

Objective and Strategy

SLJY seeks to balance high income and capital appreciation through investment exposure to junior silver mining companies and a covered call strategy. By incorporating a tactical OTM¹ covered call options writing strategy, the fund seeks to monetize volatility to generate 18% annualized option premium² income while also offering the upside potential of junior silver mining companies through exposure to Amplify Junior Silver Miners ETF (SILJ), underlying equities of SILJ, and silver exchange traded products (ETPs).

Reasons to Invest

High-Income: SLJY targets 18% annualized option premium income.

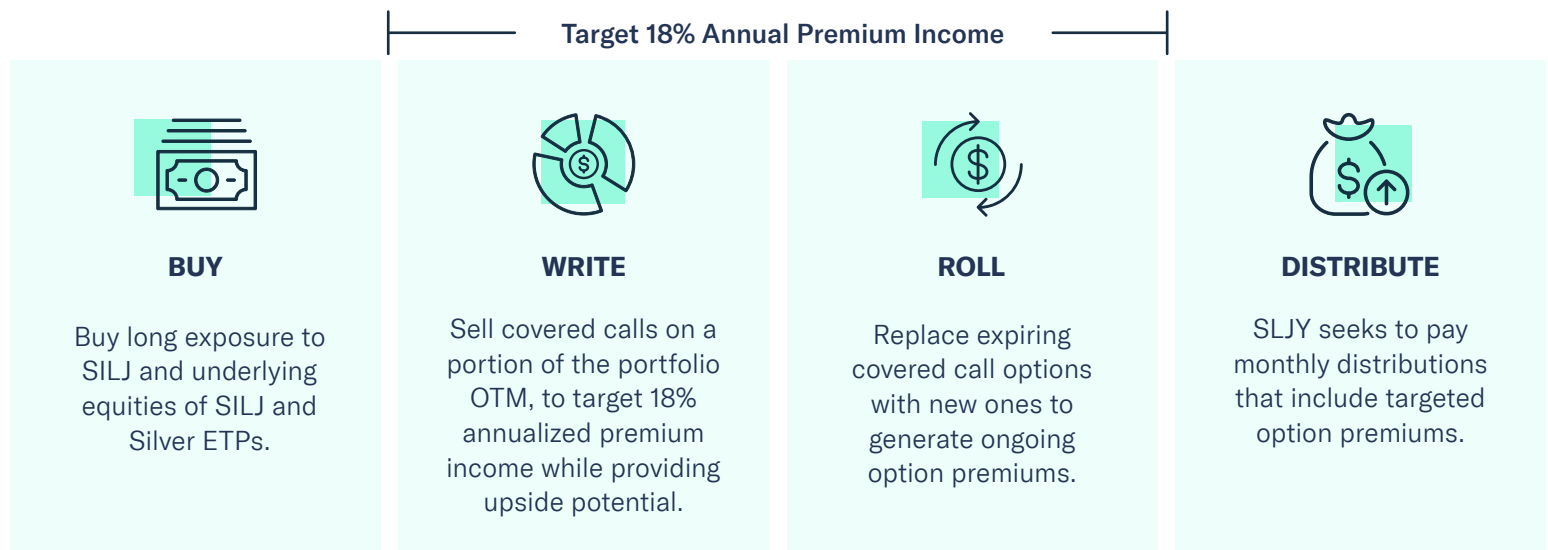

Upside Participation: Pursues price appreciation and high option premium income to deliver attractive total return potential by prioritizing out of the money (OTM) options.

Diversified Income: SLJY seeks monthly income distributions from covered call premiums offering income diversification potential due to silvers' historically low correlation to stocks and bonds.

SLJY TARGETED HIGH INCOME COVERED CALL CONSTRUCTION

There is no guarantee that distributions will be made. There is no guarantee the Fund will achieve the Target Option Premium in any given investment period.

JUNIOR SILVER MINERS EXPOSURE & COVERED CALL ENHANCED INCOME

SLJY utilizes a covered call strategy and seeks exposure to junior silver mining companies, a dynamic asset class we believe has significant growth potential.

Upside Participation with High Beta³ Exposure

SLJY provides access to junior silver mining stocks, which typically have a high beta, both up and down, to the price of silver. SLJY prioritizes OTM covered call options to offer upside exposure to junior silver miners while generating option premium income—aiming to balance growth and yield.

Income from Volatility

SLJY's covered calls aim to monetize price swings, turning volatility into attractive income potential.

Risk Management and Diversification

Covered calls in SLJY may provide an income cushion in volatile markets while also offering exposure to an asset class that typically has a low correlation to traditional equities and bonds.

Silver Macro Tailwinds

Benefit from long-term drivers such as industrial demand due in part to AI (artificial intelligence) and electrification, market uncertainty, and monetary policy shifts.

YieldSmart™ ETFs Approach:

YieldSmart ETFs are advanced covered call options-based ETFs — built for today's income needs and tomorrow's goals. By implementing carefully crafted options strategies this suite of investment solutions is designed to balance attractive monthly income with long-term capital appreciation, all in pursuit of compelling total return.

Discover how our specialized strategies can help you amplify your investment portfolio.

¹OTM means calls are written using an out of the money strategy.

²An option premium is the cost an option buyer pays to the seller for the right to trade an asset at a set price within a certain period.

³High beta means an asset is typically more sensitive to market movements.

Carefully consider the Fund's investment objectives, risks, charges, and expenses before investing. This and other information can be found in the Fund's statutory and summary prospectuses, which may be obtained at [AmplifyETFs.com](https://amplifyetfs.com). Read the prospectus carefully before investing.

Investing involves risk, including the possible loss of principal. You could lose money by investing in the Fund.

There can be no assurance that the Fund's investment objectives will be achieved. The fund is new with limited operating history. The Fund is actively-managed, and its performance reflects investment decisions that the Adviser makes for the Fund. Shares of any ETF are bought and sold at market price (not NAV), may trade at a discount or premium to NAV and are not individually redeemed from the Fund. Brokerage commissions will reduce returns. A higher portfolio turnover will cause the Fund to incur additional transaction costs and may result in higher taxes when Shares are held in a taxable account. The Fund invests in the equity securities of companies in the metals and mining industry included in the SILJ ETF. Metals and mining investments can be speculative and more volatile than other sectors. As a

non-diversified fund, it holds fewer assets and is more exposed to issuer volatility. Option prices are volatile, influenced by asset value, rates, and policies. FLEX Options may be less liquid, making it harder to close positions at preferred times or prices. The Fund plans monthly distributions, partly as return of capital, which lowers cost basis and may increase future taxes, even if shares are sold at a loss.

Amplify Investments LLC is the Investment Adviser to the Fund, and Tidal Investments, LLC serves as the Investment Sub-Adviser.
