XQBT

Building the Quantum Future

QUANTUM INNOVATION EXTENDS BEYOND A SINGLE STOCK

The Amplify Top 10™ Quantum ETF (XQBT) focuses on market leaders across the quantum computing ecosystem—from hardware and testing to cloud platforms, infrastructure, and advanced manufacturing. While market segments may contain dozens or even hundreds of companies, growth and performance are often driven by a much smaller group. As leadership emerges across the quantum ecosystem, XQBT provides concentrated, high-conviction exposure to a select group of companies positioned at the center of this evolving technology opportunity.

Company		Description	Weighting (%)
KEYSIGHT	Keysight Technologies Inc	Testing and measurement solutions for advanced technologies.	15.13%
IONQ	IonQ Inc	Trapped-ion quantum computing developer.	14.56%
Alphabet	Alphabet Inc	Quantum research and cloud-based quantum computing.	10.88%
amazon	Amazon.com Inc	Cloud infrastructure and quantum access through AWS.	10.27%
D:WAVE	D-Wave Quantum Inc	Commercial quantum computing systems and software.	9.50%
QCi QUANTUM COMPUTING INC	Quantum Computing Inc	Quantum computing solutions advancing complex optimization and processing capabilities.	8.25%
Quanta Computer	Quanta Computer Inc	Computing and data center hardware supporting next-generation technologies.	8.19%
rigetti	Rigetti Computing Inc	Quantum processors and cloud quantum services.	7.78%
FOXCONN HON HAI TECHNOLOGY GROUP	Hon Hai Precision Industry Co Ltd	Advanced electronics manufacturing and technology infrastructure.	6.23%
QUANTINUUM	Quantinuum Inc.	Quantum computing solutions advancing next-generation computing capabilities.	4.88%

Fund holdings as of 8/19/2026 and are subject to change at any time and should not be considered recommendations to buy or sell any security. Weighting reflects stock position and/or position held via total return swaps.

Why A Top 10 Approach To Quantum?

Focused exposure to companies driving innovation across an emerging technology ecosystem.

Focus On Market Leaders

The companies at the center of the opportunity. Quantum computing advances may be driven by a smaller group of companies positioned at the center of the ecosystem.

Not A Single-stock Bet

Multiple potential winners. One portfolio. Gain exposure across multiple companies rather than relying on a single company outcome.

Less Dilution

More of the theme. Less of the noise. A concentrated portfolio may help reduce exposure to peripheral holdings that are less central to the opportunity.

XQBT provides actively managed exposure to companies participating in the quantum computing ecosystem. The Fund generally invests in companies included in the Bloomberg Top 10 Momentum Quantum Computing Index, along with other quantum-related businesses identified by the portfolio management team.

Amplify Top 10™ ETF Difference

Focus on the Companies Driving Opportunities: Amplify Top 10™ ETFs are designed to cut through the noise by focusing on high-conviction companies driving opportunity within a specific market segment.

- Focus on market leaders
- Concentrated exposure without owning just one stock
- Transparent portfolio construction
- Less dilution from hundreds of peripheral holdings
- Designed for markets where leadership narrows

Carefully consider the Fund's investment objectives, risk factors, charges, and expenses before investing. This and additional information can be found in Amplify Funds statutory and summary prospectus, which may be obtained by at AmplifyETFs.com. Read the prospectus carefully before investing.

Investing involves risk, including possible loss of principal. There can be no assurance that a Fund will achieve its investment objective. ETF shares are bought and sold at market price and may trade at a premium or discount to NAV. Brokerage commissions will reduce returns. The Fund's active management strategy may not achieve its intended results and could cause the Fund to underperform other investments or experience losses. The Fund is not an index fund and does not seek to track or replicate the Index. The Fund is non-diversified, invests in a limited number of issuers, and may be more volatile than diversified funds. Companies involved in quantum computing and related technologies operate in rapidly evolving markets and may be adversely affected by technological change, competition, regulatory developments, commercialization challenges, supply chain disruptions, and changing investor sentiment. The Fund may invest in foreign securities, including emerging markets, which are subject to additional political, economic, currency, and liquidity risks. The use of derivatives and swap agreements may increase volatility.

The Bloomberg Top 10 Momentum Quantum Computing Index is constructed to track the performance of companies exposed to quantum hardware and systems, including the top 10 companies that are part of the quantum computer ecosystem, utilizing data from Bloomberg Intelligence.

Investment Adviser: Amplify Investments LLC; Sub-Adviser: Samsung Asset Management. Amplify ETFs are distributed by Foreside Fund Services, LLC.
