAPITALIZATION

As Of 3/31/22

Large Cap (> \$10B)	65%
Mid Cap (\$2B - \$10B)	20%
Small Cap (< \$2B)	14%

*as of 3/31/22

Effective 10/13/2020, the Fund's name changed from the Amplify Advanced Battery Metals & Materials ETF to the Amplify Lithium & Battery Technology ETF. The Fund also changed its investment objective from actively managed to a passively managed Fund that seeks to track an Index.

INDUSTRY ALLOCATION

As Of 3/31/22

Holdings and allocations are subject to change at any time and should not be considered a recommendation to buy or sell a security.

TOP 10 COUNTRY WEIGHTS

Fund inception date: (6/6/18). The performance data quoted represents past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than their original cost and current performance may be lower or higher than the performance quoted. Brokerage commissions will reduce returns. For performance data current to the most recent month-end please call 855-267-3837 or visit AmplifyETFs.com/BATT. Short term performance, in particular, is not a good indication of the fund's future performance, and an investment should not be made based solely on returns.

Carefully consider the Fund's investment objectives, risk factors, charges, and expenses before investing. This and additional information can be found in Amplify Funds statutory and summary prospectus, which may be obtained above or by calling 855-267-3837, or by visiting AmplifyETFs.com. Read the prospectus carefully before investing.

Investing involves risk, including the possible loss of principal. Shares of any ETF are bought and sold at market price (not NAV), may trade at a discount or premium to NAV and are not individually redeemed from the Fund. The Fund is not actively managed. The Fund invests in securities included in its Index regardless of their investment merit. Narrowly focused investments typically exhibit higher volatility. A portfolio concentrated in a single industry, such as lithium battery technology, makes it vulnerable to factors affecting the companies.

The Fund may face more risks than if it were diversified broadly over numerous industries or sectors. The Fund has become more susceptible to potential operational risks through breaches in cybersecurity. The Fund invests in securities that are issued by and/or have exposure to, companies primarily involved in the metals and mining industry. Investments in metals and mining companies may be speculative and

subject to greater price volatility than investments in other types of companies. The exploration and development of metals involves significant financial risks over a significant period of time, which even a combination of careful evaluation, experience and knowledge may not eliminate. Rare earth metals have more specialized uses and are often more difficult to extract. The increased demand for these metals has strained supply, which could adversely affect the companies in the Fund's portfolio. Some of the companies in which the Fund will invest are engaged in other lines of business unrelated to the mining, refining and/or manufacturing of metals and these lines of business could adversely affect their operating results.

The Fund's assets are concentrated in the materials sector, which means the Fund will be more affected by the performance of the materials sector than a fund that is more diversified. The Fund currently has fewer assets than larger funds, and like other relatively new funds, large inflows and outflows may impact the Fund's market exposure for limited periods of time. The Fund will invest in the securities of non-U.S. companies. Investments in emerging market issuers are subject to a greater risk of loss than investments in issuers located or operating in more developed markets. The mining, refining and/or manufacturing of metals may be significantly affected by regulatory action and changes in governments. Small and/or mid-capitalization companies may be more vulnerable to adverse general market or economic developments. Electric vehicle technology is relatively new and is sub-

ject to risks associated with a developing industry. The EQM Lithium & Battery Technology Index (BATTIDIX) seeks to provide exposure to global companies associated the development and production of lithium battery technology and/or battery storage solutions; the exploration, production, development, processing, and/or recycling of the materials and metals used in lithium battery chemistries such as Lithium, Cobalt, Nickel, Manganese, Vanadium and/or Graphite; and/or the development and production of electric vehicles. The Index inception date is 5/1/2018, and the Fund began tracking the Index as of 10/13/2020.

Amplify Investments LLC is the Investment Adviser to the Fund, and Toroso Investments, LLC serves as the Investment Sub- Adviser. Amplify ETFs are distributed by Foreside Fund Services, LLC.
