**MANAGE RISK WHILE STAYING INVESTED**

The BlackSwan ETF seeks investment results that correspond to the S-Network BlackSwan Core Index (the Index). The Index’s investment strategy seeks uncapped exposure to the S&P 500, while buffering against the possibility of significant losses. Approximately 90% of the ETF will be invested in U.S. Treasury securities, (with a targeted duration of the 10-year Treasury note), while approximately 10% will be invested in SPY LEAP Options in the form of in-the-money calls.

**REASONS TO INVEST**

1. Participation in S&P 500 returns while seeking to protect against significant losses.
2. Potential core equity solution that seeks to mitigate the effects of volatility.
3. Low-cost, index-based portfolio.

Holdings and allocations are subject to change at any time and should not be considered a recommendation to buy or sell a security.

**SELECTION METHODOLOGY**

- **Rules-based, quantitative index**
  - that seeks to hedge against equity downside while maintaining upside potential over the long term

- **Equity exposure:**
  - S&P 500 Index
  - Approximately 10% is invested in S&P 500 (SPY) LEAP options in the form of in-the-money calls

- **Fixed income exposure:**
  - Approximately 90% is invested in U.S. Treasury securities, with a targeted duration of the 10-year Treasury note.

- **Index rebalancing**
  - occurs every June and December
Correlation between Treasuries and S&P 500 have historically been negative (shaded area), and decrease during times of market turmoil.

Correlation is a statistic that measures the degree to which two securities move in relation to each other.

The Fund is not a money market fund.

Carefully consider the Fund’s investment objectives, risks, charges, and expenses before investing. This and other information can be found in the Fund’s statutory and summary prospectuses, which may be obtained at amplifyetfs.com. Read the prospectus carefully before investing.

Investing involves risk, including the possible loss of principal. To the extent the Fund utilizes a sampling approach, it may experience tracking error to a greater extent than if the Fund had sought to replicate the index. The use of derivative instruments, such as options contracts, can lead to losses because of adverse movements in the price or value of the underlying asset, index or rate, which may be magnified by certain features of the derivatives. Investing in options, including LEAP Options, and other instruments with option-type elements may increase the volatility and/or transaction expenses of the Fund. An option may expire without value, resulting in a loss of the Fund’s initial investment and may be less liquid and more volatile than an investment in the underlying securities. Investments in debt securities typically decrease in value when interest rates rise. This risk is usually greater for longer-term debt securities. The Fund is non-diversified, meaning it may concentrate its assets in fewer individual holdings than a diversified fund. Long-term equity anticipation securities (LEAPS) are publicly traded options contracts with expiration dates that are longer than one year. An “in-the-money” call option contract is an option contract with a strike price that is below the current price of the underlying reference asset.

Amplify Investments LLC is the Investment Adviser to the Fund. Cerity Partners LLC and Toroso Investments, LLC serve as the Investment Sub-Advisers. Amplify ETFs are distributed by Foreside Fund Services, LLC.
