AMPLIFY ETFs™

ROBX

Automating The Real World

ROBOTICS ADOPTION MAY BE WIDESPREAD. MARKET LEADERSHIP OFTEN ISN'T.

The Amplify Top 10™ Robotics ETF (ROBX) focuses on market leaders across the robotics ecosystem from industrial automation and warehouse logistics to surgical robotics and next-generation intelligent machines. While market segments may contain dozens of companies, growth and performance are often driven by a much smaller group. As opportunity develops across the robotics economy, ROBX provides concentrated, high-conviction exposure to a select group of companies positioned at the center of this evolving market.

Company		Description	Weighting (%)
SUPCON	SUPCON Technology Co Ltd	Intelligent automation systems helping modernize industrial operations.	13.46%
绿的谐波 leaderdrive®	Leader Harmonious Drive Systems Co Ltd	Precision motion technology that helps robots move with accuracy and efficiency.	11.30%
THK	THK Co Ltd	Precision motion-control components enabling advanced industrial automation systems.	10.76%
COGNEX	Cognex Corp	Machine vision technology helping automate inspection and manufacturing processes.	10.52%
TERADYNE	Teradyne Inc	Collaborative robots helping businesses automate repetitive tasks.	9.70%
Panasonic	Panasonic Holdings Corp	Automation and robotics technologies supporting smarter manufacturing.	9.51%
HARMONIC DRIVE	Harmonic Drive Systems Inc	Critical motion-control technology powering advanced robotic applications.	9.29%
FUJI	Fuji Corp/Aichi	Robotic assembly solutions used throughout electronics production.	8.68%
CKD	CKD Corp	Automation components that help keep advanced manufacturing moving.	7.62%
DAIHEN	Daihen Corp	Industrial welding and robotic automation solutions for modern factories.	7.19%

Fund holdings as of 8/19/2026 and are subject to change at any time and should not be considered recommendations to buy or sell any security. Weighting reflects stock position and/or position held via total return swaps.

Why A Top 10 Approach To Robotics?

Focused exposure to companies driving innovation and adoption of robotics and intelligent automation.

Focus On Market Leaders

The companies at the center of automation. Robotics adoption may be driven by a smaller group of companies developing the technologies, components, and systems that power automation across industries.

Not A Single-stock Bet

Multiple potential winners. One portfolio. Gain exposure across industrial robots, motion control, automation systems, and robotic applications without relying on a single company.

Less Dilution

More of the theme. Less of the noise. A concentrated portfolio may help reduce exposure to companies with less direct ties to the robotics and automation opportunity.

ROBX focuses on market leaders across the robotics ecosystem—from industrial automation and motion control to warehouse, logistics, and surgical robotics. The Fund generally invests in companies included in the Bloomberg Top 10 Momentum Robotics Index, along with other robotic-related businesses identified by the portfolio management team.

Amplify Top 10™ ETF Difference

Focus on the Companies Driving Opportunities: Amplify Top 10™ ETFs are designed to cut through the noise by focusing on high-conviction companies driving opportunity within a specific market segment.

- Focus on market leaders
- Concentrated exposure without owning just one stock
- Transparent portfolio construction
- Less dilution from hundreds of peripheral holdings
- Designed for markets where leadership narrows

Carefully consider the Fund's investment objectives, risk factors, charges, and expenses before investing. This and additional information can be found in Amplify Funds statutory and summary prospectus, which may be obtained by at AmplifyETFs.com. Read the prospectus carefully before investing.

Investing involves risk, including possible loss of principal. There can be no assurance that a Fund will achieve its investment objective. ETF shares are bought and sold at market price and may trade at a premium or discount to NAV. Brokerage commissions will reduce returns. The Fund's active management strategy may not achieve its intended results and could cause the Fund to underperform other investments or experience losses. The Fund is not an index fund and does not seek to track or replicate the Index. The Fund is non-diversified, invests in a limited number of issuers, and may be more volatile than diversified funds. Robotics companies may be affected by rapid technological change, competitive pressures, supply chain disruptions, regulatory developments, and shifts in automation spending, which may result in greater volatility than the broader market. The Fund may invest in foreign securities, including emerging markets, which are subject to additional political, economic, currency, and liquidity risks. The use of derivatives and swap agreements may increase volatility.

The Bloomberg Top 10 Momentum Robotics Index is constructed to track the performance of companies focusing on factory, logistics, warehouse and surgical robotics automation, including the top 10 companies that are part of the robotics ecosystem, utilizing data from Bloomberg Intelligence.

Investment Adviser: Amplify Investments LLC; Sub-Adviser: Samsung Asset Management. Amplify ETFs are distributed by Foreside Fund Services, LLC.
