1. On March 15, 2023, the Board of Trustees of the Amplify ETF Trust (the “Trust”) considered and voted to approve the appointment of an investment sub-adviser to the Fund pursuant to an investment sub-advisory agreement between Amplify Investments LLC and Seymour Asset Management LLC (“Seymour Asset Management”). Seymour Asset Management is a registered investment adviser with its offices at 1 Old Point Road, Quogue, New York 11959.

The appointment of Seymour Asset Management as an investment sub-adviser to the Fund has an effective date of April 19, 2023. In accordance with the Trust’s manager of managers exemptive order received from the Securities and Exchange Commission, additional details about the sub-adviser will be made available to shareholders within 90 days of the effective date.

In connection with the appointment of the additional sub-adviser, the following changes are being made:

i. Notwithstanding anything to the contrary in the Summary Prospectus, Prospectus and Statement of Additional Information, each reference to “Sub-Adviser” is hereby replaced with “Sub-Advisers.”

ii. Notwithstanding anything to the contrary in the Summary Prospectus and Prospectus, the third sentence of the first paragraph under the Section entitled “Principal Investment Strategies” is hereby deleted in its entirety and replaced with the following:

    Penserra Capital Management LLC (“Penserra”) and Seymour Asset Management LLC (“Seymour”, and collectively with Penserra, the “Sub-Advisers”) serve as the investment sub-advisers to the Fund.

iii. Notwithstanding anything to the contrary in each Summary Prospectus and Prospectus, the “Management of the Fund” section is hereby deleted in its entirety and replaced with the following:

**MANAGEMENT OF THE FUND**

*Investment Adviser.* Amplify Investments LLC.

*Sub-Advisers.* Penserra Capital Management LLC and Seymour Asset Management LLC
Portfolio Managers. The following individuals serve as the portfolio managers to the Fund.

- Timothy J. Seymour, Chief Investment Officer at Seymour
- Dustin Lewellyn, CFA, Chief Investment Officer at Penserra
- Ernesto Tong, CFA, Managing Director at Penserra
- Anand Desai, Senior Vice President at Penserra

Each portfolio manager is primarily responsible for the day-to-day management of the Fund. Each portfolio manager has served as part of the portfolio management team of the Fund since its inception in 2019.

iv. Notwithstanding anything to the contrary in the Prospectus, the third and fourth paragraphs and the beginning of the fifth paragraph under the Section entitled “Management of the Fund - Fund Organization” are hereby deleted and replaced in their entirety with the following:

Penserra Capital Management LLC is a registered investment adviser with its offices at 4 Orinda Way, Suite 100-A, Orinda, California 94563. Seymour Asset Management is a registered investment adviser with its offices at 1 Old Point Road, Quogue, New York 11959.

Amplify Investments has overall responsibility for the selection of the Fund’s assets, managing the Fund’s business affairs and providing certain clerical, bookkeeping and other administrative services for the Trust. Penserra and Seymour have responsibility for executing the Fund’s trades and continuously monitoring the Fund’s investments.

The members of the portfolio management team for the Fund are Timothy Seymour, Dustin Lewellyn, Ernesto Tong and Anand Desai.

Timothy J. Seymour. Mr. Seymour is Chief Investment Officer at Seymour Asset Management LLC. Mr. Seymour has over 24 years of investment experience as a portfolio manager, allocator, and capital markets professional across multiple asset classes. Mr. Seymour has been an early-stage investor in the cannabis industry and serves as a board member or in an advisory role for several private cannabis companies. Mr. Seymour is also a Senior Consultant to the JWAM Growth Fund, a cannabis hedge fund. In addition, Mr. Seymour is a frequent and long-time contributor on CNBC, including over a decade of appearances on the show “Fast Money.” Mr. Seymour is the founder and Chief Investment Officer of Seymour Asset Management (“SAM”). SAM provides both asset management and wealth management services for its clients, including direct investment and allocation to private equity and alternative assets. Prior to SAM,
Mr. Seymour was the Chief Investment Officer and co-founder of Triogem Asset Management (“Triogem”), where he helped run the firm’s flagship fund, a long/short fund with an emphasis on global emerging markets.

v. Notwithstanding anything to the contrary in the Prospectus, the tenth paragraph under the Section entitled “Management of the Fund - Fund Organization” is hereby deleted in its entirety and replaced with the following:

Manager of Managers Structure. The Fund and the Adviser have received an exemptive order from the SEC to operate under a manager of managers structure that permits the Adviser, with the approval of the Board, to appoint and replace sub-advisers, enter into sub-advisory agreements, and materially amend and terminate sub-advisory agreements on behalf of the Fund without shareholder approval (the “Manager of Managers Structure”). Under the Manager of Managers Structure, the Adviser has ultimate responsibility, subject to oversight by the Board, for overseeing the Fund’s sub-adviser(s) and recommending to the Board the hiring, termination, or replacement of any such sub-adviser(s)—including Penserra and Seymour, in their capacity as Sub-Advisers. The exemptive order does not apply to any sub-adviser that is affiliated with the Fund or the Adviser.

vi. Notwithstanding anything to the contrary in the Statement of Additional Information, the paragraph under “Information about the Funds” is hereby replaced in its entirety with the below:

The Funds are advised by Amplify Investments LLC (the “Adviser” or “Amplify Investments”). Penserra Capital Management LLC (“Penserra”) serves as the investment sub-adviser to YYY, IBUY, DIVO, EMFQ, BIDS and IDVO. Seymour Asset Management LLC (“Seymour”) along with Penserra, each serve as an investment sub-adviser to CNBS. Capital Wealth Planning, LLC (“CWP”), along with Penserra, each serves as an investment sub-adviser to DIVO and IDVO. Toroso Investments, LLC, a Tidal Financial Group company, (“Toroso”) serves as the investment sub-adviser to BLOK, BATT, SWAN, ISWN, MVPS, QSWN, IWIN and NDIV. Cerity Partners LLC (“Cerity”, and collectively, with Penserra, CWP and Toroso, the “Sub-Advisers”) along with Toroso, each serves as an investment sub-adviser to SWAN, ISWN and QSWN.

vii. Notwithstanding anything to the contrary in the Statement of Additional Information, the following is added as the last sentence of the first paragraph under the Section entitled “Investment Sub-Advisers”:

Seymour Asset Management LLC, along with Penserra, serve as an investment sub-adviser to CNBS.
viii. Notwithstanding anything to the contrary in the Statement of Additional Information, the following is added after the fourth paragraph under the Section entitled “Investment Sub-Advisers”:

Seymour Asset Management LLC is located at 1 Old Point Road, Quogue, New York 11959.

ix. Notwithstanding anything to the contrary in the Statement of Additional Information, Timothy J. Seymour’s biography under the section entitled “Portfolio Managers” is hereby deleted in its entirety and replaced with the following:

Timothy J. Seymour. Mr. Seymour is the Chief Investment Officer at Seymour Asset Management LLC. Mr. Seymour has over 24 years of investment experience as a portfolio manager, allocator, and capital markets professional across multiple asset classes. Mr. Seymour has been an early-stage investor in the cannabis industry and serves as a board member or in an advisory role for several private cannabis companies. Mr. Seymour is also a Senior Consultant to the JWAM Growth Fund, a cannabis hedge fund. In addition, Mr. Seymour is a frequent and long-time contributor on CNBC, including over a decade of appearances on the show “Fast Money.” Mr. Seymour is the founder and Chief Investment Officer of Seymour Asset Management (“SAM”). SAM provides both asset management and wealth management services for its clients, including direct investment and allocation to private equity and alternative assets. Prior to SAM, Mr. Seymour was the Chief Investment Officer and co-founder of Triogem Asset Management (“Triogem”), where he helped run the firm’s flagship fund, a long/short fund with an emphasis on global emerging markets.

x. Notwithstanding anything to the contrary in the Statement of Additional Information, the fourth paragraph under the section entitled “Portfolio Managers – Compensation” is hereby deleted in its entirety and replaced with the following:

Mr. Seymour is compensated by Seymour. Mr. Seymour’s compensation includes a salary and discretionary bonus. No compensation is directly related to the performance of the underlying assets.

2. Notwithstanding anything to the contrary in the Fund’s Prospectus and Statement of Additional Information, U.S. Bank National Association has been appointed as the custodian for the Fund. Accordingly, each reference to “Cowen Execution Services, LLC” is deleted in its entirety and replaced with “U.S. Bank National Association,” which will serve as the custodian for the Fund. Additionally, notwithstanding anything to the contrary in the Fund’s Prospectus and Statement of Additional Information, the address for U.S. Bank National Association is “1555 North Rivercenter Drive, Suite 302, Milwaukee, WI 53212” and replaces the address listed for Cowen Execution Services, LLC.
The appointment of U.S. Bank National Association as custodian of the Fund will have an effective date no later than April 28, 2023.

3. Notwithstanding anything to the contrary in the Fund’s Summary Prospectus and Prospectus, the fourth paragraph under the section entitled “Principal Investment Strategies” is hereby deleted in its entirety and replaced with the following:

“The Fund will primarily invest in equity securities and derivative instruments intended to provide exposure to companies principally engaging in the cannabis and hemp ecosystem. As part of this strategy, the derivative instruments may include, but are not limited to, total return swaps. Under normal market circumstances, the combined notional value of derivative instruments the Fund invests in will not exceed 60% of the value of the Fund’s investments. For purposes of the Fund’s 80% investment policy, the Fund’s derivative instruments will be valued on a notional basis.”

4. Notwithstanding anything to the contrary in the Fund’s Statement of Additional Information, the the first paragraph under the section entitled “CNBS” under the “Investment Strategies – Fund Specific Investment Strategies” section is hereby deleted in its entirety and replaced with the following:

“Under normal circumstances, CNBS will invest at least 80% of its net assets (plus borrowings for investment purposes) in securities of companies that derive 50% or more of their revenue from the cannabis and hemp ecosystem. CNBS shareholders are entitled to 60 days’ notice prior to any change in this non-fundamental investment policy. CNBS may also invest up to 60% of the notional value of CNBS in derivative instruments, intended to provide exposure to companies principally engaged in the cannabis and hemp ecosystem. Such derivative instruments may include, but are not limited to, total return swaps.”

PLEASE RETAIN THIS SUPPLEMENT FOR FUTURE REFERENCE.
Amplify Seymour Cannabis ETF (the “Fund”) is a series of Amplify ETF Trust (the “Trust”) and an actively managed exchange-traded fund (“ETF”). The Fund lists and principally trades its shares on NYSE Arca, Inc. (“NYSE Arca” or the “Exchange”).

As permitted by regulations adopted by the U.S Securities and Exchange Commission (“SEC”), paper copies of the Fund's shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the Fund's reports from your financial intermediary, such as a broker-dealer or bank. Instead, the reports will be made available on a website, and you will be notified by mail each time a report is posted and provided with a website link to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. Please contact your financial intermediary to elect to receive shareholder reports and other Fund communications electronically.

You may elect to receive all future reports in paper free of charge. Please contact your financial intermediary to inform them that you wish to continue receiving paper copies of shareholder reports and for details about whether your election to receive reports in paper will apply to all funds held with your financial intermediary.

NOT FDIC INSURED. MAY LOSE VALUE. NO BANK GUARANTEE.

The SEC has not approved or disapproved these securities or passed upon the accuracy or adequacy of this prospectus. Any representation to the contrary is a criminal offense.

AMPLIFY SEYMOUR CANNABIS ETF

Summary Information

INVESTMENT OBJECTIVE

The Amplify Seymour Cannabis ETF seeks to provide investors capital appreciation.

FUND FEES AND EXPENSES

This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund (“Shares”). You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below.

<table>
<thead>
<tr>
<th>Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Management Fees</td>
</tr>
<tr>
<td>Distribution and Service (12b-1) Fees</td>
</tr>
<tr>
<td>Other Expenses</td>
</tr>
<tr>
<td><strong>Total Annual Fund Operating Expenses</strong></td>
</tr>
<tr>
<td>Expense Waiver/Reimbursement(1)</td>
</tr>
<tr>
<td><strong>Total Annual Fund Operating Expenses After Waiver/Reimbursement</strong></td>
</tr>
</tbody>
</table>

(1) Pursuant to an agreement with the Fund, Amplify Investments LLC has agreed to reduce its management fee and effectively reimburse any acquired fund fees incurred by the Fund in an amount that limits the Fund’s “Total Annual Fund Operating Expenses” (excluding taxes, interest, all brokerage commissions, other normal charges incident to the purchase and sale of portfolio securities, distribution and service fees payable pursuant to a Rule 12b-1 plan, and other extraordinary expenses) to not more than 0.75% of the daily net assets of the Fund until March 1, 2024. In addition, pursuant to its expense limitation agreement with the Fund, the Adviser is entitled to recoup any fees that it waived and/or Fund expenses that it paid for a period of three years following such fee waivers and/or expense payments. The Fund may only make such repayment to the Adviser if, after the recoupment payment has been taken into account, it does not cause the Fund's expense ratio to exceed either the expense cap in place at the time the expenses were waived or the Fund’s current expense cap.

EXAMPLE

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds.

This example assumes that you invest $10,000 in the Fund for the time periods indicated and then sell all of your Shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain at current levels. This example does not include the brokerage commissions that investors may pay to buy and sell Shares. The example also assumes that the fee waiver/expense reimbursement agreement is not renewed following its termination. Although your actual costs may be higher or lower, your costs, based on these assumptions, would be:

<table>
<thead>
<tr>
<th></th>
<th>1 YEAR</th>
<th>3 YEARS</th>
<th>5 YEARS</th>
<th>10 YEARS</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>$77</td>
<td>$311</td>
<td>$563</td>
<td>$1,287</td>
</tr>
</tbody>
</table>

PORTFOLIO TURNOVER

The Fund pays transaction costs, such as commissions, when it purchases and sells securities (or “turns over” its portfolio). A higher portfolio turnover will cause the Fund to incur additional transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in Total Annual Fund Operating Expenses or in the example, may affect the Fund's performance. During the fiscal year ended October 31, 2022, the Fund's portfolio turnover rate was 27% of the average value of its portfolio.
PRINCIPAL INVESTMENT STRATEGIES

Under normal market conditions, the Fund seeks to achieve its investment objective by investing in the securities of companies engaged in cannabis and hemp-related activities selected by the Fund’s investment adviser, Amplify Investments LLC (”Amplify Investments” or the “Adviser”). Pursuant to this strategy, the Fund will invest at least 80% of its net assets (plus borrowings for investment purposes) in the securities of companies that derive 50% or more of their revenue from the cannabis and hemp ecosystem and in derivatives that have economic characteristics similar to such securities. Penserra Capital Management LLC (”Penserra” or the “Sub-Adviser”) serves as the investment sub-adviser to the Fund. Penserra is responsible for executing and implementing the Adviser’s decisions and constructing the Fund’s portfolio.

The Fund is an actively managed ETF that seeks to provide investment exposure to global companies principally engaged in the emerging cannabis and hemp ecosystem across one of three classifications, which includes:

- Cannabis/Hemp Plant (Pharmaceuticals/Biotechnology, Cultivation & Retail, Hemp Products and Cannabis-Infused Products)
- Support (Agricultural Technology, Real Estate and Commercial Services)
- Ancillary (Consumption Devices/Mechanisms, Investing & Finance, Technology & Media and Other Ancillary)

The Fund’s portfolio manager, Tim Seymour, will actively seek investment opportunities in companies fitting within one of these classifications through the use of information available in public regulatory filings, third-party research, meetings with company management, and other publicly available information. Through portfolio management, the Fund’s portfolio manager will seek opportunities to make allocations among the classifications and the sub-classifications and to take advantage of market pricing dislocations. In addition, the Fund’s portfolio manager will conduct an on-going fundamental analysis of individual companies, which includes top-down and bottom-up factors. Top-down factors considered include regulatory changes, macro-economic data and political events. Bottom-up factors considered include company growth rates relative to its peer group, income statement, free cash flow, balance sheet strength, management quality, environmental, social, and governance scoring and strategic partnerships. The Fund’s portfolio manager believes that this fundamental approach will allow for adjustments in the Fund’s portfolio to address the dynamic pace of evolution for cannabis and hemp-related companies.

The Fund will primarily invest in equity securities and derivative instruments intended to provide exposure to companies principally engaging in the cannabis and hemp ecosystem. As part of this strategy, the derivative instruments may include, but are not limited to, total return swaps. Under normal market circumstances, the combined notional value of derivative instruments the Fund invests in will not exceed 60% of the value of the Fund’s investments. For purposes of the Fund’s 80% investment policy, any derivative instruments the assets will be valued on a mark-to-market basis.

In order to be eligible for investment in the Fund’s portfolio, securities must have adequate constituent liquidity and accessibility for an exchange-listed product, as determined by the Adviser. In addition, under normal market circumstances, the Fund’s direct investment in equity securities must comply with the following:

- a security must be listed on a regulated, major stock exchange in the form of shares tradeable for non-U.S. investors without restrictions;
- for U.S. based equity securities, 90% of the U.S. based equity weight must be in companies with a market capitalization of at least $75,000,000; and a non-U.S. equity security must have a market capitalization of at least $100,000,000; and
- for U.S. based equity securities, at least 70% of the equity weight must have either: (i) a monthly trading volume of at least 250,000, or (ii) an average notional value of monthly trades of at least $25,000,000 over the prior six months; and all non-U.S. equity securities must have either: (i) a monthly trading volume of at least 250,000, or (ii) an average notional value of monthly trades of at least $25,000,000 over the prior six months.

The Fund will only directly invest in companies that engage in activities that are legal in the country where it is incorporated, as well as in the country or countries where its operations are conducted. The Fund will not hold direct ownership in any companies that engage in cannabis-related business unless permitted by national and local laws of the relevant jurisdiction, including United States (“U.S.”) federal and state laws. Because the Fund only directly holds securities from companies that are currently engaged exclusively in legal activities under national and local laws, the Fund will not include equity securities of any company that engages in the cultivation, production or distribution of marijuana or products derived from marijuana for medical or non-medical purposes in a particular country, including the U.S., unless and until such time as the cultivation, production or distribution of such medical or non-medical marijuana, as applicable, becomes legal under local and national laws governing the company in such country. As of the date of this prospectus, the Fund does not directly invest in companies that grow or distribute marijuana inside of the U.S. or any “medical marijuana” companies in the United States. Any pharmaceutical companies held by the Fund would have the necessary permits and licenses to engage in lawful
medical research using cannabinoids to produce government approved drugs, or to otherwise produce, market or distribute such drugs. This activity is distinct from the “medical marijuana” business, which refers to the use of the cannabis leaf, as opposed to specific extracts in pharmaceutical form, to alleviate the symptoms of injury or illness. If U.S. federal law changes in the future and these cannabis-related business activities become legal at the federal level, the Fund may begin directly investing in U.S. listed companies in the cannabis and hemp ecosystem in accordance with the Fund’s investment objective and principal investment strategy. The Fund may indirectly obtain exposure to such companies through its use of derivative instruments, as described above.

The Fund’s portfolio manager expects, under normal market circumstances, that the Fund’s portfolio will consist of 20 to 45 companies. These securities may be issued by small, medium and large capitalization companies operating in both emerging and developed market countries. The Fund may also invest in securities of real estate investment trusts. The Fund may purchase equity securities that trade on U.S. or non-U.S. securities exchanges and in the securities of non-U.S. companies that utilize American Depositary Receipts (“ADRs”) or Global Depositary Receipts (“GDRs”) to list on certain exchanges. To the extent that the security of a non-U.S. issuer is available as an ADR, the Fund will purchase the ADR, provided that the ADR’s liquidity is comparable to that of the issuer’s equity security. As of the date of this Prospectus, the Fund invests in securities that are primarily listed on the following exchanges: New York Stock Exchange (“NYSE”), NYSE American, Nasdaq Stock Market, TSX Exchange, TSX Venture Exchange, Australian Securities Exchange and the Tel Aviv Stock Exchange. The Fund may, in the future, invest in companies primarily listed on additional exchanges to the extent that such companies are in compliance with the above-referenced investment and legal requirements. Further, the Fund may utilize derivatives instruments that are available over-the-counter (“OTC”) rather than exchange-traded.

The Fund will seek to lend portfolio securities in an amount up to one-third of its total assets to brokers, dealers and other financial institutions. In a portfolio securities lending transaction, the Fund receives from the borrower an amount equal to the interest paid or the dividends declared on the loaned securities during the term of the loan as well as the interest on the collateral securities, less any fees (such as finders or administrative fees) the Fund pays in arranging the loan.

Diversification Status. The Fund is classified as “non-diversified” under the Investment Company Act of 1940, as amended (the “1940 Act”).

PRINCIPAL RISKS OF INVESTING IN THE FUND

You could lose money by investing in the Fund. An investment in the Fund is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency. There can be no assurance that the Fund’s investment objective will be achieved.

Cannabis Industry Risk. Companies involved in the cannabis industry face competition, may have limited access to the services of banks, may have substantial burdens on company resources due to litigation, complaints or enforcement actions, and are heavily dependent on receiving necessary permits and authorizations to engage in medical cannabis research or to otherwise cultivate, possess or distribute cannabis. Additionally, cannabis-related companies are subject to various laws and regulations that may differ at the local, state, and federal level. These laws and regulations may significantly affect a cannabis-related company’s ability to conduct business, secure financing, impact the market for cannabis business sales and services, and set limits on cannabis use, production, transportation and storage. Since the use of cannabis is illegal under U.S. federal law, federally regulated banking institutions may be unwilling to make financial services available to growers and sellers of cannabis. Additionally, litigation initiated by private citizens or companies could have a negative impact on the financial and operational status of cannabis-related companies.

Regulatory Risk — U.S. The possession and use of cannabis, even for medical purposes, is illegal under federal and certain states’ laws, which may negatively impact the value of the Fund’s investments. Use of cannabis is regulated by both the federal government and state governments, which may conflict. Even in those states in which the use of cannabis has been legalized, its possession and use remains a violation of federal law. Federal law criminalizing the use of cannabis pre-empts state laws that legalizes its use for medicinal and recreational purposes. Any change in the federal government’s enforcement of current federal laws could adversely affect the ability of the companies in which the Fund invests to possess or cultivate cannabis, including in connection with pharmaceutical research, or it could shrink the customer pool for certain of the Fund’s portfolio companies. Any of these outcomes would negatively affect the profitability and value of the Fund’s investments.

Cannabis is a Schedule I controlled substance under the Controlled Substances Act (“CSA”), meaning that it has a high potential for abuse, has no currently “accepted medical use” in the U.S., lacks accepted safety for use under medical supervision, and may not be prescribed, marketed or sold in the U.S. Facilities conducting research, manufacturing, distributing, importing or exporting, or dispensing controlled substances must be registered (licensed) to perform these activities and have the security, control, recordkeeping, reporting and inventory mechanisms required by the United States Drug Enforcement Administration (“DEA”) to prevent drug loss and diversion. Failure to obtain the necessary registrations or comply with the necessary regulatory requirements may significantly impair the ability of certain companies in which the Fund invests to pursue medical cannabis research or to otherwise cultivate, possess or distribute cannabis.
Regulatory Risk — Non-U.S. The companies in which the Fund invests are subject to various laws, regulations and guidelines relating to the manufacture, management, transportation, storage and disposal of cannabis, as well as being subject to laws and regulations relating to health and safety, the conduct of operations and the protection of the environment. Even if a company's operations are permitted under current law, they may not be permitted in the future, in which case such company may not be in a position to carry on its operations in its current locations. Additionally, controlled substance legislation differs between countries and legislation in certain countries may restrict or limit the ability of certain companies in which the Fund invests to sell their products. The companies in which the fund invest may never be able to legally produce and sell products in the U.S. or other national or local jurisdictions.

Equity Securities Risk. The value of the Shares will fluctuate with changes in the value of the equity securities in which it invests. Equity securities prices fluctuate for several reasons, including changes in investors’ perceptions of the financial condition of an issuer or the general condition of the relevant stock market, such as the current market volatility, or when political or economic events affecting the issuers occur.

Health Care Companies Risk. Health care companies are subject to extensive government regulation and their profitability can be significantly affected by restrictions on government reimbursement for medical expenses, rising costs of medical products and services, pricing pressure (including price discounting), limited product lines, and an increased emphasis on the delivery of healthcare through outpatient services. Health care companies are heavily dependent on obtaining and defending patents, which may be time consuming and costly, and the expiration of patents may also adversely affect the profitability of the companies. Health care companies are also subject to extensive litigation based on product liability and similar claims. In addition, their products can become obsolete due to industry innovation, changes in technologies, or other market developments. Many new products in the health care field require significant research and development and may be subject to regulatory approvals, all of which may be time consuming and costly with no guarantee that any product will come to market.

Biotechnology Company Risk. A biotechnology company's valuation can often be based largely on the potential or actual performance of a limited number of products and can accordingly be greatly affected if one of its products proves, among other things, unsafe, ineffective or unprofitable. Biotechnology companies are subject to regulation by, and the restrictions of, the FDA, the U.S. Environmental Protection Agency, state and local governments, and non-U.S. regulatory authorities.

Pharmaceutical Company Risk. Companies in the pharmaceutical industry can be significantly affected by, among other things, government approval of products and services, government regulation and reimbursement rates, product liability claims, patent expirations and protection of intense competition.

Canada Risk. Because the Fund invests a significant portion of its assets in companies that are domiciled in Canada, the Fund is particularly sensitive to political, economic and social conditions in that country. Canada is a major producer of metals. The Canadian economy is especially dependent on the demand for, and supply of, natural resources, and the Canadian market is relatively concentrated in issuers involved in the production and distribution of natural resources. Canada is a top producer of zinc and uranium and a global source of many other natural resources, such as gold, nickel, aluminum, and lead. Conditions that weaken demand for such products worldwide could have a negative impact on the Canadian economy as a whole. Any adverse events that affect Canada's major industries may have a negative impact on the overall Canadian economy and the shares of the Fund.

Derivatives Risk. Derivatives may be riskier than other types of investments because they may be more sensitive to changes in economic market conditions than other types of investments and could result in losses that significantly exceed the Fund's original investment. A derivative is a financial contract the value of which depends on, or is derived from, the value of a financial asset, a physical asset, or a market index. Many derivatives create leverage thereby causing the Fund to be more volatile than it would be if it had not invested in derivatives. Derivatives also expose the Fund to counterparty risk (the risk that the derivative counterparty will not fulfill its contractual obligations) and to credit risk. Additionally, derivatives may be subject to numerous special and complex tax rules, which could cause adverse tax consequences and impact the amount, timing or character of income distributed by the Fund. Derivatives may be purchased on established exchanges or through privately negotiated transactions referred to as OTC derivatives. Exchange-traded derivatives generally are guaranteed by the clearing agency which is the issuer or counterparty to such derivatives. Each party to an OTC derivative bears the risk that the counterparty will default. OTC derivatives are less liquid than exchange-traded derivatives since the other party to the transaction may be the only investor with sufficient understanding of the derivative to be interested in bidding for it. The Fund may enter into total return swaps, among other instruments, for purposes of attempting to gain exposure to a particular asset without actually purchasing that asset. Such swap arrangements are OTC derivatives that may also subject the Fund to the risk that the counterparty to the transaction may not meet its obligations. To the extent the Fund enters utilizes derivatives, it will do so pursuant to the requirements of Rule 18f-4 under the 1940 Act ("Rule 18f-4"). Rule 18f-4 requires a Fund to implement certain policies and procedures designed to manage its derivatives risks, dependent upon a Fund's level of exposure to derivative instruments. To the extent the Fund is noncompliant with Rule 18f-4, the Fund may be required to adjust its investment portfolio which may, in turn, negatively impact its implementation of its investment strategies.
Counterparty Risk. The Fund may invest in financial instruments involving counterparties that attempt to gain exposure to a particular securities without actually purchasing those securities. The Fund's use of such financial instruments, including swap arrangements, involves risks that are different from those associated with ordinary portfolio securities transactions. For example, if a swap agreement counterparty defaults on its payment obligations to the Fund, this default will cause the value of your investment in the Fund to decrease.

Active Market Risk. Although the Shares are listed for trading on the Exchange, there can be no assurance that an active trading market for the Shares will develop or be maintained. Shares trade on the Exchange at market prices that may be below, at or above the Fund's net asset value. Securities, including the Shares, are subject to market fluctuations and liquidity constraints that may be caused by such factors as economic, political, or regulatory developments, changes in interest rates, and/or perceived trends in securities prices. Shares of the Fund could decline in value or underperform other investments.

Authorized Participant Concentration Risk. Only an authorized participant (as defined in "Purchase and Sales of Shares") may engage in creation or redemption transactions directly with the Fund. The Fund has a limited number of institutions that act as authorized participants on an agency basis (i.e. on behalf of other market participants). To the extent that these institutions exit the business or are unable to proceed with creation and/or redemption orders with respect to the Fund and no other authorized participant is able to step forward to create or redeem, in either of these cases, Fund shares may trade at a discount to the Fund's net asset value and possibly face delisting.

Below Net Asset Value Risk. The net asset value of Shares will generally fluctuate with changes in the market value of the Fund's holdings. The market prices of Shares will generally fluctuate in accordance with changes in net asset value as well as the relative supply of and demand for Shares on the Exchange. The Fund cannot predict whether Shares will trade below (discount), at or above (premium) their net asset value. Price differences may be due, in large part, to the fact that supply and demand forces at work in the secondary trading market for Shares will be closely related to, but not identical to, the same forces influencing the prices of the holdings of the Fund trading individually or in the aggregate at any point in time.

Currency Risk. Because the Fund's NAV is determined in U.S. dollars, the Fund's NAV could decline if a relevant non-U.S. currency depreciates against the U.S. dollar or if there are delays or limits on the repatriation of such currency. Currency exchange rates can be very volatile and can change quickly and unpredictably. As a result, the Fund's NAV may change without warning, which could have a significant negative impact on the Fund.

Cyber Security Risk. As the use of Internet technology has become more prevalent in the course of business, the Fund has become more susceptible to potential operational risks through breaches in cyber security. A breach in cyber security refers to both intentional and unintentional events that may cause the Fund to lose proprietary information, suffer data corruption or lose operational capacity. Such events could cause the Fund to incur regulatory penalties, reputational damage, additional compliance costs associated with corrective measures and/or financial loss. Cyber security breaches may involve unauthorized access to the Fund's digital information systems through "hacking" or malicious software coding, but may also result from outside attacks such as denial-of-service attacks through efforts to make network services unavailable to intended users. In addition, cyber security breaches of the Fund's third-party service providers, such as its administrator, transfer agent, custodian, or sub-advisor, as applicable, or issuers in which the Fund invests, can also subject the Fund to many of the same risks associated with direct cyber security breaches. While the Fund has established business continuity plans and risk management systems designed to reduce the risks associated with cyber security, there are inherent limitations in such plans and systems. Additionally, there is no guarantee that such efforts will succeed, especially because the Fund does not directly control the cyber security systems of issuers or third-party service providers.

Depositary Receipts Risk. ADRs are certificates that evidence ownership of shares of a non-U.S. issuer and are alternatives to purchasing directly the underlying non-U.S. securities in their national markets and currencies. GDRs are certificates issued by an international bank that generally are traded and denominated in the currencies of countries other than the home country of the issuer of the underlying shares. Depositary receipts may be subject to some of the same risks as direct investment in non-U.S. companies, which includes international trade, currency, political, regulatory and diplomatic risks. ADRs may be purchased through "sponsored" or "unsponsored" facilities. A sponsored facility is established jointly by a depositary and the issuer of the underlying security. A depositary may establish an unsponsored facility without participation by the issuer of the deposited security. Under an unsponsored depositary receipt arrangement, the non-U.S. issuer assumes no obligations and the depositary's transaction fees are paid directly by the depositary receipt holders. Unsponsored receipts may involve higher expenses and may be less liquid. Because unsponsored depositary receipt arrangements are organized independently and without the cooperation of the issuer of the underlying securities, available information concerning the non-U.S. issuer may not be as current as for sponsored depositary receipt and voting rights with respect to the deposited securities are not passed through. GDRs can involve currency risk since, unlike ADRs, they may not be U.S. dollar-denominated. Because the Fund's NAV is determined in U.S. dollars, the NAV of the Fund could decline if the currency of the non-U.S. market in which the Fund invests depreciates against the U.S. dollar, even if the value of the Fund's holdings, measured in the non-U.S. currency, increases.
Emerging Markets Risk. Emerging market countries include, but are not limited to, those considered to be developing by the International Monetary Fund, the World Bank, the International Finance Corporation or one of the leading global investment banks. The majority of these countries are likely to be located in Asia, Latin America, the Middle East, Central and Eastern Europe, and Africa. Investments in emerging market issuers are subject to a greater risk of loss than investments in issuers located or operating in more developed markets. This is due to, among other things, the potential for greater market volatility, lower trading volume, higher levels of inflation, political and economic instability, greater risk of a market shutdown and more governmental limitations on foreign investments in emerging market countries than are typically found in more developed markets. Moreover, emerging markets often have less uniformity in accounting and reporting requirements, less reliable securities valuations and greater risks associated with custody of securities than developed markets. In addition, emerging markets often have greater risk of capital controls through such measures as taxes or interest rate control than developed markets. Certain emerging market countries may also lack the infrastructure necessary to attract large amounts of foreign trade and investment.

Fluctuation of Net Asset Value Risk. The Fund is generally subject to liquidity risk that may affect the market for Shares as compared to the underlying value of the Fund's investments. The net asset value of Shares will generally fluctuate with changes in the market value of the Fund's holdings. The market prices of Shares will generally fluctuate in accordance with changes in net asset value as well as the relative supply of and demand for Shares on the Exchange. The Fund cannot predict whether Shares will trade below, at or above their net asset value. Price differences may be due, in large part, to the fact that supply and demand forces at work in the secondary trading market for Shares will be closely related to, but not identical to, the same forces influencing the prices of the holdings of the Fund trading individually or in the aggregate at any point in time.

Growth Stocks Risk. Prices of growth stocks tend to be higher in relation to their companies' earnings because of their growth potential because of their growth potential, which may or may not be realized. Growth stocks may also be more volatile than other stocks because they are more sensitive to investor perceptions regarding the growth potential of the issuing company. In addition, growth stocks typically invest a high portion of their earnings back into their business and may lack the dividend yield that could cushion their decline in a market downturn.

Inflation Risk. Inflation may reduce the intrinsic value of increases in the value of the Fund. Inflation risk is the risk that the value of assets or income from investments will be less in the future as inflation decreases the value of money. As inflation increases, the value of the Fund's assets can decline as can the value of the Fund's distributions.

International Closed Market Trading Risk. To the extent that the underlying securities held by the Fund trade on non-U.S. exchanges that may be closed when the Exchange is open, there are likely to be deviations between the current price of such an underlying security and the last quoted price for the underlying security. These deviations could result in premiums or discounts to the Fund's NAV that may be greater than those experienced by other exchange-traded funds.

Management Risk. The Fund is subject to management risk because it is an actively managed. In managing the Fund's portfolio, the Sub-Adviser will apply investment techniques and risk analyses in making investment decisions for the Fund, but there can be no guarantee that these will produce the desired results.

Market Maker Risk. If the Fund has lower average daily trading volumes, it may rely on a small number of third-party market makers to provide a market for the purchase and sale of Shares. Any trading halt or other problem relating to the trading activity of these market makers could result in a dramatic change in the spread between the Fund's net asset value and the price at which the Shares are trading on the Exchange, which could result in a decrease in value of the Shares. In addition, decisions by market makers or authorized participants to reduce their role or step away from these activities in times of market stress could inhibit the effectiveness of the arbitrage process in maintaining the relationship between the underlying values of the Fund's portfolio securities and the Fund's market price. This reduced effectiveness could result in Shares trading at a discount to net asset value and also in greater than normal intra-day bid-ask spreads for Shares.

Market Risk. Market risk is the risk that a particular security owned by the Fund or the Shares in general may fall in value, including the possible loss of the entire principal amount that you invest. Securities are subject to market fluctuations caused by such factors as economic, political, regulatory or market developments, changes in interest rates and perceived trends in securities prices, and changes in investors' perceptions of the financial condition of an issuer or the general condition of the relevant stock market, such as the current market volatility. Overall security values could decline generally or could underperform other investments. In addition, local, regional or global events such as war, acts of terrorism, spread of infectious diseases or other public health issues, recessions, or other events could have a significant negative impact on the Fund and its investments. For example, the COVID-19 pandemic and efforts to contain its spread resulted in extreme volatility in the financial markets. While the development of vaccines has slowed the spread of the disease, there is no guarantee that the vaccines will be effective against emerging variants of the disease. As the global pandemic illustrated, such events may affect certain regions, sectors and industries more significantly than others. Such events could also adversely affect the prices and liquidity of the Fund's portfolio securities or other instruments and could result in disruptions to trading markets. Any of such circumstances could materially negatively impact the value of the Fund's Shares and result in increased market volatility. During any such events, the Fund's Shares may trade at an increased premium or discount to its NAV.
Non-Cannabis Related Business Risk. Many of the companies in which the Fund invests may be engaged in other lines of business unrelated to cannabis and these lines of business could adversely affect their operating results. The operating results of these companies may fluctuate as a result of these additional risks and events in the other lines of business. In addition, a company’s ability to engage in new activities may expose it to business risks with which it has less experience than it has with the business risks associated with its traditional businesses. Despite a company’s possible success in activities linked to its use of cannabis, there can be no assurance that the other lines of business in which these companies are engaged will not have an adverse effect on a company’s business or financial condition.

Non-Diversification Risk. Because the Fund is non-diversified and can invest in a greater portion of its assets in securities of individual issuers than a diversified fund, changes in the market value of a single investment could cause greater fluctuations in Share price than would occur in a diversified fund. This may increase the Fund’s volatility and cause the performance of a relatively small number of issuers to have a greater impact on the Fund’s performance.

Non-U.S. Investment Risk. Securities issued by non-U.S. companies present risks beyond those of securities of U.S. issuers. Risks of investing in the securities of non-U.S. companies include: different accounting standards; expropriation, nationalization or other adverse political or economic developments; currency devaluation, blockages or transfer restrictions; changes in non-U.S. currency exchange rates; taxes; restrictions on non-U.S. investments and exchange of securities; and less government supervision and regulation of issuers in non-U.S. countries. Prices of non-U.S. securities also may be more volatile. Investments in securities denominated in other currencies could decline due to changes in local currency relative to the value of the U.S. dollar, which may affect the Fund’s returns.

Operational Risk. The Fund is exposed to operational risks arising from a number of factors, including, but not limited to, human error, processing and communication errors, errors of the Fund’s service providers, counterparties or other third-parties, failed or inadequate processes and technology or systems failures. The Fund, Adviser and Sub-Adviser seek to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate to address these risks.

REIT Risk. Adverse economic, business or political developments affecting real estate could have a major effect on the value of the Fund’s investments in REITs. Investing in REITs may subject the Fund to risks associated with the direct ownership of real estate, such as decreases in real estate values, overbuilding, increased competition and other risks related to local or general economic conditions, increases in operating costs and property taxes, changes in zoning laws, casualty or condemnation losses, possible environmental liabilities, regulatory limitations on rent and fluctuations in rental income. In addition, REITs are subject to the possibility of failing to qualify for the favorable U.S. federal income tax treatment generally available to them under the Internal Revenue Code of 1986, as amended (the “Code”), and failing to maintain exemption from the registration requirements of the 1940 Act.

Securities Lending Risk. The Fund engages in securities lending. Securities lending involves a risk of loss because the borrower may fail to return the securities in a timely manner or at all. If the Fund were unable to recover the securities loaned, it may sell the collateral and purchase a replacement security in the market. Lending securities entails a risk of loss to the Fund if and to the extent that the market value of the loaned securities increases and the collateral is not increased accordingly. Any cash received as collateral for loaned securities will be invested in readily marketable, high quality, short-term obligations. This investment is subject to market appreciation or depreciation and the Fund will bear any loss on the investment of its cash collateral.

Smaller Companies Risk. The Fund may be composed primarily of, or have significant exposure to, securities of smaller companies. Small and/or mid-capitalization companies may be more vulnerable to adverse general market or economic developments, and their securities may be less liquid and may experience greater price volatility than larger, more established companies as a result of several factors, including limited trading volumes, products or financial resources, management inexperience and less publicly available information. Further, it may be more difficult for the Fund to buy or sell a significant amount of the securities of a smaller company without an adverse impact on the price of the company’s securities. Accordingly, such companies are generally subject to greater market risk than larger, more established companies.

Trading Issues Risk. Although the shares of the Fund are listed for trading on the Exchange, there can be no assurance that an active trading market for such shares will develop or be maintained. Trading in shares on the Exchange may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in shares inadvisable. In addition, trading in shares on the Exchange is subject to trading halts caused by extraordinary market volatility pursuant to Exchange “circuit breaker” rules. Market makers are under no obligation to make a market in the Fund’s shares, and authorized participants are not obligated to submit purchase or redemption orders for Creation Units. There can be no assurance that the requirements of the Exchange necessary to maintain the listing of the Fund will continue to be met or will remain unchanged. The Fund may have difficulty maintaining its listing on the Exchange in the event the Fund’s assets are small or the Fund does not have enough shareholders.

Valuation Risk. During periods of reduced market liquidity or in the absence of readily available market quotations for the holdings of the Fund, the ability of the Fund to value its investments will become more difficult. In market environments where there is reduced availability of reliable objective pricing data, the judgment of the Fund’s investment adviser in determining the fair value of the security may play a greater role. While such determinations may be made in good faith, it may nevertheless be more difficult for the Fund to accurately assign a daily value.

The Shares will change in value, and you could lose money by investing in the Fund. The Fund may not achieve its investment objective.
PERFORMANCE

The bar chart and table below illustrate the annual calendar year returns of the Fund based on NAV as well as the average annual Fund returns. The bar chart and table provide an indication of the risks of investing in the Fund by showing changes in the Fund’s performance from year-to-year and by showing how the Fund’s average annual total returns based on NAV compare to those of a benchmark index and a broad-based market index. The Fund’s performance information is accessible on the Fund’s website at www.amplifyetfs.com.

The Fund’s highest quarterly return was 66.14% (quarter ended March 31, 2021) and the Fund’s lowest quarterly return was -47.34% (quarter ended June 30, 2022).

The Fund’s past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future.

Returns before taxes do not reflect the effects of any income or capital gains taxes. All after-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of any state or local tax. Returns after taxes on distributions reflect the taxed return on the payment of dividends and capital gains. The return after taxes on distributions and sale of fund shares is higher than other return figures when a capital loss occurs upon the redemption of Fund shares.

Your own actual after-tax returns will depend on your specific tax situation and may differ from what is shown here. After-tax returns are not relevant to investors who hold Shares in tax-deferred accounts such as individual retirement accounts (IRAs) or employee-sponsored retirement plans.

MANAGEMENT OF THE FUND

Investment Adviser. Amplify Investments LLC.

Sub-Adviser. Penserra Capital Management LLC.

Portfolio Managers. The following individuals serve as the portfolio managers to the Fund.

- Timothy J. Seymour, Portfolio Manager at Amplify
- Dustin Lewellyn, CFA, Chief Investment Officer at Penserra
The portfolio managers are primarily and jointly responsible for the day-to-day management of the Fund. The portfolio managers have served as part of the portfolio management team of the Fund since its inception in 2019.

**PURCHASE AND SALE OF SHARES**

The Fund issues and redeems Shares at net asset value ("NAV") only with authorized participants ("APs") that have entered into agreements with the Fund's distributor and only in Creation Units (large blocks of 50,000 Shares) or multiples thereof ("Creation Unit Aggregations"), in exchange for the deposit or delivery of a basket of securities in which the Fund invests and/or cash. Except when aggregated in Creation Units, the Shares are not redeemable securities of the Fund.

Individual Shares may only be bought and sold in the secondary market (i.e., on a national securities exchange) through a broker or dealer at a market price. Because the Shares trade at market prices rather than NAV, Shares may trade at a price greater than NAV (at a premium), at NAV, or less than NAV (at a discount). An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase Shares (bid) and the lowest price a seller is willing to accept for Shares (ask) when buying or selling shares in the secondary market (the "bid-ask spread").

Recent information, including information on the Fund's NAV, market price, premiums and discounts, and bid-ask spreads, is available online at www.amplifyetfs.com.

**TAX INFORMATION**

The Fund's distributions will generally be taxable as ordinary income or capital gains. A sale of Shares may result in capital gain or loss.

**PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES**

If you purchase Shares through a broker-dealer or other financial intermediary (such as a bank), the Adviser and Foreside Fund Services, LLC, the Fund's distributor, may pay the intermediary for the sale of Shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.
Additional Information About the Fund’s Strategies and Risks

The Fund is a series of the Trust, an investment company and an actively-managed ETF. The investment objective of the Fund is to seek capital appreciation. The Fund’s investment objective and each of the policies described herein are non-fundamental policies that may be changed by the Board of Trustees of the Trust (the “Board”) without shareholder approval. Certain fundamental policies of the Fund are set forth in the Fund’s Statement of Additional Information (“SAI”) under “Investment Objective and Policies.”

Concentration Policy. The Fund will not concentrate its investments in securities (i.e., invest more than 25% of the value of its total assets) except that the Fund will concentrate in the securities of issuers in the cannabis industry.

Fund Investments

EQUITY SECURITIES

The Fund invests in equity securities, including common stocks and/or depositary receipts. Equity securities represent an ownership position in a company. The prices of equity securities fluctuate based on, among other things, events specific to their issuers and market, economic, and other conditions. American depositary receipts are certificates that evidence ownership of shares of a non-U.S. issuer and are alternatives to purchasing directly the underlying non-U.S. foreign securities in their national markets and currencies. Global depositary receipts are certificates issued by an international bank that generally are traded and denominated in the currencies of countries other than the home country of the issuer of the underlying shares.

CASH EQUIVALENTS AND SHORT-TERM INVESTMENTS

The Fund may invest in securities with maturities of less than one year or cash equivalents, or it may hold cash. The percentage of the Fund invested in such holdings varies and depends on several factors, including market conditions. During the initial invest-up period and during periods of high cash inflows or outflows, if market conditions are not favorable, the Fund may depart from its principal investment strategies and invest part or all of its assets in these securities or it may hold cash. During such periods, the Fund may not be able to achieve its investment objective. For more information on eligible short-term investments, see the SAI.

DERIVATIVES

The Fund may utilize derivatives in pursuing its investment objective. A derivative is a financial contract the value of which depends on, or is derived from, the value of a financial asset, a physical asset, or a market index. Derivatives may be riskier than other types of investments because they may be more sensitive to changes in economic market conditions than other types of investments and could result in losses that significantly exceed the Fund’s original investment. The Fund may utilize swap agreements in an attempt to gain exposure to the securities in a market without actually purchasing those securities. Swap arrangements are two-party contracts entered into primarily by institutional investors for periods ranging from a day to more than one-year. In a standard “swap” transaction, two parties agree to exchange the returns (or differentials in rates of return) earned or realized on a particular predetermined investments or instruments. The Fund will utilize derivative instruments pursuant to Rule 18f-4 under the 1940 Act, which requires the Fund to implement certain policies and procedures designed to manage its derivatives risks, dependent upon the Fund’s level of exposure to derivative instruments.

SECURITIES LENDING

The Fund may lend its portfolio securities to brokers, dealers and other financial institutions. In connection with such loans, the Fund receives liquid collateral equal to at least 102% (105% for international securities) of the value of the loaned portfolio securities. This collateral is marked-to-market on a daily basis. To the extent that the Fund receives cash collateral, it will invest such collateral in readily marketable, high quality, short-term obligations.

PRINCIPAL RISKS OF INVESTING IN THE FUND

The following provides additional information about certain of the principal risks identified under “Principal Risks of Investing in the Fund” in the Fund’s “Summary Information” section. Risk is inherent in all investing. Investing in the Fund involves risk, including the risk that you may lose all or part of your investment. There can be no assurance that the Fund will meet its stated objectives. Before you invest, you should consider the following risks in addition to the Principal Risks set forth above in this prospectus.
Cannabis Industry Risk. Companies involved in the cannabis industry face competition, may have limited access to the services of banks, may have substantial burdens on company resources due to litigation, complaints or enforcement actions, and are heavily dependent on receiving necessary permits and authorizations to engage in medical cannabis research or to otherwise cultivate, possess or distribute cannabis. Additionally, cannabis-related companies are subject to various laws and regulations that may differ at the local, state, and federal level. These laws and regulations may significantly affect a cannabis-related company’s ability to conduct business, secure financing, impact the market for cannabis business sales and services, and set limits on cannabis use, production, transportation and storage. Since the use of cannabis is illegal under U.S. federal law, federally regulated banking institutions may be unwilling to make financial services available to growers and sellers of cannabis. Additionally, litigation initiated by private citizens or companies could have a negative impact on the financial and operational status of cannabis-related companies.

Regulatory Risk — U.S. The possession and use of cannabis, even for medical purposes, is illegal under federal and certain states’ laws, which may negatively impact the value of the Fund’s investments. Use of cannabis is regulated by both the federal government and state governments, which may conflict. Even in those states in which the use of cannabis has been legalized, its possession and use remains a violation of federal law. Federal law criminalizing the use of cannabis pre-empts state laws that legalizes its use for medicinal and recreational purposes. Any change in the federal government's enforcement of current federal laws could adversely affect the ability of the companies in which the Fund invests to possess or cultivate cannabis, including in connection with pharmaceutical research, or it could shrink the customer pool for certain of the Fund’s portfolio companies. Any of these outcomes would negatively affect the profitability and value of the Fund’s investments.

Cannabis is a Schedule I controlled substance under the Controlled Substances Act ("CSA"), meaning that it has a high potential for abuse, has no currently “accepted medical use” in the U.S., lacks accepted safety for use under medical supervision, and may not be prescribed, marketed or sold in the U.S. Facilities conducting research, manufacturing, distributing, importing or exporting, or dispensing controlled substances must be registered (licensed) to perform these activities and have the security, control, recordkeeping, reporting and inventory mechanisms required by the United Stated Drug Enforcement Administration ("DEA") to prevent drug loss and diversion. Failure to obtain the necessary registrations or comply with the necessary regulatory requirements may significantly impair the ability of certain companies in which the Fund invests to pursue medical cannabis research or to otherwise cultivate, possess or distribute cannabis.

Facilities conducting research, manufacturing, distributing, importing or exporting, or dispensing controlled substances must be registered (licensed) to perform these activities and have the security, control, recordkeeping, reporting and inventory mechanisms required by the DEA to prevent drug loss and diversion. Failure to obtain the necessary registrations or comply with necessary regulatory requirements may significantly impair the ability of certain companies in which the Fund invests to pursue medical cannabis research or to otherwise cultivate, possess or distribute cannabis.

Regulatory Risk — Non-U.S. The companies in which the Fund invests are subject to various laws, regulations and guidelines relating to the manufacture, management, transportation, storage and disposal of cannabis, as well as being subject to laws and regulations relating to health and safety, the conduct of operations and the protection of the environment. Even if a company’s operations are permitted under current law, they may not be permitted in the future, in which case such company may not be in a position to carry on its operations in its current locations. Additionally, controlled substance legislation differs between countries and legislation in certain countries may restrict or limit the ability of certain companies in which the Fund invests to sell their products.

Equity Securities Risk. Equity securities risk is the risk that the value of equity securities, including common stocks, will fall. The value of an equity security may fall due to changes in general economic conditions that impact the market as a whole and that are relatively unrelated to an issuer or its industry. These conditions include changes in interest rates, specific periods of overall market turbulence or instability, or general and prolonged periods of economic decline and cyclical change. An issuer’s common stock in particular may be especially sensitive to, and more adversely affected by, these general movements in the stock market; it is possible that a drop in the stock market may depress the price of most or all of the common stocks that a Fund holds. In addition, equity risk includes the risk that investor sentiment toward, and perceptions regarding, particular industries or economic sectors will become negative. Price changes of equity securities may occur in a particular region, industry, or sector of the market, and as a result, the value of an issuer’s common stock may fall solely because of factors, such as increases in production costs, that negatively impact other companies in the same industry or in a number of different industries. Equity securities risk also includes the financial risks of a specific company, including that the value of the company’s securities may fall as a result of factors directly relating to that company, such as decisions made by its management or lower demand for the company’s products or services. In particular, the common stock of a company may decline significantly in price over short periods of time. For example, an adverse event, such as an unfavorable earnings report, may depress the value of common stock; similarly, the common stock of an issuer may decline in price if the issuer fails to make anticipated dividend payments because, among other reasons, the issuer experiences a decline in its financial condition.
**Health Care Companies Risk.** Health care companies are subject to extensive government regulation and their profitability can be significantly affected by restrictions on government reimbursement for medical expenses, rising costs of medical products and services, pricing pressure (including price discounting), limited product lines, and an increased emphasis on the delivery of healthcare through outpatient services. Health care companies are heavily dependent on obtaining and defending patents, which may be time consuming and costly, and the expiration of patents may also adversely affect the profitability of the companies. Health care companies are also subject to extensive litigation based on product liability and similar claims. In addition, their products can become obsolete due to industry innovation, changes in technologies, or other market developments. Many new products in the health care field require significant research and development and may be subject to regulatory approvals, all of which may be time consuming and costly with no guarantee that any product will come to market.

**Biotechnology Company Risk.** A biotechnology company's valuation can often be based largely on the potential or actual performance of a limited number of products and can accordingly be greatly affected if one of its products proves, among other things, unsafe, ineffective or unprofitable. Biotechnology companies are subject to regulation by, and the restrictions of, the FDA, the U.S. Environmental Protection Agency, state and local governments, and non-U.S. regulatory authorities.

**Pharmaceutical Company Risk.** Companies in the pharmaceutical industry can be significantly affected by, among other things, government approval of products and services, government regulation and reimbursement rates, product liability claims, patent expirations and protection of intense competition.

**Canada Risk.** Because the Fund invests a significant portion of its assets in companies that are domiciled in Canada, the Fund is particularly sensitive to political, economic and social conditions in that country. Canada is a major producer of metals. The Canadian economy is especially dependent on the demand for, and supply of, natural resources, and the Canadian market is relatively concentrated in issuers involved in the production and distribution of natural resources. Canada is a top producer of zinc and uranium and a global source of many other natural resources, such as gold, nickel, aluminum, and lead. Conditions that weaken demand for such products worldwide could have a negative impact on the Canadian economy as a whole. Any adverse events that affect Canada's major industries may have a negative impact on the overall Canadian economy and the shares of the Fund.

**Derivatives Risk.** Derivatives may be riskier than other types of investments because they may be more sensitive to changes in economic market conditions than other types of investments and could result in losses that significantly exceed the Fund's original investment. A derivative is a financial contract the value of which depends on, or is derived from, the value of a financial asset, a physical asset, or a market index. Many derivatives create leverage thereby causing the Fund to be more volatile than it would be if it had not invested in derivatives. Derivatives also expose the Fund to counterparty risk (the risk that the derivative counterparty will not fulfill its contractual obligations) and to credit risk. Additionally, derivatives may be subject to numerous special and complex tax rules, which could cause adverse tax consequences and impact the amount, timing or character of income distributed by the Fund. Derivatives may be purchased on established exchanges or through privately negotiated transactions referred to as OTC derivatives. Exchange-traded derivatives generally are guaranteed by the clearing agency which is the issuer or counterparty to such derivatives. Each party to an OTC derivative bears the risk that the counterparty will default. OTC derivatives are less liquid than exchange-traded derivatives since the other party to the transaction may be the only investor with sufficient understanding of the derivative to be interested in bidding for it. The Fund may enter into total return swaps, among other instruments, for purposes of attempting to gain exposure to a particular asset without actually purchasing that asset. Such swap arrangements are OTC derivatives that may also subject the Fund to the risk that the counterparty to the transaction may not meet its obligations. To the extent the Fund enters utilizes derivatives, it will do so pursuant to the requirements of Rule 18f-4 under the 1940 Act. Rule 18f-4 requires a Fund to implement certain policies and procedures designed to manage its derivatives risks, dependent upon a Fund's level of exposure to derivative instruments. To the extent the Fund is noncompliant with Rule 18f-4, the Fund may be required to adjust its investment portfolio which may, in turn, negatively impact its implementation of its investment strategies.

**Counterparty Risk.** The Fund may invest in financial instruments involving counterparties that attempt to gain exposure to a particular securities without actually purchasing those securities. The Fund's use of such financial instruments, including swap arrangements, involves risks that are different from those associated with ordinary portfolio securities transactions. For example, if a swap agreement counterparty defaults on its payment obligations to the Fund, this default will cause the value of your investment in the Fund to decrease. Additionally, the Fund may enter into swap agreements with a limited number of counterparties, which may increase the Fund's exposure to counterparty credit risk. Similarly, if the credit quality of an issuer or guarantor of a debt instrument improves, this change may adversely affect the value of the Fund's investment.

**Active Market Risk.** Although the Shares are listed for trading on the Exchange, there can be no assurance that an active trading market for the Shares will develop or be maintained. Shares trade on the Exchange at market prices that may be below, at or above the Fund's net asset value. Securities, including the Shares, are subject to market fluctuations and liquidity constraints that may be caused by such factors as economic, political, or regulatory developments, changes in interest rates, and/or perceived trends in securities prices. Shares of the Fund could decline in value or underperform other investments.
**Authorized Participant Concentration Risk.** Only an authorized participant may engage in creation or redemption transactions directly with the Fund. The Fund has a limited number of institutions that act as authorized participants on an agency basis (i.e. on behalf of other market participants). To the extent that these institutions exit the business or are unable to proceed with creation and/or redemption orders with respect to the Fund and no other authorized participant is able to step forward to create or redeem, in either of these cases, Fund shares may trade at a discount to the Fund's net asset value and possibly face delisting.

**Below Net Asset Value Risk.** The net asset value of Shares will generally fluctuate with changes in the market value of the Fund's holdings. The market prices of Shares will generally fluctuate in accordance with changes in net asset value as well as the relative supply of and demand for Shares on the Exchange. The Fund cannot predict whether Shares will trade below (discount), at or above (premium) their net asset value. Price differences may be due, in large part, to the fact that supply and demand forces at work in the secondary trading market for Shares will be closely related to, but not identical to, the same forces influencing the prices of the holdings of the Fund trading individually or in the aggregate at any point in time.

**Currency Risk.** Because the Fund's NAV is determined in U.S. dollars, the Fund's NAV could decline if a relevant non-U.S. currency depreciates against the U.S. dollar or if there are delays or limits on the repatriation of such currency. Currency exchange rates can be very volatile and can change quickly and unpredictably. As a result, the Fund's NAV may change without warning, which could have a significant negative impact on the Fund.

**Cyber Security Risk.** With the increased use of technologies such as the internet to conduct business, the Fund, AP, service providers and the Exchange are susceptible to operational, information security and related "cyber" risks both directly and through their service providers. Similar types of cyber security risks are also present for issuers of securities in which the Fund invests, which could result in material adverse consequences for such issuers and may cause the Fund's investment in such portfolio companies to lose value. Unlike many other types of risks faced by the Fund, these risks typically are not covered by insurance. In general, cyber incidents can result from deliberate attacks or unintentional events. Cyber incidents include, but are not limited to, gaining unauthorized access to digital systems (e.g., through "hacking" or malicious software coding) for purposes of misappropriating assets or sensitive information, corrupting data, or causing operational disruption. Cyber attacks may also be carried out in a manner that does not require gaining unauthorized access, such as causing denial-of-service attacks on websites (i.e., efforts to make network services unavailable to intended users). Cyber security failures by or breaches of the systems of the Adviser, Sub-Adviser, distributor and other service providers (including, but not limited to, index providers, fund accountants, custodians, transfer agents and administrators), market makers, authorized participants or the issuers of securities in which the Fund invests, have the ability to cause disruptions and impact business operations, potentially resulting in: financial losses, interference with the Fund's ability to calculate its NAV, disclosure of confidential trading information, impediments to trading, submission of erroneous trades or erroneous creation or redemption orders, the inability of the Fund or its service providers to transact business, violations of applicable privacy and other laws, regulatory fines, penalties, reputational damage, reimbursement or other compensation costs, or additional compliance costs. In addition, cyber attacks may render records of Fund assets and transactions, shareholder ownership of Shares, and other data integral to the functioning of the Fund inaccessible or inaccurate or incomplete. Substantial costs may be incurred by a Fund in order to resolve or prevent cyber incidents in the future. While the Fund has established business continuity plans in the event of, and risk management systems to prevent, such cyber attacks, there are inherent limitations in such plans and systems, including the possibility that certain risks have not been identified and that prevention and remediation efforts will not be successful. Furthermore, the Fund cannot control the cyber security plans and systems put in place by service providers to the Fund, issuers in which the Fund invests, the index providers, market makers or APs. The Fund and its shareholders could be negatively impacted as a result.

**Depository Receipts Risk.** ADRs are certificates that evidence ownership of shares of a non-U.S. issuer and are alternatives to purchasing directly the underlying non-U.S. securities in their national markets and currencies. GDRs are certificates issued by an international bank that generally are traded and denominated in the currencies of countries other than the home country of the issuer of the underlying shares. ADRs and GDRs may be subject to certain of the risks associated with direct investments in the securities of non-U.S. companies, such as currency, political, economic and market risks, because their values depend on the performance of the non-dollar denominated underlying non-U.S. securities. Certain countries may limit the ability to convert ADRs into the underlying non-U.S. securities and vice versa, which may cause the securities of the non-U.S. company to trade at a discount or premium to the market price of the related ADR. ADRs may be purchased through "sponsored" or “unsponsored” facilities. A sponsored facility is established jointly by a depositary and the issuer of the underlying security. A depository may establish an unsponsored facility without participation by the issuer of the deposited security. Un-sponsored receipts may involve higher expenses and may be less liquid. Holders of unsponsored ADRs generally bear all the costs of such facilities, and the depositary of an unsponsored facility frequently is under no obligation to distribute shareholder communications received from the issuer of the deposited security or to pass through voting rights to the holders of such receipts in respect of the deposited securities. GDRs can involve currency risk since, unlike ADRs, they may not be U.S. dollar-denominated. Because the Fund's NAV is determined in U.S. dollars, the NAV of the Fund could decline if the currency of the non-U.S. market in which the Fund invests depreciates against the U.S. dollar, even if the value of the Fund's holdings, measured in the non-U.S. currency, increases.
Emerging Markets Risk. Emerging market countries include, but are not limited to, those considered to be developing by the International Monetary Fund, the World Bank, the International Finance Corporation or one of the leading global investment banks. The majority of these countries are likely to be located in Asia, Latin America, the Middle East, Central and Eastern Europe, and Africa. Investments in emerging market issuers are subject to a greater risk of loss than investments in issuers located or operating in more developed markets. This is due to, among other things, the potential for greater market volatility, lower trading volume, higher levels of inflation, political and economic instability, greater risk of a market shutdown and more governmental limitations on foreign investments in emerging market countries than are typically found in more developed markets. Moreover, emerging markets often have less uniformity in accounting and reporting requirements, less reliable securities valuations and greater risks associated with custody of securities than developed markets. In addition, emerging markets often have greater risk of capital controls through such measures as taxes or interest rate control than developed markets. Certain emerging market countries may also lack the infrastructure necessary to attract large amounts of foreign trade and investment.

Fluctuation of Net Asset Value Risk. The Fund is generally subject to liquidity risk that may affect the market for Shares as compared to the underlying value of the Fund's investments. The NAV of the Shares will generally fluctuate with changes in the market value of the Fund's holdings. The market prices of Shares will generally fluctuate in accordance with changes in NAV as well as the relative supply of and demand for Shares on the Exchange. The Fund cannot predict whether Shares will trade below, at or above their net asset value. Price differences may be due, in large part, to the fact that supply and demand forces at work in the secondary trading market for Shares will be closely related to, but not identical to, the same forces influencing the prices of the holdings of the Fund trading individually or in the aggregate at any point in time. If a shareholder purchases at a time when the market price is at a premium to the net asset value of the Shares, or sells at a time when the market price is at a discount to the net asset value of the Shares, the shareholder may sustain losses. However, given that Shares can only be purchased and redeemed in Creation Units, and only to and from broker-dealers and large institutional investors that have entered into participation agreements (unlike shares of closed-end funds, which frequently trade at appreciable discounts from, and sometimes at premiums to, their net asset value), the Fund believes that large discounts or premiums to the net asset value of Shares should not be sustained.

Growth Stocks Risk. Prices of growth stocks tend to be higher in relation to their companies' earnings because of their growth potential because of their growth potential, which may or may not be realized. Growth stocks may also be more volatile than other stocks because they are more sensitive to investor perceptions regarding the growth potential of the issuing company. In addition, growth stocks typically invest a high portion of their earnings back into their business and may lack the dividend yield that could cushion their decline in a market downturn.

Inflation Risk. Inflation may reduce the intrinsic value of increases in the value of the Fund. Inflation risk is the risk that the value of assets or income from investments will be less in the future as inflation decreases the value of money. As inflation increases, the value of the Fund's assets can decline as can the value of the Fund’s distributions.

International Closed Market Trading Risk. To the extent that the underlying securities held by the Fund trade on non-U.S. exchanges that may be closed when the Exchange is open, there are likely to be deviations between the current price of such an underlying security and the last quoted price for the underlying security. These deviations could result in premiums or discounts to the Fund's NAV that may be greater than those experienced by other exchange-traded funds.

Management Risk. The Fund is subject to management risk because it is an actively managed. In managing the Fund's portfolio, the Sub-Adviser will apply investment techniques and risk analyses in making investment decisions for the Fund, but there can be no guarantee that these will produce the desired results.

Market Maker Risk. If the Fund has lower average daily trading volumes, it may rely on a small number of third-party market makers to provide a market for the purchase and sale of Shares. Any trading halt or other problem relating to the trading activity of these market makers could result in a dramatic change in the spread between the Fund's net asset value and the price at which the Shares are trading on the Exchange, which could result in a decrease in value of the Shares. In addition, decisions by market makers or authorized participants to reduce their role or step away from these activities in times of market stress could inhibit the effectiveness of the arbitrage process in maintaining the relationship between the underlying values of the Fund's portfolio securities and the Fund's market price. This reduced effectiveness could result in Shares trading at a discount to net asset value and also in greater than normal intra-day bid-ask spreads for Shares.

Market Risk. Market risk is the risk that a particular security owned by the Fund or the Shares in general may fall in value, including the possible loss of the entire principal amount that you invest. Securities are subject to market fluctuations caused by such factors as economic, political, regulatory or market developments, changes in interest rates and perceived trends in securities prices, and changes in investors’ perceptions of the financial condition of an issuer or the general condition of the relevant stock market, such as the current market volatility. Overall security values could decline generally or could underperform other investments. In addition, local, regional or global events such as war, acts of terrorism, spread of infectious diseases or other public health issues, recessions, or other events could have a significant negative impact on the Fund and its investments. For example, the COVID-19 pandemic and efforts to contain its spread resulted in extreme volatility in the financial markets. While the development of vaccines has slowed the spread of the disease, there is no guarantee that the vaccines will be effective against emerging variants of the disease. As the global pandemic illustrated, such events may affect certain regions, sectors and industries more significantly than others. Such events could also adversely affect the prices...
and liquidity of the Fund's portfolio securities or other instruments and could result in disruptions to trading markets. Any of such circumstances could materially negatively impact the value of the Fund's Shares and result in increased market volatility. During any such events, the Fund's Shares may trade at an increased premium or discount to its NAV.

**Non-Cannabis Related Business Risk.** Many of the companies in which the Fund invests may be engaged in other lines of business unrelated to cannabis and these lines of business could adversely affect their operating results. The operating results of these companies may fluctuate as a result of these additional risks and events in the other lines of business. In addition, a company's ability to engage in new activities may expose it to business risks with which it has less experience than it has with the business risks associated with its traditional businesses. Despite a company's possible success in activities linked to its use of cannabis, there can be no assurance that the other lines of business in which these companies are engaged will not have an adverse effect on a company's business or financial condition.

**Non-Diversification Risk.** Because the Fund is non-diversified and can invest a greater portion of its assets in securities of individual issuers than a diversified fund, changes in the market value of a single investment could cause greater fluctuations in Share price than would occur in a diversified fund. This may increase the Fund's volatility and cause the performance of a relatively small number of issuers to have a greater impact on the Fund's performance.

**Non-U.S. Investment Risk.** Securities issued by non-U.S. companies present risks beyond those of securities of U.S. issuers. Risks of investing in the securities of non-U.S. companies include: different accounting standards; expropriation, nationalization or other adverse political or economic developments; currency devaluation, blockages or transfer restrictions; changes in non-U.S. currency exchange rates; taxes; restrictions on non-U.S. investments and exchange of securities; and less government supervision and regulation of issuers in non-U.S. countries. Prices of non-U.S. securities also may be more volatile. Investments in securities denominated in other currencies could decline due to changes in local currency relative to the value of the U.S. dollar, which may affect the Fund's returns.

**Operational Risk.** The Fund is exposed to operational risks arising from a number of factors, including, but not limited to, human error, processing and communication errors, errors of the Fund's service providers, counterparties or other third-parties, failed or inadequate processes and technology or systems failures. The Fund, Adviser and Sub-Adviser seek to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate to address these risks.

**REIT Risk.** Adverse economic, business or political developments affecting real estate could have a major effect on the value of the Fund's investments in REITs. Investing in REITs may subject the Fund to risks associated with the direct ownership of real estate, such as decreases in real estate values, overbuilding, increased competition and other risks related to local or general economic conditions, increases in operating costs and property taxes, changes in zoning laws, casualty or condemnation losses, possible environmental liabilities, regulatory limitations on rent and fluctuations in rental income. In addition, REITs are subject to the possibility of failing to qualify for the favorable U.S. federal income tax treatment generally available to them under the Internal Revenue Code of 1986, as amended (the "Code"), and failing to maintain exemption from the registration requirements of the 1940 Act.

**Securities Lending Risk.** The Fund engages in securities lending. Securities lending involves a risk of loss because the borrower may fail to return the securities in a timely manner or at all. If the Fund were unable to recover the securities loaned, it may sell the collateral and purchase a replacement security in the market. Lending securities entails a risk of loss to the Fund if and to the extent that the market value of the loaned securities increases and the collateral is not increased accordingly. Any cash received as collateral for loaned securities will be invested in readily marketable, high quality, short-term obligations. This investment is subject to market appreciation or depreciation and the Fund will bear any loss on the investment of its cash collateral.

**Smaller Companies Risk.** Stock prices of small and/or mid-capitalization companies may be more volatile than those of larger companies and, therefore, a Fund's share price may be more volatile than those of funds that invest a larger percentage of their assets in stocks issued by mid- or large-capitalization companies. Stock prices of small and/or mid-capitalization companies are generally more vulnerable than those of large-capitalization companies to adverse business and economic developments. Securities of small and/or mid-capitalization companies may be thinly traded, making it difficult for a Fund to buy and sell them. In addition, small and/or mid-capitalization companies are typically less financially stable than larger, more established companies and may depend on a small number of essential personnel, making these companies more vulnerable to experiencing adverse effects due to the loss of personnel. Small and/or mid-capitalization companies also normally have less diverse product lines than those of large-capitalization companies and are more susceptible to adverse developments concerning their products.

**Trading Issues Risk.** Although the shares of the Fund are listed for trading on the Exchange, there can be no assurance that an active trading market for such shares will develop or be maintained. Trading in shares on the Exchange may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in shares inappropriate. In addition, trading in shares on the Exchange is subject to trading halts caused by extraordinary market volatility pursuant to Exchange "circuit breaker" rules. Market makers are under no obligation to make a market in the Fund's shares, and authorized participants are not obligated to submit purchase or redemption orders for Creation Units. There can be no assurance that the requirements of the Exchange necessary to maintain the listing of the Fund will continue to be met or will remain unchanged. The Fund may have difficulty maintaining its listing on the Exchange in the event the Fund's assets are small or the Fund does not have enough shareholders.
Valuation Risk. During periods of reduced market liquidity or in the absence of readily available market quotations for the holdings of the Fund, the ability of the Fund to value its investments will become more difficult. In market environments where there is reduced availability of reliable objective pricing data, the judgment of the Fund's investment adviser determining the fair value of the security may play a greater role. While such determinations may be made in good faith, it may nevertheless be more difficult for the Fund to accurately assign a daily value. The Fund's Valuation Procedures (as defined below) adopted Amplify as Valuation Designee (as defined below), as reviewed, approved, and subject to the oversight of the Board, complies with Rule 2a-5 under the 1940 Act ("Rule 2a-5"). Pursuant to Rule 2a-5, the Board oversees the implementation of the Valuation Procedures. While the Fund's program is designed to contemplate the specific risks of the Fund, there is no guarantee the program will adequately do so each time, and value may not be properly selected for the Fund.

ADDITIONAL RISKS OF INVESTING IN THE FUND

The following section provides additional risk information regarding investing in the Fund.

Legislation and Litigation Risk. Legislation or litigation that affects the value of securities held by the Fund may reduce the value of the Fund. From time to time, various legislative initiatives are proposed that may have a negative impact on certain securities in which the Fund invests. In addition, litigation regarding any of the securities owned by the Fund may negatively impact the value of the Shares. Such legislation or litigation may cause the Fund to lose value or may result in higher portfolio turnover if the Adviser determines to sell such a holding.

Security Issuer Risk. Issuer-specific attributes may cause a security held by the Fund to be more volatile than the market generally. The value of an individual security or particular type of security may be more volatile than the market as a whole and may perform differently from the value of the market as a whole.

Portfolio Holdings

A description of the Trust's policies and procedures with respect to the disclosure of the Fund's portfolio holdings is available in the SAI, which is available at www.amplifyetfs.com.

Management of the Fund

FUND ORGANIZATION

The Fund is a series of the Trust, an investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). The Fund is treated as a separate fund with its own investment objective and policies. The Trust is organized as a Massachusetts business trust. The Board is responsible for the overall management and direction of the Trust. The Board elects the Trust's officers and approves all significant agreements, including those with the Adviser, custodian and fund administrative and accounting agent.

Amplify Investments LLC is a registered investment adviser with its offices at 3333 Warrenville Road, Suite 350, Lisle, Illinois 60532.

Penserra Capital Management LLC is a registered investment adviser with its offices at 4 Orinda Way, Suite 100-A, Orinda, California 94563.

Amplify Investments has overall responsibility for the selection of the Fund's assets, managing the Fund's business affairs and providing certain clerical, bookkeeping and other administrative services for the Trust. Penserra has responsibility for executing the Fund's trades and continuously monitoring the Fund's investments.

The members of the portfolio management team for the Fund are Timothy Seymour, Dustin Lewellyn, Ernesto Tong and Anand Desai.

Timothy J. Seymour. Mr. Seymour is a portfolio manager at Amplify Investments. Mr. Seymour has over 24 years of investment experience as a portfolio manager, allocator, and capital markets professional across multiple asset classes. Mr. Seymour has been an early stage investor in the cannabis industry and serves as a board member or in an advisory role for several private cannabis companies. Mr. Seymour is also a Senior Consultant to the JWAM Growth Fund, a cannabis hedge fund. In addition, Mr. Seymour is a frequent and long-time contributor on CNBC, including over a decade of appearances on the show "Fast Money." Mr. Seymour is the founder and Chief Investment Officer of Seymour Asset Management ("SAM"). SAM provides both asset management and wealth management services for its clients, including direct investment and allocation to private equity and alternative assets. Prior to SAM, Mr. Seymour was the Chief Investment Officer and co-founder of Triogem Asset Management ("Triogem"), where he helped run the firm's flagship fund, a long/short fund with an emphasis on global emerging markets.
Dustin Lewellyn, CFA. Mr. Lewellyn has extensive background in institutional investment process with a specific focus on ETFs, such as the Fund. Mr. Lewellyn was a portfolio manager at BGI (now part of Blackrock) and he managed a number of international equity funds. Dustin also was head of ETF product management and product development at Northern Trust where he oversaw the build out and management of all areas of a new ETF business, including primary responsibility for the portfolio management process surrounding the ETFs. Mr. Lewellyn also built and ran a new ETF business for Charles Schwab, including having primary responsibility for the technology and investment process to support portfolio management for the ETFs. Mr. Lewellyn started a consulting business with a focus on ETFs and helped numerous new ETF sponsors, as well as service providers, understand the resource requirements to participate in the industry utilizing current best practices. Mr. Lewellyn holds a B.A. from University of Iowa and is a CFA Charterholder. He also holds security licenses 7, 63, 66 and 24.

Ernesto Tong, CFA. Mr. Tong worked for Barclays Global Investors and Blackrock prior to joining the Sub-Adviser. During his time at Blackrock, Mr. Tong spent two years as an Index Research Analyst and seven years as a portfolio manager for a number of funds. As an Index Research Analyst, he was responsible for performing independent research and analysis to incorporate into Portfolio Management and Trading strategies and also developing and launching new indices and investment products, particularly in Latin America. As a portfolio manager, Ernesto managed $40 billion in global ETF assets and was responsible for all aspects of portfolio management across domestic and international portfolios. Ernesto was also responsible for launching, managing, and driving the local Latin American ETF products for the portfolio management group, focusing on Brazil, Colombia and Mexico. Ernesto holds a B.A. from the University of California, Davis and is a CFA Charterholder. He holds security licenses 7 and 63.

Anand Desai. Prior to joining the Sub-Adviser in 2015, Mr. Desai was an officer at State Street, where he had roles in portfolio accounting and client operations.

The Fund’s SAI provides additional information about the compensation structure for the portfolio managers other accounts that the portfolio manager manages and the ownership of Shares by the portfolio managers.

Pursuant to an investment advisory agreement between Amplify Investments and the Trust, on behalf of the Fund (the “Investment Advisory Agreement”), the Fund has agreed to pay an annual management fee to Amplify Investments in an amount equal to 0.65% of its average daily net assets. This management fee is designed to pay the Fund’s expenses and to compensate Amplify Investments for the services it provides to the Fund.

Pursuant to a separate contractual arrangement, Amplify Investments has contracted, through March 1, 2024, to waive its fees and/or pay Fund expenses so that the Fund’s annual net operating expenses (excluding any Rule 12b-1 fees, taxes, interest, brokerage fees, acquired fund fees and expenses, expenses incurred in connection with any merger, reorganization or proxy solicitation, litigation, and other extraordinary expenses) do not exceed 0.75%. Pursuant to its expense limitation agreement with the Fund, Amplify Investments is entitled to recoup any fees that it waived and/or Fund expenses that it paid for a period of three years following such fee waivers and/or expense payments. The Fund may only make such repayment to Amplify Investments if, after the recoupment payment has been taken into account, it does not cause the Fund’s expense ratio to exceed either the expense cap in place at the time the expenses were waived or the Fund’s current expense cap.

Pursuant to an investment sub-advisory agreement between Amplify Investments, Penserra and the Trust, on behalf of the Fund (the “Investment Sub-Advisory Agreement”), Penserra receives an annual sub-advisory fee based on the Fund’s average daily net assets. Amplify Investments is responsible for paying the entire amount of Penserra’s fee for the Fund. The Fund does not directly pay Penserra.

A discussion regarding the basis for the Board’s approval of the Trust’s Investment Advisory Agreement and Investment Sub-Advisory Agreement is available in the Fund’s Semi-Annual Report to shareholders for the period ended April 30, 2022.

Manager of Managers Structure. The Fund and the Adviser have received an exemptive order from the SEC to operate under a manager of managers structure that permits the Adviser, with the approval of the Board, to appoint and replace sub-advisers, enter into sub-advisory agreements, and materially amend and terminate sub-advisory agreements on behalf of the Fund without shareholder approval (the “Manager of Managers Structure”). Under the Manager of Managers Structure, the Adviser has ultimate responsibility, subject to oversight by the Board, for overseeing the Fund’s sub-adviser(s) and recommending to the Board the hiring, termination, or replacement of any such sub-adviser(s) — including Penserra, in its capacity as the Sub-Adviser. The exemptive order does not apply to any sub-adviser that is affiliated with the Fund or the Adviser.

The Manager of Managers Structure enables the Fund to operate with greater efficiency and without incurring the expense and delays associated with obtaining shareholder approvals for matters relating to sub-advisers or sub-advisory agreements. The Manager of Managers Structure does not permit an increase in the overall management and advisory fees payable by the Fund without shareholder approval. Shareholders will be notified of any changes made to sub-advisers or sub-advisory agreements within 90 days of the changes.
The Fund issues or redeems its Shares at NAV per Share only in Creation Units. Most investors buy and sell Shares in secondary market transactions through brokers. Shares are listed for trading on the secondary market on the Exchange. Shares can be bought and sold throughout the trading day like other publicly-traded shares. There is no minimum investment. When buying or selling Shares through a broker, you will incur customary brokerage commissions and charges, and you may pay some or all of the spread between the bid and the offered price in the secondary market on each leg of a round trip (purchase and sale) transaction. Share prices are reported in dollars and cents per Share. APs may acquire Shares directly from the Fund, and APs may tender their Shares for redemption directly to the Fund, at NAV per Share only in Creation Units or Creation Unit Aggregations, and in accordance with the procedures described in the SAI.

The Fund may liquidate and terminate at any time without shareholder approval.

**BOOK ENTRY**

Shares are held in book-entry form, which means that no stock certificates are issued. The Depository Trust Company ("DTC") or its nominee is the record owner of all outstanding Shares and is recognized as the owner of all Shares for all purposes.

Investors owning Shares are beneficial owners as shown on the records of DTC or its participants. DTC serves as the securities depository for all Shares. Participants in DTC include securities brokers and dealers, banks, trust companies, clearing corporations and other institutions that directly or indirectly maintain a custodial relationship with DTC. As a beneficial owner of Shares, you are not entitled to receive physical delivery of stock certificates or to have Shares registered in your name, and you are not considered a registered owner of Shares. Therefore, to exercise any right as an owner of Shares, you must rely upon the procedures of DTC and its participants. These procedures are the same as those that apply to any other stocks that you hold in book entry or "street name" form.

**FUND SHARE TRADING PRICES**

The trading prices of Shares on the Exchange are based on market price and may differ from the Fund's daily NAV. Market forces of supply and demand, economic conditions and other factors may affect the trading prices of Shares.

**FREQUENT PURCHASES AND REDEMPTIONS OF FUND SHARES**

Shares may be purchased and redeemed directly from the Fund only in Creation Units by APs that have entered into agreements with the Fund's distributor. The vast majority of trading in Shares occurs on the secondary market and does not involve the Fund directly. In-kind purchases and redemptions of Creation Units by APs and cash trades on the secondary market are unlikely to cause many of the harmful effects of frequent purchases and/or redemptions of Shares. Cash purchases and/or redemptions of Creation Units, however, can result in increased tracking error, disruption of portfolio management, dilution to the Fund and increased transaction costs, which could negatively impact the Fund's ability to achieve its investment objective, and may lead to the realization of capital gains. These consequences may increase as the frequency of cash purchases and redemptions of Creation Units by APs increases. However, direct trading by APs is critical to ensuring that Shares trade at or close to NAV.

To minimize these potential consequences of frequent purchases and redemptions of Shares, the Fund imposes transaction fees on purchases and redemptions of Creation Units to cover the custodial and other costs the Fund incurs in effecting trades. In addition, the Fund reserves the right to not accept orders from APs that the Adviser has determined may be disruptive to the management of the Fund or otherwise are not in the best interests of the Fund. For these reasons, the Board has not adopted policies and procedures with respect to frequent purchases and redemptions of Shares.

**Dividends, Distributions and Taxes**

Ordinarily, dividends from net investment income, if any, are declared and paid at least annually by the Fund. The Fund distributes its net realized capital gains, if any, to shareholders annually.

Distributions in cash may be reinvested automatically in additional whole Shares only if the broker through whom you purchased Shares makes such option available.

**TAXES**

This section summarizes some of the main U.S. federal income tax consequences of owning Shares of the Fund. This section is current as of the date of this prospectus. Tax laws and interpretations change frequently, and these summaries do not describe all of the tax consequences to all taxpayers. For example, these summaries generally do not describe your situation if you are a corporation, a non-U.S. person, a broker-dealer, or other investor with special circumstances. In addition, this section does not describe your state, local or non-U.S. tax consequences.
This federal income tax summary is based in part on the advice of counsel to the Fund. The Internal Revenue Service could disagree with any conclusions set forth in this section. In addition, counsel to the Fund may not have been asked to review, and may not have reached a conclusion with respect to, the federal income tax treatment of the assets to be included in the Fund. This may not be sufficient for you to use for the purpose of avoiding penalties under federal tax law.

As with any investment, you should seek advice based on your individual circumstances from your own tax advisor.

The Fund intends to continue to qualify as a “regulated investment company” under the federal tax laws. If the Fund qualifies as a regulated investment company and distributes its income as required by the tax law, the Fund generally will not pay federal income taxes. Unless your investment in Shares is made through a tax-exempt entity or tax-deferred retirement account, such as an IRA plan, you need to be aware of the possible tax consequences when:

- Your Fund makes distributions,
- You sell your Shares listed on the Exchange, and
- You purchase or redeem Creation Units.

**TAXES ON DISTRIBUTIONS**

The Fund’s distributions are generally taxable. After the end of each year, you will receive a tax statement that separates the distributions of the Fund into two categories, ordinary income distributions and capital gain dividends. Ordinary income distributions are generally taxed at your ordinary tax rate; however, as further discussed below, certain ordinary income distributions received from the Fund may be taxed at the capital gains tax rates. Some portion of the ordinary income distributions that are attributable to dividends received by the Fund from shares in certain real estate investment trusts may be designated by the Fund as eligible for a deduction for qualified business income, provided certain holding period requirements are satisfied. Generally, you will treat all capital gain dividends as long-term capital gains regardless of how long you have owned your Shares. To determine your actual tax liability for your capital gain dividends, you must calculate your total net capital gain or loss for the tax year after considering all of your other taxable transactions, as described below. In addition, the Fund may make distributions that represent a return of capital for tax purposes and thus will generally not be taxable to you; however, such distributions may reduce your tax basis in your Shares, which could result in you having to pay higher taxes in the future when Shares are sold, even if you sell the Shares at a loss from your original investment. The tax status of your distributions from the Fund is not affected by whether you reinvest your distributions in additional Shares or receive them in cash. The income from the Fund that you must take into account for federal income tax purposes is not reduced by amounts used to pay a deferred sales fee, if any. The tax laws may require you to treat distributions made to you in January as if you had received them on December 31 of the previous year.

Income from the Fund may also be subject to a 3.8% “Medicare tax.” This tax generally applies to your net investment income if your adjusted gross income exceeds certain threshold amounts, which are $250,000 in the case of married couples filing joint returns and $200,000 in the case of single individuals.

A corporation that owns Shares generally will not be entitled to the dividends received deduction with respect to many dividends received from the Fund because the dividends received deduction is generally not available for distributions from regulated investment companies. However, certain ordinary income dividends on Shares that are attributable to qualifying dividends received by the Fund from certain corporations may be reported by the Fund as being eligible for the dividends received deduction.

If you are an individual, the maximum marginal stated federal tax rate for net capital gain is generally 20% (15% or 0% for taxpayers with taxable incomes below certain thresholds). Some capital gains, including some portion of your capital gain dividends, may be taxed at a higher maximum stated tax rate. Capital gain received from assets held for more than one year that is considered “unrecaptured section 1250 gain” (which may be the case, for example, with some capital gains attributable to equity interests in real estate investment trusts that constitute interests in entities treated as real estate investment trusts for federal income tax purposes) is taxed at a maximum marginal stated federal tax rate of 25%. In the case of capital gain dividends, the determination of which portion of the capital gain dividend, if any, is subject to the 25% tax rate, will be made based on rules prescribed by the United States Treasury. Capital gains may also be subject to the Medicare tax described above.

Net capital gain equals net long-term capital gain minus net short-term capital loss for the taxable year. Capital gain or loss is long-term if the holding period for the asset is more than one year and is short-term if the holding period for the asset is one year or less. You must exclude the date you purchase your Shares to determine your holding period. However, if you receive a capital gain dividend from the Fund and sell your Shares at a loss after holding them for six months or less, the loss will be recharacterized as long-term capital loss to the extent of the capital gain dividend received. The tax rates for capital gains realized from assets held for one year or less are generally the same as for ordinary income. The Code treats certain capital gains as ordinary income in special situations. An election may be available to you to defer recognition of the gain attributable to a capital gain dividend if you make certain qualifying investments within a limited time. You should talk to your tax advisor about the availability of this deferral election and its requirements.
Ordinary income dividends received by an individual shareholder from a regulated investment company such as the Fund are generally taxed at the same rates that apply to net capital gain (as discussed above), provided certain holding period requirements are satisfied and provided the dividends are attributable to qualifying dividends received by the Fund itself. The Fund will provide notice to its shareholders of the amount of any distribution which may be taken into account as a dividend which is eligible for the capital gains tax rates.

**TAXES ON EXCHANGE-LISTED SHARE SALES**

If you sell or redeem your Shares, you will generally recognize a taxable gain or loss. To determine the amount of this gain or loss, you must subtract your tax basis in your Shares from the amount you receive in the transaction. Your tax basis in your Shares is generally equal to the cost of your Shares, generally including sales charges. In some cases, however, you may have to adjust your tax basis after you purchase your Shares.

**TAXES ON PURCHASE AND REDEMPTION OF CREATION UNITS**

If you exchange securities for Creation Units you will generally recognize a gain or a loss. The gain or loss will be equal to the difference between the market value of the Creation Units at the time and your aggregate basis in the securities surrendered and the cash component paid. If you exchange Creation Units for securities, you will generally recognize a gain or loss equal to the difference between your basis in the Creation Units and the aggregate market value of the securities received and the cash redemption amount. The Internal Revenue Service, however, may assert that a loss realized upon an exchange of securities for Creation Units or Creation Units for securities cannot be deducted currently under the rules governing “wash sales,” or on the basis that there has been no significant change in economic position.

**TREATMENT OF FUND EXPENSES**

Expenses incurred and deducted by the Fund will generally not be treated as income taxable to you. In some cases, however, you may be required to treat your portion of these Fund expenses as income. You may not be able to take a deduction for some or all of these expenses, even if the cash you receive is reduced by such expenses.

**BACKUP WITHHOLDING**

The Fund may be required to withhold U.S. federal income tax (“backup withholding”) from dividends and capital gain distributions paid to Shareholders. Federal tax will be withheld if (1) the Shareholder fails to furnish the Fund with the Shareholder’s correct taxpayer identification number or social security number, (2) the IRS notifies the Shareholder or the Fund that the Shareholder has failed to report properly certain interest and dividend income to the IRS and to respond to notices to that effect, or (3) when required to do so, the Shareholder fails to certify to the Fund that he or she is not subject to backup withholding. The current backup withholding rate is 24%. Any amounts withheld under the backup withholding rules may be credited against the Shareholder’s U.S. federal income tax liability.

**NON-U.S. TAX CREDIT**

If the Fund invests in non-U.S. securities, the tax statement that you receive may include an item showing non-U.S. taxes the Fund paid to other countries. In this case, dividends taxed to you will include your share of the taxes the Fund paid to other countries. You may be able to deduct or receive a tax credit for your share of these taxes.

**NON-U.S. INVESTORS**

If you are a non-U.S. investor (i.e., an investor other than a U.S. citizen or resident or a U.S. corporation, partnership, estate or trust), you should be aware that, generally, subject to applicable tax treaties, distributions from the Fund will generally be characterized as dividends for federal income tax purposes (other than dividends which the Fund properly reports as capital gain dividends) and will be subject to U.S. federal income taxes, including withholding taxes, subject to certain exceptions described below. However, distributions received by a non-U.S. investor from the Fund that are properly reported by the Fund as capital gain dividends may not be subject to U.S. federal income taxes, including withholding taxes, provided that the Fund makes certain elections and certain other conditions are met. Distributions from the Fund that are properly reported by the Fund as an interest-related dividend attributable to certain interest income received by the Fund or as a short-term capital gain dividend attributable to certain net short-term capital gain income received by the Fund may not be subject to U.S. federal income taxes, including withholding taxes when received by certain non-U.S. investors, provided that the Fund makes certain elections and certain other conditions are met. For tax years after December 31, 2022, amounts paid to or recognized by a non-U.S. affiliate that are excluded from tax under the portfolio interest, capital gain dividends, short-term capital gains or tax-exempt interest dividend exceptions or applicable treaties, may be taken into consideration in determining whether a corporation is an “applicable corporation” subject to a 15% minimum tax on adjusted financial statement income.
Distributions to, and gross proceeds from dispositions of shares by, (i) certain non-U.S. financial institutions that have not entered into an agreement with the U.S. Treasury to collect and disclose certain information and are not resident in a jurisdiction that has entered into such an agreement with the U.S. Treasury and (ii) certain other non-U.S. entities that do not provide certain certifications and information about the entity’s U.S. owners, may be subject to a U.S. withholding tax of 30%. However, proposed regulations may eliminate the requirement to withhold on payments of gross proceeds from dispositions.

It is the responsibility of the entity through which you hold your shares to determine the applicable withholding.

INVESTMENTS IN CERTAIN NON-U.S. CORPORATIONS

If the Fund holds an equity interest in any “passive foreign investment companies” ("PFICs"), which are generally certain non-U.S. corporations that receive at least 75% of their annual gross income from passive sources (such as interest, dividends, certain rents and royalties or capital gains) or that hold at least 50% of their assets in investments producing such passive income, the Fund could be subject to U.S. federal income tax and additional interest charges on gains and certain distributions with respect to those equity interests, even if all the income or gain is timely distributed to its shareholders. The Fund will not be able to pass through to its shareholders any credit or deduction for such taxes. The Fund may be able to make an election that could ameliorate these adverse tax consequences. In this case, the Fund would recognize as ordinary income any increase in the value of such PFIC shares, and as ordinary loss any decrease in such value to the extent it did not exceed prior increases included in income. Under this election, the Fund might be required to recognize in a year income in excess of its distributions from PFICs and its proceeds from dispositions of PFIC stock during that year, and such income would nevertheless be subject to the distribution requirement and would be taken into account for purposes of the 4% excise tax (described above). Dividends paid by PFICs are not treated as qualified dividend income.

The foregoing discussion summarizes some of the possible consequences under current federal tax law of an investment in the Fund. It is not a substitute for personal tax advice. You also may be subject to state and local taxes on Fund distributions and sales of Shares.

Consult your personal tax advisor about the potential tax consequences of an investment in Shares under all applicable tax laws. See “Federal Tax Matters” in the statement of additional information for more information.

Distribution Plan

Foreside Fund Services, LLC (the "Distributor") serves as the distributor of Creation Units for the Fund on an agency basis. The Distributor does not maintain a secondary market in Shares.

The Board has adopted a Distribution and Service Plan pursuant to Rule 12b-1 under the 1940 Act. In accordance with its Rule 12b-1 plan, the Fund is authorized to pay an amount up to 0.25% of its average daily net assets each year to reimburse the Distributor for amounts expended to finance activities primarily intended to result in the sale of Creation Units or the provision of investor services. The Distributor may also use this amount to compensate securities dealers or other persons that are APs for providing distribution assistance, including broker-dealer and shareholder support and educational and promotional services.

The Fund does not and has no current intention of paying 12b-1 fees. However, in the event 12b-1 fees are charged in the future, because these fees are paid out of the Fund’s assets, over time these fees will increase the cost of your investment and may cost you more than certain other types of sales charges.

Net Asset Value

The Fund's NAV is determined as of the close of trading (normally 4:00 p.m., Eastern time) on each day the New York Stock Exchange is open for business. NAV is calculated by taking the market price of the Fund's total assets, including interest or dividends accrued but not yet collected, less all liabilities, and dividing such amount by the total number of Shares outstanding. The result, rounded to the nearest cent, is the net asset value per Share. Pursuant to Rule 2a-5 under the 1940 Act, the Board has appointed Amplify as the “Valuation Designee” for all portfolio investments.

The Fund’s investments are valued daily in accordance with valuation procedures adopted by the Board, and in accordance with provisions of the 1940 Act. Certain securities in which the Fund may invest are not listed on any securities exchange or board of trade. Such securities are typically bought and sold by institutional investors in individually negotiated private transactions that function in many respects like an over-the-counter secondary market, although typically no formal market makers exist. Certain securities, particularly debt securities, have few or no trades, or trade infrequently, and information regarding a specific security may not be widely available or may be incomplete. Accordingly, determinations of the fair value of debt securities may be based on infrequent and dated information. Because there is less reliable, objective data available, elements of judgment may play a greater role in valuation of debt securities than
for other types of securities. As explained below, any fair value determination will be made in accordance with Amplify’s “Valuation Procedures.” Typically, debt securities are valued using information provided by a third-party pricing service. The third-party pricing service primarily uses broker quotes to value the securities.

The Fund’s investments will be valued daily at market value or, in the absence of market value with respect to any investment, at fair value in accordance with valuation procedures adopted by the Board and in accordance with the 1940 Act. Market value prices represent last sale or official closing prices from a national or non-U.S. exchange (i.e., a regulated market) and are primarily obtained from third-party pricing services.

Certain securities may not be able to be priced by pre-established pricing methods. Such securities may be valued by Amplify (subject to the supervision of the Board) at fair value. The use of fair value pricing by the Fund is governed by valuation procedures adopted by Amplify and approved by, and subject to the oversight of, the Board, and in accordance with the provisions of the 1940 Act. Investments will be fair valued as determined in good faith in accordance with the policies and procedures established by Amplify as Valuation Designee pursuant to Rule 2a-5. These securities generally include, but are not limited to, certain restricted securities (securities which may not be publicly sold without registration under the Securities Act of 1933, as amended (the “Securities Act”)) for which a pricing service is unable to provide a market price; securities whose trading has been formally suspended; a security whose market price is not available from a pre-established pricing source; a security with respect to which an event has occurred that is likely to materially affect the value of the security after the market has closed but before the calculation of the Fund’s net asset value or make it difficult or impossible to obtain a reliable market quotation; and a security whose price, as provided by the pricing service, does not reflect the security’s “fair value.” As a general principle, the current “fair value” of a security would appear to be the amount which the owner might reasonably expect to receive for the security upon its current sale. The use of fair value prices by the Fund generally results in the prices used by the Fund that may differ from current market quotations or official closing prices on the applicable exchange. A variety of factors may be considered in determining the fair value of such securities. Valuing the Fund’s securities using fair value pricing will result in using prices for those securities that may differ from current market valuations. See the SAI for details.

Even when market quotations are available for portfolio securities, they may be stale or unreliable because the security is not traded frequently, trading on the security ceased before the close of the trading market or issuer-specific events occurred after the security ceased trading or because of the passage of time between the close of the market on which the security trades and the close of the Exchange and when the Fund calculates its NAV. Events that may cause the last market quotation to be unreliable include a merger or insolvency, events which affect a geographical area or an industry segment, such as political events or natural disasters, or market events, such as a significant movement in the U.S. market. Where market quotations are not readily available, including where the Adviser determines that the closing price of the security is unreliable, the Adviser will value the security at fair value in good faith using procedures approved by the Board. Fair value pricing involves subjective judgments and it is possible that a fair value determination for a security is materially different than the value that could be realized upon the sale of the security.

**Fund Service Providers**

U.S. Bancorp Fund Services, LLC, 615 East Michigan Street, Milwaukee, Wisconsin 53202, is the dividend disbursing, transfer agent, fund accountant and administrator of the Fund.

Chapman and Cutler LLP, 320 South Canal Street, Chicago, Illinois 60606, serves as legal counsel to the Trust.

Cohen & Company, Ltd., 342 North Water Street, Suite 830, Milwaukee, Wisconsin 53202, serves as the Fund’s independent registered public accounting firm and is responsible for auditing the annual financial statements of the Fund.

Cowen Execution Services, LLC, 599 Lexington Avenue, 21st Floor, New York, NY 10022, is the custodian for the Fund.

**Premium/Discount Information**

Information showing the number of days the market price of the Fund’s Shares was greater (at a premium) and less (at a discount) than the Fund’s NAV for the most recently completed calendar year, and the most recently completed calendar quarters since that year (or the life of the Fund, if shorter), is available at www.amplifyetfs.com.
INVESTMENTS BY OTHER INVESTMENT COMPANIES

Section 12(d)(1) of the 1940 Act restricts investments by investment companies in the securities of other investment companies, including Shares. The SEC adopted Rule 12d1-4 under the 1940 Act, which the Fund is required to comply with. Under Rule 12d1-4, the Fund may, subject to certain conditions, invest in other registered investment companies and other registered investment companies may invest in the Fund beyond the limits contained in Section 12(d)(1) of the 1940 Act.

DELIVERY OF SHAREHOLDER DOCUMENTS — HOUSEHOLDING

Householding is an option available to certain investors of the Fund. Householding is a method of delivery, based on the preference of the individual investor, in which a single copy of certain shareholder documents can be delivered to investors who share the same address, even if their accounts are registered under different names. Householding for the Fund is available through certain broker-dealers. If you are interested in enrolling in householding and receiving a single copy of the prospectus and other shareholder documents, please contact your broker-dealer. If you currently are enrolled in householding and wish to change your householding status, please contact your broker-dealer.
Financial Highlights

The financial highlights table is intended to help you understand the Fund’s financial performance. Certain information reflects financial results for a single share of the Fund. The total return in the table represents the rate that an investor would have earned (or lost) on an investment in the Fund (assuming reinvestment of all dividends and distributions). This information has been derived from the Fund’s financial statements, which have been audited by Cohen & Company, Ltd., the Fund’s independent registered public accounting firm, whose report, along with this information and additional Fund performance and portfolio information appears in the Fund’s Annual Report dated October 31, 2022.

(a) The Fund commenced operations on July 22, 2019.
(b) Calculated based on average shares outstanding during the period.
(c) Less than $0.005.
(d) Realized and unrealized gains and losses per share in this caption are balancing amounts necessary to reconcile the change in net asset value per share for the period and may not reconcile with the aggregate gains and losses in the statement of operations due to share transactions for the year.
(e) Total Return on Net Asset Value is based on the change in net asset value (“NAV”) of a share during the period and assumes reinvestment of dividends and distributions at NAV. Total Return on Net Asset Value is for the period indicated and has not been annualized. The return shown does not reflect the deduction of taxes that a shareholder would pay on fund distributions or redemption of fund shares.
(f) Annualized.
(g) Excludes the impact of in-kind transactions.
(h) Not Annualized.
