

FROM PRIORITIES TO PORTFOLIOS

U.S. Priorities Aligned with ETF Strategies

The U.S. government has indicated several strategic priorities in response to today's evolving geopolitical landscape—ranging from national security and energy independence to technological innovation and supply chain resilience. Many of these themes are investable through Amplify ETFs, offering advisors and investors targeted exposure to sectors poised for long-term relevance.

Administration Priorities

Carefully consider the Fund's investment objectives, risks, charges, and expenses before investing. This and other information can be found in the Fund's statutory and summary prospectuses, which may be obtained at AmplifyETFs.com. Read the prospectus carefully before investing.

Investing involves risk, including the possible loss of principal. Shares of any ETF are bought and sold

at market price (not NAV), may trade at a discount or premium to NAV and are not individually redeemed from the Fund. Brokerage commissions will reduce returns.

Narrowly focused investments are typically more volatile and riskier than broadly diversified portfolios.

Funds that include covered calls include the risk that the Fund will forgo, during the option's life, the opportunity to profit from increases in the market value of the security covering the call option above the sum of the premium and the strike price of the

call, but has retained the risk of loss should the price of the underlying security decline.

Exposure to cryptocurrencies, such as Bitcoin and Ethereum, is highly speculative and may be subject to extreme volatility and risk of total loss. Investors should be prepared to lose their entire investment. The regulatory and tax treatment of digital assets and cryptocurrencies is uncertain and evolving.
