Small Cap ($300M - <$2B)	13.64%

ABOUT THE FUND

The Amplify Top 10™ Quantum ETF (XQBT) provides actively managed exposure to companies participating in the quantum computing ecosystem. The Fund generally invests in companies included in the Bloomberg Top 10 Momentum Quantum Computing Index, along with other quantum-related businesses identified by the portfolio management team. XQBT seeks capital appreciation.

REASONS TO INVEST

1. **Focus on Market Leaders:** Provides concentrated, high-conviction exposure to 10 companies positioned at the center of the quantum computing innovation.
2. **Not a Single-Stock Bet:** Gain exposure across multiple companies rather than relying on a single company outcome.
3. **More of the Theme; Less of the Noise:** A concentrated portfolio may help reduce exposure to peripheral holdings that are less central to the opportunity.

TOP 10™ HOLDINGS EXPOSURE

COMPANY	% WT.
Keysight Technologies Inc	16.95%
IonQ Inc	15.35%
Alphabet Inc	11.64%

Bloomberg Top 10 Momentum Quantum Computing Index	2.79%	N/A	-1.91%	N/A	N/A

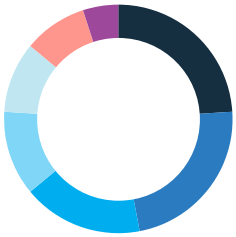

Fund inception date: 8/18/2026. ***The performance data quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than the original cost. Current performance may be lower or higher than the performance quoted. For most recent month end performance, visit AmplifyETFs.com/XQBT.*** *Brokerage commissions will reduce returns. NAV is the sum of all its assets less any liabilities, divided by the number of shares outstanding. The closing price is the last price at which the fund traded. Indexes are unmanaged and it's not possible to invest directly in an index. Bloomberg Top 10 Momentum Quantum Computing Index is constructed to track the performance of companies exposed to quantum hardware and systems, including the top 10 companies that are part of the quantum computer ecosystem, utilizing data from Bloomberg Intelligence.*

Carefully consider the Fund's investment objectives, risks, charges, and expenses before investing. This and other information can be found in the Fund's statutory and summary prospectuses, which may be obtained at AmplifyETFs.com. Read the prospectus carefully before investing.

Investing involves risk, including possible loss of principal. There can be no assurance that a Fund will achieve its investment objective. ETF shares are bought and sold at market price and may trade at a premium or discount to NAV. Brokerage commissions will reduce returns. The Fund's active management strategy may not achieve its intended results and could cause the Fund to underperform other investments or experience losses. The Fund is not an index fund and does not seek to track or replicate the Index. The Fund is non-diversified, invests in a limited number of issuers, and may be more volatile than diversified funds. Companies involved in quantum computing and related technologies operate in rapidly evolving markets and may be adversely affected by technological change, competition, regulatory developments, commercialization challenges, supply chain disruptions, and changing investor sentiment. The Fund may invest in foreign securities, including emerging markets, which are subject to additional political, economic, currency, and liquidity risks. The use of derivatives and swap agreements may increase volatility.
