

Amplify ETF Trust

Amplify Small-Mid Cap Equity ETF

(NYSE Arca — SMAP)

PROSPECTUS

October 21, 2024

Amplify Small-Mid Cap Equity ETF (the “Fund”) is a series of Amplify ETF Trust (the “Trust”) and an exchange-traded actively managed fund organized as a separate series of a registered investment management company. The Fund intends to list and principally trades its shares on NYSE Arca, Inc. (the “Exchange”). Market prices of shares of the Fund may differ to some degree from their net asset value. The Fund issues and redeems shares at net asset value only in large blocks of shares called “Creation Units.” Except when aggregated in Creation Units, shares of the Fund are not redeemable securities of the Fund.

The SEC has not approved or disapproved these securities or passed upon the accuracy or adequacy of this prospectus. Any representation to the contrary is a criminal offense.

AMPLIFY SMALL-MID CAP EQUITY ETF

Summary Information

INVESTMENT OBJECTIVES

The Amplify Small-Mid Cap Equity ETF seeks to provide capital appreciation.

FUND FEES AND EXPENSES

This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund (“Shares”). **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below.**

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.60%
Distribution and Service (12b-1) Fees	0.00%
Other Expenses ⁽¹⁾	0.00%
Total Annual Fund Operating Expenses	0.60%

⁽¹⁾ Estimate based on the expenses the Fund expects to incur for the current fiscal year.

EXAMPLE

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. This example assumes that you invest \$10,000 in the Fund for the time periods indicated and then sell all of your Shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain at current levels. This example does not include the brokerage commissions that investors may pay to buy and sell Shares. Although your actual costs may be higher or lower, your costs, based on these assumptions, would be:

1 YEAR	3 YEARS
\$61	\$192

PORTFOLIO TURNOVER

The Fund pays transaction costs, such as commissions, when it purchases and sells securities (or “turns over” its portfolio). A higher portfolio turnover will cause the Fund to incur additional transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in Total Annual Fund Operating Expenses or in the example, may affect the Fund’s performance. Because the Fund has not yet commenced investment operations, no portfolio turnover information is available at this time.

PRINCIPAL INVESTMENT STRATEGIES

Under normal circumstances, the Fund invests at least 80% of its net assets (plus borrowings for investment purposes) in high quality U.S.-listed equity securities of companies with small- to mid- market capitalizations. For these purposes, the Fund defines a “high quality” security as a company that meets the Sub-Adviser’s evaluation process described herein and a small- to mid- market capitalization company as a company that has a market capitalization of between \$400 million and approximately the largest market capitalization company in the Russell 2500™ Index at the time of purchase. The Fund will primarily invest in common stocks, but may invest in other types of equity securities and/or in real estate investment trusts (“REITs”). REITs are financial vehicles that pool investors’ capital to purchase or finance real estate. Amplify Investments LLC (“Amplify Investments” or the “Adviser”) serves as the investment adviser to the Fund. Curi RMB Capital, LLC (“Curi RMB” or a “Sub-Adviser”) and Penserra Capital Management LLC (“Penserra” or a “Sub-Adviser”, and collectively with Curi RMB, the “Sub-Advisers”) each serve as investment sub-advisers to the Fund. Penserra is responsible for implementing the Fund’s investment program by, among other things, trading portfolio securities and performing related services, rebalancing the Fund’s portfolio and providing cash management services in accordance with the investment advice formulated by, and model portfolios delivered by, Curi RMB and Amplify Investments. The Sub-Advisers are not affiliated with the Fund or Amplify Investments.

Curi RMB actively manages the Fund by applying an economic return framework that seeks to identify attractively priced small- to mid- capitalization companies at all stages of the corporate lifecycle (*i.e.*, the progression of a business over time from its creation to termination) that allocate capital in a way that creates long-term value. Curi RMB's economic return framework analyzes key determinants of success, such as cash flow, capital investments, credit worthiness and sales momentum. Taking into account a company's stage in the corporate lifecycle, Curi RMB evaluates the sustainability of the company's economic returns and further evaluates potential investments to determine which stocks are most attractively priced. In managing the Fund, the Adviser seeks to construct a portfolio that is diversified across both economic sectors and corporate lifecycle. As a result of its lifecycle diversification, the Fund invests in both growth- and value-style equity securities. Curi RMB will consider a variety of factors in its determination to sell a portfolio security, including, but not limited to, a company's performance in relation to its investment milestones, valuation, and risk controls around sector, lifecycle or individual position size.

As part of the investment process, Curi RMB's investment team evaluates the general and industry-specific Environmental, Social, and Governance ("ESG") factors that Curi RMB believes to be the most financially material to a company's short-, medium, and long-term enterprise value at any given time. Curi RMB defines materiality in terms of the impact on a company's net income over the longer term. Specific ESG factors Curi RMB considers at any given time vary greatly by geography and industry, and may also vary between companies within the same geographic region or industry. Such factors include, but are not limited to, board diversity, size and background, incentives, workforce diversity, cybersecurity, and environmental sustainability.

Diversification Status. The Fund is classified as a "diversified company" under the Investment Company Act of 1940, as amended (the "1940 Act").

PRINCIPAL RISKS OF INVESTING IN THE FUND

You could lose money by investing in the Fund. An investment in the Fund is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency. There can be no assurance that the Fund's investment objectives will be achieved. The principal risks are presented in alphabetical order to facilitate finding particular risks and comparing them with other funds. Each risk summarized below is considered a "principal risk" of investing in the Fund, regardless of the order in which it appears.

Active Market Risk. Although the Shares are listed for trading on the Exchange, there can be no assurance that an active trading market for the Shares will develop or be maintained. Shares trade on the Exchange at market prices that may be below, at or above the Fund's net asset value. Securities, including the Shares, are subject to market fluctuations and liquidity constraints that may be caused by such factors as economic, political, or regulatory developments, changes in interest rates, and/or perceived trends in securities prices. Shares of the Fund could decline in value or underperform other investments.

Authorized Participant Concentration Risk. Only an authorized participant may engage in creation or redemption transactions directly with the Fund. The Fund has a limited number of institutions that act as authorized participants on an agency basis (*i.e.*, on behalf of other market participants). To the extent that these institutions exit the business or are unable to proceed with orders for the issuance or redemption of Creation Units and no other authorized participant is able to step forward to fulfill the order, in either of these cases, Shares may trade at a discount to the Fund's net asset value and possibly face delisting.

Cyber Security Risk. The Fund is susceptible to operational risks through breaches in cyber security. A breach in cyber security refers to both intentional and unintentional events that may cause the Fund to lose proprietary information, suffer data corruption or lose operational capacity. Such events could cause the Fund to incur regulatory penalties, reputational damage, additional compliance costs associated with corrective measures and/or financial loss. Cyber security breaches may involve unauthorized access to the Fund's digital information systems through "hacking" or malicious software coding, but may also result from outside attacks such as denial-of-service attacks through efforts to make network services unavailable to intended users. In addition, cyber security breaches of the Fund's third-party service providers, such as its administrator, transfer agent, custodian, or sub-adviser, as applicable, or issuers in which the Fund invests, can also subject the Fund to many of the same risks associated with direct cyber security breaches. While the Fund has established business continuity plans and risk management systems designed to reduce the risks associated with cyber security, there are inherent limitations in such plans and systems. Additionally, there is no guarantee that such efforts will succeed, especially because the Fund does not directly control the cyber security systems of issuers or third-party service providers.

Equity Securities Risk. The value of the Shares will fluctuate with changes in the value of the equity securities in which the Fund invests. Prices of equity securities fluctuate for several reasons, including changes in investors' perceptions of the financial condition of an issuer or the general condition of the relevant stock market, such as the current market volatility, or when political or economic events affecting the issuers occur.

ESG Risk. To the extent RMB Curi utilizes ESG factors to evaluate the Fund's investments, the consideration of such factors may adversely affect the Fund's performance. Not every ESG factor may be identified or evaluated for every investment. ESG characteristics are not the only factors considered and, as a result, the issuers in which the Fund invests may not be issuers with favorable ESG characteristics or high ESG ratings. When integrating ESG factors into the investment process, RMB Curi may rely on third-party data that it believes to be reliable, but it does not guarantee the accuracy of such third-party data. ESG information from third-party data providers may be incomplete, inaccurate or unavailable, which may adversely impact the investment process. Moreover, ESG information, whether from an external and/or internal source, is, by nature and in many instances, based on a qualitative and subjective assessment. An element of subjectivity and discretion is therefore inherent to the interpretation and use of ESG data. Moreover, the current lack of common standards may result in different approaches to integrating ESG factors. Any of these factors could adversely affect the Fund's performance.

Growth Investing Risk. Growth companies are generally more susceptible than established companies to market events and sharp declines in value.

Inflation Risk. Inflation risk is the risk that the value of the Fund's assets or income from investments held by the Fund will be less in the future since inflation decreases the value of money. As inflation increases, the present value of the Fund's assets can decline as can the value of the Fund's distributions.

Management Risk. The Fund is subject to management risk because it is an actively managed portfolio. The Sub-Advisers will apply investment techniques and risk analyses in making investment decisions for the Fund, but there can be no guarantee that the Fund will meet its investment objectives.

Market Maker Risk. If the Fund has lower average daily trading volumes, it may rely on a small number of third-party market makers to provide a market for the purchase and sale of Shares. Any trading halt or other problem relating to the trading activity of these market makers could result in a dramatic change in the spread between the Fund's net asset value and the price at which the Shares are trading on the Exchange, which could result in a decrease in value of the Shares. In addition, decisions by market makers or authorized participants to reduce their role or step away from these activities in times of market stress could inhibit the effectiveness of the arbitrage process in maintaining the relationship between the underlying values of the Fund's portfolio securities and the Fund's market price. This reduced effectiveness could result in Shares trading at a discount to net asset value and also in greater than normal intra-day bid-ask spreads for Shares.

Market Risk. Market risk is the risk that a particular security owned by the Fund or the Shares in general may fall in value, including the possible loss of the entire principal amount that you invest. Securities are subject to market fluctuations caused by such factors as economic, political, regulatory or market developments, changes in interest rates and perceived trends in securities prices, and changes in investors' perceptions of the financial condition of an issuer or the general condition of the relevant stock market, such as the current market volatility. Overall security values could decline generally or could underperform other investments. In addition, local, regional or global events such as war, acts of terrorism, spread of infectious diseases or other public health issues, recessions, or other events could have a significant negative impact on the Fund and its investments. Such events may affect certain regions, sectors and industries more significantly than others. Such events could result in disruptions to trading markets and could also adversely affect the prices and liquidity of the Fund's holdings. Any of such circumstances could materially negatively impact the value of Shares and result in increased market volatility. During any such events, Shares may trade at a greater premium or discount to its NAV.

New Fund Risk. The Fund is new and currently has fewer assets than larger funds, and like other new funds, large inflows and outflows may impact the Fund's market exposure for limited periods of time. This impact may be positive or negative, depending on the direction of market movement during the period affected. Additionally, because the Fund has fewer assets than larger funds over which to spread its fixed costs, its expense levels on a percentage basis will be higher than that of a larger Fund.

Operational Risk. The Fund is exposed to operational risks arising from a number of factors, including, but not limited to, human error, processing and communication errors, errors of the Fund's service providers, counterparties or other third-parties, failed or inadequate processes and technology or systems failures. The Fund, Adviser and Sub-Advisers seek to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate to address these risks.

Portfolio Turnover Risk. The Fund will engage in active trading, which may result in a turnover of the Fund's portfolio to be greater than 100% annually. The Fund's strategy may result in the Fund paying higher levels of transaction costs and generating greater tax liabilities for shareholders. Frequent portfolio turnover may negatively affect the Fund's performance.

Premium/Discount Risk. The net asset value of Shares will generally fluctuate with changes in the market value of the Fund's holdings. The market prices of Shares will generally fluctuate in accordance with change in net asset value as well as the relative supply of and demand for Shares on the Exchange. The Fund cannot predict whether Shares will trade below (discount), at or above (premium) their net asset value. Price differences may be due, in large part, to the fact that supply and demand forces at work in the secondary trading market for Shares will be closely related to, but not identical to, the same forces influencing the prices of the holdings of the Fund trading individually or in the aggregate at any point in time.

REIT Risk. REITs typically own and operate income-producing real estate, such as residential or commercial buildings, or real-estate related assets, including mortgages. Adverse economic, business or political developments affecting real estate could have a major effect on the value of the Fund's investments in REITs. Investing in REITs may subject the Fund to risks associated with the direct ownership of real estate, such as decreases in real estate values, overbuilding, increased competition and other risks related to local or general economic conditions, increases in operating costs and property taxes, changes in zoning laws, casualty or condemnation losses, possible environmental liabilities, regulatory limitations on rent and fluctuations in rental income.

Small and Mid-Cap Companies Risk. Small and/or mid-capitalization companies may be more vulnerable to adverse general market or economic developments, and their securities may be less liquid and may experience greater price volatility than larger, more established companies as a result of several factors, including limited trading volumes, products or financial resources, management inexperience and less publicly available information. Accordingly, such companies are generally subject to greater market risk than larger, more established companies.

Trading Issues Risk. Although the Shares of the Fund are listed for trading on the Exchange, there can be no assurance that an active trading market for such Shares will develop or be maintained. Trading in Shares on the Exchange may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in Shares inadvisable. In addition, trading in Shares on the Exchange is subject to trading halts caused by extraordinary market volatility pursuant to Exchange "circuit breaker" rules. Market makers are under no obligation to make a market in Shares, and authorized participants are not obligated to submit purchase or redemption orders for Creation Units. There can be no assurance that the requirements of the Exchange necessary to maintain the listing of the Fund will continue to be met or will remain unchanged.

Valuation Risk. During periods of reduced market liquidity or in the absence of readily available market quotations for the holdings of the Fund, the valuation of the Fund's investments will become more difficult. In market environments where there is reduced availability of reliable objective pricing data, the judgment of the Fund's investment adviser in determining the fair value of the security may play a greater role. While such determinations may be made in good faith, it may nevertheless be more difficult for the Fund to accurately assign a daily value.

Value Investing Risk. Value stocks may not increase in price, may not issue the anticipated stock dividends or may decline in price, based upon the market's belief of the issuer's intrinsic worth.

The Shares will change in value, and you could lose money by investing in the Fund. The Fund may not achieve its investment objectives.

PERFORMANCE

As of the date of this prospectus, the Fund has not yet commenced operations and therefore does not have a performance history. Once available, the Fund's performance information will be accessible on the Fund's website at www.amplifyetfs.com and will provide some indication of the risks of investing in the Fund.

MANAGEMENT OF THE FUND

Investment Adviser. Amplify Investments LLC.

Sub-Advisers. Curi RMB Capital, LLC and Penserra Capital Management LLC.

Portfolio Managers. The following individuals serve as portfolio managers to the Fund.

CURI RMB CAPITAL, LLC

- Christopher C. Faber, Senior Vice President and Portfolio Manager at Curi RMB

PENSERRA CAPITAL MANAGEMENT LLC

- Dustin Lewellyn, CFA, Chief Investment Officer at Penserra
- Ernesto Tong, CFA, Managing Director at Penserra
- Christine Johanson, CFA, Director at Penserra

The portfolio managers are primarily and jointly responsible for the day-to-day management of the Fund. Each portfolio manager has served as part of the portfolio management team of the Fund since its inception in October 2024.

PURCHASE AND SALE OF SHARES

The Fund issues and redeems Shares at net asset value (“NAV”) only with authorized participants that have entered into agreements with the Fund’s distributor and only in Creation Units (large blocks of 10,000 Shares) or multiples thereof (“Creation Unit Aggregations”), in exchange for the deposit or delivery of a basket of securities in which the Fund invests and/or cash. Except when aggregated in Creation Units, the Shares are not redeemable securities of the Fund.

Individual Shares may only be bought and sold in the secondary market (i.e., on a national securities exchange) through a broker or dealer at a market price. Because the Shares trade at market prices rather than NAV, Shares may trade at a price greater than NAV (at a premium), at NAV, or less than NAV (at a discount). An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase Shares (bid) and the lowest price a seller is willing to accept for Shares (ask) when buying or selling shares in the secondary market (the “*bid-ask spread*”).

Recent information, including information on the Fund’s NAV, market price, premiums and discounts, and bid-ask spreads, is available online at www.amplifyetfs.com.

TAX INFORMATION

The Fund’s distributions will generally be taxable as ordinary income or capital gains. A sale of Shares may result in capital gain or loss.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase Shares through a broker-dealer or other financial intermediary (such as a bank), the Adviser and Foreside Fund Services, LLC, the Fund’s distributor, may pay the intermediary for the sale of Shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.

Additional Information About the Fund's Strategies

PRINCIPAL INVESTMENT STRATEGIES

The Fund seeks to provide capital appreciation as its investment objective. Under normal circumstances, the Fund will invest at least 80% of its net assets (plus borrowings for investment purposes) in U.S.-listed equity securities of companies with small- to mid- market capitalizations.

The Adviser defines a small- to mid- market capitalization company as a company that has a market capitalization of between \$400 million and approximately the largest market capitalization company in the Russell 2500™ Index at the time of purchase. As of August 31, 2024, the largest company in the Russell 2500™ Index had a market capitalization of \$30.5 billion. The Fund will primarily invest in common stocks, but may invest in other types of equity securities and/or in REITs.

Curi RMB actively manages the Fund by applying an economic return framework that seeks to identify attractively-priced companies at all stages of the corporate lifecycle that allocate capital in a way that creates long-term value. Curi RMB's economic return framework analyzes key determinants of success, such as cash flow, capital investments, credit worthiness and sales momentum. Taking into account a company's stage in the corporate lifecycle, Curi RMB evaluates the sustainability of the company's economic returns and further evaluates potential investments to determine which stocks are most attractively priced. In managing the Fund, Curi RMB seeks to construct a portfolio that is diversified across both economic sectors and corporate lifecycle. As a result of its lifecycle diversification, the Fund invests in both growth- and value-style equity securities.

The first phase in the decision-making process involves screening a broad equity universe of approximately 2,500 small- to mid- market capitalization issuers to determine which look most promising based on analysis of several key determinants of success, such as capital investments, credit worthiness and sales momentum. From there, Curi RMB narrows the list and evaluates approximately 600 companies, with a focus on each company's stage in its life cycle and the level, trend and sustainability of economic returns. This results in a potential "buy" list of 150 companies the Adviser believes are well managed, and which are evaluated further to determine which stocks are most attractively priced. Following additional analysis of accounting numbers (including fundamental, valuation modeling, and auditor flags), financial statement data and recent corporate news, Curi RMB arrives at a target price for each stock and makes risk/reward comparisons among all of the potential investments. Curi RMB typically constructs the Fund's portfolio of the approximately 40 to 80 holdings that result from this process, with close attention paid to the Russell 2500™ Index sector weightings, which may result in a significant portion of the Fund's assets being invested in particular sectors, such as the financial services industry. Stocks are sold or positions are reduced at a variety of times, including when they reach the target price, when there is a significant change in economic return trend, or when a position reaches 5% of the Fund's net assets.

The Fund's investment objectives, investment strategies and each of the policies described herein are non-fundamental policies that may be changed by the Board of Trustees of the Trust (the "Board") without shareholder approval. Certain fundamental policies of the Fund are set forth in the Fund's Statement of Additional Information ("SAI") under "Investment Objectives and Policies." The Fund may liquidate and terminate at any time without shareholder approval.

Concentration Policy. The Fund will not concentrate its investments (*i.e.*, invest more than 25% of the value of its total assets) in securities of issuers in any industry or group of industries.

NON-PRINCIPAL INVESTMENT STRATEGIES

Securities Lending. The Fund may lend its portfolio securities to brokers, dealers and other financial institutions. In connection with such loans, the Fund receives liquid collateral equal to at least 102% (105% for international securities) of the value of the loaned portfolio securities. This collateral is marked-to-market on a daily basis. To the extent that the Fund receives cash collateral, it will invest such collateral in readily marketable, high quality, short-term obligations.

Fund Investments

EQUITY SECURITIES

The Fund invests in equity securities, including common stocks. Equity securities represent an ownership position in a company. The prices of equity securities fluctuate based on, among other things, events specific to their issuers and market, economic, and other conditions.

REAL ESTATE INVESTMENT TRUSTS

The Fund may invest in REITs. REITs are financial vehicles that pool investors' capital to purchase or finance real estate. REITs are generally classified as equity REITs, mortgage REITs or a combination of equity and mortgage REITs. Equity REITs invest the majority of their assets directly in real property and derive income primarily from the collection of rents. Equity REITs can also realize capital gains by selling properties that have appreciated in value. Mortgage REITs invest the majority of their assets in real estate mortgages and derive income from the collection of interest payments. REITs are not taxed on income distributed to shareholders provided they comply with the applicable tax requirements.

CASH EQUIVALENTS AND SHORT-TERM INVESTMENTS

The Fund may invest in securities with maturities of less than one year, cash or cash equivalents, or in the securities of one or more ETFs designed to provide exposure to short-term interest or financing rates, including the Amplify Samsung SOFR ETF (the "SOF ETF"), which is advised by Amplify Investments LLC, the Fund's investment adviser. The Fund expects, under normal market circumstances, that the Fund's investment in securities with maturities of less than one year, cash or cash equivalents and/or one or more ETFs designed to provide exposure to short-term interest or financing rates (including the SOF ETF), will vary due to several factors, including market conditions. During periods of high cash inflows or outflows or if market conditions are not favorable, the Fund may depart from its principal investment strategies and invest part or all of its assets in these securities or it may hold cash. During such periods, the Fund may not be able to achieve its investment objectives. Under normal market conditions, the Fund will invest 5% or less of its assets in such holdings or cash. For more information on eligible short-term investments, see the SAI.

PRINCIPAL RISKS OF INVESTING IN THE FUND

The following provides additional information about certain of the principal risks identified under "Principal Risks of Investing in the Fund" in the Fund's "Summary Information" section.

Risk is inherent in all investing. Investing in the Fund involves risk, including the risk that you may lose all or part of your investment. There can be no assurance that the Fund will meet its stated objectives. Before you invest, you should consider the following risks in addition to the Principal Risks set forth above in this prospectus.

Active Market Risk. Although the Shares are listed for trading on the Exchange, there can be no assurance that an active trading market for the Shares will develop or be maintained. Shares trade on the Exchange at market prices that may be below, at or above the Fund's net asset value. Securities, including the Shares, are subject to market fluctuations and liquidity constraints that may be caused by such factors as economic, political, or regulatory developments, changes in interest rates, and/or perceived trends in securities prices. Shares of the Fund could decline in value or underperform other investments.

Authorized Participant Concentration Risk. Only an authorized participant may engage in creation or redemption transactions directly with the Fund. The Fund has a limited number of institutions that act as authorized participants on an agency basis. To the extent that these institutions exit the business or are unable to proceed with orders for the issuance or redemption of Creation Units and no other authorized participant is able to step forward to fulfill the order, in either of these cases, Shares may trade at a discount to the Fund's NAV and possibly face delisting.

Cyber Security Risk. The Fund, Adviser, Sub-Advisers, service providers, authorized participants and the Exchange are susceptible to operational, information security and related "cyber" risks both directly and through their service providers. Similar types of cyber security risks are also present for issuers of securities in which the Fund invests, which could result in material adverse consequences for such issuers and may cause the Fund's investment in such portfolio companies to lose value. Unlike many other types of risks faced by the Fund, these risks typically are not covered by insurance. In general, cyber incidents can result from deliberate attacks or unintentional events. Cyber incidents include, but are not limited to, gaining unauthorized access to digital systems (*e.g.*, through "hacking" or malicious software coding) for purposes of misappropriating assets or sensitive information, corrupting data, or causing operational disruption. Cyber attacks may also be carried out in a manner that does not require gaining unauthorized access, such as causing denial-of-service attacks on websites (*i.e.*, efforts to make network services unavailable to intended users). Cyber security failures by or breaches of the systems of the Adviser, Sub-Advisers, distributor and other service providers (including, but not limited to, index providers, fund accountants, custodians, transfer agents and administrators), market makers, authorized participants or the issuers of securities in which the Fund invests, have the ability to cause disruptions and impact business operations, potentially resulting in: financial losses, interference with the Fund's ability to calculate its NAV, disclosure of confidential trading information, impediments to trading, submission of erroneous trades or erroneous creation or redemption orders, the inability of the Fund or its service providers to transact business, violations of

applicable privacy and other laws, regulatory fines, penalties, reputational damage, reimbursement or other compensation costs, or additional compliance costs. In addition, cyber attacks may render records of Fund assets and transactions, shareholder ownership of Shares, and other data integral to the functioning of the Fund inaccessible or inaccurate or incomplete. Substantial costs may be incurred by the Fund in order to resolve or prevent cyber incidents in the future. While the Fund has established business continuity plans in the event of, and risk management systems to prevent, such cyber attacks, there are inherent limitations in such plans and systems, including the possibility that certain risks have not been identified and that prevention and remediation efforts will not be successful. Furthermore, the Fund cannot control the cyber security plans and systems put in place by service providers to the Fund, issuers in which the Fund invests, market makers or authorized participants. The Fund and its shareholders could be negatively impacted as a result.

Equity Securities Risk. Equity securities present certain risks, including the risk that the value of equity securities, including common stocks, will fall. The value of an equity security may fall due to changes in general economic conditions that impact the market as a whole and that are relatively unrelated to an issuer or its industry. These conditions include changes in interest rates, specific periods of overall market turbulence or instability, or general and prolonged periods of economic decline and cyclical change. An issuer's common stock in particular may be especially sensitive to, and more adversely affected by, these general movements in the stock market; it is possible that a drop in the stock market may depress the price of most or all of the common stocks that a fund holds. In addition, equity risk includes the risk that investor sentiment toward, and perceptions regarding, particular industries or economic sectors will become negative. Price changes of equity securities may occur in a particular region, industry, or sector of the market, and as a result, the value of an issuer's common stock may fall solely because of factors, such as increases in production costs, that negatively impact other companies in the same industry or in a number of different industries. Equity securities risk also includes the financial risks of a specific company, including that the value of the company's securities may fall as a result of factors directly relating to that company, such as decisions made by its management or lower demand for the company's products or services. In particular, the common stock of a company may decline significantly in price over short periods of time. For example, an adverse event, such as an unfavorable earnings report, may depress the value of common stock; similarly, the common stock of an issuer may decline in price if the issuer fails to make anticipated dividend payments because, among other reasons, the issuer experiences a decline in its financial condition.

ESG Risk. To the extent RMB Curi utilizes ESG factors to evaluate the Fund's investments, the consideration of such factors may adversely affect the Fund's performance. Not every ESG factor may be identified or evaluated for every investment. ESG characteristics are not the only factors considered and, as a result, the issuers in which the Fund invests may not be issuers with favorable ESG characteristics or high ESG ratings. When integrating ESG factors into the investment process, RMB Curi may rely on third-party data that it believes to be reliable, but it does not guarantee the accuracy of such third-party data. ESG information from third-party data providers may be incomplete, inaccurate or unavailable, which may adversely impact the investment process. Moreover, ESG information, whether from an external and/or internal source, is, by nature and in many instances, based on a qualitative and subjective assessment. An element of subjectivity and discretion is therefore inherent to the interpretation and use of ESG data. Moreover, the current lack of common standards may result in different approaches to integrating ESG factors. Any of these factors could adversely affect the Fund's performance.

Growth Investing Risk. Growth stocks may fall out of favor with investors and underperform other asset types during given periods. A company may never achieve the earnings growth the team anticipated. Investors often expect growth companies to increase their earnings at a certain rate. Failures by such companies to meet these expectations may result in sharp declines in the prices of these stocks, even if earnings do increase. In addition, growth stocks typically lack the dividend yield that can cushion stock prices in market downturns. This may result in a decline in the value of the Funds' investments.

Inflation Risk. Inflation risk is the risk that the value of the Fund's assets or income from investments of the Fund will be less in the future as inflation decreases the value of money. As inflation increases, the present value of the Fund's assets can decline as can the value of the Fund's distributions.

Management Risk. The Fund is subject to management risk because it is an actively managed portfolio. The Sub-Advisers will apply investment techniques and risk analyses in making investment decisions for the Fund, but there can be no guarantee that the Fund will meet its investment objectives.

Market Maker Risk. If the Fund has lower average daily trading volumes, it may rely on a small number of third-party market makers to provide a market for the purchase and sale of Shares. Any trading halt or other problem relating to the trading activity of these market makers could result in a dramatic change in the spread between the Fund's net asset value and the price at which the Shares are trading on the Exchange, which could result in a decrease in value of the Shares. In addition, decisions by market makers or authorized participants to reduce their role or step away from these activities in times of market stress could inhibit the effectiveness of the arbitrage process in maintaining the relationship between the underlying values of the Fund's portfolio securities and the Fund's market price. This reduced effectiveness could result in Shares trading at a discount to net asset value and also in greater than normal intra-day bid-ask spreads for Shares.

Market Risk. Market risk is the risk that a particular security owned by the Fund or the Shares in general may fall in value, including the possible loss of the entire principal amount that you invest. Securities are subject to market fluctuations caused by such factors as economic, political, regulatory or market developments, changes in interest rates and perceived trends in securities prices, and changes in investors' perceptions of the financial condition of an issuer or the general condition of the relevant stock market, such as the current market volatility. Overall security values could decline generally or could underperform other investments. In addition, local, regional or global events such as war, acts of terrorism, spread of infectious diseases or other public health issues, recessions, or other events could have a significant negative impact on the Fund and its investments. Such events may affect certain regions, sectors and industries more significantly than others. Such events could result in disruptions to trading markets and could also adversely affect the prices and liquidity of the Fund's holdings. Any of such circumstances could materially negatively impact the value of Shares and result in increased market volatility. During any such events, Shares may trade at a greater premium or discount to its NAV.

New Fund Risk. The Fund is new and currently has fewer assets than larger funds, and like other new funds, large inflows and outflows may impact the Fund's market exposure for limited periods of time. This impact may be positive or negative, depending on the direction of market movement during the period affected. Additionally, because the Fund has fewer assets than larger funds over which to spread its fixed costs, its expense levels on a percentage basis will be higher than that of a larger Fund.

Operational Risk. The Fund is exposed to operational risks arising from a number of factors, including, but not limited to, human error, processing and communication errors, errors of the Fund's service providers, counterparties or other third-parties, failed or inadequate processes and technology or systems failures. The Fund, Adviser and Sub-Adviser seek to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate to address these risks.

Portfolio Turnover Risk. The Fund will engage in active trading, which may result in a turnover of the Fund's portfolio to be greater than 100% annually. The Fund's strategy may result in the Fund paying higher levels of transaction costs and generating greater tax liabilities for shareholders. Frequent portfolio turnover may negatively affect the Fund's performance.

Premium/Discount Risk. The net asset value of Shares will generally fluctuate with changes in the market value of the Fund's holdings. The market prices of shares will generally fluctuate in accordance with changes in net asset value as well as the relative supply of and demand for Shares on the Exchange. The Fund cannot predict whether Shares will trade below (discount), at or above (premium) their net asset value. Price differences may be due, in large part, to the fact that supply and demand forces at work in the secondary trading market for Shares will be closely related to, but not identical to, the same forces influencing the prices of the holdings of the Fund trading individually or in the aggregate at any point in time.

REIT Risk. REITs typically own and operate income-producing real estate, such as residential or commercial buildings, or real-estate related assets, including mortgages. Adverse economic, business or political developments affecting real estate could have a major effect on the value of the Fund's investments in REITs. Investing in REITs may subject the Fund to risks associated with the direct ownership of real estate, such as decreases in real estate values, overbuilding, increased competition and other risks related to local or general economic conditions, increases in operating costs and property taxes, changes in zoning laws, casualty or condemnation losses, possible environmental liabilities, regulatory limitations on rent and fluctuations in rental income. In addition, REITs are subject to the possibility of failing to qualify for the favorable U.S. federal income tax treatment generally available to them under the Internal Revenue Code of 1986, as amended (the "Code"), and failing to maintain exemption from the registration requirements of the 1940 Act.

Small and Mid-Cap Companies Risk. Stock prices of small and/or mid-capitalization companies may be more volatile than those of larger companies and, therefore, a Fund's share price may be more volatile than those of funds that invest a larger percentage of their assets in stocks issued by mid- or large-capitalization companies. Stock prices of small and/or mid-capitalization companies are generally more vulnerable than those of large-capitalization companies to adverse business and economic developments. Securities of small and/or mid-capitalization companies may be thinly traded, making it difficult for a Fund to buy and sell them. In addition, small and/or mid-capitalization companies are typically less financially stable than larger, more established companies and may depend on a small number of essential personnel, making these companies more vulnerable to experiencing adverse effects due to the loss of personnel. Small and/or mid-capitalization companies also normally have less diverse product lines than those of large-capitalization companies and are more susceptible to adverse developments concerning their products.

Trading Issues Risk. Although the Shares of the Fund are listed for trading on the Exchange, there can be no assurance that an active trading market for such Shares will develop or be maintained. Trading in Shares on the Exchange may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in Shares inadvisable. In addition, trading in Shares on the Exchange is subject to trading halts caused by extraordinary market volatility pursuant to Exchange "circuit breaker" rules. Market makers are under no obligation to make a market in Shares, and authorized participants are not obligated to submit purchase or redemption orders for Creation Units. There can be no assurance that the requirements of the Exchange necessary to maintain the listing of the Fund will continue to be met or will remain unchanged.

Valuation Risk. During periods of reduced market liquidity or in the absence of readily available market quotations for the holdings of the Fund, the valuation of the Fund's investments will become more difficult. In market environments where there is reduced availability of reliable objective pricing data, the judgment of the Fund's investment adviser in determining the fair value of the security may play a greater role. While such determinations may be made in good faith, it may nevertheless be more difficult for the Fund to accurately assign a daily value. The Fund's Valuation Procedures (as defined below) appointed Amplify as Valuation Designee (as defined below), as reviewed, approved, and subject to the oversight of the Board, complies with Rule 2a-5 under the 1940 Act ("Rule 2a-5"). Pursuant to Rule 2a-5, the Board oversees the implementation of the Valuation Procedures. While the Fund's program is designed to contemplate the specific risks of the Fund, there is no guarantee the program will adequately do so each time, and value may not be properly selected for the Fund.

Value Investing Risk. Value-style stocks are those that the Adviser believes will increase in value, pay dividends or are undervalued at the time of purchase. Value-style stocks may never increase in price or pay dividends as anticipated by the Adviser/Sub-Adviser, or may decline if the market fails to recognize the company's intrinsic value, if the factors that the Adviser/Sub-Adviser believes will increase the price do not occur or if a stock is appropriately priced.

NON-PRINCIPAL RISKS OF INVESTING IN THE FUND

The following section provides additional risk information regarding investing in the Fund.

International Closed Market Trading Risk. To the extent that the underlying securities held by the Fund trade on non-U.S. exchanges that may be closed when the Exchange is open, there are likely to be deviations between the current price of such an underlying security and the last quoted price for the underlying security. These deviations could result in premiums or discounts to the Fund's NAV that may be greater than those experienced by other exchange-traded funds.

Legislation and Litigation Risk. Legislation or litigation that affects the value of securities held by the Fund may reduce the value of the Fund. From time to time, various legislative initiatives are proposed that may have a negative impact on certain securities in which the Fund invests. In addition, litigation regarding any of the securities owned by the Fund may negatively impact the value of the Shares. Such legislation or litigation may cause the Fund to lose value or may result in higher portfolio turnover if Fund determines to sell such a holding.

Security Issuer Risk. Issuer-specific attributes may cause a security held by the Fund to be more volatile than the market generally. The value of an individual security or particular type of security may be more volatile than the market as a whole and may perform differently from the value of the market as a whole.

Securities Lending Risk. Securities lending involves a risk of loss because the borrower may fail to return the securities in a timely manner or at all. If the Fund were unable to recover the securities loaned, it may sell the collateral and purchase a replacement security in the market. Lending securities entails a risk of loss to the Fund if and to the extent that the market value of the loaned securities increases and the collateral is not increased accordingly. Any cash received as collateral for loaned securities will be invested in readily marketable, high quality, short-term obligations. This investment is subject to market appreciation or depreciation and the Fund will bear any loss on the investment of its cash collateral.

Portfolio Holdings

A description of the Trust's policies and procedures with respect to the disclosure of the Fund's portfolio holdings is available in the Fund's SAI, which is available at www.amplifyetfs.com.

Management of the Fund

FUND ORGANIZATION

The Fund is a series of the Trust, an investment company registered under the 1940 Act. The Fund is treated as a separate fund with its own investment objective and policies. The Trust is organized as a Massachusetts business trust. The Board is responsible for the overall management and direction of the Trust. The Board elects the Trust's officers and approves all significant agreements, including those with the Adviser, Sub-Advisers, custodian and fund administrative and accounting agent.

Investment Adviser. Amplify Investments LLC is a registered investment adviser with its offices at 3333 Warrenville Road, Suite 350, Lisle, Illinois 60532. The Trust, on behalf of the Fund, has engaged Amplify Investments to serve as the Fund's investment adviser pursuant to an investment management agreement (the "Investment Management Agreement"). In this capacity, Amplify Investments has overall responsibility for overseeing the investment of the Fund's assets, managing the Fund's business affairs and providing certain clerical, bookkeeping and other administrative services for the Trust. As compensation for its services, the Fund has agreed to pay

Amplify Investments an annual management fee equal to 0.60% of its average daily net assets. Out of this management fee, Amplify Investments pays substantially all expenses of the Fund, including the cost of transfer agency, custody, fund administration, legal, audit and other service and license fees, except for distribution and service fees payable pursuant to a Rule 12b-1 plan, if any, acquired fund fees and expenses, brokerage commissions and other expenses connected with the execution of portfolio transactions, taxes, interest, and extraordinary expenses.

Pursuant to an agreement with the Fund, Amplify Investments has agreed to waive its management fee with respect to acquired fund fees incurred by the Fund with respect to the Fund's investment, if any, in any funds in which Amplify Investments serves as investment adviser, including but not limited to the SOF ETF, in an amount equal to any acquired fund fees incurred by the Fund with respect to its investment in such fund. Amplify Investments has agreed to waive and reimburse such expenses. This agreement may be terminated only by, or with the consent of, the Trust's Board of Trustees on behalf of the Fund.

Investment Sub-Advisers. Curi RMB Capital, LLC, is a registered investment adviser with its offices at 115 South LaSalle Street, 34th Floor, Chicago, Illinois, 60603. The Trust, on behalf of the Fund, and Amplify Investments have engaged Curi RMB to serve as the Fund's investment sub-adviser pursuant to an investment sub-advisory agreement (the "Curi RMB Sub-Advisory Agreement"). In this capacity, Curi RMB has overall responsibility for the Fund's selection of equity securities for the portfolio. As compensation for its services, Amplify Investments has agreed to pay Curi RMB an annual sub-advisory fee based upon the Fund's average daily net assets. Amplify Investments is responsible for paying the entire amount of Curi RMB's sub-advisory fee. The Fund does not directly pay Curi RMB.

Penserra Capital Management LLC is a registered investment adviser with its offices at 4 Orinda Way, Suite 100-A, Orinda, California 94563. The Trust, on behalf of the Fund, and Amplify Investments have engaged Penserra to serve as the Fund's investment sub-adviser pursuant to an investment sub-advisory agreement (the "Penserra Sub-Advisory Agreement" and collectively with the Curi RMB Sub-Advisory Agreement, the "Sub-Advisory Agreements"). In this capacity, Penserra has responsibility for implementing the Fund's investment program by, among other things, trading portfolio securities and performing related services, rebalancing the Fund's portfolio, and providing cash management services in accordance with the investment advice formulated by, and model portfolios delivered by, Curi RMB and Amplify Investments. As compensation for its services, Amplify Investments has agreed to pay Penserra an annual sub-advisory fee based upon the Fund's average daily net assets. Amplify Investments is responsible for paying the entire amount of Penserra's sub-advisory fee. The Fund does not directly pay Penserra.

A discussion regarding the basis for the Board's approval of the Investment Management Agreement and the Sub-Advisory Agreements will be available in the Fund's Annual Report to shareholders for the fiscal year ended September 30, 2024.

Portfolio Managers. The members of the portfolio management team for the Fund are Christopher Faber, Dustin Lewellyn, Ernesto Tong and Christine Johanson.

Christopher C. Faber. Mr. Faber is Senior Vice President and Portfolio Manager at Curi RMB. Prior to joining Curi RMB in 2017, Mr. Faber was the President and a portfolio manager of IronBridge Capital Management, L.P. ("IronBridge") from 1999 to 2017. Mr. Faber was a founding partner of HOLT Value Associates, L.P., the former parent company of IronBridge, from May 1986 to April 1999.

Dustin Lewellyn, CFA. Mr. Lewellyn has extensive background in institutional investment process with a specific focus on ETF, such as the Fund. Mr. Lewellyn was a portfolio manager at BGI (now part of Blackrock) and he managed a number of international equity funds. Mr. Lewellyn also was head of ETF product management and product development at Northern Trust where he oversaw the build out and management of all areas of a new ETF business, including primary responsibility for the portfolio management process surrounding the ETFs. Mr. Lewellyn also built and ran a new ETF business for Charles Schwab, including having primary responsibility for the technology and investment process to support portfolio management for the ETFs. Mr. Lewellyn started a consulting business with a focus on ETFs and helped numerous new ETF sponsors, as well as service providers, understand the resource requirements to participate in the industry utilizing current best practices. Mr. Lewellyn holds a B.A. from University of Iowa and is a CFA Charterholder. He also holds security licenses 7, 63, 66 and 24.

Ernesto Tong, CFA. Mr. Tong worked for Barclays Global Investors and Blackrock prior to joining Penserra. During his time at Blackrock, Mr. Tong spent two years as an Index Research Analyst and seven years as a portfolio manager for a number of funds. As an Index Research Analyst, he was responsible for performing independent research and analysis to incorporate into Portfolio Management and Trading strategies and also developing and launching new indices and investment products, particularly in Latin America. As a portfolio manager, Ernesto managed \$40 billion in global ETF assets and was responsible for all aspects of portfolio management across domestic and international portfolios. Mr. Tong was also responsible for launching, managing, and driving the local Latin American ETF products for the portfolio management group, focusing on Brazil, Colombia and Mexico. Mr. Tong holds a B.A. from the University of California, Davis and is a CFA Charterholder. He holds security licenses 7 and 63.

Christine Johanson, CFA. Ms. Johanson has been a Director with Penserra since 2023. Prior to joining Penserra, Ms. Johanson was a Director on the US Transition Management team at BlackRock from March 2022 to March 2023, where she developed custom solutions for institutional investors seeking to restructure portfolios across multiple asset classes. Ms. Johanson previously served as the global Head of Fixed Income Transition Management for Russell Investments from March 2018 to February 2022. Ms. Johanson holds a B.S.B.A. from the University of Missouri and is a CFA Charterholder.

The Fund's SAI provides additional information about the compensation structure for the portfolio managers, other accounts that the portfolio managers manage and the ownership of Shares by the portfolio managers.

Manager of Managers Structure. The Fund and the Adviser have received an exemptive order from the SEC to operate under a manager of managers structure that permits the Adviser, with the approval of the Board, to appoint and replace sub-advisers, enter into sub-advisory agreements, and materially amend and terminate sub-advisory agreements on behalf of the Fund without shareholder approval (the "Manager of Managers Structure"). Under the Manager of Managers Structure, the Adviser has ultimate responsibility, subject to oversight by the Board, for overseeing the Fund's sub-adviser(s) and recommending to the Board the hiring, termination, or replacement of any such sub-adviser(s) — including Curi RMB and Penserra, in their capacity as Sub-Advisers. The exemptive order does not apply to any sub-adviser that is affiliated with the Fund or the Adviser.

The Manager of Managers Structure enables the Fund to operate with greater efficiency and without incurring the expense and delays associated with obtaining shareholder approvals for matters relating to sub-advisers or sub-advisory agreements. The Manager of Managers Structure does not permit an increase in the overall management and advisory fees payable by the Fund without shareholder approval. Shareholders will be notified of any changes made to sub-advisers or sub-advisory agreements within 90 days of the changes.

How to Buy and Sell Shares

The Fund issues or redeems its Shares at NAV per Share only in Creation Units. Most investors buy and sell Shares in secondary market transactions through brokers. Shares are listed for trading on the secondary market on the Exchange. Shares can be bought and sold throughout the trading day like other publicly traded shares. There is no minimum investment. When buying or selling Shares through a broker, you will incur customary brokerage commissions and charges, and you may pay some or all of the spread between the bid and the offered price in the secondary market on each leg of a round trip (purchase and sale) transaction. Share prices are reported in dollars and cents per Share. Authorized participants may acquire Shares directly from the Fund, and authorized participants may tender their Shares for redemption directly to the Fund, at NAV per Share only in Creation Units or Creation Unit Aggregations, and in accordance with the procedures described in the SAI.

BOOK ENTRY

Shares are held in book-entry form, which means that no stock certificates are issued. The Depository Trust Company ("DTC") or its nominee is the record owner of all outstanding Shares and is recognized as the owner of all Shares for all purposes.

Investors owning Shares are beneficial owners as shown on the records of DTC or its participants. DTC serves as the securities depository for all Shares. Participants in DTC include securities brokers and dealers, banks, trust companies, clearing corporations and other institutions that directly or indirectly maintain a custodial relationship with DTC. As a beneficial owner of Shares, you are not entitled to receive physical delivery of stock certificates or to have Shares registered in your name, and you are not considered a registered owner of Shares. Therefore, to exercise any right as an owner of Shares, you must rely upon the procedures of DTC and its participants. These procedures are the same as those that apply to any other stocks that you hold in book entry or "street name" form.

FUND SHARE TRADING PRICES

The trading prices of Shares on the Exchange are based on market price and may differ from the Fund's daily NAV. Market forces of supply and demand, economic conditions and other factors may affect the trading prices of Shares.

FREQUENT PURCHASES AND REDEMPTIONS OF FUND SHARES

The Fund imposes no restrictions on the frequency of purchases and redemptions ("market timing") and has adopted no policies and procedures with respect to such purchases and redemptions. In making this determination, the Board considered the risks associated with frequent purchases and redemptions by the Fund's shareholders. Such risks include, dilution, disruption of portfolio management, increases in the Fund's trading costs and the potential for the realization of capital gains.

Shares may be purchased and redeemed directly from the Fund only when aggregated into one or more Creation Units by authorized participants that have entered into agreements with the Fund's distributor. The vast majority of trading in Shares occurs on the secondary market and does not involve the Fund directly. In-kind purchases and redemptions of Creation Units by authorized participants and cash trades on the secondary market are unlikely to cause many of the harmful effects of frequent purchases and/or redemptions of Shares that are detailed above. To the extent that the Fund may affect the issuance or redemption of Creation Units in exchange wholly or partially for cash, such trades could result in dilution to the Fund and increased transaction costs, which could negatively impact the Fund's ability to achieve its investment objectives. These consequences may increase as the frequency of cash purchases and redemptions of Creation Units by authorized participants increases. However, direct trading by authorized participants is critical to ensuring that Shares trade at or close to NAV.

To minimize these potential consequences of frequent purchases and redemptions of Shares, the Fund imposes transaction fees on purchases and redemptions of Creation Units to cover the custodial and other costs the Fund incurs in effecting trades. In addition, the Fund reserves the right to not accept orders from authorized participants that the Adviser has determined may be disruptive to the management of the Fund or otherwise are not in the best interests of the Fund. For these reasons, the Board has not adopted policies and procedures with respect to frequent purchases and redemptions of Shares.

Dividends, Distributions and Taxes

Ordinarily, dividends from net investment income, if any, are declared and paid at least quarterly by the Fund. The Fund distributes its net realized capital gains, if any, to shareholders annually.

Distributions in cash may be reinvested automatically in additional whole Shares only if the broker through whom you purchased Shares makes such option available.

TAXES

This section summarizes some of the main U.S. federal income tax consequences of owning Shares of the Fund. This section is current as of the date of this prospectus. Tax laws and interpretations change frequently, and these summaries do not describe all of the tax consequences to all taxpayers. For example, these summaries generally do not describe your situation if you are a corporation, a non-U.S. person, a broker-dealer, or other investor with special circumstances. In addition, this section does not describe your state, local or non-U.S. tax consequences.

This federal income tax summary is based in part on the advice of counsel to the Fund. The Internal Revenue Service could disagree with any conclusions set forth in this section. In addition, counsel to the Fund may not have been asked to review, and may not have reached a conclusion with respect to, the federal income tax treatment of the assets to be included in the Fund. This may not be sufficient for you to use for the purpose of avoiding penalties under federal tax law.

As with any investment, you should seek advice based on your individual circumstances from your own tax advisor.

The Fund intends to qualify as a "regulated investment company" under the federal tax laws. If the Fund qualifies as a regulated investment company and distributes its income as required by the tax law, the Fund generally will not pay federal income taxes.

Unless your investment in Shares is made through a tax-exempt entity or tax-deferred retirement account, such as an IRA plan, you need to be aware of the possible tax consequences when:

- Your Fund makes distributions,
- You sell your Shares listed on the Exchange, and
- You purchase or redeem Creation Units.

TAXES ON DISTRIBUTIONS

The Fund's distributions are generally taxable. After the end of each year, you will receive a tax statement that separates the distributions of the Fund into two categories, ordinary income distributions and capital gain dividends. The presence of covered call options in the portfolio may reduce the amount of dividends that would otherwise be treated as capital gain dividends. Ordinary income distributions are generally taxed at your ordinary tax rate; however, as further discussed below, certain ordinary income distributions received from the Fund may be taxed at the capital gains tax rates. Generally, you will treat all capital gain dividends as long-term capital gains regardless of how long you have owned your Shares. To determine your actual tax liability for your capital gain dividends, you must calculate your total net capital gain or loss for the tax year after considering all of your other taxable transactions, as described below. In addition, the Fund may make distributions that represent a return of capital for tax purposes and thus will generally not be taxable to you; however, such

distributions may reduce your tax basis in your Shares, which could result in you having to pay higher taxes in the future when Shares are sold, even if you sell the Shares at a loss from your original investment. The tax status of your distributions from the Fund is not affected by whether you reinvest your distributions in additional Shares or receive them in cash. The income from the Fund that you must take into account for federal income tax purposes is not reduced by amounts used to pay a deferred sales fee, if any. The tax laws may require you to treat distributions made to you in January as if you had received them on December 31 of the previous year.

Income from the Fund may also be subject to a 3.8% “Medicare tax.” This tax generally applies to your net investment income if your adjusted gross income exceeds certain threshold amounts, which are \$250,000 in the case of married couples filing joint returns and \$200,000 in the case of single individuals.

A corporation that owns Shares generally will not be entitled to the dividends received deduction with respect to many dividends received from the Fund because the dividends received deduction is generally not available for distributions from regulated investment companies. However, certain ordinary income dividends on Shares that are attributable to qualifying dividends received by the Fund from certain corporations may be reported by the Fund as being eligible for the dividends received deduction. The presence of covered call options in the portfolio may reduce the amount of dividends that are treated as qualifying dividends.

If you are an individual, the maximum marginal stated federal tax rate for net capital gain is generally 20% (15% or 0% for taxpayers with taxable incomes below certain thresholds). Some capital gains, including some portion of your capital gain dividends, may be taxed at a higher maximum stated tax rate. Capital gains may also be subject to the Medicare tax described above.

Net capital gain equals net long-term capital gain minus net short-term capital loss for the taxable year. Capital gain or loss is long-term if the holding period for the asset is more than one year and is short-term if the holding period for the asset is one year or less. You must exclude the date you purchase your Shares to determine your holding period. However, if you receive a capital gain dividend from the Fund and sell your Shares at a loss after holding them for six months or less, the loss will be recharacterized as long-term capital loss to the extent of the capital gain dividend received. The tax rates for capital gains realized from assets held for one year or less are generally the same as for ordinary income. The Code treats certain capital gains as ordinary income in special situations. An election may be available to you to defer recognition of the gain attributable to a capital gain dividend if you make certain qualifying investments within a limited time. You should talk to your tax advisor about the availability of this deferral election and its requirements.

Ordinary income dividends received by an individual shareholder from a regulated investment company such as the Fund are generally taxed at the same rates that apply to net capital gain (as discussed above), provided certain holding period requirements are satisfied and provided the dividends are attributable to qualifying dividends received by the Fund itself. The presence of covered call options in the portfolio may reduce the amount of dividends that are eligible for capital gains rates. The Fund will provide notice to its shareholders of the amount of any distribution which may be taken into account as a dividend which is eligible for the capital gains tax rates.

TAXES ON EXCHANGE-LISTED SHARE SALES

If you sell or redeem your Shares, you will generally recognize a taxable gain or loss. To determine the amount of this gain or loss, you must subtract your tax basis in your Shares from the amount you receive in the transaction. Your tax basis in your Shares is generally equal to the cost of your Shares, generally including sales charges. In some cases, however, you may have to adjust your tax basis after you purchase your Shares.

TAXES ON PURCHASE AND REDEMPTION OF CREATION UNITS

If you exchange securities for Creation Units you will generally recognize a gain or a loss. The gain or loss will be equal to the difference between the market value of the Creation Units at the time and your aggregate basis in the securities surrendered and the cash component paid. If you exchange Creation Units for securities, you will generally recognize a gain or loss equal to the difference between your basis in the Creation Units and the aggregate market value of the securities received and the cash redemption amount. The Internal Revenue Service, however, may assert that a loss realized upon an exchange of securities for Creation Units or Creation Units for securities cannot be deducted currently under the rules governing “wash sales,” or on the basis that there has been no significant change in economic position.

TREATMENT OF FUND EXPENSES

Expenses incurred and deducted by the Fund will generally not be treated as income taxable to you. In some cases, however, you may be required to treat your portion of these Fund expenses as income. You may not be able to take a deduction for some or all of these expenses, even if the cash you receive is reduced by such expenses.

BACKUP WITHHOLDING

The Fund may be required to withhold U.S. federal income tax (“*backup withholding*”) from dividends and capital gain distributions paid to Shareholders. Federal tax will be withheld if (1) the Shareholder fails to furnish the Fund with the Shareholder’s correct taxpayer identification number or social security number, (2) the IRS notifies the Shareholder or the Fund that the Shareholder has failed to report properly certain interest and dividend income to the IRS and to respond to notices to that effect, or (3) when required to do so, the Shareholder fails to certify to the Fund that he or she is not subject to backup withholding. The current backup withholding rate is 24%. Any amounts withheld under the backup withholding rules may be credited against the Shareholder’s U.S. federal income tax liability.

NON-U.S. TAX CREDIT

If the Fund invests in non-U.S. securities, the tax statement that you receive may include an item showing non-U.S. taxes the Fund paid to other countries. In this case, dividends taxed to you will include your share of the taxes the Fund paid to other countries. You may be able to deduct or receive a tax credit for your share of these taxes.

NON-U.S. INVESTORS

If you are a non-U.S. investor (*i.e.*, an investor other than a U.S. citizen or resident or a U.S. corporation, partnership, estate or trust), you should be aware that, generally, subject to applicable tax treaties, distributions from the Fund will generally be characterized as dividends for federal income tax purposes (other than dividends which the Fund properly reports as capital gain dividends) and will be subject to U.S. federal income taxes, including withholding taxes, subject to certain exceptions described below. However, distributions received by a non-U.S. investor from the Fund that are properly reported by the Fund as capital gain dividends may not be subject to U.S. federal income taxes, including withholding taxes, provided that the Fund makes certain elections and certain other conditions are met. Distributions from the Fund that are properly reported by the Fund as an interest-related dividend attributable to certain interest income received by the Fund or as a short-term capital gain dividend attributable to certain net short-term capital gain income received by the Fund may not be subject to U.S. federal income taxes, including withholding taxes when received by certain non-U.S. investors, provided that the Fund makes certain elections and certain other conditions are met. For tax years after December 31, 2022, amounts paid to or recognized by a non-U.S. affiliate that are excluded from tax under the portfolio interest, capital gain dividends, short-term capital gains or tax-exempt interest dividend exceptions or applicable treaties, may be taken into consideration in determining whether a corporation is an “applicable corporation” subject to a 15% minimum tax on adjusted financial statement income.

Distributions to, and the gross proceeds from dispositions of shares by, (i) certain non-U.S. financial institutions that have not entered into an agreement with the U.S. Treasury to collect and disclose certain information and are not resident in a jurisdiction that has entered into such an agreement with the U.S. Treasury and (ii) certain other non-U.S. entities that do not provide certain certifications and information about the entity’s U.S. owners, may be subject to a U.S. withholding tax of 30%. However, proposed regulations may eliminate the requirement to withhold on payments of gross proceeds from dispositions.

It is the responsibility of the entity through which you hold your shares to determine the applicable withholding.

INVESTMENTS IN CERTAIN NON-U.S. CORPORATIONS

If the Fund holds an equity interest in any “passive foreign investment companies” (“PFICs”), which are generally certain non-U.S. corporations that receive at least 75% of their annual gross income from passive sources (such as interest, dividends, certain rents and royalties or capital gains) or that hold at least 50% of their assets in investments producing such passive income, the Fund could be subject to U.S. federal income tax and additional interest charges on gains and certain distributions with respect to those equity interests, even if all the income or gain is timely distributed to its shareholders. The Fund will not be able to pass through to its shareholders any credit or deduction for such taxes. The Fund may be able to make an election that could ameliorate these adverse tax consequences. In this case, the Fund would recognize as ordinary income any increase in the value of such PFIC shares, and as ordinary loss any decrease in such value to the extent it did not exceed prior increases included in income. Under this election, the Fund might be required to recognize in a year income in excess of its distributions from PFICs and its proceeds from dispositions of PFIC stock during that year, and such income would nevertheless be subject to the distribution requirement and would be taken into account for purposes of the 4% excise tax (described above). Dividends paid by PFICs are not treated as qualified dividend income.

The foregoing discussion summarizes some of the possible consequences under current federal tax law of an investment in the Fund. It is not a substitute for personal tax advice. You also may be subject to state and local taxes on Fund distributions and sales of Shares.

Consult your personal tax advisor about the potential tax consequences of an investment in Shares under all applicable tax laws. See “Federal Tax Matters” in the statement of additional information for more information.

Distribution Plan

Foreside Fund Services, LLC (the “Distributor”) serves as the distributor of Creation Units for the Fund on an agency basis. The Distributor does not maintain a secondary market in Shares.

The Board has adopted a Distribution and Service Plan pursuant to Rule 12b-1 under the 1940 Act. In accordance with its Rule 12b-1 plan, the Fund is authorized to pay an amount up to 0.25% of its average daily net assets each year to reimburse the Distributor for amounts expended to finance activities primarily intended to result in the sale of Creation Units or the provision of investor services. The Distributor may also use this amount to compensate securities dealers or other persons that are authorized participants for providing distribution assistance, including broker-dealer and shareholder support and educational and promotional services.

The Fund does not and has no current intention of paying 12b-1 fees. However, in the event 12b-1 fees are charged in the future, because these fees are paid out of the Fund’s assets, over time these fees will increase the cost of your investment and may cost you more than certain other types of sales charges.

Net Asset Value

The Fund’s NAV is determined as of the close of trading (normally 4:00 p.m., Eastern time) on each day the New York Stock Exchange is open for business. NAV is calculated by taking the market price of the Fund’s total assets, including interest or dividends accrued but not yet collected, less all liabilities, and dividing such amount by the total number of Shares outstanding. The result, rounded to the nearest cent, is the net asset value per Share.

Section 2(a)(41) of the 1940 Act provides that when a market quotation is readily available for a fund’s portfolio investments, such investment must be valued at the market value. Rule 2a-5 under the 1940 Act defines a readily available market quotation as “a quoted price (unadjusted) in active markets for identical investments that the fund can access at a measurement date, provided that a quotation will not be readily available if it is not reliable.” If a market quotation is not “readily available” the portfolio investment must be fair valued as determined in good faith by a fund’s board of trustees. Rule 2a-5 allows a fund’s board of trustees to designate the fund’s investment adviser as the “valuation designee” to perform fair value determinations subject to certain conditions. In accordance with Rule 2a-5, the Board has appointed Amplify Investments as the “Valuation Designee” for the Fund’s portfolio investments. Investments will be fair valued as determined in good faith in accordance with the policies and procedures established by Amplify Investments as the Valuation Designee pursuant to Rule 2a-5 and approved by, and subject to the oversight of, the Board of Trustees. As a general principle, “fair value” represents a good faith approximation of the value of a portfolio investment and is the amount the Fund might reasonably expect to receive from the current sale of that investment in an arm’s-length transaction. The use of fair value prices may result in prices used by the Fund that may differ from current market quotations or official closing prices on the applicable exchange. A variety of factors may be considered in determining the fair value of such securities. While the Valuation Procedures (defined below) are intended to result in the Fund’s NAV calculation that fairly reflects the values as of the time of pricing, the fair value determined for a portfolio instrument may be materially different from the value that could be realized upon the sale of that instrument.

The Fund’s investments will be valued daily at market value or, in the absence of market value with respect to any investment, at fair value in accordance with valuation procedures adopted by the Board and in accordance with the 1940 Act. Market value prices represent last sale or official closing prices from a national or foreign exchange (*i.e.*, a regulated market) and are primarily obtained from third-party pricing services.

The Fund’s investments are valued daily in accordance with valuation procedures adopted by the Board, and in accordance with provisions of the 1940 Act. Certain securities in which the Fund may invest are not listed on any securities exchange or board of trade. Such securities are typically bought and sold by institutional investors in individually negotiated private transactions that function in many respects like an over-the-counter secondary market, although typically no formal market makers exist. Certain securities, particularly debt securities, have few or no trades, or trade infrequently, and information regarding a specific security may not be widely available or may be incomplete. Accordingly, determinations of the fair value of debt securities may be based on infrequent and dated information. Because there is less reliable, objective data available, elements of judgment may play a greater role in valuation of debt securities than for other types of securities. As explained below, any fair value determination will be made in accordance with Amplify Investments’ “Valuation Procedures.” Typically, debt securities are valued using information provided by a third-party pricing service. The third-party pricing service primarily uses broker quotes to value the securities.

Certain securities may not be able to be priced by pre-established pricing methods. Such securities may be valued by Amplify Investments (subject to the supervision of the Board) at fair value. The use of fair value pricing by the Fund is governed by valuation procedures adopted by Amplify Investments, and approved by, subject to the oversight of, the Board, and in accordance with the provisions of the 1940 Act. Investments will be fair valued as determined in good faith in accordance with the policies and procedures established by Amplify Investments as Valuation Designee pursuant to Rule 2a-5. These securities generally include, but are not limited to, certain

restricted securities (securities which may not be publicly sold without registration under the Securities Act of 1933, as amended, for which a pricing service is unable to provide a market price; securities whose trading has been formally suspended; a security whose market price is not available from a pre-established pricing source; a security with respect to which an event has occurred that is likely to materially affect the value of the security after the market has closed but before the calculation of the Fund's net asset value or make it difficult or impossible to obtain a reliable market quotation; and a security whose price, as provided by the pricing service, does not reflect the security's "fair value." See the SAI for details.

Even when market quotations are available for portfolio securities, they may be stale or unreliable because the security is not traded frequently, trading on the security ceased before the close of the trading market or issuer-specific events occurred after the security ceased trading or because of the passage of time between the close of the market on which the security trades and the close of the Exchange and when the Fund calculates its NAV. Events that may cause the last market quotation to be unreliable include a merger or insolvency, events which affect a geographical area or an industry segment, such as political events or natural disasters, or market events, such as a significant movement in the U.S. market. Where market quotations are not readily available, including where Amplify Investments determines that the closing price of the security is unreliable, Amplify Investments will value the security at fair value in good faith using procedures approved by the Board. Fair value pricing involves subjective judgments and it is possible that a fair value determination for a security is materially different than the value that could be realized upon the sale of the security.

Fund Service Providers

U.S. Bancorp Fund Services, LLC, 615 East Michigan Street, Milwaukee, Wisconsin 53202, is the administrator, fund accounting and transfer agent for the Fund. U.S. Bank National Association, 1555 North River Center Drive, Suite 302, Milwaukee, WI 53212, is the custodian.

Chapman and Cutler LLP, 320 South Canal Street, Chicago, Illinois 60606, serves as legal counsel to the Trust.

Cohen & Company, Ltd., 342 North Water Street, Suite 830, Milwaukee, Wisconsin 53202, serves as the Fund's independent registered public accounting firm and is responsible for auditing the annual financial statements of the Fund.

Premium/Discount Information

Information showing the number of days the market price of Shares was greater (at a premium) and less (at a discount) than the Fund's NAV for the most recently completed calendar year, and the most recently completed calendar quarters since that year (or the life of the Fund, if shorter), is available at www.amplifyetfs.com.

Other Information

OTHER INVESTMENT COMPANIES

Section 12(d)(1) of the 1940 Act restricts investments by investment companies in the securities of other investment companies. The SEC adopted Rule 12d1-4 under the 1940 Act, which outlines the requirements under which an investment company may invest in the securities of another investment company beyond the limits prescribed in Section 12(d)(1) of the 1940 Act. Any investment by another investment company in the Fund, or by the Fund in another investment company, must comply with Rule 12d1-4 in order to exceed the limits contained in Section 12(d)(1).

DELIVERY OF SHAREHOLDER DOCUMENTS — HOUSEHOLDING

Householding is an option available to certain investors of the Fund. Householding is a method of delivery, based on the preference of the individual investor, in which a single copy of certain shareholder documents can be delivered to investors who share the same address, even if their accounts are registered under different names. Householding for the Fund is available through certain broker-dealers. If you are interested in enrolling in householding and receiving a single copy of the prospectus and other shareholder documents, please contact your broker-dealer. If you currently are enrolled in householding and wish to change your householding status, please contact your broker-dealer.

Financial Highlights

The Fund is new and has no performance history as of the date of this prospectus. Financial information therefore is not available.

For More Information

For more detailed information on the Trust, Fund and Shares, you may request a copy of the Fund's SAI. The SAI provides detailed information about the Fund and is incorporated by reference into this prospectus. This means that the SAI legally is a part of this prospectus. Additional information about the Fund's investments also will be available in the Fund's Annual and Semi-Annual Reports to Shareholders, when available. In the Fund's Annual Report, you will find a discussion of the market conditions and investment strategies that significantly affected the Fund's performance during the last fiscal year. The Fund makes available its SAI and annual and semi-annual reports, free of charge, on or through its website listed below. If you have questions about the Fund or Shares or you wish to obtain the SAI, Annual Report and/or Semi-Annual Report, when available, free of charge, or to request other information about the Fund or to make shareholder inquiries, please:
